HLA-C*07:748:01 Protein Expression Plasmid Vector	PHLAP92525424	Plasmid vector containing HLA-C*07:748:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:748:01 protein. This plasmid can be used for constructing HLA-C*07:748:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:748:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:748:02 Protein Expression Plasmid Vector	PHLAP92525425	Plasmid vector containing HLA-C*07:748:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:748:02 protein. This plasmid can be used for constructing HLA-C*07:748:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:748:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:749N Protein Expression Plasmid Vector	PHLAP92525426	Plasmid vector containing HLA-C*07:749N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:749N protein. This plasmid can be used for constructing HLA-C*07:749N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:749N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:75 Protein Expression Plasmid Vector	PHLAP92525427	Plasmid vector containing HLA-C*07:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:75 protein. This plasmid can be used for constructing HLA-C*07:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:750N Protein Expression Plasmid Vector	PHLAP92525428	Plasmid vector containing HLA-C*07:750N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:750N protein. This plasmid can be used for constructing HLA-C*07:750N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:750N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:751N Protein Expression Plasmid Vector	PHLAP92525429	Plasmid vector containing HLA-C*07:751N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:751N protein. This plasmid can be used for constructing HLA-C*07:751N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:751N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:752N Protein Expression Plasmid Vector	PHLAP92525430	Plasmid vector containing HLA-C*07:752N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:752N protein. This plasmid can be used for constructing HLA-C*07:752N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:752N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:753N Protein Expression Plasmid Vector	PHLAP92525431	Plasmid vector containing HLA-C*07:753N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:753N protein. This plasmid can be used for constructing HLA-C*07:753N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:753N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:754N Protein Expression Plasmid Vector	PHLAP92525432	Plasmid vector containing HLA-C*07:754N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:754N protein. This plasmid can be used for constructing HLA-C*07:754N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:754N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:755 Protein Expression Plasmid Vector	PHLAP92525433	Plasmid vector containing HLA-C*07:755 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:755 protein. This plasmid can be used for constructing HLA-C*07:755 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:755 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:756 Protein Expression Plasmid Vector	PHLAP92525434	Plasmid vector containing HLA-C*07:756 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:756 protein. This plasmid can be used for constructing HLA-C*07:756 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:756 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:757 Protein Expression Plasmid Vector	PHLAP92525435	Plasmid vector containing HLA-C*07:757 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:757 protein. This plasmid can be used for constructing HLA-C*07:757 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:757 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:758 Protein Expression Plasmid Vector	PHLAP92525436	Plasmid vector containing HLA-C*07:758 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:758 protein. This plasmid can be used for constructing HLA-C*07:758 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:758 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:759 Protein Expression Plasmid Vector	PHLAP92525437	Plasmid vector containing HLA-C*07:759 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:759 protein. This plasmid can be used for constructing HLA-C*07:759 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:759 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:76:01 Protein Expression Plasmid Vector	PHLAP92525438	Plasmid vector containing HLA-C*07:76:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:76:01 protein. This plasmid can be used for constructing HLA-C*07:76:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:76:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:76:02 Protein Expression Plasmid Vector	PHLAP92525439	Plasmid vector containing HLA-C*07:76:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:76:02 protein. This plasmid can be used for constructing HLA-C*07:76:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:76:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:760 Protein Expression Plasmid Vector	PHLAP92525440	Plasmid vector containing HLA-C*07:760 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:760 protein. This plasmid can be used for constructing HLA-C*07:760 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:760 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:761 Protein Expression Plasmid Vector	PHLAP92525441	Plasmid vector containing HLA-C*07:761 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:761 protein. This plasmid can be used for constructing HLA-C*07:761 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:761 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:762 Protein Expression Plasmid Vector	PHLAP92525442	Plasmid vector containing HLA-C*07:762 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:762 protein. This plasmid can be used for constructing HLA-C*07:762 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:762 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:763 Protein Expression Plasmid Vector	PHLAP92525443	Plasmid vector containing HLA-C*07:763 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:763 protein. This plasmid can be used for constructing HLA-C*07:763 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:763 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:764 Protein Expression Plasmid Vector	PHLAP92525444	Plasmid vector containing HLA-C*07:764 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:764 protein. This plasmid can be used for constructing HLA-C*07:764 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:764 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:765 Protein Expression Plasmid Vector	PHLAP92525445	Plasmid vector containing HLA-C*07:765 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:765 protein. This plasmid can be used for constructing HLA-C*07:765 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:765 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:766 Protein Expression Plasmid Vector	PHLAP92525446	Plasmid vector containing HLA-C*07:766 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:766 protein. This plasmid can be used for constructing HLA-C*07:766 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:766 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:767 Protein Expression Plasmid Vector	PHLAP92525447	Plasmid vector containing HLA-C*07:767 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:767 protein. This plasmid can be used for constructing HLA-C*07:767 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:767 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:768 Protein Expression Plasmid Vector	PHLAP92525448	Plasmid vector containing HLA-C*07:768 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:768 protein. This plasmid can be used for constructing HLA-C*07:768 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:768 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:769 Protein Expression Plasmid Vector	PHLAP92525449	Plasmid vector containing HLA-C*07:769 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:769 protein. This plasmid can be used for constructing HLA-C*07:769 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:769 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:77 Protein Expression Plasmid Vector	PHLAP925254500	Plasmid vector containing HLA-C*07:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:77 protein. This plasmid can be used for constructing HLA-C*07:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:770N Protein Expression Plasmid Vector	PHLAP925254501	Plasmid vector containing HLA-C*07:770N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:770N protein. This plasmid can be used for constructing HLA-C*07:770N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:770N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:771 Protein Expression Plasmid Vector	PHLAP925254502	Plasmid vector containing HLA-C*07:771 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:771 protein. This plasmid can be used for constructing HLA-C*07:771 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:771 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:772 Protein Expression Plasmid Vector	PHLAP92525453	Plasmid vector containing HLA-C*07:772 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:772 protein. This plasmid can be used for constructing HLA-C*07:772 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:772 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:773N Protein Expression Plasmid Vector	PHLAP92525454	Plasmid vector containing HLA-C*07:773N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:773N protein. This plasmid can be used for constructing HLA-C*07:773N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:773N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:774 Protein Expression Plasmid Vector	PHLAP92525455	Plasmid vector containing HLA-C*07:774 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:774 protein. This plasmid can be used for constructing HLA-C*07:774 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:774 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:775 Protein Expression Plasmid Vector	PHLAP92525456	Plasmid vector containing HLA-C*07:775 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:775 protein. This plasmid can be used for constructing HLA-C*07:775 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:775 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:776N Protein Expression Plasmid Vector	PHLAP92525457	Plasmid vector containing HLA-C*07:776N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:776N protein. This plasmid can be used for constructing HLA-C*07:776N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:776N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:777 Protein Expression Plasmid Vector	PHLAP92525458	Plasmid vector containing HLA-C*07:777 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:777 protein. This plasmid can be used for constructing HLA-C*07:777 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:777 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:778 Protein Expression Plasmid Vector	PHLAP92525459	Plasmid vector containing HLA-C*07:778 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:778 protein. This plasmid can be used for constructing HLA-C*07:778 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:778 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:779:01:01 Protein Expression Plasmid Vector	PHLAP92525460	Plasmid vector containing HLA-C*07:779:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:779:01:01 protein. This plasmid can be used for constructing HLA-C*07:779:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:779:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:779:01:02 Protein Expression Plasmid Vector	PHLAP92525461	Plasmid vector containing HLA-C*07:779:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:779:01:02 protein. This plasmid can be used for constructing HLA-C*07:779:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:779:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:78:01 Protein Expression Plasmid Vector	PHLAP92525462	Plasmid vector containing HLA-C*07:78:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:78:01 protein. This plasmid can be used for constructing HLA-C*07:78:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:78:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:78:02 Protein Expression Plasmid Vector	PHLAP92525463	Plasmid vector containing HLA-C*07:78:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:78:02 protein. This plasmid can be used for constructing HLA-C*07:78:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:78:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:780 Protein Expression Plasmid Vector	PHLAP92525464	Plasmid vector containing HLA-C*07:780 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:780 protein. This plasmid can be used for constructing HLA-C*07:780 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:780 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:781 Protein Expression Plasmid Vector	PHLAP92525465	Plasmid vector containing HLA-C*07:781 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:781 protein. This plasmid can be used for constructing HLA-C*07:781 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:781 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:782 Protein Expression Plasmid Vector	PHLAP92525466	Plasmid vector containing HLA-C*07:782 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:782 protein. This plasmid can be used for constructing HLA-C*07:782 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:782 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:783 Protein Expression Plasmid Vector	PHLAP92525467	Plasmid vector containing HLA-C*07:783 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:783 protein. This plasmid can be used for constructing HLA-C*07:783 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:783 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:784 Protein Expression Plasmid Vector	PHLAP92525468	Plasmid vector containing HLA-C*07:784 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:784 protein. This plasmid can be used for constructing HLA-C*07:784 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:784 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:785 Protein Expression Plasmid Vector	PHLAP92525469	Plasmid vector containing HLA-C*07:785 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:785 protein. This plasmid can be used for constructing HLA-C*07:785 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:785 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:786 Protein Expression Plasmid Vector	PHLAP92525470	Plasmid vector containing HLA-C*07:786 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:786 protein. This plasmid can be used for constructing HLA-C*07:786 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:786 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:787N Protein Expression Plasmid Vector	PHLAP92525471	Plasmid vector containing HLA-C*07:787N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:787N protein. This plasmid can be used for constructing HLA-C*07:787N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:787N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:788 Protein Expression Plasmid Vector	PHLAP92525472	Plasmid vector containing HLA-C*07:788 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:788 protein. This plasmid can be used for constructing HLA-C*07:788 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:788 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:789 Protein Expression Plasmid Vector	PHLAP92525473	Plasmid vector containing HLA-C*07:789 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:789 protein. This plasmid can be used for constructing HLA-C*07:789 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:789 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:79 Protein Expression Plasmid Vector	PHLAP92525474	Plasmid vector containing HLA-C*07:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:79 protein. This plasmid can be used for constructing HLA-C*07:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:790 Protein Expression Plasmid Vector	PHLAP92525475	Plasmid vector containing HLA-C*07:790 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:790 protein. This plasmid can be used for constructing HLA-C*07:790 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:790 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:791 Protein Expression Plasmid Vector	PHLAP92525476	Plasmid vector containing HLA-C*07:791 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:791 protein. This plasmid can be used for constructing HLA-C*07:791 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:791 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:792 Protein Expression Plasmid Vector	PHLAP92525477	Plasmid vector containing HLA-C*07:792 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:792 protein. This plasmid can be used for constructing HLA-C*07:792 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:792 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:793 Protein Expression Plasmid Vector	PHLAP92525478	Plasmid vector containing HLA-C*07:793 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:793 protein. This plasmid can be used for constructing HLA-C*07:793 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:793 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:794 Protein Expression Plasmid Vector	PHLAP92525479	Plasmid vector containing HLA-C*07:794 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:794 protein. This plasmid can be used for constructing HLA-C*07:794 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:794 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:795 Protein Expression Plasmid Vector	PHLAP92525480	Plasmid vector containing HLA-C*07:795 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:795 protein. This plasmid can be used for constructing HLA-C*07:795 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:795 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:796N Protein Expression Plasmid Vector	PHLAP92525481	Plasmid vector containing HLA-C*07:796N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:796N protein. This plasmid can be used for constructing HLA-C*07:796N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:796N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:797N Protein Expression Plasmid Vector	PHLAP92525482	Plasmid vector containing HLA-C*07:797N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:797N protein. This plasmid can be used for constructing HLA-C*07:797N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:797N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:798 Protein Expression Plasmid Vector	PHLAP92525483	Plasmid vector containing HLA-C*07:798 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:798 protein. This plasmid can be used for constructing HLA-C*07:798 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:798 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:799 Protein Expression Plasmid Vector	PHLAP92525484	Plasmid vector containing HLA-C*07:799 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:799 protein. This plasmid can be used for constructing HLA-C*07:799 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:799 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:80 Protein Expression Plasmid Vector	PHLAP92525485	Plasmid vector containing HLA-C*07:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:80 protein. This plasmid can be used for constructing HLA-C*07:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:800 Protein Expression Plasmid Vector	PHLAP92525486	Plasmid vector containing HLA-C*07:800 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:800 protein. This plasmid can be used for constructing HLA-C*07:800 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:800 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:801 Protein Expression Plasmid Vector	PHLAP92525487	Plasmid vector containing HLA-C*07:801 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:801 protein. This plasmid can be used for constructing HLA-C*07:801 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:801 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:802 Protein Expression Plasmid Vector	PHLAP92525488	Plasmid vector containing HLA-C*07:802 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:802 protein. This plasmid can be used for constructing HLA-C*07:802 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:802 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:803 Protein Expression Plasmid Vector	PHLAP92525489	Plasmid vector containing HLA-C*07:803 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:803 protein. This plasmid can be used for constructing HLA-C*07:803 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:803 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:804N Protein Expression Plasmid Vector	PHLAP92525490	Plasmid vector containing HLA-C*07:804N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:804N protein. This plasmid can be used for constructing HLA-C*07:804N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:804N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:805 Protein Expression Plasmid Vector	PHLAP92525491	Plasmid vector containing HLA-C*07:805 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:805 protein. This plasmid can be used for constructing HLA-C*07:805 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:805 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:806 Protein Expression Plasmid Vector	PHLAP92525492	Plasmid vector containing HLA-C*07:806 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:806 protein. This plasmid can be used for constructing HLA-C*07:806 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:806 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:807N Protein Expression Plasmid Vector	PHLAP92525493	Plasmid vector containing HLA-C*07:807N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:807N protein. This plasmid can be used for constructing HLA-C*07:807N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:807N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:808 Protein Expression Plasmid Vector	PHLAP92525494	Plasmid vector containing HLA-C*07:808 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:808 protein. This plasmid can be used for constructing HLA-C*07:808 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:808 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:809 Protein Expression Plasmid Vector	PHLAP92525495	Plasmid vector containing HLA-C*07:809 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:809 protein. This plasmid can be used for constructing HLA-C*07:809 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:809 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:81 Protein Expression Plasmid Vector	PHLAP92525496	Plasmid vector containing HLA-C*07:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:81 protein. This plasmid can be used for constructing HLA-C*07:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:810 Protein Expression Plasmid Vector	PHLAP92525497	Plasmid vector containing HLA-C*07:810 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:810 protein. This plasmid can be used for constructing HLA-C*07:810 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:810 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:811 Protein Expression Plasmid Vector	PHLAP92525498	Plasmid vector containing HLA-C*07:811 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:811 protein. This plasmid can be used for constructing HLA-C*07:811 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:811 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:812 Protein Expression Plasmid Vector	PHLAP92525499	Plasmid vector containing HLA-C*07:812 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:812 protein. This plasmid can be used for constructing HLA-C*07:812 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:812 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:813 Protein Expression Plasmid Vector	PHLAP925255000	Plasmid vector containing HLA-C*07:813 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:813 protein. This plasmid can be used for constructing HLA-C*07:813 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:813 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:814 Protein Expression Plasmid Vector	PHLAP92525501	Plasmid vector containing HLA-C*07:814 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:814 protein. This plasmid can be used for constructing HLA-C*07:814 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:814 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:815 Protein Expression Plasmid Vector	PHLAP92525502	Plasmid vector containing HLA-C*07:815 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:815 protein. This plasmid can be used for constructing HLA-C*07:815 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:815 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:816 Protein Expression Plasmid Vector	PHLAP92525503	Plasmid vector containing HLA-C*07:816 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:816 protein. This plasmid can be used for constructing HLA-C*07:816 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:816 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:817 Protein Expression Plasmid Vector	PHLAP92525504	Plasmid vector containing HLA-C*07:817 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:817 protein. This plasmid can be used for constructing HLA-C*07:817 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:817 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:818 Protein Expression Plasmid Vector	PHLAP92525505	Plasmid vector containing HLA-C*07:818 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:818 protein. This plasmid can be used for constructing HLA-C*07:818 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:818 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:819Q Protein Expression Plasmid Vector	PHLAP92525506	Plasmid vector containing HLA-C*07:819Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:819Q protein. This plasmid can be used for constructing HLA-C*07:819Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:819Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:82 Protein Expression Plasmid Vector	PHLAP92525507	Plasmid vector containing HLA-C*07:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:82 protein. This plasmid can be used for constructing HLA-C*07:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:820N Protein Expression Plasmid Vector	PHLAP92525508	Plasmid vector containing HLA-C*07:820N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:820N protein. This plasmid can be used for constructing HLA-C*07:820N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:820N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:821N Protein Expression Plasmid Vector	PHLAP92525509	Plasmid vector containing HLA-C*07:821N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:821N protein. This plasmid can be used for constructing HLA-C*07:821N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:821N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:822 Protein Expression Plasmid Vector	PHLAP925255110	Plasmid vector containing HLA-C*07:822 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:822 protein. This plasmid can be used for constructing HLA-C*07:822 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:822 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:823 Protein Expression Plasmid Vector	PHLAP925255111	Plasmid vector containing HLA-C*07:823 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:823 protein. This plasmid can be used for constructing HLA-C*07:823 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:823 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:824 Protein Expression Plasmid Vector	PHLAP925255112	Plasmid vector containing HLA-C*07:824 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:824 protein. This plasmid can be used for constructing HLA-C*07:824 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:824 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:825 Protein Expression Plasmid Vector	PHLAP925255113	Plasmid vector containing HLA-C*07:825 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:825 protein. This plasmid can be used for constructing HLA-C*07:825 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:825 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:826 Protein Expression Plasmid Vector	PHLAP925255114	Plasmid vector containing HLA-C*07:826 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:826 protein. This plasmid can be used for constructing HLA-C*07:826 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:826 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:827 Protein Expression Plasmid Vector	PHLAP925255115	Plasmid vector containing HLA-C*07:827 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:827 protein. This plasmid can be used for constructing HLA-C*07:827 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:827 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:828 Protein Expression Plasmid Vector	PHLAP925255116	Plasmid vector containing HLA-C*07:828 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:828 protein. This plasmid can be used for constructing HLA-C*07:828 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:828 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:829 Protein Expression Plasmid Vector	PHLAP92525517	Plasmid vector containing HLA-C*07:829 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:829 protein. This plasmid can be used for constructing HLA-C*07:829 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:829 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:83 Protein Expression Plasmid Vector	PHLAP92525518	Plasmid vector containing HLA-C*07:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:83 protein. This plasmid can be used for constructing HLA-C*07:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:830 Protein Expression Plasmid Vector	PHLAP92525519	Plasmid vector containing HLA-C*07:830 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:830 protein. This plasmid can be used for constructing HLA-C*07:830 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:830 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:831 Protein Expression Plasmid Vector	PHLAP925255220	Plasmid vector containing HLA-C*07:831 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:831 protein. This plasmid can be used for constructing HLA-C*07:831 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:831 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:832 Protein Expression Plasmid Vector	PHLAP925255221	Plasmid vector containing HLA-C*07:832 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:832 protein. This plasmid can be used for constructing HLA-C*07:832 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:832 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:833N Protein Expression Plasmid Vector	PHLAP925255222	Plasmid vector containing HLA-C*07:833N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:833N protein. This plasmid can be used for constructing HLA-C*07:833N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:833N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:834 Protein Expression Plasmid Vector	PHLAP925255223	Plasmid vector containing HLA-C*07:834 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:834 protein. This plasmid can be used for constructing HLA-C*07:834 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:834 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:835 Protein Expression Plasmid Vector	PHLAP925255224	Plasmid vector containing HLA-C*07:835 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:835 protein. This plasmid can be used for constructing HLA-C*07:835 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:835 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:836 Protein Expression Plasmid Vector	PHLAP92525525	Plasmid vector containing HLA-C*07:836 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:836 protein. This plasmid can be used for constructing HLA-C*07:836 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:836 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:837 Protein Expression Plasmid Vector	PHLAP92525526	Plasmid vector containing HLA-C*07:837 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:837 protein. This plasmid can be used for constructing HLA-C*07:837 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:837 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:838 Protein Expression Plasmid Vector	PHLAP92525527	Plasmid vector containing HLA-C*07:838 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:838 protein. This plasmid can be used for constructing HLA-C*07:838 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:838 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:839N Protein Expression Plasmid Vector	PHLAP92525528	Plasmid vector containing HLA-C*07:839N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:839N protein. This plasmid can be used for constructing HLA-C*07:839N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:839N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:84 Protein Expression Plasmid Vector	PHLAP92525529	Plasmid vector containing HLA-C*07:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:84 protein. This plasmid can be used for constructing HLA-C*07:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:840N Protein Expression Plasmid Vector	PHLAP92525530	Plasmid vector containing HLA-C*07:840N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:840N protein. This plasmid can be used for constructing HLA-C*07:840N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:840N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:841 Protein Expression Plasmid Vector	PHLAP92525531	Plasmid vector containing HLA-C*07:841 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:841 protein. This plasmid can be used for constructing HLA-C*07:841 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:841 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:842 Protein Expression Plasmid Vector	PHLAP92525532	Plasmid vector containing HLA-C*07:842 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:842 protein. This plasmid can be used for constructing HLA-C*07:842 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:842 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:843 Protein Expression Plasmid Vector	PHLAP92525533	Plasmid vector containing HLA-C*07:843 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:843 protein. This plasmid can be used for constructing HLA-C*07:843 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:843 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:844 Protein Expression Plasmid Vector	PHLAP92525534	Plasmid vector containing HLA-C*07:844 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:844 protein. This plasmid can be used for constructing HLA-C*07:844 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:844 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:845 Protein Expression Plasmid Vector	PHLAP92525535	Plasmid vector containing HLA-C*07:845 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:845 protein. This plasmid can be used for constructing HLA-C*07:845 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:845 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:846:01 Protein Expression Plasmid Vector	PHLAP92525536	Plasmid vector containing HLA-C*07:846:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:846:01 protein. This plasmid can be used for constructing HLA-C*07:846:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:846:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:846:02 Protein Expression Plasmid Vector	PHLAP92525537	Plasmid vector containing HLA-C*07:846:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:846:02 protein. This plasmid can be used for constructing HLA-C*07:846:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:846:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:847 Protein Expression Plasmid Vector	PHLAP92525538	Plasmid vector containing HLA-C*07:847 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:847 protein. This plasmid can be used for constructing HLA-C*07:847 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:847 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:848 Protein Expression Plasmid Vector	PHLAP92525539	Plasmid vector containing HLA-C*07:848 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:848 protein. This plasmid can be used for constructing HLA-C*07:848 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:848 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:849N Protein Expression Plasmid Vector	PHLAP92525540	Plasmid vector containing HLA-C*07:849N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:849N protein. This plasmid can be used for constructing HLA-C*07:849N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:849N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:85 Protein Expression Plasmid Vector	PHLAP92525541	Plasmid vector containing HLA-C*07:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:85 protein. This plasmid can be used for constructing HLA-C*07:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:850 Protein Expression Plasmid Vector	PHLAP92525542	Plasmid vector containing HLA-C*07:850 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:850 protein. This plasmid can be used for constructing HLA-C*07:850 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:850 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:851 Protein Expression Plasmid Vector	PHLAP92525543	Plasmid vector containing HLA-C*07:851 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:851 protein. This plasmid can be used for constructing HLA-C*07:851 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:851 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:852 Protein Expression Plasmid Vector	PHLAP92525544	Plasmid vector containing HLA-C*07:852 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:852 protein. This plasmid can be used for constructing HLA-C*07:852 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:852 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:853 Protein Expression Plasmid Vector	PHLAP92525545	Plasmid vector containing HLA-C*07:853 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:853 protein. This plasmid can be used for constructing HLA-C*07:853 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:853 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:854 Protein Expression Plasmid Vector	PHLAP92525546	Plasmid vector containing HLA-C*07:854 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:854 protein. This plasmid can be used for constructing HLA-C*07:854 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:854 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:855 Protein Expression Plasmid Vector	PHLAP92525547	Plasmid vector containing HLA-C*07:855 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:855 protein. This plasmid can be used for constructing HLA-C*07:855 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:855 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:856N Protein Expression Plasmid Vector	PHLAP92525548	Plasmid vector containing HLA-C*07:856N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:856N protein. This plasmid can be used for constructing HLA-C*07:856N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:856N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:857 Protein Expression Plasmid Vector	PHLAP92525549	Plasmid vector containing HLA-C*07:857 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:857 protein. This plasmid can be used for constructing HLA-C*07:857 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:857 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:858 Protein Expression Plasmid Vector	PHLAP92525550	Plasmid vector containing HLA-C*07:858 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:858 protein. This plasmid can be used for constructing HLA-C*07:858 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:858 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:859 Protein Expression Plasmid Vector	PHLAP92525551	Plasmid vector containing HLA-C*07:859 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:859 protein. This plasmid can be used for constructing HLA-C*07:859 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:859 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:86 Protein Expression Plasmid Vector	PHLAP92525552	Plasmid vector containing HLA-C*07:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:86 protein. This plasmid can be used for constructing HLA-C*07:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:860 Protein Expression Plasmid Vector	PHLAP92525553	Plasmid vector containing HLA-C*07:860 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:860 protein. This plasmid can be used for constructing HLA-C*07:860 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:860 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:861 Protein Expression Plasmid Vector	PHLAP92525554	Plasmid vector containing HLA-C*07:861 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:861 protein. This plasmid can be used for constructing HLA-C*07:861 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:861 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:862 Protein Expression Plasmid Vector	PHLAP92525555	Plasmid vector containing HLA-C*07:862 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:862 protein. This plasmid can be used for constructing HLA-C*07:862 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:862 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:863N Protein Expression Plasmid Vector	PHLAP92525556	Plasmid vector containing HLA-C*07:863N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:863N protein. This plasmid can be used for constructing HLA-C*07:863N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:863N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:864 Protein Expression Plasmid Vector	PHLAP92525557	Plasmid vector containing HLA-C*07:864 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:864 protein. This plasmid can be used for constructing HLA-C*07:864 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:864 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:865 Protein Expression Plasmid Vector	PHLAP92525558	Plasmid vector containing HLA-C*07:865 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:865 protein. This plasmid can be used for constructing HLA-C*07:865 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:865 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:866 Protein Expression Plasmid Vector	PHLAP92525559	Plasmid vector containing HLA-C*07:866 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:866 protein. This plasmid can be used for constructing HLA-C*07:866 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:866 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:867 Protein Expression Plasmid Vector	PHLAP92525560	Plasmid vector containing HLA-C*07:867 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:867 protein. This plasmid can be used for constructing HLA-C*07:867 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:867 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:868 Protein Expression Plasmid Vector	PHLAP92525561	Plasmid vector containing HLA-C*07:868 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:868 protein. This plasmid can be used for constructing HLA-C*07:868 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:868 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:869 Protein Expression Plasmid Vector	PHLAP92525562	Plasmid vector containing HLA-C*07:869 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:869 protein. This plasmid can be used for constructing HLA-C*07:869 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:869 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:87 Protein Expression Plasmid Vector	PHLAP92525563	Plasmid vector containing HLA-C*07:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:87 protein. This plasmid can be used for constructing HLA-C*07:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:870 Protein Expression Plasmid Vector	PHLAP92525564	Plasmid vector containing HLA-C*07:870 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:870 protein. This plasmid can be used for constructing HLA-C*07:870 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:870 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:871 Protein Expression Plasmid Vector	PHLAP92525565	Plasmid vector containing HLA-C*07:871 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:871 protein. This plasmid can be used for constructing HLA-C*07:871 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:871 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:872 Protein Expression Plasmid Vector	PHLAP92525566	Plasmid vector containing HLA-C*07:872 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:872 protein. This plasmid can be used for constructing HLA-C*07:872 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:872 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:873 Protein Expression Plasmid Vector	PHLAP92525567	Plasmid vector containing HLA-C*07:873 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:873 protein. This plasmid can be used for constructing HLA-C*07:873 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:873 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:874 Protein Expression Plasmid Vector	PHLAP92525568	Plasmid vector containing HLA-C*07:874 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:874 protein. This plasmid can be used for constructing HLA-C*07:874 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:874 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:875 Protein Expression Plasmid Vector	PHLAP92525569	Plasmid vector containing HLA-C*07:875 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:875 protein. This plasmid can be used for constructing HLA-C*07:875 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:875 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:876 Protein Expression Plasmid Vector	PHLAP92525570	Plasmid vector containing HLA-C*07:876 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:876 protein. This plasmid can be used for constructing HLA-C*07:876 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:876 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:877 Protein Expression Plasmid Vector	PHLAP92525571	Plasmid vector containing HLA-C*07:877 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:877 protein. This plasmid can be used for constructing HLA-C*07:877 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:877 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:878 Protein Expression Plasmid Vector	PHLAP92525572	Plasmid vector containing HLA-C*07:878 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:878 protein. This plasmid can be used for constructing HLA-C*07:878 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:878 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:879 Protein Expression Plasmid Vector	PHLAP92525573	Plasmid vector containing HLA-C*07:879 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:879 protein. This plasmid can be used for constructing HLA-C*07:879 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:879 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:88 Protein Expression Plasmid Vector	PHLAP92525574	Plasmid vector containing HLA-C*07:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:88 protein. This plasmid can be used for constructing HLA-C*07:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:880 Protein Expression Plasmid Vector	PHLAP92525575	Plasmid vector containing HLA-C*07:880 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:880 protein. This plasmid can be used for constructing HLA-C*07:880 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:880 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:881N Protein Expression Plasmid Vector	PHLAP92525576	Plasmid vector containing HLA-C*07:881N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:881N protein. This plasmid can be used for constructing HLA-C*07:881N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:881N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:882 Protein Expression Plasmid Vector	PHLAP92525577	Plasmid vector containing HLA-C*07:882 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:882 protein. This plasmid can be used for constructing HLA-C*07:882 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:882 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:883 Protein Expression Plasmid Vector	PHLAP92525578	Plasmid vector containing HLA-C*07:883 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:883 protein. This plasmid can be used for constructing HLA-C*07:883 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:883 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:884 Protein Expression Plasmid Vector	PHLAP92525579	Plasmid vector containing HLA-C*07:884 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:884 protein. This plasmid can be used for constructing HLA-C*07:884 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:884 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:885 Protein Expression Plasmid Vector	PHLAP92525580	Plasmid vector containing HLA-C*07:885 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:885 protein. This plasmid can be used for constructing HLA-C*07:885 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:885 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:886N Protein Expression Plasmid Vector	PHLAP92525581	Plasmid vector containing HLA-C*07:886N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:886N protein. This plasmid can be used for constructing HLA-C*07:886N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:886N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:887 Protein Expression Plasmid Vector	PHLAP92525582	Plasmid vector containing HLA-C*07:887 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:887 protein. This plasmid can be used for constructing HLA-C*07:887 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:887 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:888 Protein Expression Plasmid Vector	PHLAP92525583	Plasmid vector containing HLA-C*07:888 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:888 protein. This plasmid can be used for constructing HLA-C*07:888 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:888 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:889N Protein Expression Plasmid Vector	PHLAP92525584	Plasmid vector containing HLA-C*07:889N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:889N protein. This plasmid can be used for constructing HLA-C*07:889N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:889N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:89 Protein Expression Plasmid Vector	PHLAP92525585	Plasmid vector containing HLA-C*07:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:89 protein. This plasmid can be used for constructing HLA-C*07:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:890 Protein Expression Plasmid Vector	PHLAP92525586	Plasmid vector containing HLA-C*07:890 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:890 protein. This plasmid can be used for constructing HLA-C*07:890 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:890 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:891 Protein Expression Plasmid Vector	PHLAP92525587	Plasmid vector containing HLA-C*07:891 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:891 protein. This plasmid can be used for constructing HLA-C*07:891 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:891 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:892 Protein Expression Plasmid Vector	PHLAP92525588	Plasmid vector containing HLA-C*07:892 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:892 protein. This plasmid can be used for constructing HLA-C*07:892 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:892 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:893 Protein Expression Plasmid Vector	PHLAP92525589	Plasmid vector containing HLA-C*07:893 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:893 protein. This plasmid can be used for constructing HLA-C*07:893 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:893 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:894 Protein Expression Plasmid Vector	PHLAP92525590	Plasmid vector containing HLA-C*07:894 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:894 protein. This plasmid can be used for constructing HLA-C*07:894 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:894 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:895 Protein Expression Plasmid Vector	PHLAP92525591	Plasmid vector containing HLA-C*07:895 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:895 protein. This plasmid can be used for constructing HLA-C*07:895 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:895 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:896 Protein Expression Plasmid Vector	PHLAP92525592	Plasmid vector containing HLA-C*07:896 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:896 protein. This plasmid can be used for constructing HLA-C*07:896 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:896 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:897 Protein Expression Plasmid Vector	PHLAP92525593	Plasmid vector containing HLA-C*07:897 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:897 protein. This plasmid can be used for constructing HLA-C*07:897 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:897 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:898 Protein Expression Plasmid Vector	PHLAP92525594	Plasmid vector containing HLA-C*07:898 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:898 protein. This plasmid can be used for constructing HLA-C*07:898 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:898 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:899 Protein Expression Plasmid Vector	PHLAP92525595	Plasmid vector containing HLA-C*07:899 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:899 protein. This plasmid can be used for constructing HLA-C*07:899 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:899 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:90 Protein Expression Plasmid Vector	PHLAP92525596	Plasmid vector containing HLA-C*07:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:90 protein. This plasmid can be used for constructing HLA-C*07:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:900 Protein Expression Plasmid Vector	PHLAP92525597	Plasmid vector containing HLA-C*07:900 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:900 protein. This plasmid can be used for constructing HLA-C*07:900 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:900 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:901 Protein Expression Plasmid Vector	PHLAP92525598	Plasmid vector containing HLA-C*07:901 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:901 protein. This plasmid can be used for constructing HLA-C*07:901 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:901 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:902 Protein Expression Plasmid Vector	PHLAP92525599	Plasmid vector containing HLA-C*07:902 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:902 protein. This plasmid can be used for constructing HLA-C*07:902 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:902 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:903 Protein Expression Plasmid Vector	PHLAP925256000	Plasmid vector containing HLA-C*07:903 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:903 protein. This plasmid can be used for constructing HLA-C*07:903 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:903 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:904 Protein Expression Plasmid Vector	PHLAP925256001	Plasmid vector containing HLA-C*07:904 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:904 protein. This plasmid can be used for constructing HLA-C*07:904 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:904 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:905:01:01 Protein Expression Plasmid Vector	PHLAP925256002	Plasmid vector containing HLA-C*07:905:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:905:01:01 protein. This plasmid can be used for constructing HLA-C*07:905:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:905:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:905:01:02 Protein Expression Plasmid Vector	PHLAP925256003	Plasmid vector containing HLA-C*07:905:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:905:01:02 protein. This plasmid can be used for constructing HLA-C*07:905:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:905:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:906 Protein Expression Plasmid Vector	PHLAP925256004	Plasmid vector containing HLA-C*07:906 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:906 protein. This plasmid can be used for constructing HLA-C*07:906 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:906 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:907 Protein Expression Plasmid Vector	PHLAP92525605	Plasmid vector containing HLA-C*07:907 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:907 protein. This plasmid can be used for constructing HLA-C*07:907 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:907 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:908 Protein Expression Plasmid Vector	PHLAP92525606	Plasmid vector containing HLA-C*07:908 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:908 protein. This plasmid can be used for constructing HLA-C*07:908 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:908 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:909 Protein Expression Plasmid Vector	PHLAP92525607	Plasmid vector containing HLA-C*07:909 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:909 protein. This plasmid can be used for constructing HLA-C*07:909 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:909 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:91 Protein Expression Plasmid Vector	PHLAP92525608	Plasmid vector containing HLA-C*07:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:91 protein. This plasmid can be used for constructing HLA-C*07:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:910 Protein Expression Plasmid Vector	PHLAP92525609	Plasmid vector containing HLA-C*07:910 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:910 protein. This plasmid can be used for constructing HLA-C*07:910 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:910 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:911 Protein Expression Plasmid Vector	PHLAP925256110	Plasmid vector containing HLA-C*07:911 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:911 protein. This plasmid can be used for constructing HLA-C*07:911 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:911 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:912 Protein Expression Plasmid Vector	PHLAP925256111	Plasmid vector containing HLA-C*07:912 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:912 protein. This plasmid can be used for constructing HLA-C*07:912 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:912 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:913 Protein Expression Plasmid Vector	PHLAP925256112	Plasmid vector containing HLA-C*07:913 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:913 protein. This plasmid can be used for constructing HLA-C*07:913 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:913 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:914 Protein Expression Plasmid Vector	PHLAP92525613	Plasmid vector containing HLA-C*07:914 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:914 protein. This plasmid can be used for constructing HLA-C*07:914 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:914 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:915 Protein Expression Plasmid Vector	PHLAP92525614	Plasmid vector containing HLA-C*07:915 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:915 protein. This plasmid can be used for constructing HLA-C*07:915 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:915 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:916 Protein Expression Plasmid Vector	PHLAP92525615	Plasmid vector containing HLA-C*07:916 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:916 protein. This plasmid can be used for constructing HLA-C*07:916 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:916 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:917 Protein Expression Plasmid Vector	PHLAP92525616	Plasmid vector containing HLA-C*07:917 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:917 protein. This plasmid can be used for constructing HLA-C*07:917 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:917 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:918 Protein Expression Plasmid Vector	PHLAP92525617	Plasmid vector containing HLA-C*07:918 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:918 protein. This plasmid can be used for constructing HLA-C*07:918 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:918 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:919 Protein Expression Plasmid Vector	PHLAP92525618	Plasmid vector containing HLA-C*07:919 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:919 protein. This plasmid can be used for constructing HLA-C*07:919 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:919 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:92 Protein Expression Plasmid Vector	PHLAP92525619	Plasmid vector containing HLA-C*07:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:92 protein. This plasmid can be used for constructing HLA-C*07:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:920 Protein Expression Plasmid Vector	PHLAP92525620	Plasmid vector containing HLA-C*07:920 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:920 protein. This plasmid can be used for constructing HLA-C*07:920 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:920 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:921 Protein Expression Plasmid Vector	PHLAP92525621	Plasmid vector containing HLA-C*07:921 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:921 protein. This plasmid can be used for constructing HLA-C*07:921 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:921 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:922 Protein Expression Plasmid Vector	PHLAP92525622	Plasmid vector containing HLA-C*07:922 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:922 protein. This plasmid can be used for constructing HLA-C*07:922 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:922 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:923 Protein Expression Plasmid Vector	PHLAP92525623	Plasmid vector containing HLA-C*07:923 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:923 protein. This plasmid can be used for constructing HLA-C*07:923 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:923 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:924 Protein Expression Plasmid Vector	PHLAP92525624	Plasmid vector containing HLA-C*07:924 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:924 protein. This plasmid can be used for constructing HLA-C*07:924 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:924 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:925 Protein Expression Plasmid Vector	PHLAP92525625	Plasmid vector containing HLA-C*07:925 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:925 protein. This plasmid can be used for constructing HLA-C*07:925 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:925 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:926 Protein Expression Plasmid Vector	PHLAP92525626	Plasmid vector containing HLA-C*07:926 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:926 protein. This plasmid can be used for constructing HLA-C*07:926 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:926 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:927 Protein Expression Plasmid Vector	PHLAP92525627	Plasmid vector containing HLA-C*07:927 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:927 protein. This plasmid can be used for constructing HLA-C*07:927 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:927 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:928 Protein Expression Plasmid Vector	PHLAP92525628	Plasmid vector containing HLA-C*07:928 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:928 protein. This plasmid can be used for constructing HLA-C*07:928 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:928 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:929 Protein Expression Plasmid Vector	PHLAP92525629	Plasmid vector containing HLA-C*07:929 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:929 protein. This plasmid can be used for constructing HLA-C*07:929 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:929 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:93:01 Protein Expression Plasmid Vector	PHLAP925256300	Plasmid vector containing HLA-C*07:93:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:93:01 protein. This plasmid can be used for constructing HLA-C*07:93:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:93:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:93:02 Protein Expression Plasmid Vector	PHLAP925256301	Plasmid vector containing HLA-C*07:93:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:93:02 protein. This plasmid can be used for constructing HLA-C*07:93:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:93:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:930 Protein Expression Plasmid Vector	PHLAP925256302	Plasmid vector containing HLA-C*07:930 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:930 protein. This plasmid can be used for constructing HLA-C*07:930 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:930 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:931 Protein Expression Plasmid Vector	PHLAP925256303	Plasmid vector containing HLA-C*07:931 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:931 protein. This plasmid can be used for constructing HLA-C*07:931 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:931 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:932 Protein Expression Plasmid Vector	PHLAP925256304	Plasmid vector containing HLA-C*07:932 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:932 protein. This plasmid can be used for constructing HLA-C*07:932 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:932 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:933 Protein Expression Plasmid Vector	PHLAP925256305	Plasmid vector containing HLA-C*07:933 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:933 protein. This plasmid can be used for constructing HLA-C*07:933 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:933 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:934N Protein Expression Plasmid Vector	PHLAP925256306	Plasmid vector containing HLA-C*07:934N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:934N protein. This plasmid can be used for constructing HLA-C*07:934N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:934N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:935 Protein Expression Plasmid Vector	PHLAP92525637	Plasmid vector containing HLA-C*07:935 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:935 protein. This plasmid can be used for constructing HLA-C*07:935 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:935 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:936N Protein Expression Plasmid Vector	PHLAP92525638	Plasmid vector containing HLA-C*07:936N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:936N protein. This plasmid can be used for constructing HLA-C*07:936N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:936N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:937 Protein Expression Plasmid Vector	PHLAP92525639	Plasmid vector containing HLA-C*07:937 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:937 protein. This plasmid can be used for constructing HLA-C*07:937 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:937 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:938 Protein Expression Plasmid Vector	PHLAP925256400	Plasmid vector containing HLA-C*07:938 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:938 protein. This plasmid can be used for constructing HLA-C*07:938 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:938 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:939 Protein Expression Plasmid Vector	PHLAP925256401	Plasmid vector containing HLA-C*07:939 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:939 protein. This plasmid can be used for constructing HLA-C*07:939 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:939 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:94 Protein Expression Plasmid Vector	PHLAP925256402	Plasmid vector containing HLA-C*07:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:94 protein. This plasmid can be used for constructing HLA-C*07:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:940:01 Protein Expression Plasmid Vector	PHLAP925256403	Plasmid vector containing HLA-C*07:940:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:940:01 protein. This plasmid can be used for constructing HLA-C*07:940:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:940:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:940:02 Protein Expression Plasmid Vector	PHLAP925256404	Plasmid vector containing HLA-C*07:940:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:940:02 protein. This plasmid can be used for constructing HLA-C*07:940:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:940:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:941 Protein Expression Plasmid Vector	PHLAP92525645	Plasmid vector containing HLA-C*07:941 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:941 protein. This plasmid can be used for constructing HLA-C*07:941 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:941 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:942 Protein Expression Plasmid Vector	PHLAP92525646	Plasmid vector containing HLA-C*07:942 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:942 protein. This plasmid can be used for constructing HLA-C*07:942 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:942 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:943 Protein Expression Plasmid Vector	PHLAP92525647	Plasmid vector containing HLA-C*07:943 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:943 protein. This plasmid can be used for constructing HLA-C*07:943 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:943 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:944 Protein Expression Plasmid Vector	PHLAP92525648	Plasmid vector containing HLA-C*07:944 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:944 protein. This plasmid can be used for constructing HLA-C*07:944 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:944 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:945 Protein Expression Plasmid Vector	PHLAP92525649	Plasmid vector containing HLA-C*07:945 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:945 protein. This plasmid can be used for constructing HLA-C*07:945 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:945 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:946 Protein Expression Plasmid Vector	PHLAP925256500	Plasmid vector containing HLA-C*07:946 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:946 protein. This plasmid can be used for constructing HLA-C*07:946 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:946 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:947 Protein Expression Plasmid Vector	PHLAP925256501	Plasmid vector containing HLA-C*07:947 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:947 protein. This plasmid can be used for constructing HLA-C*07:947 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:947 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:948 Protein Expression Plasmid Vector	PHLAP925256502	Plasmid vector containing HLA-C*07:948 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:948 protein. This plasmid can be used for constructing HLA-C*07:948 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:948 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:949 Protein Expression Plasmid Vector	PHLAP92525653	Plasmid vector containing HLA-C*07:949 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:949 protein. This plasmid can be used for constructing HLA-C*07:949 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:949 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:95 Protein Expression Plasmid Vector	PHLAP92525654	Plasmid vector containing HLA-C*07:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:95 protein. This plasmid can be used for constructing HLA-C*07:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:950 Protein Expression Plasmid Vector	PHLAP92525655	Plasmid vector containing HLA-C*07:950 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:950 protein. This plasmid can be used for constructing HLA-C*07:950 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:950 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:951 Protein Expression Plasmid Vector	PHLAP92525656	Plasmid vector containing HLA-C*07:951 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:951 protein. This plasmid can be used for constructing HLA-C*07:951 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:951 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:952 Protein Expression Plasmid Vector	PHLAP92525657	Plasmid vector containing HLA-C*07:952 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:952 protein. This plasmid can be used for constructing HLA-C*07:952 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:952 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:953 Protein Expression Plasmid Vector	PHLAP92525658	Plasmid vector containing HLA-C*07:953 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:953 protein. This plasmid can be used for constructing HLA-C*07:953 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:953 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:954N Protein Expression Plasmid Vector	PHLAP92525659	Plasmid vector containing HLA-C*07:954N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:954N protein. This plasmid can be used for constructing HLA-C*07:954N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:954N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:955 Protein Expression Plasmid Vector	PHLAP92525660	Plasmid vector containing HLA-C*07:955 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:955 protein. This plasmid can be used for constructing HLA-C*07:955 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:955 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:956 Protein Expression Plasmid Vector	PHLAP92525661	Plasmid vector containing HLA-C*07:956 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:956 protein. This plasmid can be used for constructing HLA-C*07:956 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:956 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:957 Protein Expression Plasmid Vector	PHLAP92525662	Plasmid vector containing HLA-C*07:957 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:957 protein. This plasmid can be used for constructing HLA-C*07:957 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:957 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:958 Protein Expression Plasmid Vector	PHLAP92525663	Plasmid vector containing HLA-C*07:958 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:958 protein. This plasmid can be used for constructing HLA-C*07:958 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:958 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:959 Protein Expression Plasmid Vector	PHLAP92525664	Plasmid vector containing HLA-C*07:959 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:959 protein. This plasmid can be used for constructing HLA-C*07:959 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:959 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:96:01 Protein Expression Plasmid Vector	PHLAP92525665	Plasmid vector containing HLA-C*07:96:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:96:01 protein. This plasmid can be used for constructing HLA-C*07:96:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:96:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:96:02 Protein Expression Plasmid Vector	PHLAP92525666	Plasmid vector containing HLA-C*07:96:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:96:02 protein. This plasmid can be used for constructing HLA-C*07:96:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:96:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:960 Protein Expression Plasmid Vector	PHLAP92525667	Plasmid vector containing HLA-C*07:960 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:960 protein. This plasmid can be used for constructing HLA-C*07:960 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:960 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:961 Protein Expression Plasmid Vector	PHLAP92525668	Plasmid vector containing HLA-C*07:961 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:961 protein. This plasmid can be used for constructing HLA-C*07:961 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:961 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:962 Protein Expression Plasmid Vector	PHLAP92525669	Plasmid vector containing HLA-C*07:962 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:962 protein. This plasmid can be used for constructing HLA-C*07:962 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:962 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:963N Protein Expression Plasmid Vector	PHLAP92525670	Plasmid vector containing HLA-C*07:963N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:963N protein. This plasmid can be used for constructing HLA-C*07:963N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:963N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:964 Protein Expression Plasmid Vector	PHLAP92525671	Plasmid vector containing HLA-C*07:964 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:964 protein. This plasmid can be used for constructing HLA-C*07:964 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:964 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:965 Protein Expression Plasmid Vector	PHLAP92525672	Plasmid vector containing HLA-C*07:965 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:965 protein. This plasmid can be used for constructing HLA-C*07:965 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:965 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:966 Protein Expression Plasmid Vector	PHLAP92525673	Plasmid vector containing HLA-C*07:966 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:966 protein. This plasmid can be used for constructing HLA-C*07:966 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:966 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:967 Protein Expression Plasmid Vector	PHLAP92525674	Plasmid vector containing HLA-C*07:967 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:967 protein. This plasmid can be used for constructing HLA-C*07:967 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:967 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:968 Protein Expression Plasmid Vector	PHLAP92525675	Plasmid vector containing HLA-C*07:968 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:968 protein. This plasmid can be used for constructing HLA-C*07:968 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:968 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:969 Protein Expression Plasmid Vector	PHLAP92525676	Plasmid vector containing HLA-C*07:969 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:969 protein. This plasmid can be used for constructing HLA-C*07:969 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:969 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:97 Protein Expression Plasmid Vector	PHLAP92525677	Plasmid vector containing HLA-C*07:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:97 protein. This plasmid can be used for constructing HLA-C*07:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:970N Protein Expression Plasmid Vector	PHLAP92525678	Plasmid vector containing HLA-C*07:970N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:970N protein. This plasmid can be used for constructing HLA-C*07:970N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:970N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:971 Protein Expression Plasmid Vector	PHLAP92525679	Plasmid vector containing HLA-C*07:971 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:971 protein. This plasmid can be used for constructing HLA-C*07:971 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:971 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:972 Protein Expression Plasmid Vector	PHLAP92525680	Plasmid vector containing HLA-C*07:972 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:972 protein. This plasmid can be used for constructing HLA-C*07:972 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:972 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:973 Protein Expression Plasmid Vector	PHLAP92525681	Plasmid vector containing HLA-C*07:973 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:973 protein. This plasmid can be used for constructing HLA-C*07:973 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:973 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:974Q Protein Expression Plasmid Vector	PHLAP92525682	Plasmid vector containing HLA-C*07:974Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:974Q protein. This plasmid can be used for constructing HLA-C*07:974Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:974Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:975:01 Protein Expression Plasmid Vector	PHLAP92525683	Plasmid vector containing HLA-C*07:975:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:975:01 protein. This plasmid can be used for constructing HLA-C*07:975:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:975:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:975:02 Protein Expression Plasmid Vector	PHLAP92525684	Plasmid vector containing HLA-C*07:975:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:975:02 protein. This plasmid can be used for constructing HLA-C*07:975:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:975:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:976 Protein Expression Plasmid Vector	PHLAP92525685	Plasmid vector containing HLA-C*07:976 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:976 protein. This plasmid can be used for constructing HLA-C*07:976 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:976 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:977 Protein Expression Plasmid Vector	PHLAP92525686	Plasmid vector containing HLA-C*07:977 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:977 protein. This plasmid can be used for constructing HLA-C*07:977 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:977 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:978 Protein Expression Plasmid Vector	PHLAP92525687	Plasmid vector containing HLA-C*07:978 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:978 protein. This plasmid can be used for constructing HLA-C*07:978 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:978 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:979 Protein Expression Plasmid Vector	PHLAP92525688	Plasmid vector containing HLA-C*07:979 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:979 protein. This plasmid can be used for constructing HLA-C*07:979 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:979 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:980 Protein Expression Plasmid Vector	PHLAP92525689	Plasmid vector containing HLA-C*07:980 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:980 protein. This plasmid can be used for constructing HLA-C*07:980 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:980 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:981N Protein Expression Plasmid Vector	PHLAP92525690	Plasmid vector containing HLA-C*07:981N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:981N protein. This plasmid can be used for constructing HLA-C*07:981N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:981N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:982 Protein Expression Plasmid Vector	PHLAP92525691	Plasmid vector containing HLA-C*07:982 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:982 protein. This plasmid can be used for constructing HLA-C*07:982 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:982 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:983 Protein Expression Plasmid Vector	PHLAP92525692	Plasmid vector containing HLA-C*07:983 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:983 protein. This plasmid can be used for constructing HLA-C*07:983 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:983 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:984N Protein Expression Plasmid Vector	PHLAP92525693	Plasmid vector containing HLA-C*07:984N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:984N protein. This plasmid can be used for constructing HLA-C*07:984N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:984N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:985:01:01 Protein Expression Plasmid Vector	PHLAP92525694	Plasmid vector containing HLA-C*07:985:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:985:01:01 protein. This plasmid can be used for constructing HLA-C*07:985:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:985:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:985:01:02Q Protein Expression Plasmid Vector	PHLAP92525695	Plasmid vector containing HLA-C*07:985:01:02Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:985:01:02Q protein. This plasmid can be used for constructing HLA-C*07:985:01:02Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:985:01:02Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:985:02 Protein Expression Plasmid Vector	PHLAP92525696	Plasmid vector containing HLA-C*07:985:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:985:02 protein. This plasmid can be used for constructing HLA-C*07:985:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:985:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:986:01 Protein Expression Plasmid Vector	PHLAP92525697	Plasmid vector containing HLA-C*07:986:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:986:01 protein. This plasmid can be used for constructing HLA-C*07:986:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:986:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:986:02 Protein Expression Plasmid Vector	PHLAP92525698	Plasmid vector containing HLA-C*07:986:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:986:02 protein. This plasmid can be used for constructing HLA-C*07:986:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:986:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:987 Protein Expression Plasmid Vector	PHLAP92525699	Plasmid vector containing HLA-C*07:987 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:987 protein. This plasmid can be used for constructing HLA-C*07:987 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:987 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:988 Protein Expression Plasmid Vector	PHLAP92525700	Plasmid vector containing HLA-C*07:988 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:988 protein. This plasmid can be used for constructing HLA-C*07:988 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:988 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:989 Protein Expression Plasmid Vector	PHLAP92525701	Plasmid vector containing HLA-C*07:989 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:989 protein. This plasmid can be used for constructing HLA-C*07:989 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:989 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:98N Protein Expression Plasmid Vector	PHLAP92525702	Plasmid vector containing HLA-C*07:98N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:98N protein. This plasmid can be used for constructing HLA-C*07:98N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:98N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:99 Protein Expression Plasmid Vector	PHLAP92525703	Plasmid vector containing HLA-C*07:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:99 protein. This plasmid can be used for constructing HLA-C*07:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:990 Protein Expression Plasmid Vector	PHLAP92525704	Plasmid vector containing HLA-C*07:990 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:990 protein. This plasmid can be used for constructing HLA-C*07:990 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:990 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:991 Protein Expression Plasmid Vector	PHLAP92525705	Plasmid vector containing HLA-C*07:991 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:991 protein. This plasmid can be used for constructing HLA-C*07:991 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:991 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:992 Protein Expression Plasmid Vector	PHLAP92525706	Plasmid vector containing HLA-C*07:992 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:992 protein. This plasmid can be used for constructing HLA-C*07:992 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:992 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:993:01 Protein Expression Plasmid Vector	PHLAP92525707	Plasmid vector containing HLA-C*07:993:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:993:01 protein. This plasmid can be used for constructing HLA-C*07:993:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:993:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*07:993:02 Protein Expression Plasmid Vector	PHLAP92525708	Plasmid vector containing HLA-C*07:993:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:993:02 protein. This plasmid can be used for constructing HLA-C*07:993:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:993:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:994 Protein Expression Plasmid Vector	PHLAP92525709	Plasmid vector containing HLA-C*07:994 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:994 protein. This plasmid can be used for constructing HLA-C*07:994 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:994 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:995 Protein Expression Plasmid Vector	PHLAP925257110	Plasmid vector containing HLA-C*07:995 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:995 protein. This plasmid can be used for constructing HLA-C*07:995 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:995 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:996 Protein Expression Plasmid Vector	PHLAP925257111	Plasmid vector containing HLA-C*07:996 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:996 protein. This plasmid can be used for constructing HLA-C*07:996 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:996 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:997 Protein Expression Plasmid Vector	PHLAP925257112	Plasmid vector containing HLA-C*07:997 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:997 protein. This plasmid can be used for constructing HLA-C*07:997 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:997 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:998 Protein Expression Plasmid Vector	PHLAP925257113	Plasmid vector containing HLA-C*07:998 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:998 protein. This plasmid can be used for constructing HLA-C*07:998 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:998 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*07:999 Protein Expression Plasmid Vector	PHLAP925257114	Plasmid vector containing HLA-C*07:999 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*07:999 protein. This plasmid can be used for constructing HLA-C*07:999 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*07:999 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:01 Protein Expression Plasmid Vector	PHLAP925257115	Plasmid vector containing HLA-C*08:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:01 protein. This plasmid can be used for constructing HLA-C*08:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:01:01:02 Protein Expression Plasmid Vector	PHLAP92525716	Plasmid vector containing HLA-C*08:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:02 protein. This plasmid can be used for constructing HLA-C*08:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:03 Protein Expression Plasmid Vector	PHLAP92525717	Plasmid vector containing HLA-C*08:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:03 protein. This plasmid can be used for constructing HLA-C*08:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:04 Protein Expression Plasmid Vector	PHLAP92525718	Plasmid vector containing HLA-C*08:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:04 protein. This plasmid can be used for constructing HLA-C*08:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:05 Protein Expression Plasmid Vector	PHLAP92525719	Plasmid vector containing HLA-C*08:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:05 protein. This plasmid can be used for constructing HLA-C*08:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:06 Protein Expression Plasmid Vector	PHLAP92525720	Plasmid vector containing HLA-C*08:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:06 protein. This plasmid can be used for constructing HLA-C*08:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:07 Protein Expression Plasmid Vector	PHLAP92525721	Plasmid vector containing HLA-C*08:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:07 protein. This plasmid can be used for constructing HLA-C*08:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:08 Protein Expression Plasmid Vector	PHLAP92525722	Plasmid vector containing HLA-C*08:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:08 protein. This plasmid can be used for constructing HLA-C*08:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:01:01:09 Protein Expression Plasmid Vector	PHLAP925257223	Plasmid vector containing HLA-C*08:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:09 protein. This plasmid can be used for constructing HLA-C*08:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:10 Protein Expression Plasmid Vector	PHLAP925257224	Plasmid vector containing HLA-C*08:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:10 protein. This plasmid can be used for constructing HLA-C*08:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:11 Protein Expression Plasmid Vector	PHLAP925257225	Plasmid vector containing HLA-C*08:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:11 protein. This plasmid can be used for constructing HLA-C*08:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:12 Protein Expression Plasmid Vector	PHLAP925257226	Plasmid vector containing HLA-C*08:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:12 protein. This plasmid can be used for constructing HLA-C*08:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:13 Protein Expression Plasmid Vector	PHLAP925257227	Plasmid vector containing HLA-C*08:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:13 protein. This plasmid can be used for constructing HLA-C*08:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:14 Protein Expression Plasmid Vector	PHLAP925257228	Plasmid vector containing HLA-C*08:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:14 protein. This plasmid can be used for constructing HLA-C*08:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:15 Protein Expression Plasmid Vector	PHLAP925257229	Plasmid vector containing HLA-C*08:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:15 protein. This plasmid can be used for constructing HLA-C*08:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:01:01:16 Protein Expression Plasmid Vector	PHLAP92525730	Plasmid vector containing HLA-C*08:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:16 protein. This plasmid can be used for constructing HLA-C*08:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:17 Protein Expression Plasmid Vector	PHLAP92525731	Plasmid vector containing HLA-C*08:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:17 protein. This plasmid can be used for constructing HLA-C*08:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:18 Protein Expression Plasmid Vector	PHLAP92525732	Plasmid vector containing HLA-C*08:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:18 protein. This plasmid can be used for constructing HLA-C*08:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:19 Protein Expression Plasmid Vector	PHLAP92525733	Plasmid vector containing HLA-C*08:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:19 protein. This plasmid can be used for constructing HLA-C*08:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:20 Protein Expression Plasmid Vector	PHLAP92525734	Plasmid vector containing HLA-C*08:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:20 protein. This plasmid can be used for constructing HLA-C*08:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:21 Protein Expression Plasmid Vector	PHLAP92525735	Plasmid vector containing HLA-C*08:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:21 protein. This plasmid can be used for constructing HLA-C*08:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:01:22 Protein Expression Plasmid Vector	PHLAP92525736	Plasmid vector containing HLA-C*08:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:01:22 protein. This plasmid can be used for constructing HLA-C*08:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:01:02 Protein Expression Plasmid Vector	PHLAP92525737	Plasmid vector containing HLA-C*08:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:02 protein. This plasmid can be used for constructing HLA-C*08:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:03 Protein Expression Plasmid Vector	PHLAP92525738	Plasmid vector containing HLA-C*08:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:03 protein. This plasmid can be used for constructing HLA-C*08:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:04 Protein Expression Plasmid Vector	PHLAP92525739	Plasmid vector containing HLA-C*08:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:04 protein. This plasmid can be used for constructing HLA-C*08:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:05 Protein Expression Plasmid Vector	PHLAP92525740	Plasmid vector containing HLA-C*08:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:05 protein. This plasmid can be used for constructing HLA-C*08:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:06 Protein Expression Plasmid Vector	PHLAP92525741	Plasmid vector containing HLA-C*08:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:06 protein. This plasmid can be used for constructing HLA-C*08:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:07 Protein Expression Plasmid Vector	PHLAP92525742	Plasmid vector containing HLA-C*08:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:07 protein. This plasmid can be used for constructing HLA-C*08:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:08 Protein Expression Plasmid Vector	PHLAP92525743	Plasmid vector containing HLA-C*08:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:08 protein. This plasmid can be used for constructing HLA-C*08:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:09 Protein Expression Plasmid Vector	PHLAP92525744	Plasmid vector containing HLA-C*08:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:09 protein. This plasmid can be used for constructing HLA-C*08:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:01:10 Protein Expression Plasmid Vector	PHLAP92525745	Plasmid vector containing HLA-C*08:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:10 protein. This plasmid can be used for constructing HLA-C*08:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:11 Protein Expression Plasmid Vector	PHLAP92525746	Plasmid vector containing HLA-C*08:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:11 protein. This plasmid can be used for constructing HLA-C*08:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:12 Protein Expression Plasmid Vector	PHLAP92525747	Plasmid vector containing HLA-C*08:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:12 protein. This plasmid can be used for constructing HLA-C*08:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:13 Protein Expression Plasmid Vector	PHLAP92525748	Plasmid vector containing HLA-C*08:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:13 protein. This plasmid can be used for constructing HLA-C*08:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:14 Protein Expression Plasmid Vector	PHLAP92525749	Plasmid vector containing HLA-C*08:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:14 protein. This plasmid can be used for constructing HLA-C*08:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:15 Protein Expression Plasmid Vector	PHLAP92525750	Plasmid vector containing HLA-C*08:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:15 protein. This plasmid can be used for constructing HLA-C*08:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:16 Protein Expression Plasmid Vector	PHLAP92525751	Plasmid vector containing HLA-C*08:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:16 protein. This plasmid can be used for constructing HLA-C*08:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:17 Protein Expression Plasmid Vector	PHLAP92525752	Plasmid vector containing HLA-C*08:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:17 protein. This plasmid can be used for constructing HLA-C*08:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:01:18 Protein Expression Plasmid Vector	PHLAP92525753	Plasmid vector containing HLA-C*08:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:18 protein. This plasmid can be used for constructing HLA-C*08:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:19 Protein Expression Plasmid Vector	PHLAP92525754	Plasmid vector containing HLA-C*08:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:19 protein. This plasmid can be used for constructing HLA-C*08:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:20 Protein Expression Plasmid Vector	PHLAP92525755	Plasmid vector containing HLA-C*08:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:20 protein. This plasmid can be used for constructing HLA-C*08:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:21 Protein Expression Plasmid Vector	PHLAP92525756	Plasmid vector containing HLA-C*08:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:21 protein. This plasmid can be used for constructing HLA-C*08:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:22 Protein Expression Plasmid Vector	PHLAP92525757	Plasmid vector containing HLA-C*08:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:22 protein. This plasmid can be used for constructing HLA-C*08:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:23 Protein Expression Plasmid Vector	PHLAP92525758	Plasmid vector containing HLA-C*08:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:23 protein. This plasmid can be used for constructing HLA-C*08:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:24 Protein Expression Plasmid Vector	PHLAP92525759	Plasmid vector containing HLA-C*08:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:24 protein. This plasmid can be used for constructing HLA-C*08:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:25 Protein Expression Plasmid Vector	PHLAP92525760	Plasmid vector containing HLA-C*08:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:25 protein. This plasmid can be used for constructing HLA-C*08:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:01:26 Protein Expression Plasmid Vector	PHLAP92525761	Plasmid vector containing HLA-C*08:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:26 protein. This plasmid can be used for constructing HLA-C*08:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:27 Protein Expression Plasmid Vector	PHLAP92525762	Plasmid vector containing HLA-C*08:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:27 protein. This plasmid can be used for constructing HLA-C*08:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:28 Protein Expression Plasmid Vector	PHLAP92525763	Plasmid vector containing HLA-C*08:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:28 protein. This plasmid can be used for constructing HLA-C*08:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:29 Protein Expression Plasmid Vector	PHLAP92525764	Plasmid vector containing HLA-C*08:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:29 protein. This plasmid can be used for constructing HLA-C*08:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:30 Protein Expression Plasmid Vector	PHLAP92525765	Plasmid vector containing HLA-C*08:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:30 protein. This plasmid can be used for constructing HLA-C*08:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:31 Protein Expression Plasmid Vector	PHLAP92525766	Plasmid vector containing HLA-C*08:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:31 protein. This plasmid can be used for constructing HLA-C*08:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:32 Protein Expression Plasmid Vector	PHLAP92525767	Plasmid vector containing HLA-C*08:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:32 protein. This plasmid can be used for constructing HLA-C*08:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:33 Protein Expression Plasmid Vector	PHLAP92525768	Plasmid vector containing HLA-C*08:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:33 protein. This plasmid can be used for constructing HLA-C*08:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:01:34 Protein Expression Plasmid Vector	PHLAP92525769	Plasmid vector containing HLA-C*08:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:34 protein. This plasmid can be used for constructing HLA-C*08:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:35 Protein Expression Plasmid Vector	PHLAP92525770	Plasmid vector containing HLA-C*08:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:35 protein. This plasmid can be used for constructing HLA-C*08:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:36 Protein Expression Plasmid Vector	PHLAP92525771	Plasmid vector containing HLA-C*08:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:36 protein. This plasmid can be used for constructing HLA-C*08:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:37 Protein Expression Plasmid Vector	PHLAP92525772	Plasmid vector containing HLA-C*08:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:37 protein. This plasmid can be used for constructing HLA-C*08:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:38 Protein Expression Plasmid Vector	PHLAP92525773	Plasmid vector containing HLA-C*08:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:38 protein. This plasmid can be used for constructing HLA-C*08:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:39 Protein Expression Plasmid Vector	PHLAP92525774	Plasmid vector containing HLA-C*08:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:39 protein. This plasmid can be used for constructing HLA-C*08:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:40 Protein Expression Plasmid Vector	PHLAP92525775	Plasmid vector containing HLA-C*08:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:40 protein. This plasmid can be used for constructing HLA-C*08:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:01:41 Protein Expression Plasmid Vector	PHLAP92525776	Plasmid vector containing HLA-C*08:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:01:41 protein. This plasmid can be used for constructing HLA-C*08:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:01:01 Protein Expression Plasmid Vector	PHLAP92525777	Plasmid vector containing HLA-C*08:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:01 protein. This plasmid can be used for constructing HLA-C*08:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:02 Protein Expression Plasmid Vector	PHLAP92525778	Plasmid vector containing HLA-C*08:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:02 protein. This plasmid can be used for constructing HLA-C*08:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:03 Protein Expression Plasmid Vector	PHLAP92525779	Plasmid vector containing HLA-C*08:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:03 protein. This plasmid can be used for constructing HLA-C*08:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:04 Protein Expression Plasmid Vector	PHLAP92525780	Plasmid vector containing HLA-C*08:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:04 protein. This plasmid can be used for constructing HLA-C*08:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:05 Protein Expression Plasmid Vector	PHLAP92525781	Plasmid vector containing HLA-C*08:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:05 protein. This plasmid can be used for constructing HLA-C*08:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:06 Protein Expression Plasmid Vector	PHLAP92525782	Plasmid vector containing HLA-C*08:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:06 protein. This plasmid can be used for constructing HLA-C*08:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:07 Protein Expression Plasmid Vector	PHLAP92525783	Plasmid vector containing HLA-C*08:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:07 protein. This plasmid can be used for constructing HLA-C*08:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:01:08 Protein Expression Plasmid Vector	PHLAP92525784	Plasmid vector containing HLA-C*08:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:08 protein. This plasmid can be used for constructing HLA-C*08:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:09 Protein Expression Plasmid Vector	PHLAP92525785	Plasmid vector containing HLA-C*08:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:09 protein. This plasmid can be used for constructing HLA-C*08:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:10 Protein Expression Plasmid Vector	PHLAP92525786	Plasmid vector containing HLA-C*08:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:10 protein. This plasmid can be used for constructing HLA-C*08:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:11 Protein Expression Plasmid Vector	PHLAP92525787	Plasmid vector containing HLA-C*08:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:11 protein. This plasmid can be used for constructing HLA-C*08:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:12 Protein Expression Plasmid Vector	PHLAP92525788	Plasmid vector containing HLA-C*08:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:12 protein. This plasmid can be used for constructing HLA-C*08:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:13 Protein Expression Plasmid Vector	PHLAP92525789	Plasmid vector containing HLA-C*08:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:13 protein. This plasmid can be used for constructing HLA-C*08:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:14 Protein Expression Plasmid Vector	PHLAP92525790	Plasmid vector containing HLA-C*08:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:14 protein. This plasmid can be used for constructing HLA-C*08:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:01:15 Protein Expression Plasmid Vector	PHLAP92525791	Plasmid vector containing HLA-C*08:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:15 protein. This plasmid can be used for constructing HLA-C*08:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:16 Protein Expression Plasmid Vector	PHLAP92525792	Plasmid vector containing HLA-C*08:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:16 protein. This plasmid can be used for constructing HLA-C*08:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:17 Protein Expression Plasmid Vector	PHLAP92525793	Plasmid vector containing HLA-C*08:02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:17 protein. This plasmid can be used for constructing HLA-C*08:02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:18 Protein Expression Plasmid Vector	PHLAP92525794	Plasmid vector containing HLA-C*08:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:18 protein. This plasmid can be used for constructing HLA-C*08:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:19 Protein Expression Plasmid Vector	PHLAP92525795	Plasmid vector containing HLA-C*08:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:19 protein. This plasmid can be used for constructing HLA-C*08:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:20 Protein Expression Plasmid Vector	PHLAP92525796	Plasmid vector containing HLA-C*08:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:20 protein. This plasmid can be used for constructing HLA-C*08:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:21 Protein Expression Plasmid Vector	PHLAP92525797	Plasmid vector containing HLA-C*08:02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:21 protein. This plasmid can be used for constructing HLA-C*08:02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:01:22 Protein Expression Plasmid Vector	PHLAP92525798	Plasmid vector containing HLA-C*08:02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:22 protein. This plasmid can be used for constructing HLA-C*08:02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:23 Protein Expression Plasmid Vector	PHLAP92525799	Plasmid vector containing HLA-C*08:02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:23 protein. This plasmid can be used for constructing HLA-C*08:02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:24 Protein Expression Plasmid Vector	PHLAP925258000	Plasmid vector containing HLA-C*08:02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:24 protein. This plasmid can be used for constructing HLA-C*08:02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:25 Protein Expression Plasmid Vector	PHLAP925258001	Plasmid vector containing HLA-C*08:02:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:25 protein. This plasmid can be used for constructing HLA-C*08:02:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:26 Protein Expression Plasmid Vector	PHLAP925258002	Plasmid vector containing HLA-C*08:02:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:26 protein. This plasmid can be used for constructing HLA-C*08:02:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:27 Protein Expression Plasmid Vector	PHLAP925258003	Plasmid vector containing HLA-C*08:02:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:27 protein. This plasmid can be used for constructing HLA-C*08:02:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:28 Protein Expression Plasmid Vector	PHLAP925258004	Plasmid vector containing HLA-C*08:02:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:28 protein. This plasmid can be used for constructing HLA-C*08:02:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:01:29 Protein Expression Plasmid Vector	PHLAP92525805	Plasmid vector containing HLA-C*08:02:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:29 protein. This plasmid can be used for constructing HLA-C*08:02:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:30 Protein Expression Plasmid Vector	PHLAP92525806	Plasmid vector containing HLA-C*08:02:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:30 protein. This plasmid can be used for constructing HLA-C*08:02:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:31 Protein Expression Plasmid Vector	PHLAP92525807	Plasmid vector containing HLA-C*08:02:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:31 protein. This plasmid can be used for constructing HLA-C*08:02:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:32 Protein Expression Plasmid Vector	PHLAP92525808	Plasmid vector containing HLA-C*08:02:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:32 protein. This plasmid can be used for constructing HLA-C*08:02:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:33 Protein Expression Plasmid Vector	PHLAP92525809	Plasmid vector containing HLA-C*08:02:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:33 protein. This plasmid can be used for constructing HLA-C*08:02:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:34 Protein Expression Plasmid Vector	PHLAP92525810	Plasmid vector containing HLA-C*08:02:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:34 protein. This plasmid can be used for constructing HLA-C*08:02:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:35 Protein Expression Plasmid Vector	PHLAP92525811	Plasmid vector containing HLA-C*08:02:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:35 protein. This plasmid can be used for constructing HLA-C*08:02:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:01:36 Protein Expression Plasmid Vector	PHLAP92525812	Plasmid vector containing HLA-C*08:02:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:36 protein. This plasmid can be used for constructing HLA-C*08:02:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:37 Protein Expression Plasmid Vector	PHLAP92525813	Plasmid vector containing HLA-C*08:02:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:37 protein. This plasmid can be used for constructing HLA-C*08:02:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:38 Protein Expression Plasmid Vector	PHLAP92525814	Plasmid vector containing HLA-C*08:02:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:38 protein. This plasmid can be used for constructing HLA-C*08:02:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:39 Protein Expression Plasmid Vector	PHLAP92525815	Plasmid vector containing HLA-C*08:02:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:39 protein. This plasmid can be used for constructing HLA-C*08:02:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:40 Protein Expression Plasmid Vector	PHLAP92525816	Plasmid vector containing HLA-C*08:02:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:40 protein. This plasmid can be used for constructing HLA-C*08:02:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:41 Protein Expression Plasmid Vector	PHLAP92525817	Plasmid vector containing HLA-C*08:02:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:41 protein. This plasmid can be used for constructing HLA-C*08:02:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:42 Protein Expression Plasmid Vector	PHLAP92525818	Plasmid vector containing HLA-C*08:02:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:42 protein. This plasmid can be used for constructing HLA-C*08:02:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:01:43 Protein Expression Plasmid Vector	PHLAP92525819	Plasmid vector containing HLA-C*08:02:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:43 protein. This plasmid can be used for constructing HLA-C*08:02:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:01:44Q Protein Expression Plasmid Vector	PHLAP92525820	Plasmid vector containing HLA-C*08:02:01:44Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:01:44Q protein. This plasmid can be used for constructing HLA-C*08:02:01:44Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:01:44Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:02 Protein Expression Plasmid Vector	PHLAP92525821	Plasmid vector containing HLA-C*08:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:02 protein. This plasmid can be used for constructing HLA-C*08:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:03 Protein Expression Plasmid Vector	PHLAP92525822	Plasmid vector containing HLA-C*08:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:03 protein. This plasmid can be used for constructing HLA-C*08:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:04 Protein Expression Plasmid Vector	PHLAP92525823	Plasmid vector containing HLA-C*08:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:04 protein. This plasmid can be used for constructing HLA-C*08:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:05 Protein Expression Plasmid Vector	PHLAP92525824	Plasmid vector containing HLA-C*08:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:05 protein. This plasmid can be used for constructing HLA-C*08:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:06 Protein Expression Plasmid Vector	PHLAP92525825	Plasmid vector containing HLA-C*08:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:06 protein. This plasmid can be used for constructing HLA-C*08:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:07 Protein Expression Plasmid Vector	PHLAP92525826	Plasmid vector containing HLA-C*08:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:07 protein. This plasmid can be used for constructing HLA-C*08:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:08 Protein Expression Plasmid Vector	PHLAP92525827	Plasmid vector containing HLA-C*08:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:08 protein. This plasmid can be used for constructing HLA-C*08:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:09 Protein Expression Plasmid Vector	PHLAP92525828	Plasmid vector containing HLA-C*08:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:09 protein. This plasmid can be used for constructing HLA-C*08:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:10 Protein Expression Plasmid Vector	PHLAP92525829	Plasmid vector containing HLA-C*08:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:10 protein. This plasmid can be used for constructing HLA-C*08:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:11:01 Protein Expression Plasmid Vector	PHLAP925258330	Plasmid vector containing HLA-C*08:02:11:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:11:01 protein. This plasmid can be used for constructing HLA-C*08:02:11:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:11:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:11:02 Protein Expression Plasmid Vector	PHLAP925258331	Plasmid vector containing HLA-C*08:02:11:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:11:02 protein. This plasmid can be used for constructing HLA-C*08:02:11:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:11:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:12 Protein Expression Plasmid Vector	PHLAP925258332	Plasmid vector containing HLA-C*08:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:12 protein. This plasmid can be used for constructing HLA-C*08:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:13 Protein Expression Plasmid Vector	PHLAP925258333	Plasmid vector containing HLA-C*08:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:13 protein. This plasmid can be used for constructing HLA-C*08:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:14 Protein Expression Plasmid Vector	PHLAP925258334	Plasmid vector containing HLA-C*08:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:14 protein. This plasmid can be used for constructing HLA-C*08:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:15 Protein Expression Plasmid Vector	PHLAP92525835	Plasmid vector containing HLA-C*08:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:15 protein. This plasmid can be used for constructing HLA-C*08:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:16 Protein Expression Plasmid Vector	PHLAP92525836	Plasmid vector containing HLA-C*08:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:16 protein. This plasmid can be used for constructing HLA-C*08:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:17 Protein Expression Plasmid Vector	PHLAP92525837	Plasmid vector containing HLA-C*08:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:17 protein. This plasmid can be used for constructing HLA-C*08:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:18 Protein Expression Plasmid Vector	PHLAP92525838	Plasmid vector containing HLA-C*08:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:18 protein. This plasmid can be used for constructing HLA-C*08:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:19 Protein Expression Plasmid Vector	PHLAP92525839	Plasmid vector containing HLA-C*08:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:19 protein. This plasmid can be used for constructing HLA-C*08:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:20 Protein Expression Plasmid Vector	PHLAP92525840	Plasmid vector containing HLA-C*08:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:20 protein. This plasmid can be used for constructing HLA-C*08:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:21 Protein Expression Plasmid Vector	PHLAP92525841	Plasmid vector containing HLA-C*08:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:21 protein. This plasmid can be used for constructing HLA-C*08:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:22 Protein Expression Plasmid Vector	PHLAP92525842	Plasmid vector containing HLA-C*08:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:22 protein. This plasmid can be used for constructing HLA-C*08:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:23 Protein Expression Plasmid Vector	PHLAP92525843	Plasmid vector containing HLA-C*08:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:23 protein. This plasmid can be used for constructing HLA-C*08:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:24 Protein Expression Plasmid Vector	PHLAP92525844	Plasmid vector containing HLA-C*08:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:24 protein. This plasmid can be used for constructing HLA-C*08:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:25 Protein Expression Plasmid Vector	PHLAP92525845	Plasmid vector containing HLA-C*08:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:25 protein. This plasmid can be used for constructing HLA-C*08:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:26 Protein Expression Plasmid Vector	PHLAP92525846	Plasmid vector containing HLA-C*08:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:26 protein. This plasmid can be used for constructing HLA-C*08:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:27 Protein Expression Plasmid Vector	PHLAP92525847	Plasmid vector containing HLA-C*08:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:27 protein. This plasmid can be used for constructing HLA-C*08:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:28 Protein Expression Plasmid Vector	PHLAP92525848	Plasmid vector containing HLA-C*08:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:28 protein. This plasmid can be used for constructing HLA-C*08:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:29 Protein Expression Plasmid Vector	PHLAP92525849	Plasmid vector containing HLA-C*08:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:29 protein. This plasmid can be used for constructing HLA-C*08:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:30 Protein Expression Plasmid Vector	PHLAP92525850	Plasmid vector containing HLA-C*08:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:30 protein. This plasmid can be used for constructing HLA-C*08:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:31 Protein Expression Plasmid Vector	PHLAP92525851	Plasmid vector containing HLA-C*08:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:31 protein. This plasmid can be used for constructing HLA-C*08:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:32 Protein Expression Plasmid Vector	PHLAP92525852	Plasmid vector containing HLA-C*08:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:32 protein. This plasmid can be used for constructing HLA-C*08:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:33 Protein Expression Plasmid Vector	PHLAP92525853	Plasmid vector containing HLA-C*08:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:33 protein. This plasmid can be used for constructing HLA-C*08:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:34 Protein Expression Plasmid Vector	PHLAP92525854	Plasmid vector containing HLA-C*08:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:34 protein. This plasmid can be used for constructing HLA-C*08:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:35 Protein Expression Plasmid Vector	PHLAP92525855	Plasmid vector containing HLA-C*08:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:35 protein. This plasmid can be used for constructing HLA-C*08:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:36 Protein Expression Plasmid Vector	PHLAP92525856	Plasmid vector containing HLA-C*08:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:36 protein. This plasmid can be used for constructing HLA-C*08:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:37 Protein Expression Plasmid Vector	PHLAP92525857	Plasmid vector containing HLA-C*08:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:37 protein. This plasmid can be used for constructing HLA-C*08:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:38:01 Protein Expression Plasmid Vector	PHLAP92525858	Plasmid vector containing HLA-C*08:02:38:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:38:01 protein. This plasmid can be used for constructing HLA-C*08:02:38:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:38:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:02:38:02 Protein Expression Plasmid Vector	PHLAP92525859	Plasmid vector containing HLA-C*08:02:38:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:38:02 protein. This plasmid can be used for constructing HLA-C*08:02:38:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:38:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:39 Protein Expression Plasmid Vector	PHLAP92525860	Plasmid vector containing HLA-C*08:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:39 protein. This plasmid can be used for constructing HLA-C*08:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:40 Protein Expression Plasmid Vector	PHLAP92525861	Plasmid vector containing HLA-C*08:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:40 protein. This plasmid can be used for constructing HLA-C*08:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:41 Protein Expression Plasmid Vector	PHLAP92525862	Plasmid vector containing HLA-C*08:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:41 protein. This plasmid can be used for constructing HLA-C*08:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:42 Protein Expression Plasmid Vector	PHLAP92525863	Plasmid vector containing HLA-C*08:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:42 protein. This plasmid can be used for constructing HLA-C*08:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:02:43 Protein Expression Plasmid Vector	PHLAP92525864	Plasmid vector containing HLA-C*08:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:02:43 protein. This plasmid can be used for constructing HLA-C*08:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:03:01:01 Protein Expression Plasmid Vector	PHLAP92525865	Plasmid vector containing HLA-C*08:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:03:01:01 protein. This plasmid can be used for constructing HLA-C*08:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:03:01:02 Protein Expression Plasmid Vector	PHLAP92525866	Plasmid vector containing HLA-C*08:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:03:01:02 protein. This plasmid can be used for constructing HLA-C*08:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:03:01:03 Protein Expression Plasmid Vector	PHLAP92525867	Plasmid vector containing HLA-C*08:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:03:01:03 protein. This plasmid can be used for constructing HLA-C*08:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:03:01:04 Protein Expression Plasmid Vector	PHLAP92525868	Plasmid vector containing HLA-C*08:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:03:01:04 protein. This plasmid can be used for constructing HLA-C*08:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:03:02 Protein Expression Plasmid Vector	PHLAP92525869	Plasmid vector containing HLA-C*08:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:03:02 protein. This plasmid can be used for constructing HLA-C*08:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:03:03 Protein Expression Plasmid Vector	PHLAP92525870	Plasmid vector containing HLA-C*08:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:03:03 protein. This plasmid can be used for constructing HLA-C*08:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:03:04 Protein Expression Plasmid Vector	PHLAP92525871	Plasmid vector containing HLA-C*08:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:03:04 protein. This plasmid can be used for constructing HLA-C*08:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:03:05 Protein Expression Plasmid Vector	PHLAP92525872	Plasmid vector containing HLA-C*08:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:03:05 protein. This plasmid can be used for constructing HLA-C*08:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:03:06 Protein Expression Plasmid Vector	PHLAP92525873	Plasmid vector containing HLA-C*08:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:03:06 protein. This plasmid can be used for constructing HLA-C*08:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:04:01:01 Protein Expression Plasmid Vector	PHLAP92525874	Plasmid vector containing HLA-C*08:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:04:01:01 protein. This plasmid can be used for constructing HLA-C*08:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:04:01:02 Protein Expression Plasmid Vector	PHLAP92525875	Plasmid vector containing HLA-C*08:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:04:01:02 protein. This plasmid can be used for constructing HLA-C*08:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:04:01:03 Protein Expression Plasmid Vector	PHLAP92525876	Plasmid vector containing HLA-C*08:04:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:04:01:03 protein. This plasmid can be used for constructing HLA-C*08:04:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:04:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:04:01:04 Protein Expression Plasmid Vector	PHLAP92525877	Plasmid vector containing HLA-C*08:04:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:04:01:04 protein. This plasmid can be used for constructing HLA-C*08:04:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:04:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:04:01:05 Protein Expression Plasmid Vector	PHLAP92525878	Plasmid vector containing HLA-C*08:04:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:04:01:05 protein. This plasmid can be used for constructing HLA-C*08:04:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:04:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:04:02 Protein Expression Plasmid Vector	PHLAP92525879	Plasmid vector containing HLA-C*08:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:04:02 protein. This plasmid can be used for constructing HLA-C*08:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:04:03 Protein Expression Plasmid Vector	PHLAP92525880	Plasmid vector containing HLA-C*08:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:04:03 protein. This plasmid can be used for constructing HLA-C*08:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:04:04 Protein Expression Plasmid Vector	PHLAP92525881	Plasmid vector containing HLA-C*08:04:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:04:04 protein. This plasmid can be used for constructing HLA-C*08:04:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:04:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:05 Protein Expression Plasmid Vector	PHLAP92525882	Plasmid vector containing HLA-C*08:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:05 protein. This plasmid can be used for constructing HLA-C*08:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:06 Protein Expression Plasmid Vector	PHLAP92525883	Plasmid vector containing HLA-C*08:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:06 protein. This plasmid can be used for constructing HLA-C*08:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:07 Protein Expression Plasmid Vector	PHLAP92525884	Plasmid vector containing HLA-C*08:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:07 protein. This plasmid can be used for constructing HLA-C*08:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:08:01 Protein Expression Plasmid Vector	PHLAP92525885	Plasmid vector containing HLA-C*08:08:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:08:01 protein. This plasmid can be used for constructing HLA-C*08:08:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:08:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:08:02 Protein Expression Plasmid Vector	PHLAP92525886	Plasmid vector containing HLA-C*08:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:08:02 protein. This plasmid can be used for constructing HLA-C*08:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:09 Protein Expression Plasmid Vector	PHLAP92525887	Plasmid vector containing HLA-C*08:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:09 protein. This plasmid can be used for constructing HLA-C*08:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:10 Protein Expression Plasmid Vector	PHLAP92525888	Plasmid vector containing HLA-C*08:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:10 protein. This plasmid can be used for constructing HLA-C*08:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:100 Protein Expression Plasmid Vector	PHLAP92525889	Plasmid vector containing HLA-C*08:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:100 protein. This plasmid can be used for constructing HLA-C*08:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:101 Protein Expression Plasmid Vector	PHLAP92525890	Plasmid vector containing HLA-C*08:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:101 protein. This plasmid can be used for constructing HLA-C*08:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:102 Protein Expression Plasmid Vector	PHLAP92525891	Plasmid vector containing HLA-C*08:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:102 protein. This plasmid can be used for constructing HLA-C*08:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:103:01:01 Protein Expression Plasmid Vector	PHLAP92525892	Plasmid vector containing HLA-C*08:103:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:103:01:01 protein. This plasmid can be used for constructing HLA-C*08:103:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:103:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:103:01:02 Protein Expression Plasmid Vector	PHLAP92525893	Plasmid vector containing HLA-C*08:103:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:103:01:02 protein. This plasmid can be used for constructing HLA-C*08:103:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:103:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:104 Protein Expression Plasmid Vector	PHLAP92525894	Plasmid vector containing HLA-C*08:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:104 protein. This plasmid can be used for constructing HLA-C*08:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:105 Protein Expression Plasmid Vector	PHLAP92525895	Plasmid vector containing HLA-C*08:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:105 protein. This plasmid can be used for constructing HLA-C*08:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:106 Protein Expression Plasmid Vector	PHLAP92525896	Plasmid vector containing HLA-C*08:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:106 protein. This plasmid can be used for constructing HLA-C*08:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:107 Protein Expression Plasmid Vector	PHLAP92525897	Plasmid vector containing HLA-C*08:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:107 protein. This plasmid can be used for constructing HLA-C*08:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:108 Protein Expression Plasmid Vector	PHLAP92525898	Plasmid vector containing HLA-C*08:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:108 protein. This plasmid can be used for constructing HLA-C*08:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:109 Protein Expression Plasmid Vector	PHLAP92525899	Plasmid vector containing HLA-C*08:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:109 protein. This plasmid can be used for constructing HLA-C*08:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:11 Protein Expression Plasmid Vector	PHLAP92525900	Plasmid vector containing HLA-C*08:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:11 protein. This plasmid can be used for constructing HLA-C*08:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:110 Protein Expression Plasmid Vector	PHLAP92525901	Plasmid vector containing HLA-C*08:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:110 protein. This plasmid can be used for constructing HLA-C*08:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:111 Protein Expression Plasmid Vector	PHLAP92525902	Plasmid vector containing HLA-C*08:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:111 protein. This plasmid can be used for constructing HLA-C*08:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:112 Protein Expression Plasmid Vector	PHLAP92525903	Plasmid vector containing HLA-C*08:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:112 protein. This plasmid can be used for constructing HLA-C*08:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:113 Protein Expression Plasmid Vector	PHLAP92525904	Plasmid vector containing HLA-C*08:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:113 protein. This plasmid can be used for constructing HLA-C*08:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:114 Protein Expression Plasmid Vector	PHLAP92525905	Plasmid vector containing HLA-C*08:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:114 protein. This plasmid can be used for constructing HLA-C*08:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:115 Protein Expression Plasmid Vector	PHLAP92525906	Plasmid vector containing HLA-C*08:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:115 protein. This plasmid can be used for constructing HLA-C*08:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:116 Protein Expression Plasmid Vector	PHLAP92525907	Plasmid vector containing HLA-C*08:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:116 protein. This plasmid can be used for constructing HLA-C*08:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:117 Protein Expression Plasmid Vector	PHLAP92525908	Plasmid vector containing HLA-C*08:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:117 protein. This plasmid can be used for constructing HLA-C*08:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:118 Protein Expression Plasmid Vector	PHLAP92525909	Plasmid vector containing HLA-C*08:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:118 protein. This plasmid can be used for constructing HLA-C*08:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:119 Protein Expression Plasmid Vector	PHLAP92525910	Plasmid vector containing HLA-C*08:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:119 protein. This plasmid can be used for constructing HLA-C*08:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:12:01:01 Protein Expression Plasmid Vector	PHLAP92525911	Plasmid vector containing HLA-C*08:12:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:12:01:01 protein. This plasmid can be used for constructing HLA-C*08:12:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:12:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:12:01:02 Protein Expression Plasmid Vector	PHLAP92525912	Plasmid vector containing HLA-C*08:12:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:12:01:02 protein. This plasmid can be used for constructing HLA-C*08:12:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:12:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:120 Protein Expression Plasmid Vector	PHLAP92525913	Plasmid vector containing HLA-C*08:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:120 protein. This plasmid can be used for constructing HLA-C*08:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:121N Protein Expression Plasmid Vector	PHLAP92525914	Plasmid vector containing HLA-C*08:121N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:121N protein. This plasmid can be used for constructing HLA-C*08:121N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:121N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:122 Protein Expression Plasmid Vector	PHLAP92525915	Plasmid vector containing HLA-C*08:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:122 protein. This plasmid can be used for constructing HLA-C*08:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:123 Protein Expression Plasmid Vector	PHLAP92525916	Plasmid vector containing HLA-C*08:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:123 protein. This plasmid can be used for constructing HLA-C*08:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:124 Protein Expression Plasmid Vector	PHLAP92525917	Plasmid vector containing HLA-C*08:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:124 protein. This plasmid can be used for constructing HLA-C*08:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:125 Protein Expression Plasmid Vector	PHLAP92525918	Plasmid vector containing HLA-C*08:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:125 protein. This plasmid can be used for constructing HLA-C*08:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:126 Protein Expression Plasmid Vector	PHLAP92525919	Plasmid vector containing HLA-C*08:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:126 protein. This plasmid can be used for constructing HLA-C*08:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:127N Protein Expression Plasmid Vector	PHLAP92525920	Plasmid vector containing HLA-C*08:127N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:127N protein. This plasmid can be used for constructing HLA-C*08:127N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:127N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:128 Protein Expression Plasmid Vector	PHLAP92525921	Plasmid vector containing HLA-C*08:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:128 protein. This plasmid can be used for constructing HLA-C*08:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:129N Protein Expression Plasmid Vector	PHLAP92525922	Plasmid vector containing HLA-C*08:129N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:129N protein. This plasmid can be used for constructing HLA-C*08:129N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:129N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:13 Protein Expression Plasmid Vector	PHLAP92525923	Plasmid vector containing HLA-C*08:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:13 protein. This plasmid can be used for constructing HLA-C*08:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:130N Protein Expression Plasmid Vector	PHLAP92525924	Plasmid vector containing HLA-C*08:130N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:130N protein. This plasmid can be used for constructing HLA-C*08:130N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:130N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:131 Protein Expression Plasmid Vector	PHLAP92525925	Plasmid vector containing HLA-C*08:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:131 protein. This plasmid can be used for constructing HLA-C*08:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:132 Protein Expression Plasmid Vector	PHLAP92525926	Plasmid vector containing HLA-C*08:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:132 protein. This plasmid can be used for constructing HLA-C*08:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:133 Protein Expression Plasmid Vector	PHLAP92525927	Plasmid vector containing HLA-C*08:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:133 protein. This plasmid can be used for constructing HLA-C*08:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:134 Protein Expression Plasmid Vector	PHLAP92525928	Plasmid vector containing HLA-C*08:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:134 protein. This plasmid can be used for constructing HLA-C*08:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:135 Protein Expression Plasmid Vector	PHLAP92525929	Plasmid vector containing HLA-C*08:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:135 protein. This plasmid can be used for constructing HLA-C*08:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:136 Protein Expression Plasmid Vector	PHLAP92525930	Plasmid vector containing HLA-C*08:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:136 protein. This plasmid can be used for constructing HLA-C*08:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:137 Protein Expression Plasmid Vector	PHLAP92525931	Plasmid vector containing HLA-C*08:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:137 protein. This plasmid can be used for constructing HLA-C*08:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:138 Protein Expression Plasmid Vector	PHLAP92525932	Plasmid vector containing HLA-C*08:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:138 protein. This plasmid can be used for constructing HLA-C*08:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:139 Protein Expression Plasmid Vector	PHLAP92525933	Plasmid vector containing HLA-C*08:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:139 protein. This plasmid can be used for constructing HLA-C*08:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:14 Protein Expression Plasmid Vector	PHLAP92525934	Plasmid vector containing HLA-C*08:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:14 protein. This plasmid can be used for constructing HLA-C*08:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:140 Protein Expression Plasmid Vector	PHLAP92525935	Plasmid vector containing HLA-C*08:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:140 protein. This plasmid can be used for constructing HLA-C*08:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:141Q Protein Expression Plasmid Vector	PHLAP92525936	Plasmid vector containing HLA-C*08:141Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:141Q protein. This plasmid can be used for constructing HLA-C*08:141Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:141Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:142 Protein Expression Plasmid Vector	PHLAP92525937	Plasmid vector containing HLA-C*08:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:142 protein. This plasmid can be used for constructing HLA-C*08:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:143 Protein Expression Plasmid Vector	PHLAP92525938	Plasmid vector containing HLA-C*08:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:143 protein. This plasmid can be used for constructing HLA-C*08:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:144:01 Protein Expression Plasmid Vector	PHLAP92525939	Plasmid vector containing HLA-C*08:144:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:144:01 protein. This plasmid can be used for constructing HLA-C*08:144:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:144:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:144:02 Protein Expression Plasmid Vector	PHLAP92525940	Plasmid vector containing HLA-C*08:144:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:144:02 protein. This plasmid can be used for constructing HLA-C*08:144:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:144:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:145 Protein Expression Plasmid Vector	PHLAP92525941	Plasmid vector containing HLA-C*08:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:145 protein. This plasmid can be used for constructing HLA-C*08:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:146 Protein Expression Plasmid Vector	PHLAP92525942	Plasmid vector containing HLA-C*08:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:146 protein. This plasmid can be used for constructing HLA-C*08:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:147 Protein Expression Plasmid Vector	PHLAP92525943	Plasmid vector containing HLA-C*08:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:147 protein. This plasmid can be used for constructing HLA-C*08:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:148 Protein Expression Plasmid Vector	PHLAP92525944	Plasmid vector containing HLA-C*08:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:148 protein. This plasmid can be used for constructing HLA-C*08:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:149 Protein Expression Plasmid Vector	PHLAP92525945	Plasmid vector containing HLA-C*08:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:149 protein. This plasmid can be used for constructing HLA-C*08:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:15:01 Protein Expression Plasmid Vector	PHLAP92525946	Plasmid vector containing HLA-C*08:15:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:15:01 protein. This plasmid can be used for constructing HLA-C*08:15:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:15:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:15:02 Protein Expression Plasmid Vector	PHLAP92525947	Plasmid vector containing HLA-C*08:15:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:15:02 protein. This plasmid can be used for constructing HLA-C*08:15:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:15:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:150 Protein Expression Plasmid Vector	PHLAP92525948	Plasmid vector containing HLA-C*08:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:150 protein. This plasmid can be used for constructing HLA-C*08:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:151 Protein Expression Plasmid Vector	PHLAP92525949	Plasmid vector containing HLA-C*08:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:151 protein. This plasmid can be used for constructing HLA-C*08:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:152 Protein Expression Plasmid Vector	PHLAP92525950	Plasmid vector containing HLA-C*08:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:152 protein. This plasmid can be used for constructing HLA-C*08:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:153 Protein Expression Plasmid Vector	PHLAP92525951	Plasmid vector containing HLA-C*08:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:153 protein. This plasmid can be used for constructing HLA-C*08:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:154 Protein Expression Plasmid Vector	PHLAP92525952	Plasmid vector containing HLA-C*08:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:154 protein. This plasmid can be used for constructing HLA-C*08:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:155 Protein Expression Plasmid Vector	PHLAP92525953	Plasmid vector containing HLA-C*08:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:155 protein. This plasmid can be used for constructing HLA-C*08:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:156 Protein Expression Plasmid Vector	PHLAP92525954	Plasmid vector containing HLA-C*08:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:156 protein. This plasmid can be used for constructing HLA-C*08:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:157 Protein Expression Plasmid Vector	PHLAP92525955	Plasmid vector containing HLA-C*08:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:157 protein. This plasmid can be used for constructing HLA-C*08:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:158 Protein Expression Plasmid Vector	PHLAP92525956	Plasmid vector containing HLA-C*08:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:158 protein. This plasmid can be used for constructing HLA-C*08:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:159 Protein Expression Plasmid Vector	PHLAP92525957	Plasmid vector containing HLA-C*08:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:159 protein. This plasmid can be used for constructing HLA-C*08:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:16:01 Protein Expression Plasmid Vector	PHLAP92525958	Plasmid vector containing HLA-C*08:16:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:16:01 protein. This plasmid can be used for constructing HLA-C*08:16:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:16:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:16:02 Protein Expression Plasmid Vector	PHLAP92525959	Plasmid vector containing HLA-C*08:16:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:16:02 protein. This plasmid can be used for constructing HLA-C*08:16:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:16:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:160 Protein Expression Plasmid Vector	PHLAP92525960	Plasmid vector containing HLA-C*08:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:160 protein. This plasmid can be used for constructing HLA-C*08:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:161N Protein Expression Plasmid Vector	PHLAP92525961	Plasmid vector containing HLA-C*08:161N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:161N protein. This plasmid can be used for constructing HLA-C*08:161N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:161N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:162 Protein Expression Plasmid Vector	PHLAP92525962	Plasmid vector containing HLA-C*08:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:162 protein. This plasmid can be used for constructing HLA-C*08:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:163 Protein Expression Plasmid Vector	PHLAP92525963	Plasmid vector containing HLA-C*08:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:163 protein. This plasmid can be used for constructing HLA-C*08:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:164 Protein Expression Plasmid Vector	PHLAP92525964	Plasmid vector containing HLA-C*08:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:164 protein. This plasmid can be used for constructing HLA-C*08:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:165 Protein Expression Plasmid Vector	PHLAP92525965	Plasmid vector containing HLA-C*08:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:165 protein. This plasmid can be used for constructing HLA-C*08:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:166 Protein Expression Plasmid Vector	PHLAP92525966	Plasmid vector containing HLA-C*08:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:166 protein. This plasmid can be used for constructing HLA-C*08:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:167 Protein Expression Plasmid Vector	PHLAP92525967	Plasmid vector containing HLA-C*08:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:167 protein. This plasmid can be used for constructing HLA-C*08:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:168 Protein Expression Plasmid Vector	PHLAP92525968	Plasmid vector containing HLA-C*08:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:168 protein. This plasmid can be used for constructing HLA-C*08:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:169 Protein Expression Plasmid Vector	PHLAP92525969	Plasmid vector containing HLA-C*08:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:169 protein. This plasmid can be used for constructing HLA-C*08:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:17 Protein Expression Plasmid Vector	PHLAP92525970	Plasmid vector containing HLA-C*08:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:17 protein. This plasmid can be used for constructing HLA-C*08:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:170 Protein Expression Plasmid Vector	PHLAP92525971	Plasmid vector containing HLA-C*08:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:170 protein. This plasmid can be used for constructing HLA-C*08:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:171 Protein Expression Plasmid Vector	PHLAP92525972	Plasmid vector containing HLA-C*08:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:171 protein. This plasmid can be used for constructing HLA-C*08:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:172 Protein Expression Plasmid Vector	PHLAP92525973	Plasmid vector containing HLA-C*08:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:172 protein. This plasmid can be used for constructing HLA-C*08:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:173N Protein Expression Plasmid Vector	PHLAP92525974	Plasmid vector containing HLA-C*08:173N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:173N protein. This plasmid can be used for constructing HLA-C*08:173N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:173N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:174 Protein Expression Plasmid Vector	PHLAP92525975	Plasmid vector containing HLA-C*08:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:174 protein. This plasmid can be used for constructing HLA-C*08:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:175 Protein Expression Plasmid Vector	PHLAP92525976	Plasmid vector containing HLA-C*08:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:175 protein. This plasmid can be used for constructing HLA-C*08:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:176 Protein Expression Plasmid Vector	PHLAP92525977	Plasmid vector containing HLA-C*08:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:176 protein. This plasmid can be used for constructing HLA-C*08:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:177 Protein Expression Plasmid Vector	PHLAP92525978	Plasmid vector containing HLA-C*08:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:177 protein. This plasmid can be used for constructing HLA-C*08:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:178 Protein Expression Plasmid Vector	PHLAP92525979	Plasmid vector containing HLA-C*08:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:178 protein. This plasmid can be used for constructing HLA-C*08:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:179 Protein Expression Plasmid Vector	PHLAP92525980	Plasmid vector containing HLA-C*08:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:179 protein. This plasmid can be used for constructing HLA-C*08:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:18 Protein Expression Plasmid Vector	PHLAP92525981	Plasmid vector containing HLA-C*08:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:18 protein. This plasmid can be used for constructing HLA-C*08:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:180N Protein Expression Plasmid Vector	PHLAP92525982	Plasmid vector containing HLA-C*08:180N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:180N protein. This plasmid can be used for constructing HLA-C*08:180N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:180N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:181N Protein Expression Plasmid Vector	PHLAP92525983	Plasmid vector containing HLA-C*08:181N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:181N protein. This plasmid can be used for constructing HLA-C*08:181N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:181N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:182 Protein Expression Plasmid Vector	PHLAP92525984	Plasmid vector containing HLA-C*08:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:182 protein. This plasmid can be used for constructing HLA-C*08:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:183 Protein Expression Plasmid Vector	PHLAP92525985	Plasmid vector containing HLA-C*08:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:183 protein. This plasmid can be used for constructing HLA-C*08:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:184 Protein Expression Plasmid Vector	PHLAP92525986	Plasmid vector containing HLA-C*08:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:184 protein. This plasmid can be used for constructing HLA-C*08:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:185 Protein Expression Plasmid Vector	PHLAP92525987	Plasmid vector containing HLA-C*08:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:185 protein. This plasmid can be used for constructing HLA-C*08:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:186 Protein Expression Plasmid Vector	PHLAP92525988	Plasmid vector containing HLA-C*08:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:186 protein. This plasmid can be used for constructing HLA-C*08:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:187 Protein Expression Plasmid Vector	PHLAP92525989	Plasmid vector containing HLA-C*08:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:187 protein. This plasmid can be used for constructing HLA-C*08:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:188 Protein Expression Plasmid Vector	PHLAP92525990	Plasmid vector containing HLA-C*08:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:188 protein. This plasmid can be used for constructing HLA-C*08:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:189 Protein Expression Plasmid Vector	PHLAP92525991	Plasmid vector containing HLA-C*08:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:189 protein. This plasmid can be used for constructing HLA-C*08:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:19:01 Protein Expression Plasmid Vector	PHLAP92525992	Plasmid vector containing HLA-C*08:19:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:19:01 protein. This plasmid can be used for constructing HLA-C*08:19:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:19:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:19:02 Protein Expression Plasmid Vector	PHLAP92525993	Plasmid vector containing HLA-C*08:19:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:19:02 protein. This plasmid can be used for constructing HLA-C*08:19:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:19:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:190 Protein Expression Plasmid Vector	PHLAP92525994	Plasmid vector containing HLA-C*08:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:190 protein. This plasmid can be used for constructing HLA-C*08:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:191 Protein Expression Plasmid Vector	PHLAP92525995	Plasmid vector containing HLA-C*08:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:191 protein. This plasmid can be used for constructing HLA-C*08:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:192 Protein Expression Plasmid Vector	PHLAP92525996	Plasmid vector containing HLA-C*08:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:192 protein. This plasmid can be used for constructing HLA-C*08:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:193 Protein Expression Plasmid Vector	PHLAP92525997	Plasmid vector containing HLA-C*08:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:193 protein. This plasmid can be used for constructing HLA-C*08:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:194 Protein Expression Plasmid Vector	PHLAP92525998	Plasmid vector containing HLA-C*08:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:194 protein. This plasmid can be used for constructing HLA-C*08:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:195 Protein Expression Plasmid Vector	PHLAP92525999	Plasmid vector containing HLA-C*08:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:195 protein. This plasmid can be used for constructing HLA-C*08:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:196 Protein Expression Plasmid Vector	PHLAP92526000	Plasmid vector containing HLA-C*08:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:196 protein. This plasmid can be used for constructing HLA-C*08:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:197 Protein Expression Plasmid Vector	PHLAP92526001	Plasmid vector containing HLA-C*08:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:197 protein. This plasmid can be used for constructing HLA-C*08:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:198 Protein Expression Plasmid Vector	PHLAP92526002	Plasmid vector containing HLA-C*08:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:198 protein. This plasmid can be used for constructing HLA-C*08:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:199 Protein Expression Plasmid Vector	PHLAP92526003	Plasmid vector containing HLA-C*08:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:199 protein. This plasmid can be used for constructing HLA-C*08:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:20 Protein Expression Plasmid Vector	PHLAP92526004	Plasmid vector containing HLA-C*08:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:20 protein. This plasmid can be used for constructing HLA-C*08:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:200 Protein Expression Plasmid Vector	PHLAP92526005	Plasmid vector containing HLA-C*08:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:200 protein. This plasmid can be used for constructing HLA-C*08:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:201 Protein Expression Plasmid Vector	PHLAP92526006	Plasmid vector containing HLA-C*08:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:201 protein. This plasmid can be used for constructing HLA-C*08:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:202 Protein Expression Plasmid Vector	PHLAP92526007	Plasmid vector containing HLA-C*08:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:202 protein. This plasmid can be used for constructing HLA-C*08:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:203 Protein Expression Plasmid Vector	PHLAP92526008	Plasmid vector containing HLA-C*08:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:203 protein. This plasmid can be used for constructing HLA-C*08:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:204 Protein Expression Plasmid Vector	PHLAP92526009	Plasmid vector containing HLA-C*08:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:204 protein. This plasmid can be used for constructing HLA-C*08:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:205 Protein Expression Plasmid Vector	PHLAP925260110	Plasmid vector containing HLA-C*08:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:205 protein. This plasmid can be used for constructing HLA-C*08:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:206 Protein Expression Plasmid Vector	PHLAP925260111	Plasmid vector containing HLA-C*08:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:206 protein. This plasmid can be used for constructing HLA-C*08:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:207:01 Protein Expression Plasmid Vector	PHLAP925260112	Plasmid vector containing HLA-C*08:207:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:207:01 protein. This plasmid can be used for constructing HLA-C*08:207:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:207:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:207:02 Protein Expression Plasmid Vector	PHLAP925260113	Plasmid vector containing HLA-C*08:207:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:207:02 protein. This plasmid can be used for constructing HLA-C*08:207:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:207:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:208N Protein Expression Plasmid Vector	PHLAP925260114	Plasmid vector containing HLA-C*08:208N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:208N protein. This plasmid can be used for constructing HLA-C*08:208N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:208N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:209 Protein Expression Plasmid Vector	PHLAP925260115	Plasmid vector containing HLA-C*08:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:209 protein. This plasmid can be used for constructing HLA-C*08:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:21 Protein Expression Plasmid Vector	PHLAP92526016	Plasmid vector containing HLA-C*08:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:21 protein. This plasmid can be used for constructing HLA-C*08:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:210 Protein Expression Plasmid Vector	PHLAP92526017	Plasmid vector containing HLA-C*08:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:210 protein. This plasmid can be used for constructing HLA-C*08:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:211 Protein Expression Plasmid Vector	PHLAP92526018	Plasmid vector containing HLA-C*08:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:211 protein. This plasmid can be used for constructing HLA-C*08:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:212 Protein Expression Plasmid Vector	PHLAP92526019	Plasmid vector containing HLA-C*08:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:212 protein. This plasmid can be used for constructing HLA-C*08:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:213 Protein Expression Plasmid Vector	PHLAP92526020	Plasmid vector containing HLA-C*08:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:213 protein. This plasmid can be used for constructing HLA-C*08:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:214:01N Protein Expression Plasmid Vector	PHLAP92526021	Plasmid vector containing HLA-C*08:214:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:214:01N protein. This plasmid can be used for constructing HLA-C*08:214:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:214:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:214:02N Protein Expression Plasmid Vector	PHLAP92526022	Plasmid vector containing HLA-C*08:214:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:214:02N protein. This plasmid can be used for constructing HLA-C*08:214:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:214:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:215 Protein Expression Plasmid Vector	PHLAP92526023	Plasmid vector containing HLA-C*08:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:215 protein. This plasmid can be used for constructing HLA-C*08:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:216 Protein Expression Plasmid Vector	PHLAP92526024	Plasmid vector containing HLA-C*08:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:216 protein. This plasmid can be used for constructing HLA-C*08:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:217 Protein Expression Plasmid Vector	PHLAP92526025	Plasmid vector containing HLA-C*08:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:217 protein. This plasmid can be used for constructing HLA-C*08:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:218 Protein Expression Plasmid Vector	PHLAP92526026	Plasmid vector containing HLA-C*08:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:218 protein. This plasmid can be used for constructing HLA-C*08:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:219 Protein Expression Plasmid Vector	PHLAP92526027	Plasmid vector containing HLA-C*08:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:219 protein. This plasmid can be used for constructing HLA-C*08:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:22:01:01 Protein Expression Plasmid Vector	PHLAP92526028	Plasmid vector containing HLA-C*08:22:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:22:01:01 protein. This plasmid can be used for constructing HLA-C*08:22:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:22:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:22:01:02 Protein Expression Plasmid Vector	PHLAP92526029	Plasmid vector containing HLA-C*08:22:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:22:01:02 protein. This plasmid can be used for constructing HLA-C*08:22:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:22:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:22:01:03 Protein Expression Plasmid Vector	PHLAP92526030	Plasmid vector containing HLA-C*08:22:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:22:01:03 protein. This plasmid can be used for constructing HLA-C*08:22:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:22:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:22:02 Protein Expression Plasmid Vector	PHLAP92526031	Plasmid vector containing HLA-C*08:22:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:22:02 protein. This plasmid can be used for constructing HLA-C*08:22:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:22:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:22:03 Protein Expression Plasmid Vector	PHLAP92526032	Plasmid vector containing HLA-C*08:22:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:22:03 protein. This plasmid can be used for constructing HLA-C*08:22:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:22:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:220 Protein Expression Plasmid Vector	PHLAP92526033	Plasmid vector containing HLA-C*08:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:220 protein. This plasmid can be used for constructing HLA-C*08:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:221 Protein Expression Plasmid Vector	PHLAP92526034	Plasmid vector containing HLA-C*08:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:221 protein. This plasmid can be used for constructing HLA-C*08:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:222 Protein Expression Plasmid Vector	PHLAP92526035	Plasmid vector containing HLA-C*08:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:222 protein. This plasmid can be used for constructing HLA-C*08:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:223 Protein Expression Plasmid Vector	PHLAP92526036	Plasmid vector containing HLA-C*08:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:223 protein. This plasmid can be used for constructing HLA-C*08:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:224N Protein Expression Plasmid Vector	PHLAP92526037	Plasmid vector containing HLA-C*08:224N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:224N protein. This plasmid can be used for constructing HLA-C*08:224N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:224N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:225Q Protein Expression Plasmid Vector	PHLAP92526038	Plasmid vector containing HLA-C*08:225Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:225Q protein. This plasmid can be used for constructing HLA-C*08:225Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:225Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:226 Protein Expression Plasmid Vector	PHLAP92526039	Plasmid vector containing HLA-C*08:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:226 protein. This plasmid can be used for constructing HLA-C*08:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:227 Protein Expression Plasmid Vector	PHLAP925260400	Plasmid vector containing HLA-C*08:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:227 protein. This plasmid can be used for constructing HLA-C*08:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:228 Protein Expression Plasmid Vector	PHLAP925260401	Plasmid vector containing HLA-C*08:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:228 protein. This plasmid can be used for constructing HLA-C*08:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:229 Protein Expression Plasmid Vector	PHLAP925260402	Plasmid vector containing HLA-C*08:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:229 protein. This plasmid can be used for constructing HLA-C*08:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:23 Protein Expression Plasmid Vector	PHLAP925260403	Plasmid vector containing HLA-C*08:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:23 protein. This plasmid can be used for constructing HLA-C*08:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:230 Protein Expression Plasmid Vector	PHLAP925260404	Plasmid vector containing HLA-C*08:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:230 protein. This plasmid can be used for constructing HLA-C*08:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:231 Protein Expression Plasmid Vector	PHLAP925260405	Plasmid vector containing HLA-C*08:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:231 protein. This plasmid can be used for constructing HLA-C*08:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:232 Protein Expression Plasmid Vector	PHLAP925260406	Plasmid vector containing HLA-C*08:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:232 protein. This plasmid can be used for constructing HLA-C*08:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:233 Protein Expression Plasmid Vector	PHLAP92526047	Plasmid vector containing HLA-C*08:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:233 protein. This plasmid can be used for constructing HLA-C*08:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:234 Protein Expression Plasmid Vector	PHLAP92526048	Plasmid vector containing HLA-C*08:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:234 protein. This plasmid can be used for constructing HLA-C*08:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:235 Protein Expression Plasmid Vector	PHLAP92526049	Plasmid vector containing HLA-C*08:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:235 protein. This plasmid can be used for constructing HLA-C*08:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:236N Protein Expression Plasmid Vector	PHLAP925260510	Plasmid vector containing HLA-C*08:236N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:236N protein. This plasmid can be used for constructing HLA-C*08:236N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:236N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:237 Protein Expression Plasmid Vector	PHLAP925260511	Plasmid vector containing HLA-C*08:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:237 protein. This plasmid can be used for constructing HLA-C*08:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:238 Protein Expression Plasmid Vector	PHLAP925260512	Plasmid vector containing HLA-C*08:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:238 protein. This plasmid can be used for constructing HLA-C*08:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:239 Protein Expression Plasmid Vector	PHLAP925260513	Plasmid vector containing HLA-C*08:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:239 protein. This plasmid can be used for constructing HLA-C*08:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:24 Protein Expression Plasmid Vector	PHLAP925260514	Plasmid vector containing HLA-C*08:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:24 protein. This plasmid can be used for constructing HLA-C*08:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:240 Protein Expression Plasmid Vector	PHLAP92526055	Plasmid vector containing HLA-C*08:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:240 protein. This plasmid can be used for constructing HLA-C*08:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:241 Protein Expression Plasmid Vector	PHLAP92526056	Plasmid vector containing HLA-C*08:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:241 protein. This plasmid can be used for constructing HLA-C*08:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:242 Protein Expression Plasmid Vector	PHLAP92526057	Plasmid vector containing HLA-C*08:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:242 protein. This plasmid can be used for constructing HLA-C*08:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:243 Protein Expression Plasmid Vector	PHLAP92526058	Plasmid vector containing HLA-C*08:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:243 protein. This plasmid can be used for constructing HLA-C*08:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:244 Protein Expression Plasmid Vector	PHLAP92526059	Plasmid vector containing HLA-C*08:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:244 protein. This plasmid can be used for constructing HLA-C*08:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:245 Protein Expression Plasmid Vector	PHLAP92526060	Plasmid vector containing HLA-C*08:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:245 protein. This plasmid can be used for constructing HLA-C*08:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:246 Protein Expression Plasmid Vector	PHLAP92526061	Plasmid vector containing HLA-C*08:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:246 protein. This plasmid can be used for constructing HLA-C*08:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:247 Protein Expression Plasmid Vector	PHLAP92526062	Plasmid vector containing HLA-C*08:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:247 protein. This plasmid can be used for constructing HLA-C*08:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:248 Protein Expression Plasmid Vector	PHLAP92526063	Plasmid vector containing HLA-C*08:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:248 protein. This plasmid can be used for constructing HLA-C*08:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:249 Protein Expression Plasmid Vector	PHLAP92526064	Plasmid vector containing HLA-C*08:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:249 protein. This plasmid can be used for constructing HLA-C*08:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:25 Protein Expression Plasmid Vector	PHLAP92526065	Plasmid vector containing HLA-C*08:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:25 protein. This plasmid can be used for constructing HLA-C*08:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:250 Protein Expression Plasmid Vector	PHLAP92526066	Plasmid vector containing HLA-C*08:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:250 protein. This plasmid can be used for constructing HLA-C*08:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:251 Protein Expression Plasmid Vector	PHLAP92526067	Plasmid vector containing HLA-C*08:251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:251 protein. This plasmid can be used for constructing HLA-C*08:251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:252 Protein Expression Plasmid Vector	PHLAP92526068	Plasmid vector containing HLA-C*08:252 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:252 protein. This plasmid can be used for constructing HLA-C*08:252 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:252 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:253 Protein Expression Plasmid Vector	PHLAP92526069	Plasmid vector containing HLA-C*08:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:253 protein. This plasmid can be used for constructing HLA-C*08:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:254 Protein Expression Plasmid Vector	PHLAP925260670	Plasmid vector containing HLA-C*08:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:254 protein. This plasmid can be used for constructing HLA-C*08:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:255 Protein Expression Plasmid Vector	PHLAP92526071	Plasmid vector containing HLA-C*08:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:255 protein. This plasmid can be used for constructing HLA-C*08:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:256 Protein Expression Plasmid Vector	PHLAP92526072	Plasmid vector containing HLA-C*08:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:256 protein. This plasmid can be used for constructing HLA-C*08:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:257 Protein Expression Plasmid Vector	PHLAP92526073	Plasmid vector containing HLA-C*08:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:257 protein. This plasmid can be used for constructing HLA-C*08:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:258 Protein Expression Plasmid Vector	PHLAP92526074	Plasmid vector containing HLA-C*08:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:258 protein. This plasmid can be used for constructing HLA-C*08:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:259 Protein Expression Plasmid Vector	PHLAP92526075	Plasmid vector containing HLA-C*08:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:259 protein. This plasmid can be used for constructing HLA-C*08:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:260 Protein Expression Plasmid Vector	PHLAP92526076	Plasmid vector containing HLA-C*08:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:260 protein. This plasmid can be used for constructing HLA-C*08:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:261 Protein Expression Plasmid Vector	PHLAP92526077	Plasmid vector containing HLA-C*08:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:261 protein. This plasmid can be used for constructing HLA-C*08:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:262 Protein Expression Plasmid Vector	PHLAP92526078	Plasmid vector containing HLA-C*08:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:262 protein. This plasmid can be used for constructing HLA-C*08:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:263 Protein Expression Plasmid Vector	PHLAP92526079	Plasmid vector containing HLA-C*08:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:263 protein. This plasmid can be used for constructing HLA-C*08:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:264 Protein Expression Plasmid Vector	PHLAP92526080	Plasmid vector containing HLA-C*08:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:264 protein. This plasmid can be used for constructing HLA-C*08:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:265 Protein Expression Plasmid Vector	PHLAP92526081	Plasmid vector containing HLA-C*08:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:265 protein. This plasmid can be used for constructing HLA-C*08:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:266 Protein Expression Plasmid Vector	PHLAP92526082	Plasmid vector containing HLA-C*08:266 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:266 protein. This plasmid can be used for constructing HLA-C*08:266 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:266 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:267 Protein Expression Plasmid Vector	PHLAP92526083	Plasmid vector containing HLA-C*08:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:267 protein. This plasmid can be used for constructing HLA-C*08:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:268 Protein Expression Plasmid Vector	PHLAP92526084	Plasmid vector containing HLA-C*08:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:268 protein. This plasmid can be used for constructing HLA-C*08:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:269 Protein Expression Plasmid Vector	PHLAP92526085	Plasmid vector containing HLA-C*08:269 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:269 protein. This plasmid can be used for constructing HLA-C*08:269 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:269 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:26N Protein Expression Plasmid Vector	PHLAP92526086	Plasmid vector containing HLA-C*08:26N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:26N protein. This plasmid can be used for constructing HLA-C*08:26N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:26N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:27 Protein Expression Plasmid Vector	PHLAP92526087	Plasmid vector containing HLA-C*08:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:27 protein. This plasmid can be used for constructing HLA-C*08:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:270 Protein Expression Plasmid Vector	PHLAP92526088	Plasmid vector containing HLA-C*08:270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:270 protein. This plasmid can be used for constructing HLA-C*08:270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:271 Protein Expression Plasmid Vector	PHLAP92526089	Plasmid vector containing HLA-C*08:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:271 protein. This plasmid can be used for constructing HLA-C*08:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:272 Protein Expression Plasmid Vector	PHLAP925260910	Plasmid vector containing HLA-C*08:272 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:272 protein. This plasmid can be used for constructing HLA-C*08:272 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:272 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:273 Protein Expression Plasmid Vector	PHLAP925260911	Plasmid vector containing HLA-C*08:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:273 protein. This plasmid can be used for constructing HLA-C*08:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:274 Protein Expression Plasmid Vector	PHLAP925260912	Plasmid vector containing HLA-C*08:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:274 protein. This plasmid can be used for constructing HLA-C*08:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:275 Protein Expression Plasmid Vector	PHLAP925260913	Plasmid vector containing HLA-C*08:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:275 protein. This plasmid can be used for constructing HLA-C*08:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:276 Protein Expression Plasmid Vector	PHLAP925260914	Plasmid vector containing HLA-C*08:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:276 protein. This plasmid can be used for constructing HLA-C*08:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:277 Protein Expression Plasmid Vector	PHLAP92526095	Plasmid vector containing HLA-C*08:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:277 protein. This plasmid can be used for constructing HLA-C*08:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:278 Protein Expression Plasmid Vector	PHLAP92526096	Plasmid vector containing HLA-C*08:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:278 protein. This plasmid can be used for constructing HLA-C*08:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:279 Protein Expression Plasmid Vector	PHLAP92526097	Plasmid vector containing HLA-C*08:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:279 protein. This plasmid can be used for constructing HLA-C*08:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:28 Protein Expression Plasmid Vector	PHLAP92526098	Plasmid vector containing HLA-C*08:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:28 protein. This plasmid can be used for constructing HLA-C*08:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:280 Protein Expression Plasmid Vector	PHLAP92526099	Plasmid vector containing HLA-C*08:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:280 protein. This plasmid can be used for constructing HLA-C*08:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:281 Protein Expression Plasmid Vector	PHLAP925261000	Plasmid vector containing HLA-C*08:281 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:281 protein. This plasmid can be used for constructing HLA-C*08:281 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:281 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:282 Protein Expression Plasmid Vector	PHLAP925261001	Plasmid vector containing HLA-C*08:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:282 protein. This plasmid can be used for constructing HLA-C*08:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:283 Protein Expression Plasmid Vector	PHLAP925261002	Plasmid vector containing HLA-C*08:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:283 protein. This plasmid can be used for constructing HLA-C*08:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:284 Protein Expression Plasmid Vector	PHLAP92526103	Plasmid vector containing HLA-C*08:284 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:284 protein. This plasmid can be used for constructing HLA-C*08:284 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:284 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:285 Protein Expression Plasmid Vector	PHLAP92526104	Plasmid vector containing HLA-C*08:285 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:285 protein. This plasmid can be used for constructing HLA-C*08:285 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:285 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:286 Protein Expression Plasmid Vector	PHLAP92526105	Plasmid vector containing HLA-C*08:286 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:286 protein. This plasmid can be used for constructing HLA-C*08:286 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:286 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:287 Protein Expression Plasmid Vector	PHLAP92526106	Plasmid vector containing HLA-C*08:287 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:287 protein. This plasmid can be used for constructing HLA-C*08:287 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:287 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:288 Protein Expression Plasmid Vector	PHLAP92526107	Plasmid vector containing HLA-C*08:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:288 protein. This plasmid can be used for constructing HLA-C*08:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:289 Protein Expression Plasmid Vector	PHLAP92526108	Plasmid vector containing HLA-C*08:289 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:289 protein. This plasmid can be used for constructing HLA-C*08:289 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:289 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:29 Protein Expression Plasmid Vector	PHLAP92526109	Plasmid vector containing HLA-C*08:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:29 protein. This plasmid can be used for constructing HLA-C*08:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:290 Protein Expression Plasmid Vector	PHLAP92526110	Plasmid vector containing HLA-C*08:290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:290 protein. This plasmid can be used for constructing HLA-C*08:290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:291 Protein Expression Plasmid Vector	PHLAP92526111	Plasmid vector containing HLA-C*08:291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:291 protein. This plasmid can be used for constructing HLA-C*08:291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:292Q Protein Expression Plasmid Vector	PHLAP92526112	Plasmid vector containing HLA-C*08:292Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:292Q protein. This plasmid can be used for constructing HLA-C*08:292Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:292Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:293 Protein Expression Plasmid Vector	PHLAP92526113	Plasmid vector containing HLA-C*08:293 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:293 protein. This plasmid can be used for constructing HLA-C*08:293 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:293 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:294 Protein Expression Plasmid Vector	PHLAP92526114	Plasmid vector containing HLA-C*08:294 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:294 protein. This plasmid can be used for constructing HLA-C*08:294 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:294 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:295 Protein Expression Plasmid Vector	PHLAP92526115	Plasmid vector containing HLA-C*08:295 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:295 protein. This plasmid can be used for constructing HLA-C*08:295 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:295 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:296 Protein Expression Plasmid Vector	PHLAP92526116	Plasmid vector containing HLA-C*08:296 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:296 protein. This plasmid can be used for constructing HLA-C*08:296 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:296 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:297 Protein Expression Plasmid Vector	PHLAP92526117	Plasmid vector containing HLA-C*08:297 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:297 protein. This plasmid can be used for constructing HLA-C*08:297 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:297 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:298 Protein Expression Plasmid Vector	PHLAP92526118	Plasmid vector containing HLA-C*08:298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:298 protein. This plasmid can be used for constructing HLA-C*08:298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:299 Protein Expression Plasmid Vector	PHLAP92526119	Plasmid vector containing HLA-C*08:299 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:299 protein. This plasmid can be used for constructing HLA-C*08:299 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:299 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:30 Protein Expression Plasmid Vector	PHLAP92526120	Plasmid vector containing HLA-C*08:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:30 protein. This plasmid can be used for constructing HLA-C*08:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:300 Protein Expression Plasmid Vector	PHLAP92526121	Plasmid vector containing HLA-C*08:300 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:300 protein. This plasmid can be used for constructing HLA-C*08:300 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:300 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:301 Protein Expression Plasmid Vector	PHLAP92526122	Plasmid vector containing HLA-C*08:301 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:301 protein. This plasmid can be used for constructing HLA-C*08:301 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:301 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:302N Protein Expression Plasmid Vector	PHLAP92526123	Plasmid vector containing HLA-C*08:302N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:302N protein. This plasmid can be used for constructing HLA-C*08:302N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:302N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:303N Protein Expression Plasmid Vector	PHLAP92526124	Plasmid vector containing HLA-C*08:303N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:303N protein. This plasmid can be used for constructing HLA-C*08:303N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:303N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:304 Protein Expression Plasmid Vector	PHLAP92526125	Plasmid vector containing HLA-C*08:304 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:304 protein. This plasmid can be used for constructing HLA-C*08:304 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:304 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:305Q Protein Expression Plasmid Vector	PHLAP92526126	Plasmid vector containing HLA-C*08:305Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:305Q protein. This plasmid can be used for constructing HLA-C*08:305Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:305Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:306 Protein Expression Plasmid Vector	PHLAP92526127	Plasmid vector containing HLA-C*08:306 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:306 protein. This plasmid can be used for constructing HLA-C*08:306 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:306 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:307N Protein Expression Plasmid Vector	PHLAP92526128	Plasmid vector containing HLA-C*08:307N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:307N protein. This plasmid can be used for constructing HLA-C*08:307N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:307N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:308 Protein Expression Plasmid Vector	PHLAP92526129	Plasmid vector containing HLA-C*08:308 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:308 protein. This plasmid can be used for constructing HLA-C*08:308 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:308 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:31 Protein Expression Plasmid Vector	PHLAP92526130	Plasmid vector containing HLA-C*08:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:31 protein. This plasmid can be used for constructing HLA-C*08:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:32 Protein Expression Plasmid Vector	PHLAP92526131	Plasmid vector containing HLA-C*08:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:32 protein. This plasmid can be used for constructing HLA-C*08:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:33:01 Protein Expression Plasmid Vector	PHLAP92526132	Plasmid vector containing HLA-C*08:33:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:33:01 protein. This plasmid can be used for constructing HLA-C*08:33:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:33:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:33:02 Protein Expression Plasmid Vector	PHLAP92526133	Plasmid vector containing HLA-C*08:33:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:33:02 protein. This plasmid can be used for constructing HLA-C*08:33:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:33:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:33:03 Protein Expression Plasmid Vector	PHLAP92526134	Plasmid vector containing HLA-C*08:33:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:33:03 protein. This plasmid can be used for constructing HLA-C*08:33:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:33:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:33:04 Protein Expression Plasmid Vector	PHLAP92526135	Plasmid vector containing HLA-C*08:33:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:33:04 protein. This plasmid can be used for constructing HLA-C*08:33:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:33:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:33:05 Protein Expression Plasmid Vector	PHLAP92526136	Plasmid vector containing HLA-C*08:33:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:33:05 protein. This plasmid can be used for constructing HLA-C*08:33:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:33:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:33:06 Protein Expression Plasmid Vector	PHLAP92526137	Plasmid vector containing HLA-C*08:33:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:33:06 protein. This plasmid can be used for constructing HLA-C*08:33:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:33:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:34 Protein Expression Plasmid Vector	PHLAP92526138	Plasmid vector containing HLA-C*08:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:34 protein. This plasmid can be used for constructing HLA-C*08:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:35 Protein Expression Plasmid Vector	PHLAP92526139	Plasmid vector containing HLA-C*08:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:35 protein. This plasmid can be used for constructing HLA-C*08:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:36N Protein Expression Plasmid Vector	PHLAP92526140	Plasmid vector containing HLA-C*08:36N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:36N protein. This plasmid can be used for constructing HLA-C*08:36N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:36N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:37 Protein Expression Plasmid Vector	PHLAP92526141	Plasmid vector containing HLA-C*08:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:37 protein. This plasmid can be used for constructing HLA-C*08:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:38 Protein Expression Plasmid Vector	PHLAP92526142	Plasmid vector containing HLA-C*08:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:38 protein. This plasmid can be used for constructing HLA-C*08:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:39 Protein Expression Plasmid Vector	PHLAP92526143	Plasmid vector containing HLA-C*08:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:39 protein. This plasmid can be used for constructing HLA-C*08:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:40 Protein Expression Plasmid Vector	PHLAP92526144	Plasmid vector containing HLA-C*08:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:40 protein. This plasmid can be used for constructing HLA-C*08:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:41 Protein Expression Plasmid Vector	PHLAP92526145	Plasmid vector containing HLA-C*08:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:41 protein. This plasmid can be used for constructing HLA-C*08:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:42 Protein Expression Plasmid Vector	PHLAP92526146	Plasmid vector containing HLA-C*08:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:42 protein. This plasmid can be used for constructing HLA-C*08:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:43 Protein Expression Plasmid Vector	PHLAP92526147	Plasmid vector containing HLA-C*08:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:43 protein. This plasmid can be used for constructing HLA-C*08:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:44 Protein Expression Plasmid Vector	PHLAP92526148	Plasmid vector containing HLA-C*08:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:44 protein. This plasmid can be used for constructing HLA-C*08:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:45 Protein Expression Plasmid Vector	PHLAP92526149	Plasmid vector containing HLA-C*08:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:45 protein. This plasmid can be used for constructing HLA-C*08:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:46 Protein Expression Plasmid Vector	PHLAP92526150	Plasmid vector containing HLA-C*08:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:46 protein. This plasmid can be used for constructing HLA-C*08:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:47 Protein Expression Plasmid Vector	PHLAP92526151	Plasmid vector containing HLA-C*08:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:47 protein. This plasmid can be used for constructing HLA-C*08:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:48 Protein Expression Plasmid Vector	PHLAP92526152	Plasmid vector containing HLA-C*08:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:48 protein. This plasmid can be used for constructing HLA-C*08:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:49 Protein Expression Plasmid Vector	PHLAP92526153	Plasmid vector containing HLA-C*08:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:49 protein. This plasmid can be used for constructing HLA-C*08:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:50 Protein Expression Plasmid Vector	PHLAP92526154	Plasmid vector containing HLA-C*08:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:50 protein. This plasmid can be used for constructing HLA-C*08:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:51 Protein Expression Plasmid Vector	PHLAP92526155	Plasmid vector containing HLA-C*08:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:51 protein. This plasmid can be used for constructing HLA-C*08:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:52N Protein Expression Plasmid Vector	PHLAP92526156	Plasmid vector containing HLA-C*08:52N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:52N protein. This plasmid can be used for constructing HLA-C*08:52N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:52N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:53 Protein Expression Plasmid Vector	PHLAP92526157	Plasmid vector containing HLA-C*08:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:53 protein. This plasmid can be used for constructing HLA-C*08:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:54 Protein Expression Plasmid Vector	PHLAP92526158	Plasmid vector containing HLA-C*08:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:54 protein. This plasmid can be used for constructing HLA-C*08:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:55N Protein Expression Plasmid Vector	PHLAP92526159	Plasmid vector containing HLA-C*08:55N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:55N protein. This plasmid can be used for constructing HLA-C*08:55N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:55N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:56 Protein Expression Plasmid Vector	PHLAP92526160	Plasmid vector containing HLA-C*08:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:56 protein. This plasmid can be used for constructing HLA-C*08:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:57 Protein Expression Plasmid Vector	PHLAP92526161	Plasmid vector containing HLA-C*08:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:57 protein. This plasmid can be used for constructing HLA-C*08:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:58 Protein Expression Plasmid Vector	PHLAP92526162	Plasmid vector containing HLA-C*08:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:58 protein. This plasmid can be used for constructing HLA-C*08:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:59 Protein Expression Plasmid Vector	PHLAP92526163	Plasmid vector containing HLA-C*08:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:59 protein. This plasmid can be used for constructing HLA-C*08:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:60 Protein Expression Plasmid Vector	PHLAP92526164	Plasmid vector containing HLA-C*08:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:60 protein. This plasmid can be used for constructing HLA-C*08:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:61 Protein Expression Plasmid Vector	PHLAP92526165	Plasmid vector containing HLA-C*08:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:61 protein. This plasmid can be used for constructing HLA-C*08:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:62:01 Protein Expression Plasmid Vector	PHLAP92526166	Plasmid vector containing HLA-C*08:62:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:62:01 protein. This plasmid can be used for constructing HLA-C*08:62:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:62:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:62:02 Protein Expression Plasmid Vector	PHLAP92526167	Plasmid vector containing HLA-C*08:62:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:62:02 protein. This plasmid can be used for constructing HLA-C*08:62:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:62:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:63 Protein Expression Plasmid Vector	PHLAP92526168	Plasmid vector containing HLA-C*08:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:63 protein. This plasmid can be used for constructing HLA-C*08:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:64 Protein Expression Plasmid Vector	PHLAP92526169	Plasmid vector containing HLA-C*08:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:64 protein. This plasmid can be used for constructing HLA-C*08:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:65 Protein Expression Plasmid Vector	PHLAP92526170	Plasmid vector containing HLA-C*08:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:65 protein. This plasmid can be used for constructing HLA-C*08:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:66 Protein Expression Plasmid Vector	PHLAP92526171	Plasmid vector containing HLA-C*08:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:66 protein. This plasmid can be used for constructing HLA-C*08:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:67 Protein Expression Plasmid Vector	PHLAP92526172	Plasmid vector containing HLA-C*08:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:67 protein. This plasmid can be used for constructing HLA-C*08:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:68 Protein Expression Plasmid Vector	PHLAP92526173	Plasmid vector containing HLA-C*08:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:68 protein. This plasmid can be used for constructing HLA-C*08:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:69 Protein Expression Plasmid Vector	PHLAP92526174	Plasmid vector containing HLA-C*08:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:69 protein. This plasmid can be used for constructing HLA-C*08:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:70Q Protein Expression Plasmid Vector	PHLAP92526175	Plasmid vector containing HLA-C*08:70Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:70Q protein. This plasmid can be used for constructing HLA-C*08:70Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:70Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:71 Protein Expression Plasmid Vector	PHLAP92526176	Plasmid vector containing HLA-C*08:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:71 protein. This plasmid can be used for constructing HLA-C*08:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:72:01 Protein Expression Plasmid Vector	PHLAP92526177	Plasmid vector containing HLA-C*08:72:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:72:01 protein. This plasmid can be used for constructing HLA-C*08:72:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:72:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:72:02 Protein Expression Plasmid Vector	PHLAP92526178	Plasmid vector containing HLA-C*08:72:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:72:02 protein. This plasmid can be used for constructing HLA-C*08:72:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:72:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:73 Protein Expression Plasmid Vector	PHLAP92526179	Plasmid vector containing HLA-C*08:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:73 protein. This plasmid can be used for constructing HLA-C*08:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:74 Protein Expression Plasmid Vector	PHLAP92526180	Plasmid vector containing HLA-C*08:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:74 protein. This plasmid can be used for constructing HLA-C*08:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:75 Protein Expression Plasmid Vector	PHLAP92526181	Plasmid vector containing HLA-C*08:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:75 protein. This plasmid can be used for constructing HLA-C*08:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:76 Protein Expression Plasmid Vector	PHLAP92526182	Plasmid vector containing HLA-C*08:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:76 protein. This plasmid can be used for constructing HLA-C*08:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:77 Protein Expression Plasmid Vector	PHLAP92526183	Plasmid vector containing HLA-C*08:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:77 protein. This plasmid can be used for constructing HLA-C*08:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:78 Protein Expression Plasmid Vector	PHLAP92526184	Plasmid vector containing HLA-C*08:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:78 protein. This plasmid can be used for constructing HLA-C*08:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:79 Protein Expression Plasmid Vector	PHLAP92526185	Plasmid vector containing HLA-C*08:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:79 protein. This plasmid can be used for constructing HLA-C*08:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:80 Protein Expression Plasmid Vector	PHLAP92526186	Plasmid vector containing HLA-C*08:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:80 protein. This plasmid can be used for constructing HLA-C*08:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:81 Protein Expression Plasmid Vector	PHLAP92526187	Plasmid vector containing HLA-C*08:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:81 protein. This plasmid can be used for constructing HLA-C*08:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:82 Protein Expression Plasmid Vector	PHLAP92526188	Plasmid vector containing HLA-C*08:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:82 protein. This plasmid can be used for constructing HLA-C*08:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:83 Protein Expression Plasmid Vector	PHLAP92526189	Plasmid vector containing HLA-C*08:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:83 protein. This plasmid can be used for constructing HLA-C*08:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:84 Protein Expression Plasmid Vector	PHLAP92526190	Plasmid vector containing HLA-C*08:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:84 protein. This plasmid can be used for constructing HLA-C*08:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:85 Protein Expression Plasmid Vector	PHLAP92526191	Plasmid vector containing HLA-C*08:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:85 protein. This plasmid can be used for constructing HLA-C*08:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:86 Protein Expression Plasmid Vector	PHLAP92526192	Plasmid vector containing HLA-C*08:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:86 protein. This plasmid can be used for constructing HLA-C*08:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:87 Protein Expression Plasmid Vector	PHLAP92526193	Plasmid vector containing HLA-C*08:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:87 protein. This plasmid can be used for constructing HLA-C*08:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:88N Protein Expression Plasmid Vector	PHLAP92526194	Plasmid vector containing HLA-C*08:88N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:88N protein. This plasmid can be used for constructing HLA-C*08:88N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:88N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:89N Protein Expression Plasmid Vector	PHLAP92526195	Plasmid vector containing HLA-C*08:89N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:89N protein. This plasmid can be used for constructing HLA-C*08:89N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:89N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:90 Protein Expression Plasmid Vector	PHLAP92526196	Plasmid vector containing HLA-C*08:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:90 protein. This plasmid can be used for constructing HLA-C*08:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:91 Protein Expression Plasmid Vector	PHLAP92526197	Plasmid vector containing HLA-C*08:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:91 protein. This plasmid can be used for constructing HLA-C*08:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:92 Protein Expression Plasmid Vector	PHLAP92526198	Plasmid vector containing HLA-C*08:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:92 protein. This plasmid can be used for constructing HLA-C*08:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*08:93 Protein Expression Plasmid Vector	PHLAP92526199	Plasmid vector containing HLA-C*08:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:93 protein. This plasmid can be used for constructing HLA-C*08:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:94 Protein Expression Plasmid Vector	PHLAP92526200	Plasmid vector containing HLA-C*08:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:94 protein. This plasmid can be used for constructing HLA-C*08:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:95 Protein Expression Plasmid Vector	PHLAP92526201	Plasmid vector containing HLA-C*08:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:95 protein. This plasmid can be used for constructing HLA-C*08:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:96 Protein Expression Plasmid Vector	PHLAP92526202	Plasmid vector containing HLA-C*08:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:96 protein. This plasmid can be used for constructing HLA-C*08:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:97 Protein Expression Plasmid Vector	PHLAP92526203	Plasmid vector containing HLA-C*08:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:97 protein. This plasmid can be used for constructing HLA-C*08:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:98 Protein Expression Plasmid Vector	PHLAP92526204	Plasmid vector containing HLA-C*08:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:98 protein. This plasmid can be used for constructing HLA-C*08:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*08:99 Protein Expression Plasmid Vector	PHLAP92526205	Plasmid vector containing HLA-C*08:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*08:99 protein. This plasmid can be used for constructing HLA-C*08:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*08:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:01 Protein Expression Plasmid Vector	PHLAP92526206	Plasmid vector containing HLA-C*12:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:01 protein. This plasmid can be used for constructing HLA-C*12:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:02:01 Protein Expression Plasmid Vector	PHLAP92526207	Plasmid vector containing HLA-C*12:02:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:01 protein. This plasmid can be used for constructing HLA-C*12:02:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:02 Protein Expression Plasmid Vector	PHLAP92526208	Plasmid vector containing HLA-C*12:02:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:02 protein. This plasmid can be used for constructing HLA-C*12:02:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:03 Protein Expression Plasmid Vector	PHLAP92526209	Plasmid vector containing HLA-C*12:02:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:03 protein. This plasmid can be used for constructing HLA-C*12:02:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:04 Protein Expression Plasmid Vector	PHLAP925262110	Plasmid vector containing HLA-C*12:02:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:04 protein. This plasmid can be used for constructing HLA-C*12:02:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:05 Protein Expression Plasmid Vector	PHLAP925262111	Plasmid vector containing HLA-C*12:02:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:05 protein. This plasmid can be used for constructing HLA-C*12:02:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:06 Protein Expression Plasmid Vector	PHLAP925262112	Plasmid vector containing HLA-C*12:02:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:06 protein. This plasmid can be used for constructing HLA-C*12:02:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:07 Protein Expression Plasmid Vector	PHLAP925262113	Plasmid vector containing HLA-C*12:02:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:07 protein. This plasmid can be used for constructing HLA-C*12:02:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:02:08 Protein Expression Plasmid Vector	PHLAP92526214	Plasmid vector containing HLA-C*12:02:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:08 protein. This plasmid can be used for constructing HLA-C*12:02:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:09 Protein Expression Plasmid Vector	PHLAP92526215	Plasmid vector containing HLA-C*12:02:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:09 protein. This plasmid can be used for constructing HLA-C*12:02:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:10 Protein Expression Plasmid Vector	PHLAP92526216	Plasmid vector containing HLA-C*12:02:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:10 protein. This plasmid can be used for constructing HLA-C*12:02:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:11 Protein Expression Plasmid Vector	PHLAP92526217	Plasmid vector containing HLA-C*12:02:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:11 protein. This plasmid can be used for constructing HLA-C*12:02:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:12 Protein Expression Plasmid Vector	PHLAP92526218	Plasmid vector containing HLA-C*12:02:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:12 protein. This plasmid can be used for constructing HLA-C*12:02:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:13 Protein Expression Plasmid Vector	PHLAP92526219	Plasmid vector containing HLA-C*12:02:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:13 protein. This plasmid can be used for constructing HLA-C*12:02:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:14 Protein Expression Plasmid Vector	PHLAP92526220	Plasmid vector containing HLA-C*12:02:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:14 protein. This plasmid can be used for constructing HLA-C*12:02:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:02:15 Protein Expression Plasmid Vector	PHLAP92526221	Plasmid vector containing HLA-C*12:02:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:15 protein. This plasmid can be used for constructing HLA-C*12:02:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:16 Protein Expression Plasmid Vector	PHLAP92526222	Plasmid vector containing HLA-C*12:02:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:16 protein. This plasmid can be used for constructing HLA-C*12:02:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:17 Protein Expression Plasmid Vector	PHLAP92526223	Plasmid vector containing HLA-C*12:02:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:17 protein. This plasmid can be used for constructing HLA-C*12:02:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:18 Protein Expression Plasmid Vector	PHLAP92526224	Plasmid vector containing HLA-C*12:02:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:18 protein. This plasmid can be used for constructing HLA-C*12:02:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:19 Protein Expression Plasmid Vector	PHLAP92526225	Plasmid vector containing HLA-C*12:02:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:19 protein. This plasmid can be used for constructing HLA-C*12:02:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:20 Protein Expression Plasmid Vector	PHLAP92526226	Plasmid vector containing HLA-C*12:02:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:20 protein. This plasmid can be used for constructing HLA-C*12:02:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:21 Protein Expression Plasmid Vector	PHLAP92526227	Plasmid vector containing HLA-C*12:02:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:21 protein. This plasmid can be used for constructing HLA-C*12:02:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:02:22 Protein Expression Plasmid Vector	PHLAP92526228	Plasmid vector containing HLA-C*12:02:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:22 protein. This plasmid can be used for constructing HLA-C*12:02:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:23 Protein Expression Plasmid Vector	PHLAP92526229	Plasmid vector containing HLA-C*12:02:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:23 protein. This plasmid can be used for constructing HLA-C*12:02:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:24Q Protein Expression Plasmid Vector	PHLAP925262310	Plasmid vector containing HLA-C*12:02:02:24Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:24Q protein. This plasmid can be used for constructing HLA-C*12:02:02:24Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:24Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:25 Protein Expression Plasmid Vector	PHLAP925262311	Plasmid vector containing HLA-C*12:02:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:25 protein. This plasmid can be used for constructing HLA-C*12:02:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:26Q Protein Expression Plasmid Vector	PHLAP925262312	Plasmid vector containing HLA-C*12:02:02:26Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:26Q protein. This plasmid can be used for constructing HLA-C*12:02:02:26Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:26Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:27 Protein Expression Plasmid Vector	PHLAP925262313	Plasmid vector containing HLA-C*12:02:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:27 protein. This plasmid can be used for constructing HLA-C*12:02:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:02:28 Protein Expression Plasmid Vector	PHLAP925262314	Plasmid vector containing HLA-C*12:02:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:28 protein. This plasmid can be used for constructing HLA-C*12:02:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:02:29 Protein Expression Plasmid Vector	PHLAP92526235	Plasmid vector containing HLA-C*12:02:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:02:29 protein. This plasmid can be used for constructing HLA-C*12:02:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:03 Protein Expression Plasmid Vector	PHLAP92526236	Plasmid vector containing HLA-C*12:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:03 protein. This plasmid can be used for constructing HLA-C*12:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:04 Protein Expression Plasmid Vector	PHLAP92526237	Plasmid vector containing HLA-C*12:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:04 protein. This plasmid can be used for constructing HLA-C*12:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:05 Protein Expression Plasmid Vector	PHLAP92526238	Plasmid vector containing HLA-C*12:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:05 protein. This plasmid can be used for constructing HLA-C*12:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:06 Protein Expression Plasmid Vector	PHLAP92526239	Plasmid vector containing HLA-C*12:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:06 protein. This plasmid can be used for constructing HLA-C*12:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:07 Protein Expression Plasmid Vector	PHLAP925262400	Plasmid vector containing HLA-C*12:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:07 protein. This plasmid can be used for constructing HLA-C*12:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:08 Protein Expression Plasmid Vector	PHLAP925262401	Plasmid vector containing HLA-C*12:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:08 protein. This plasmid can be used for constructing HLA-C*12:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:09 Protein Expression Plasmid Vector	PHLAP925262402	Plasmid vector containing HLA-C*12:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:09 protein. This plasmid can be used for constructing HLA-C*12:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:10 Protein Expression Plasmid Vector	PHLAP92526243	Plasmid vector containing HLA-C*12:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:10 protein. This plasmid can be used for constructing HLA-C*12:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:11 Protein Expression Plasmid Vector	PHLAP92526244	Plasmid vector containing HLA-C*12:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:11 protein. This plasmid can be used for constructing HLA-C*12:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:12 Protein Expression Plasmid Vector	PHLAP92526245	Plasmid vector containing HLA-C*12:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:12 protein. This plasmid can be used for constructing HLA-C*12:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:13 Protein Expression Plasmid Vector	PHLAP92526246	Plasmid vector containing HLA-C*12:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:13 protein. This plasmid can be used for constructing HLA-C*12:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:14 Protein Expression Plasmid Vector	PHLAP92526247	Plasmid vector containing HLA-C*12:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:14 protein. This plasmid can be used for constructing HLA-C*12:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:15 Protein Expression Plasmid Vector	PHLAP92526248	Plasmid vector containing HLA-C*12:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:15 protein. This plasmid can be used for constructing HLA-C*12:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:16 Protein Expression Plasmid Vector	PHLAP92526249	Plasmid vector containing HLA-C*12:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:16 protein. This plasmid can be used for constructing HLA-C*12:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:17 Protein Expression Plasmid Vector	PHLAP92526250	Plasmid vector containing HLA-C*12:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:17 protein. This plasmid can be used for constructing HLA-C*12:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:18 Protein Expression Plasmid Vector	PHLAP92526251	Plasmid vector containing HLA-C*12:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:18 protein. This plasmid can be used for constructing HLA-C*12:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:19 Protein Expression Plasmid Vector	PHLAP92526252	Plasmid vector containing HLA-C*12:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:19 protein. This plasmid can be used for constructing HLA-C*12:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:20 Protein Expression Plasmid Vector	PHLAP92526253	Plasmid vector containing HLA-C*12:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:20 protein. This plasmid can be used for constructing HLA-C*12:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:21 Protein Expression Plasmid Vector	PHLAP92526254	Plasmid vector containing HLA-C*12:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:21 protein. This plasmid can be used for constructing HLA-C*12:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:22 Protein Expression Plasmid Vector	PHLAP92526255	Plasmid vector containing HLA-C*12:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:22 protein. This plasmid can be used for constructing HLA-C*12:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:23 Protein Expression Plasmid Vector	PHLAP92526256	Plasmid vector containing HLA-C*12:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:23 protein. This plasmid can be used for constructing HLA-C*12:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:24 Protein Expression Plasmid Vector	PHLAP92526257	Plasmid vector containing HLA-C*12:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:24 protein. This plasmid can be used for constructing HLA-C*12:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:25 Protein Expression Plasmid Vector	PHLAP92526258	Plasmid vector containing HLA-C*12:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:25 protein. This plasmid can be used for constructing HLA-C*12:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:26 Protein Expression Plasmid Vector	PHLAP92526259	Plasmid vector containing HLA-C*12:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:26 protein. This plasmid can be used for constructing HLA-C*12:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:27 Protein Expression Plasmid Vector	PHLAP92526260	Plasmid vector containing HLA-C*12:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:27 protein. This plasmid can be used for constructing HLA-C*12:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:28 Protein Expression Plasmid Vector	PHLAP92526261	Plasmid vector containing HLA-C*12:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:28 protein. This plasmid can be used for constructing HLA-C*12:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:29 Protein Expression Plasmid Vector	PHLAP92526262	Plasmid vector containing HLA-C*12:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:29 protein. This plasmid can be used for constructing HLA-C*12:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:30 Protein Expression Plasmid Vector	PHLAP92526263	Plasmid vector containing HLA-C*12:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:30 protein. This plasmid can be used for constructing HLA-C*12:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:31 Protein Expression Plasmid Vector	PHLAP92526264	Plasmid vector containing HLA-C*12:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:31 protein. This plasmid can be used for constructing HLA-C*12:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:32 Protein Expression Plasmid Vector	PHLAP92526265	Plasmid vector containing HLA-C*12:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:32 protein. This plasmid can be used for constructing HLA-C*12:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:33 Protein Expression Plasmid Vector	PHLAP92526266	Plasmid vector containing HLA-C*12:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:33 protein. This plasmid can be used for constructing HLA-C*12:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:34 Protein Expression Plasmid Vector	PHLAP92526267	Plasmid vector containing HLA-C*12:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:34 protein. This plasmid can be used for constructing HLA-C*12:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:35 Protein Expression Plasmid Vector	PHLAP92526268	Plasmid vector containing HLA-C*12:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:35 protein. This plasmid can be used for constructing HLA-C*12:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:36 Protein Expression Plasmid Vector	PHLAP92526269	Plasmid vector containing HLA-C*12:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:36 protein. This plasmid can be used for constructing HLA-C*12:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:37 Protein Expression Plasmid Vector	PHLAP92526270	Plasmid vector containing HLA-C*12:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:37 protein. This plasmid can be used for constructing HLA-C*12:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:38 Protein Expression Plasmid Vector	PHLAP92526271	Plasmid vector containing HLA-C*12:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:38 protein. This plasmid can be used for constructing HLA-C*12:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:39 Protein Expression Plasmid Vector	PHLAP92526272	Plasmid vector containing HLA-C*12:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:39 protein. This plasmid can be used for constructing HLA-C*12:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:40 Protein Expression Plasmid Vector	PHLAP92526273	Plasmid vector containing HLA-C*12:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:40 protein. This plasmid can be used for constructing HLA-C*12:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:41 Protein Expression Plasmid Vector	PHLAP92526274	Plasmid vector containing HLA-C*12:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:41 protein. This plasmid can be used for constructing HLA-C*12:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:42 Protein Expression Plasmid Vector	PHLAP92526275	Plasmid vector containing HLA-C*12:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:42 protein. This plasmid can be used for constructing HLA-C*12:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:43 Protein Expression Plasmid Vector	PHLAP92526276	Plasmid vector containing HLA-C*12:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:43 protein. This plasmid can be used for constructing HLA-C*12:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:44 Protein Expression Plasmid Vector	PHLAP92526277	Plasmid vector containing HLA-C*12:02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:44 protein. This plasmid can be used for constructing HLA-C*12:02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:45 Protein Expression Plasmid Vector	PHLAP92526278	Plasmid vector containing HLA-C*12:02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:45 protein. This plasmid can be used for constructing HLA-C*12:02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:46 Protein Expression Plasmid Vector	PHLAP92526279	Plasmid vector containing HLA-C*12:02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:46 protein. This plasmid can be used for constructing HLA-C*12:02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:47 Protein Expression Plasmid Vector	PHLAP92526280	Plasmid vector containing HLA-C*12:02:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:47 protein. This plasmid can be used for constructing HLA-C*12:02:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:48 Protein Expression Plasmid Vector	PHLAP92526281	Plasmid vector containing HLA-C*12:02:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:48 protein. This plasmid can be used for constructing HLA-C*12:02:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:49 Protein Expression Plasmid Vector	PHLAP92526282	Plasmid vector containing HLA-C*12:02:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:49 protein. This plasmid can be used for constructing HLA-C*12:02:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:02:50 Protein Expression Plasmid Vector	PHLAP92526283	Plasmid vector containing HLA-C*12:02:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:50 protein. This plasmid can be used for constructing HLA-C*12:02:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:51 Protein Expression Plasmid Vector	PHLAP92526284	Plasmid vector containing HLA-C*12:02:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:51 protein. This plasmid can be used for constructing HLA-C*12:02:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:52 Protein Expression Plasmid Vector	PHLAP92526285	Plasmid vector containing HLA-C*12:02:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:52 protein. This plasmid can be used for constructing HLA-C*12:02:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:53 Protein Expression Plasmid Vector	PHLAP92526286	Plasmid vector containing HLA-C*12:02:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:53 protein. This plasmid can be used for constructing HLA-C*12:02:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:54 Protein Expression Plasmid Vector	PHLAP92526287	Plasmid vector containing HLA-C*12:02:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:54 protein. This plasmid can be used for constructing HLA-C*12:02:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:55 Protein Expression Plasmid Vector	PHLAP92526288	Plasmid vector containing HLA-C*12:02:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:55 protein. This plasmid can be used for constructing HLA-C*12:02:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:02:56 Protein Expression Plasmid Vector	PHLAP92526289	Plasmid vector containing HLA-C*12:02:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:02:56 protein. This plasmid can be used for constructing HLA-C*12:02:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:02:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:01 Protein Expression Plasmid Vector	PHLAP92526290	Plasmid vector containing HLA-C*12:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:01 protein. This plasmid can be used for constructing HLA-C*12:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:02 Protein Expression Plasmid Vector	PHLAP92526291	Plasmid vector containing HLA-C*12:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:02 protein. This plasmid can be used for constructing HLA-C*12:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:03 Protein Expression Plasmid Vector	PHLAP92526292	Plasmid vector containing HLA-C*12:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:03 protein. This plasmid can be used for constructing HLA-C*12:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:04 Protein Expression Plasmid Vector	PHLAP92526293	Plasmid vector containing HLA-C*12:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:04 protein. This plasmid can be used for constructing HLA-C*12:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:05 Protein Expression Plasmid Vector	PHLAP92526294	Plasmid vector containing HLA-C*12:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:05 protein. This plasmid can be used for constructing HLA-C*12:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:06 Protein Expression Plasmid Vector	PHLAP92526295	Plasmid vector containing HLA-C*12:03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:06 protein. This plasmid can be used for constructing HLA-C*12:03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:07 Protein Expression Plasmid Vector	PHLAP92526296	Plasmid vector containing HLA-C*12:03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:07 protein. This plasmid can be used for constructing HLA-C*12:03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:08 Protein Expression Plasmid Vector	PHLAP92526297	Plasmid vector containing HLA-C*12:03:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:08 protein. This plasmid can be used for constructing HLA-C*12:03:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:09 Protein Expression Plasmid Vector	PHLAP92526298	Plasmid vector containing HLA-C*12:03:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:09 protein. This plasmid can be used for constructing HLA-C*12:03:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:10 Protein Expression Plasmid Vector	PHLAP92526299	Plasmid vector containing HLA-C*12:03:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:10 protein. This plasmid can be used for constructing HLA-C*12:03:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:11 Protein Expression Plasmid Vector	PHLAP925263000	Plasmid vector containing HLA-C*12:03:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:11 protein. This plasmid can be used for constructing HLA-C*12:03:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:12 Protein Expression Plasmid Vector	PHLAP925263001	Plasmid vector containing HLA-C*12:03:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:12 protein. This plasmid can be used for constructing HLA-C*12:03:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:13 Protein Expression Plasmid Vector	PHLAP925263002	Plasmid vector containing HLA-C*12:03:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:13 protein. This plasmid can be used for constructing HLA-C*12:03:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:14 Protein Expression Plasmid Vector	PHLAP925263003	Plasmid vector containing HLA-C*12:03:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:14 protein. This plasmid can be used for constructing HLA-C*12:03:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:15 Protein Expression Plasmid Vector	PHLAP925263004	Plasmid vector containing HLA-C*12:03:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:15 protein. This plasmid can be used for constructing HLA-C*12:03:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:16 Protein Expression Plasmid Vector	PHLAP92526305	Plasmid vector containing HLA-C*12:03:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:16 protein. This plasmid can be used for constructing HLA-C*12:03:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:17 Protein Expression Plasmid Vector	PHLAP92526306	Plasmid vector containing HLA-C*12:03:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:17 protein. This plasmid can be used for constructing HLA-C*12:03:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:18 Protein Expression Plasmid Vector	PHLAP92526307	Plasmid vector containing HLA-C*12:03:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:18 protein. This plasmid can be used for constructing HLA-C*12:03:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:19 Protein Expression Plasmid Vector	PHLAP92526308	Plasmid vector containing HLA-C*12:03:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:19 protein. This plasmid can be used for constructing HLA-C*12:03:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:20 Protein Expression Plasmid Vector	PHLAP92526309	Plasmid vector containing HLA-C*12:03:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:20 protein. This plasmid can be used for constructing HLA-C*12:03:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:21 Protein Expression Plasmid Vector	PHLAP92526310	Plasmid vector containing HLA-C*12:03:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:21 protein. This plasmid can be used for constructing HLA-C*12:03:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:22 Protein Expression Plasmid Vector	PHLAP92526311	Plasmid vector containing HLA-C*12:03:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:22 protein. This plasmid can be used for constructing HLA-C*12:03:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:23 Protein Expression Plasmid Vector	PHLAP92526312	Plasmid vector containing HLA-C*12:03:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:23 protein. This plasmid can be used for constructing HLA-C*12:03:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:24 Protein Expression Plasmid Vector	PHLAP92526313	Plasmid vector containing HLA-C*12:03:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:24 protein. This plasmid can be used for constructing HLA-C*12:03:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:25 Protein Expression Plasmid Vector	PHLAP92526314	Plasmid vector containing HLA-C*12:03:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:25 protein. This plasmid can be used for constructing HLA-C*12:03:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:26 Protein Expression Plasmid Vector	PHLAP92526315	Plasmid vector containing HLA-C*12:03:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:26 protein. This plasmid can be used for constructing HLA-C*12:03:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:27 Protein Expression Plasmid Vector	PHLAP92526316	Plasmid vector containing HLA-C*12:03:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:27 protein. This plasmid can be used for constructing HLA-C*12:03:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:28 Protein Expression Plasmid Vector	PHLAP92526317	Plasmid vector containing HLA-C*12:03:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:28 protein. This plasmid can be used for constructing HLA-C*12:03:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:29 Protein Expression Plasmid Vector	PHLAP92526318	Plasmid vector containing HLA-C*12:03:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:29 protein. This plasmid can be used for constructing HLA-C*12:03:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:30 Protein Expression Plasmid Vector	PHLAP92526319	Plasmid vector containing HLA-C*12:03:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:30 protein. This plasmid can be used for constructing HLA-C*12:03:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:31 Protein Expression Plasmid Vector	PHLAP92526320	Plasmid vector containing HLA-C*12:03:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:31 protein. This plasmid can be used for constructing HLA-C*12:03:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:32 Protein Expression Plasmid Vector	PHLAP92526321	Plasmid vector containing HLA-C*12:03:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:32 protein. This plasmid can be used for constructing HLA-C*12:03:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:33 Protein Expression Plasmid Vector	PHLAP92526322	Plasmid vector containing HLA-C*12:03:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:33 protein. This plasmid can be used for constructing HLA-C*12:03:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:34 Protein Expression Plasmid Vector	PHLAP92526323	Plasmid vector containing HLA-C*12:03:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:34 protein. This plasmid can be used for constructing HLA-C*12:03:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:35 Protein Expression Plasmid Vector	PHLAP92526324	Plasmid vector containing HLA-C*12:03:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:35 protein. This plasmid can be used for constructing HLA-C*12:03:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:36 Protein Expression Plasmid Vector	PHLAP92526325	Plasmid vector containing HLA-C*12:03:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:36 protein. This plasmid can be used for constructing HLA-C*12:03:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:37 Protein Expression Plasmid Vector	PHLAP92526326	Plasmid vector containing HLA-C*12:03:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:37 protein. This plasmid can be used for constructing HLA-C*12:03:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:38 Protein Expression Plasmid Vector	PHLAP92526327	Plasmid vector containing HLA-C*12:03:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:38 protein. This plasmid can be used for constructing HLA-C*12:03:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:39 Protein Expression Plasmid Vector	PHLAP92526328	Plasmid vector containing HLA-C*12:03:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:39 protein. This plasmid can be used for constructing HLA-C*12:03:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:40 Protein Expression Plasmid Vector	PHLAP92526329	Plasmid vector containing HLA-C*12:03:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:40 protein. This plasmid can be used for constructing HLA-C*12:03:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:41 Protein Expression Plasmid Vector	PHLAP92526330	Plasmid vector containing HLA-C*12:03:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:41 protein. This plasmid can be used for constructing HLA-C*12:03:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:42Q Protein Expression Plasmid Vector	PHLAP92526331	Plasmid vector containing HLA-C*12:03:01:42Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:42Q protein. This plasmid can be used for constructing HLA-C*12:03:01:42Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:42Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:43 Protein Expression Plasmid Vector	PHLAP92526332	Plasmid vector containing HLA-C*12:03:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:43 protein. This plasmid can be used for constructing HLA-C*12:03:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:44 Protein Expression Plasmid Vector	PHLAP92526333	Plasmid vector containing HLA-C*12:03:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:44 protein. This plasmid can be used for constructing HLA-C*12:03:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:45 Protein Expression Plasmid Vector	PHLAP92526334	Plasmid vector containing HLA-C*12:03:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:45 protein. This plasmid can be used for constructing HLA-C*12:03:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:46 Protein Expression Plasmid Vector	PHLAP92526335	Plasmid vector containing HLA-C*12:03:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:46 protein. This plasmid can be used for constructing HLA-C*12:03:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:47 Protein Expression Plasmid Vector	PHLAP92526336	Plasmid vector containing HLA-C*12:03:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:47 protein. This plasmid can be used for constructing HLA-C*12:03:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:48 Protein Expression Plasmid Vector	PHLAP92526337	Plasmid vector containing HLA-C*12:03:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:48 protein. This plasmid can be used for constructing HLA-C*12:03:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:49 Protein Expression Plasmid Vector	PHLAP92526338	Plasmid vector containing HLA-C*12:03:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:49 protein. This plasmid can be used for constructing HLA-C*12:03:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:50 Protein Expression Plasmid Vector	PHLAP92526339	Plasmid vector containing HLA-C*12:03:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:50 protein. This plasmid can be used for constructing HLA-C*12:03:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:51 Protein Expression Plasmid Vector	PHLAP92526340	Plasmid vector containing HLA-C*12:03:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:51 protein. This plasmid can be used for constructing HLA-C*12:03:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:52 Protein Expression Plasmid Vector	PHLAP92526341	Plasmid vector containing HLA-C*12:03:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:52 protein. This plasmid can be used for constructing HLA-C*12:03:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:53 Protein Expression Plasmid Vector	PHLAP92526342	Plasmid vector containing HLA-C*12:03:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:53 protein. This plasmid can be used for constructing HLA-C*12:03:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:54 Protein Expression Plasmid Vector	PHLAP92526343	Plasmid vector containing HLA-C*12:03:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:54 protein. This plasmid can be used for constructing HLA-C*12:03:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:55 Protein Expression Plasmid Vector	PHLAP92526344	Plasmid vector containing HLA-C*12:03:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:55 protein. This plasmid can be used for constructing HLA-C*12:03:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:56 Protein Expression Plasmid Vector	PHLAP92526345	Plasmid vector containing HLA-C*12:03:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:56 protein. This plasmid can be used for constructing HLA-C*12:03:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:57 Protein Expression Plasmid Vector	PHLAP92526346	Plasmid vector containing HLA-C*12:03:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:57 protein. This plasmid can be used for constructing HLA-C*12:03:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:58 Protein Expression Plasmid Vector	PHLAP92526347	Plasmid vector containing HLA-C*12:03:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:58 protein. This plasmid can be used for constructing HLA-C*12:03:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:59 Protein Expression Plasmid Vector	PHLAP92526348	Plasmid vector containing HLA-C*12:03:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:59 protein. This plasmid can be used for constructing HLA-C*12:03:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:60 Protein Expression Plasmid Vector	PHLAP92526349	Plasmid vector containing HLA-C*12:03:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:60 protein. This plasmid can be used for constructing HLA-C*12:03:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:61 Protein Expression Plasmid Vector	PHLAP925263510	Plasmid vector containing HLA-C*12:03:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:61 protein. This plasmid can be used for constructing HLA-C*12:03:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:62 Protein Expression Plasmid Vector	PHLAP925263511	Plasmid vector containing HLA-C*12:03:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:62 protein. This plasmid can be used for constructing HLA-C*12:03:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:63 Protein Expression Plasmid Vector	PHLAP925263512	Plasmid vector containing HLA-C*12:03:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:63 protein. This plasmid can be used for constructing HLA-C*12:03:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:64 Protein Expression Plasmid Vector	PHLAP925263513	Plasmid vector containing HLA-C*12:03:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:64 protein. This plasmid can be used for constructing HLA-C*12:03:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:65 Protein Expression Plasmid Vector	PHLAP92526354	Plasmid vector containing HLA-C*12:03:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:65 protein. This plasmid can be used for constructing HLA-C*12:03:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:66 Protein Expression Plasmid Vector	PHLAP92526355	Plasmid vector containing HLA-C*12:03:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:66 protein. This plasmid can be used for constructing HLA-C*12:03:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:67 Protein Expression Plasmid Vector	PHLAP92526356	Plasmid vector containing HLA-C*12:03:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:67 protein. This plasmid can be used for constructing HLA-C*12:03:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:68 Protein Expression Plasmid Vector	PHLAP92526357	Plasmid vector containing HLA-C*12:03:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:68 protein. This plasmid can be used for constructing HLA-C*12:03:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:69 Protein Expression Plasmid Vector	PHLAP92526358	Plasmid vector containing HLA-C*12:03:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:69 protein. This plasmid can be used for constructing HLA-C*12:03:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:70 Protein Expression Plasmid Vector	PHLAP92526359	Plasmid vector containing HLA-C*12:03:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:70 protein. This plasmid can be used for constructing HLA-C*12:03:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:71 Protein Expression Plasmid Vector	PHLAP92526360	Plasmid vector containing HLA-C*12:03:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:71 protein. This plasmid can be used for constructing HLA-C*12:03:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:01:72 Protein Expression Plasmid Vector	PHLAP92526361	Plasmid vector containing HLA-C*12:03:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:72 protein. This plasmid can be used for constructing HLA-C*12:03:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:01:73 Protein Expression Plasmid Vector	PHLAP92526362	Plasmid vector containing HLA-C*12:03:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:01:73 protein. This plasmid can be used for constructing HLA-C*12:03:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:02 Protein Expression Plasmid Vector	PHLAP92526363	Plasmid vector containing HLA-C*12:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:02 protein. This plasmid can be used for constructing HLA-C*12:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:03 Protein Expression Plasmid Vector	PHLAP92526364	Plasmid vector containing HLA-C*12:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:03 protein. This plasmid can be used for constructing HLA-C*12:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:04 Protein Expression Plasmid Vector	PHLAP92526365	Plasmid vector containing HLA-C*12:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:04 protein. This plasmid can be used for constructing HLA-C*12:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:05 Protein Expression Plasmid Vector	PHLAP92526366	Plasmid vector containing HLA-C*12:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:05 protein. This plasmid can be used for constructing HLA-C*12:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:06 Protein Expression Plasmid Vector	PHLAP92526367	Plasmid vector containing HLA-C*12:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:06 protein. This plasmid can be used for constructing HLA-C*12:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:07 Protein Expression Plasmid Vector	PHLAP92526368	Plasmid vector containing HLA-C*12:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:07 protein. This plasmid can be used for constructing HLA-C*12:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:08 Protein Expression Plasmid Vector	PHLAP92526369	Plasmid vector containing HLA-C*12:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:08 protein. This plasmid can be used for constructing HLA-C*12:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:09 Protein Expression Plasmid Vector	PHLAP92526370	Plasmid vector containing HLA-C*12:03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:09 protein. This plasmid can be used for constructing HLA-C*12:03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:10 Protein Expression Plasmid Vector	PHLAP92526371	Plasmid vector containing HLA-C*12:03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:10 protein. This plasmid can be used for constructing HLA-C*12:03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:11 Protein Expression Plasmid Vector	PHLAP92526372	Plasmid vector containing HLA-C*12:03:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:11 protein. This plasmid can be used for constructing HLA-C*12:03:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:12 Protein Expression Plasmid Vector	PHLAP92526373	Plasmid vector containing HLA-C*12:03:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:12 protein. This plasmid can be used for constructing HLA-C*12:03:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:13 Protein Expression Plasmid Vector	PHLAP92526374	Plasmid vector containing HLA-C*12:03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:13 protein. This plasmid can be used for constructing HLA-C*12:03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:14 Protein Expression Plasmid Vector	PHLAP92526375	Plasmid vector containing HLA-C*12:03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:14 protein. This plasmid can be used for constructing HLA-C*12:03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:15 Protein Expression Plasmid Vector	PHLAP92526376	Plasmid vector containing HLA-C*12:03:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:15 protein. This plasmid can be used for constructing HLA-C*12:03:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:16 Protein Expression Plasmid Vector	PHLAP92526377	Plasmid vector containing HLA-C*12:03:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:16 protein. This plasmid can be used for constructing HLA-C*12:03:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:17 Protein Expression Plasmid Vector	PHLAP92526378	Plasmid vector containing HLA-C*12:03:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:17 protein. This plasmid can be used for constructing HLA-C*12:03:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:18 Protein Expression Plasmid Vector	PHLAP92526379	Plasmid vector containing HLA-C*12:03:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:18 protein. This plasmid can be used for constructing HLA-C*12:03:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:19 Protein Expression Plasmid Vector	PHLAP92526380	Plasmid vector containing HLA-C*12:03:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:19 protein. This plasmid can be used for constructing HLA-C*12:03:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:20 Protein Expression Plasmid Vector	PHLAP92526381	Plasmid vector containing HLA-C*12:03:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:20 protein. This plasmid can be used for constructing HLA-C*12:03:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:21 Protein Expression Plasmid Vector	PHLAP92526382	Plasmid vector containing HLA-C*12:03:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:21 protein. This plasmid can be used for constructing HLA-C*12:03:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:22 Protein Expression Plasmid Vector	PHLAP92526383	Plasmid vector containing HLA-C*12:03:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:22 protein. This plasmid can be used for constructing HLA-C*12:03:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:23 Protein Expression Plasmid Vector	PHLAP92526384	Plasmid vector containing HLA-C*12:03:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:23 protein. This plasmid can be used for constructing HLA-C*12:03:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:24 Protein Expression Plasmid Vector	PHLAP92526385	Plasmid vector containing HLA-C*12:03:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:24 protein. This plasmid can be used for constructing HLA-C*12:03:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:25 Protein Expression Plasmid Vector	PHLAP92526386	Plasmid vector containing HLA-C*12:03:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:25 protein. This plasmid can be used for constructing HLA-C*12:03:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:26 Protein Expression Plasmid Vector	PHLAP92526387	Plasmid vector containing HLA-C*12:03:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:26 protein. This plasmid can be used for constructing HLA-C*12:03:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:27 Protein Expression Plasmid Vector	PHLAP92526388	Plasmid vector containing HLA-C*12:03:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:27 protein. This plasmid can be used for constructing HLA-C*12:03:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:28 Protein Expression Plasmid Vector	PHLAP92526389	Plasmid vector containing HLA-C*12:03:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:28 protein. This plasmid can be used for constructing HLA-C*12:03:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:29 Protein Expression Plasmid Vector	PHLAP92526390	Plasmid vector containing HLA-C*12:03:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:29 protein. This plasmid can be used for constructing HLA-C*12:03:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:30 Protein Expression Plasmid Vector	PHLAP92526391	Plasmid vector containing HLA-C*12:03:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:30 protein. This plasmid can be used for constructing HLA-C*12:03:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:31 Protein Expression Plasmid Vector	PHLAP92526392	Plasmid vector containing HLA-C*12:03:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:31 protein. This plasmid can be used for constructing HLA-C*12:03:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:32 Protein Expression Plasmid Vector	PHLAP92526393	Plasmid vector containing HLA-C*12:03:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:32 protein. This plasmid can be used for constructing HLA-C*12:03:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:33 Protein Expression Plasmid Vector	PHLAP92526394	Plasmid vector containing HLA-C*12:03:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:33 protein. This plasmid can be used for constructing HLA-C*12:03:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:34:01 Protein Expression Plasmid Vector	PHLAP92526395	Plasmid vector containing HLA-C*12:03:34:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:34:01 protein. This plasmid can be used for constructing HLA-C*12:03:34:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:34:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:34:02 Protein Expression Plasmid Vector	PHLAP92526396	Plasmid vector containing HLA-C*12:03:34:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:34:02 protein. This plasmid can be used for constructing HLA-C*12:03:34:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:34:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:35 Protein Expression Plasmid Vector	PHLAP92526397	Plasmid vector containing HLA-C*12:03:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:35 protein. This plasmid can be used for constructing HLA-C*12:03:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:36 Protein Expression Plasmid Vector	PHLAP92526398	Plasmid vector containing HLA-C*12:03:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:36 protein. This plasmid can be used for constructing HLA-C*12:03:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:37 Protein Expression Plasmid Vector	PHLAP92526399	Plasmid vector containing HLA-C*12:03:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:37 protein. This plasmid can be used for constructing HLA-C*12:03:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:38 Protein Expression Plasmid Vector	PHLAP925264000	Plasmid vector containing HLA-C*12:03:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:38 protein. This plasmid can be used for constructing HLA-C*12:03:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:39 Protein Expression Plasmid Vector	PHLAP92526401	Plasmid vector containing HLA-C*12:03:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:39 protein. This plasmid can be used for constructing HLA-C*12:03:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:40 Protein Expression Plasmid Vector	PHLAP92526402	Plasmid vector containing HLA-C*12:03:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:40 protein. This plasmid can be used for constructing HLA-C*12:03:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:41 Protein Expression Plasmid Vector	PHLAP92526403	Plasmid vector containing HLA-C*12:03:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:41 protein. This plasmid can be used for constructing HLA-C*12:03:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:42 Protein Expression Plasmid Vector	PHLAP92526404	Plasmid vector containing HLA-C*12:03:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:42 protein. This plasmid can be used for constructing HLA-C*12:03:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:43 Protein Expression Plasmid Vector	PHLAP92526405	Plasmid vector containing HLA-C*12:03:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:43 protein. This plasmid can be used for constructing HLA-C*12:03:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:44 Protein Expression Plasmid Vector	PHLAP92526406	Plasmid vector containing HLA-C*12:03:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:44 protein. This plasmid can be used for constructing HLA-C*12:03:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:45 Protein Expression Plasmid Vector	PHLAP92526407	Plasmid vector containing HLA-C*12:03:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:45 protein. This plasmid can be used for constructing HLA-C*12:03:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:46 Protein Expression Plasmid Vector	PHLAP92526408	Plasmid vector containing HLA-C*12:03:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:46 protein. This plasmid can be used for constructing HLA-C*12:03:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:47 Protein Expression Plasmid Vector	PHLAP92526409	Plasmid vector containing HLA-C*12:03:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:47 protein. This plasmid can be used for constructing HLA-C*12:03:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:48 Protein Expression Plasmid Vector	PHLAP92526410	Plasmid vector containing HLA-C*12:03:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:48 protein. This plasmid can be used for constructing HLA-C*12:03:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:49 Protein Expression Plasmid Vector	PHLAP92526411	Plasmid vector containing HLA-C*12:03:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:49 protein. This plasmid can be used for constructing HLA-C*12:03:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:50 Protein Expression Plasmid Vector	PHLAP92526412	Plasmid vector containing HLA-C*12:03:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:50 protein. This plasmid can be used for constructing HLA-C*12:03:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:51 Protein Expression Plasmid Vector	PHLAP92526413	Plasmid vector containing HLA-C*12:03:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:51 protein. This plasmid can be used for constructing HLA-C*12:03:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:52 Protein Expression Plasmid Vector	PHLAP92526414	Plasmid vector containing HLA-C*12:03:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:52 protein. This plasmid can be used for constructing HLA-C*12:03:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:53 Protein Expression Plasmid Vector	PHLAP92526415	Plasmid vector containing HLA-C*12:03:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:53 protein. This plasmid can be used for constructing HLA-C*12:03:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:54 Protein Expression Plasmid Vector	PHLAP92526416	Plasmid vector containing HLA-C*12:03:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:54 protein. This plasmid can be used for constructing HLA-C*12:03:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:55 Protein Expression Plasmid Vector	PHLAP92526417	Plasmid vector containing HLA-C*12:03:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:55 protein. This plasmid can be used for constructing HLA-C*12:03:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:56 Protein Expression Plasmid Vector	PHLAP92526418	Plasmid vector containing HLA-C*12:03:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:56 protein. This plasmid can be used for constructing HLA-C*12:03:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:57 Protein Expression Plasmid Vector	PHLAP92526419	Plasmid vector containing HLA-C*12:03:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:57 protein. This plasmid can be used for constructing HLA-C*12:03:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:58 Protein Expression Plasmid Vector	PHLAP92526420	Plasmid vector containing HLA-C*12:03:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:58 protein. This plasmid can be used for constructing HLA-C*12:03:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:59 Protein Expression Plasmid Vector	PHLAP92526421	Plasmid vector containing HLA-C*12:03:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:59 protein. This plasmid can be used for constructing HLA-C*12:03:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:60 Protein Expression Plasmid Vector	PHLAP92526422	Plasmid vector containing HLA-C*12:03:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:60 protein. This plasmid can be used for constructing HLA-C*12:03:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:61 Protein Expression Plasmid Vector	PHLAP92526423	Plasmid vector containing HLA-C*12:03:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:61 protein. This plasmid can be used for constructing HLA-C*12:03:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:62 Protein Expression Plasmid Vector	PHLAP92526424	Plasmid vector containing HLA-C*12:03:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:62 protein. This plasmid can be used for constructing HLA-C*12:03:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:63 Protein Expression Plasmid Vector	PHLAP92526425	Plasmid vector containing HLA-C*12:03:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:63 protein. This plasmid can be used for constructing HLA-C*12:03:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:64 Protein Expression Plasmid Vector	PHLAP92526426	Plasmid vector containing HLA-C*12:03:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:64 protein. This plasmid can be used for constructing HLA-C*12:03:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:65 Protein Expression Plasmid Vector	PHLAP92526427	Plasmid vector containing HLA-C*12:03:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:65 protein. This plasmid can be used for constructing HLA-C*12:03:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:66 Protein Expression Plasmid Vector	PHLAP92526428	Plasmid vector containing HLA-C*12:03:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:66 protein. This plasmid can be used for constructing HLA-C*12:03:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:67 Protein Expression Plasmid Vector	PHLAP92526429	Plasmid vector containing HLA-C*12:03:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:67 protein. This plasmid can be used for constructing HLA-C*12:03:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:68 Protein Expression Plasmid Vector	PHLAP92526430	Plasmid vector containing HLA-C*12:03:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:68 protein. This plasmid can be used for constructing HLA-C*12:03:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:69 Protein Expression Plasmid Vector	PHLAP92526431	Plasmid vector containing HLA-C*12:03:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:69 protein. This plasmid can be used for constructing HLA-C*12:03:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:70 Protein Expression Plasmid Vector	PHLAP92526432	Plasmid vector containing HLA-C*12:03:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:70 protein. This plasmid can be used for constructing HLA-C*12:03:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:71 Protein Expression Plasmid Vector	PHLAP92526433	Plasmid vector containing HLA-C*12:03:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:71 protein. This plasmid can be used for constructing HLA-C*12:03:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:72 Protein Expression Plasmid Vector	PHLAP92526434	Plasmid vector containing HLA-C*12:03:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:72 protein. This plasmid can be used for constructing HLA-C*12:03:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:73 Protein Expression Plasmid Vector	PHLAP92526435	Plasmid vector containing HLA-C*12:03:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:73 protein. This plasmid can be used for constructing HLA-C*12:03:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:74 Protein Expression Plasmid Vector	PHLAP92526436	Plasmid vector containing HLA-C*12:03:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:74 protein. This plasmid can be used for constructing HLA-C*12:03:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:75 Protein Expression Plasmid Vector	PHLAP92526437	Plasmid vector containing HLA-C*12:03:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:75 protein. This plasmid can be used for constructing HLA-C*12:03:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:76 Protein Expression Plasmid Vector	PHLAP92526438	Plasmid vector containing HLA-C*12:03:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:76 protein. This plasmid can be used for constructing HLA-C*12:03:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:77 Protein Expression Plasmid Vector	PHLAP92526439	Plasmid vector containing HLA-C*12:03:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:77 protein. This plasmid can be used for constructing HLA-C*12:03:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:78 Protein Expression Plasmid Vector	PHLAP92526440	Plasmid vector containing HLA-C*12:03:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:78 protein. This plasmid can be used for constructing HLA-C*12:03:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:79 Protein Expression Plasmid Vector	PHLAP92526441	Plasmid vector containing HLA-C*12:03:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:79 protein. This plasmid can be used for constructing HLA-C*12:03:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:80 Protein Expression Plasmid Vector	PHLAP92526442	Plasmid vector containing HLA-C*12:03:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:80 protein. This plasmid can be used for constructing HLA-C*12:03:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:81 Protein Expression Plasmid Vector	PHLAP92526443	Plasmid vector containing HLA-C*12:03:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:81 protein. This plasmid can be used for constructing HLA-C*12:03:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:82 Protein Expression Plasmid Vector	PHLAP92526444	Plasmid vector containing HLA-C*12:03:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:82 protein. This plasmid can be used for constructing HLA-C*12:03:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:83 Protein Expression Plasmid Vector	PHLAP92526445	Plasmid vector containing HLA-C*12:03:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:83 protein. This plasmid can be used for constructing HLA-C*12:03:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:84 Protein Expression Plasmid Vector	PHLAP92526446	Plasmid vector containing HLA-C*12:03:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:84 protein. This plasmid can be used for constructing HLA-C*12:03:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:85 Protein Expression Plasmid Vector	PHLAP92526447	Plasmid vector containing HLA-C*12:03:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:85 protein. This plasmid can be used for constructing HLA-C*12:03:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:86 Protein Expression Plasmid Vector	PHLAP92526448	Plasmid vector containing HLA-C*12:03:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:86 protein. This plasmid can be used for constructing HLA-C*12:03:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:87 Protein Expression Plasmid Vector	PHLAP92526449	Plasmid vector containing HLA-C*12:03:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:87 protein. This plasmid can be used for constructing HLA-C*12:03:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:88 Protein Expression Plasmid Vector	PHLAP92526450	Plasmid vector containing HLA-C*12:03:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:88 protein. This plasmid can be used for constructing HLA-C*12:03:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:89 Protein Expression Plasmid Vector	PHLAP92526451	Plasmid vector containing HLA-C*12:03:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:89 protein. This plasmid can be used for constructing HLA-C*12:03:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:90 Protein Expression Plasmid Vector	PHLAP92526452	Plasmid vector containing HLA-C*12:03:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:90 protein. This plasmid can be used for constructing HLA-C*12:03:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:91 Protein Expression Plasmid Vector	PHLAP92526453	Plasmid vector containing HLA-C*12:03:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:91 protein. This plasmid can be used for constructing HLA-C*12:03:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:92 Protein Expression Plasmid Vector	PHLAP92526454	Plasmid vector containing HLA-C*12:03:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:92 protein. This plasmid can be used for constructing HLA-C*12:03:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:93 Protein Expression Plasmid Vector	PHLAP92526455	Plasmid vector containing HLA-C*12:03:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:93 protein. This plasmid can be used for constructing HLA-C*12:03:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:94 Protein Expression Plasmid Vector	PHLAP92526456	Plasmid vector containing HLA-C*12:03:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:94 protein. This plasmid can be used for constructing HLA-C*12:03:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:03:95 Protein Expression Plasmid Vector	PHLAP92526457	Plasmid vector containing HLA-C*12:03:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:95 protein. This plasmid can be used for constructing HLA-C*12:03:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:03:96 Protein Expression Plasmid Vector	PHLAP92526458	Plasmid vector containing HLA-C*12:03:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:03:96 protein. This plasmid can be used for constructing HLA-C*12:03:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:03:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:04:01 Protein Expression Plasmid Vector	PHLAP92526459	Plasmid vector containing HLA-C*12:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:04:01 protein. This plasmid can be used for constructing HLA-C*12:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:04:02:01 Protein Expression Plasmid Vector	PHLAP92526460	Plasmid vector containing HLA-C*12:04:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:04:02:01 protein. This plasmid can be used for constructing HLA-C*12:04:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:04:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:04:02:02 Protein Expression Plasmid Vector	PHLAP92526461	Plasmid vector containing HLA-C*12:04:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:04:02:02 protein. This plasmid can be used for constructing HLA-C*12:04:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:04:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:04:03 Protein Expression Plasmid Vector	PHLAP92526462	Plasmid vector containing HLA-C*12:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:04:03 protein. This plasmid can be used for constructing HLA-C*12:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:05:01 Protein Expression Plasmid Vector	PHLAP92526463	Plasmid vector containing HLA-C*12:05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:05:01 protein. This plasmid can be used for constructing HLA-C*12:05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:05:02 Protein Expression Plasmid Vector	PHLAP92526464	Plasmid vector containing HLA-C*12:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:05:02 protein. This plasmid can be used for constructing HLA-C*12:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:06 Protein Expression Plasmid Vector	PHLAP92526465	Plasmid vector containing HLA-C*12:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:06 protein. This plasmid can be used for constructing HLA-C*12:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:07 Protein Expression Plasmid Vector	PHLAP92526466	Plasmid vector containing HLA-C*12:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:07 protein. This plasmid can be used for constructing HLA-C*12:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:08 Protein Expression Plasmid Vector	PHLAP92526467	Plasmid vector containing HLA-C*12:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:08 protein. This plasmid can be used for constructing HLA-C*12:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:09 Protein Expression Plasmid Vector	PHLAP92526468	Plasmid vector containing HLA-C*12:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:09 protein. This plasmid can be used for constructing HLA-C*12:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:10:01 Protein Expression Plasmid Vector	PHLAP92526469	Plasmid vector containing HLA-C*12:10:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:10:01 protein. This plasmid can be used for constructing HLA-C*12:10:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:10:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:10:02 Protein Expression Plasmid Vector	PHLAP92526470	Plasmid vector containing HLA-C*12:10:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:10:02 protein. This plasmid can be used for constructing HLA-C*12:10:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:10:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:10:03 Protein Expression Plasmid Vector	PHLAP92526471	Plasmid vector containing HLA-C*12:10:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:10:03 protein. This plasmid can be used for constructing HLA-C*12:10:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:10:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:100 Protein Expression Plasmid Vector	PHLAP92526472	Plasmid vector containing HLA-C*12:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:100 protein. This plasmid can be used for constructing HLA-C*12:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:101 Protein Expression Plasmid Vector	PHLAP92526473	Plasmid vector containing HLA-C*12:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:101 protein. This plasmid can be used for constructing HLA-C*12:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:102 Protein Expression Plasmid Vector	PHLAP92526474	Plasmid vector containing HLA-C*12:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:102 protein. This plasmid can be used for constructing HLA-C*12:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:103 Protein Expression Plasmid Vector	PHLAP92526475	Plasmid vector containing HLA-C*12:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:103 protein. This plasmid can be used for constructing HLA-C*12:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:104N Protein Expression Plasmid Vector	PHLAP92526476	Plasmid vector containing HLA-C*12:104N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:104N protein. This plasmid can be used for constructing HLA-C*12:104N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:104N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:105N Protein Expression Plasmid Vector	PHLAP92526477	Plasmid vector containing HLA-C*12:105N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:105N protein. This plasmid can be used for constructing HLA-C*12:105N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:105N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:106 Protein Expression Plasmid Vector	PHLAP92526478	Plasmid vector containing HLA-C*12:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:106 protein. This plasmid can be used for constructing HLA-C*12:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:107 Protein Expression Plasmid Vector	PHLAP92526479	Plasmid vector containing HLA-C*12:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:107 protein. This plasmid can be used for constructing HLA-C*12:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:108 Protein Expression Plasmid Vector	PHLAP92526480	Plasmid vector containing HLA-C*12:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:108 protein. This plasmid can be used for constructing HLA-C*12:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:109 Protein Expression Plasmid Vector	PHLAP92526481	Plasmid vector containing HLA-C*12:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:109 protein. This plasmid can be used for constructing HLA-C*12:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:11 Protein Expression Plasmid Vector	PHLAP92526482	Plasmid vector containing HLA-C*12:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:11 protein. This plasmid can be used for constructing HLA-C*12:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:110 Protein Expression Plasmid Vector	PHLAP92526483	Plasmid vector containing HLA-C*12:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:110 protein. This plasmid can be used for constructing HLA-C*12:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:111 Protein Expression Plasmid Vector	PHLAP92526484	Plasmid vector containing HLA-C*12:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:111 protein. This plasmid can be used for constructing HLA-C*12:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:112 Protein Expression Plasmid Vector	PHLAP92526485	Plasmid vector containing HLA-C*12:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:112 protein. This plasmid can be used for constructing HLA-C*12:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:113 Protein Expression Plasmid Vector	PHLAP92526486	Plasmid vector containing HLA-C*12:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:113 protein. This plasmid can be used for constructing HLA-C*12:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:114 Protein Expression Plasmid Vector	PHLAP92526487	Plasmid vector containing HLA-C*12:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:114 protein. This plasmid can be used for constructing HLA-C*12:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:115 Protein Expression Plasmid Vector	PHLAP92526488	Plasmid vector containing HLA-C*12:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:115 protein. This plasmid can be used for constructing HLA-C*12:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:116 Protein Expression Plasmid Vector	PHLAP92526489	Plasmid vector containing HLA-C*12:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:116 protein. This plasmid can be used for constructing HLA-C*12:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:117 Protein Expression Plasmid Vector	PHLAP92526490	Plasmid vector containing HLA-C*12:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:117 protein. This plasmid can be used for constructing HLA-C*12:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:118 Protein Expression Plasmid Vector	PHLAP92526491	Plasmid vector containing HLA-C*12:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:118 protein. This plasmid can be used for constructing HLA-C*12:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:119 Protein Expression Plasmid Vector	PHLAP92526492	Plasmid vector containing HLA-C*12:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:119 protein. This plasmid can be used for constructing HLA-C*12:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:12 Protein Expression Plasmid Vector	PHLAP92526493	Plasmid vector containing HLA-C*12:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:12 protein. This plasmid can be used for constructing HLA-C*12:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:120 Protein Expression Plasmid Vector	PHLAP92526494	Plasmid vector containing HLA-C*12:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:120 protein. This plasmid can be used for constructing HLA-C*12:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:121 Protein Expression Plasmid Vector	PHLAP92526495	Plasmid vector containing HLA-C*12:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:121 protein. This plasmid can be used for constructing HLA-C*12:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:122 Protein Expression Plasmid Vector	PHLAP92526496	Plasmid vector containing HLA-C*12:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:122 protein. This plasmid can be used for constructing HLA-C*12:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:123 Protein Expression Plasmid Vector	PHLAP92526497	Plasmid vector containing HLA-C*12:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:123 protein. This plasmid can be used for constructing HLA-C*12:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:124 Protein Expression Plasmid Vector	PHLAP92526498	Plasmid vector containing HLA-C*12:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:124 protein. This plasmid can be used for constructing HLA-C*12:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:125 Protein Expression Plasmid Vector	PHLAP92526499	Plasmid vector containing HLA-C*12:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:125 protein. This plasmid can be used for constructing HLA-C*12:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:126 Protein Expression Plasmid Vector	PHLAP925265000	Plasmid vector containing HLA-C*12:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:126 protein. This plasmid can be used for constructing HLA-C*12:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:127 Protein Expression Plasmid Vector	PHLAP925265001	Plasmid vector containing HLA-C*12:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:127 protein. This plasmid can be used for constructing HLA-C*12:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:128 Protein Expression Plasmid Vector	PHLAP925265002	Plasmid vector containing HLA-C*12:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:128 protein. This plasmid can be used for constructing HLA-C*12:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:129 Protein Expression Plasmid Vector	PHLAP925265003	Plasmid vector containing HLA-C*12:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:129 protein. This plasmid can be used for constructing HLA-C*12:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:13:01:01 Protein Expression Plasmid Vector	PHLAP925265004	Plasmid vector containing HLA-C*12:13:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:13:01:01 protein. This plasmid can be used for constructing HLA-C*12:13:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:13:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:13:01:02 Protein Expression Plasmid Vector	PHLAP92526505	Plasmid vector containing HLA-C*12:13:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:13:01:02 protein. This plasmid can be used for constructing HLA-C*12:13:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:13:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:130 Protein Expression Plasmid Vector	PHLAP92526506	Plasmid vector containing HLA-C*12:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:130 protein. This plasmid can be used for constructing HLA-C*12:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:131 Protein Expression Plasmid Vector	PHLAP92526507	Plasmid vector containing HLA-C*12:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:131 protein. This plasmid can be used for constructing HLA-C*12:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:132 Protein Expression Plasmid Vector	PHLAP92526508	Plasmid vector containing HLA-C*12:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:132 protein. This plasmid can be used for constructing HLA-C*12:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:133 Protein Expression Plasmid Vector	PHLAP92526509	Plasmid vector containing HLA-C*12:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:133 protein. This plasmid can be used for constructing HLA-C*12:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:134 Protein Expression Plasmid Vector	PHLAP92526510	Plasmid vector containing HLA-C*12:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:134 protein. This plasmid can be used for constructing HLA-C*12:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:135 Protein Expression Plasmid Vector	PHLAP92526511	Plasmid vector containing HLA-C*12:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:135 protein. This plasmid can be used for constructing HLA-C*12:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:136 Protein Expression Plasmid Vector	PHLAP92526512	Plasmid vector containing HLA-C*12:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:136 protein. This plasmid can be used for constructing HLA-C*12:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:137 Protein Expression Plasmid Vector	PHLAP92526513	Plasmid vector containing HLA-C*12:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:137 protein. This plasmid can be used for constructing HLA-C*12:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:138 Protein Expression Plasmid Vector	PHLAP92526514	Plasmid vector containing HLA-C*12:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:138 protein. This plasmid can be used for constructing HLA-C*12:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:139Q Protein Expression Plasmid Vector	PHLAP92526515	Plasmid vector containing HLA-C*12:139Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:139Q protein. This plasmid can be used for constructing HLA-C*12:139Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:139Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:14:01 Protein Expression Plasmid Vector	PHLAP92526516	Plasmid vector containing HLA-C*12:14:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:14:01 protein. This plasmid can be used for constructing HLA-C*12:14:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:14:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:14:02 Protein Expression Plasmid Vector	PHLAP92526517	Plasmid vector containing HLA-C*12:14:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:14:02 protein. This plasmid can be used for constructing HLA-C*12:14:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:14:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:140:01 Protein Expression Plasmid Vector	PHLAP92526518	Plasmid vector containing HLA-C*12:140:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:140:01 protein. This plasmid can be used for constructing HLA-C*12:140:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:140:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:140:02 Protein Expression Plasmid Vector	PHLAP92526519	Plasmid vector containing HLA-C*12:140:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:140:02 protein. This plasmid can be used for constructing HLA-C*12:140:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:140:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:141 Protein Expression Plasmid Vector	PHLAP92526520	Plasmid vector containing HLA-C*12:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:141 protein. This plasmid can be used for constructing HLA-C*12:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:142 Protein Expression Plasmid Vector	PHLAP92526521	Plasmid vector containing HLA-C*12:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:142 protein. This plasmid can be used for constructing HLA-C*12:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:143 Protein Expression Plasmid Vector	PHLAP92526522	Plasmid vector containing HLA-C*12:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:143 protein. This plasmid can be used for constructing HLA-C*12:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:144 Protein Expression Plasmid Vector	PHLAP92526523	Plasmid vector containing HLA-C*12:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:144 protein. This plasmid can be used for constructing HLA-C*12:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:145 Protein Expression Plasmid Vector	PHLAP92526524	Plasmid vector containing HLA-C*12:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:145 protein. This plasmid can be used for constructing HLA-C*12:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:146 Protein Expression Plasmid Vector	PHLAP92526525	Plasmid vector containing HLA-C*12:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:146 protein. This plasmid can be used for constructing HLA-C*12:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:147 Protein Expression Plasmid Vector	PHLAP92526526	Plasmid vector containing HLA-C*12:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:147 protein. This plasmid can be used for constructing HLA-C*12:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:148N Protein Expression Plasmid Vector	PHLAP92526527	Plasmid vector containing HLA-C*12:148N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:148N protein. This plasmid can be used for constructing HLA-C*12:148N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:148N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:149 Protein Expression Plasmid Vector	PHLAP92526528	Plasmid vector containing HLA-C*12:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:149 protein. This plasmid can be used for constructing HLA-C*12:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:15 Protein Expression Plasmid Vector	PHLAP92526529	Plasmid vector containing HLA-C*12:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:15 protein. This plasmid can be used for constructing HLA-C*12:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:150 Protein Expression Plasmid Vector	PHLAP92526530	Plasmid vector containing HLA-C*12:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:150 protein. This plasmid can be used for constructing HLA-C*12:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:151 Protein Expression Plasmid Vector	PHLAP92526531	Plasmid vector containing HLA-C*12:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:151 protein. This plasmid can be used for constructing HLA-C*12:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:152 Protein Expression Plasmid Vector	PHLAP92526532	Plasmid vector containing HLA-C*12:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:152 protein. This plasmid can be used for constructing HLA-C*12:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:153 Protein Expression Plasmid Vector	PHLAP92526533	Plasmid vector containing HLA-C*12:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:153 protein. This plasmid can be used for constructing HLA-C*12:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:154 Protein Expression Plasmid Vector	PHLAP92526534	Plasmid vector containing HLA-C*12:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:154 protein. This plasmid can be used for constructing HLA-C*12:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:155Q Protein Expression Plasmid Vector	PHLAP92526535	Plasmid vector containing HLA-C*12:155Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:155Q protein. This plasmid can be used for constructing HLA-C*12:155Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:155Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:156 Protein Expression Plasmid Vector	PHLAP92526536	Plasmid vector containing HLA-C*12:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:156 protein. This plasmid can be used for constructing HLA-C*12:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:157 Protein Expression Plasmid Vector	PHLAP92526537	Plasmid vector containing HLA-C*12:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:157 protein. This plasmid can be used for constructing HLA-C*12:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:158 Protein Expression Plasmid Vector	PHLAP92526538	Plasmid vector containing HLA-C*12:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:158 protein. This plasmid can be used for constructing HLA-C*12:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:159 Protein Expression Plasmid Vector	PHLAP92526539	Plasmid vector containing HLA-C*12:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:159 protein. This plasmid can be used for constructing HLA-C*12:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:16:01 Protein Expression Plasmid Vector	PHLAP925265400	Plasmid vector containing HLA-C*12:16:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:16:01 protein. This plasmid can be used for constructing HLA-C*12:16:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:16:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:16:02 Protein Expression Plasmid Vector	PHLAP925265401	Plasmid vector containing HLA-C*12:16:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:16:02 protein. This plasmid can be used for constructing HLA-C*12:16:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:16:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:160 Protein Expression Plasmid Vector	PHLAP92526542	Plasmid vector containing HLA-C*12:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:160 protein. This plasmid can be used for constructing HLA-C*12:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:161 Protein Expression Plasmid Vector	PHLAP92526543	Plasmid vector containing HLA-C*12:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:161 protein. This plasmid can be used for constructing HLA-C*12:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:162 Protein Expression Plasmid Vector	PHLAP92526544	Plasmid vector containing HLA-C*12:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:162 protein. This plasmid can be used for constructing HLA-C*12:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:163 Protein Expression Plasmid Vector	PHLAP92526545	Plasmid vector containing HLA-C*12:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:163 protein. This plasmid can be used for constructing HLA-C*12:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:164 Protein Expression Plasmid Vector	PHLAP92526546	Plasmid vector containing HLA-C*12:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:164 protein. This plasmid can be used for constructing HLA-C*12:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:165 Protein Expression Plasmid Vector	PHLAP92526547	Plasmid vector containing HLA-C*12:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:165 protein. This plasmid can be used for constructing HLA-C*12:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:166 Protein Expression Plasmid Vector	PHLAP92526548	Plasmid vector containing HLA-C*12:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:166 protein. This plasmid can be used for constructing HLA-C*12:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:167 Protein Expression Plasmid Vector	PHLAP92526549	Plasmid vector containing HLA-C*12:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:167 protein. This plasmid can be used for constructing HLA-C*12:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:168 Protein Expression Plasmid Vector	PHLAP92526550	Plasmid vector containing HLA-C*12:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:168 protein. This plasmid can be used for constructing HLA-C*12:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:169 Protein Expression Plasmid Vector	PHLAP92526551	Plasmid vector containing HLA-C*12:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:169 protein. This plasmid can be used for constructing HLA-C*12:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:17 Protein Expression Plasmid Vector	PHLAP92526552	Plasmid vector containing HLA-C*12:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:17 protein. This plasmid can be used for constructing HLA-C*12:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:170 Protein Expression Plasmid Vector	PHLAP92526553	Plasmid vector containing HLA-C*12:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:170 protein. This plasmid can be used for constructing HLA-C*12:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:171 Protein Expression Plasmid Vector	PHLAP92526554	Plasmid vector containing HLA-C*12:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:171 protein. This plasmid can be used for constructing HLA-C*12:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:172 Protein Expression Plasmid Vector	PHLAP92526555	Plasmid vector containing HLA-C*12:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:172 protein. This plasmid can be used for constructing HLA-C*12:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:173 Protein Expression Plasmid Vector	PHLAP92526556	Plasmid vector containing HLA-C*12:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:173 protein. This plasmid can be used for constructing HLA-C*12:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:174 Protein Expression Plasmid Vector	PHLAP92526557	Plasmid vector containing HLA-C*12:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:174 protein. This plasmid can be used for constructing HLA-C*12:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:175 Protein Expression Plasmid Vector	PHLAP92526558	Plasmid vector containing HLA-C*12:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:175 protein. This plasmid can be used for constructing HLA-C*12:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:176 Protein Expression Plasmid Vector	PHLAP92526559	Plasmid vector containing HLA-C*12:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:176 protein. This plasmid can be used for constructing HLA-C*12:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:177 Protein Expression Plasmid Vector	PHLAP92526560	Plasmid vector containing HLA-C*12:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:177 protein. This plasmid can be used for constructing HLA-C*12:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:178 Protein Expression Plasmid Vector	PHLAP92526561	Plasmid vector containing HLA-C*12:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:178 protein. This plasmid can be used for constructing HLA-C*12:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:179 Protein Expression Plasmid Vector	PHLAP92526562	Plasmid vector containing HLA-C*12:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:179 protein. This plasmid can be used for constructing HLA-C*12:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:18:01 Protein Expression Plasmid Vector	PHLAP92526563	Plasmid vector containing HLA-C*12:18:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:18:01 protein. This plasmid can be used for constructing HLA-C*12:18:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:18:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:18:02 Protein Expression Plasmid Vector	PHLAP92526564	Plasmid vector containing HLA-C*12:18:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:18:02 protein. This plasmid can be used for constructing HLA-C*12:18:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:18:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:180 Protein Expression Plasmid Vector	PHLAP92526565	Plasmid vector containing HLA-C*12:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:180 protein. This plasmid can be used for constructing HLA-C*12:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:181 Protein Expression Plasmid Vector	PHLAP92526566	Plasmid vector containing HLA-C*12:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:181 protein. This plasmid can be used for constructing HLA-C*12:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:182 Protein Expression Plasmid Vector	PHLAP92526567	Plasmid vector containing HLA-C*12:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:182 protein. This plasmid can be used for constructing HLA-C*12:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:183 Protein Expression Plasmid Vector	PHLAP92526568	Plasmid vector containing HLA-C*12:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:183 protein. This plasmid can be used for constructing HLA-C*12:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:184 Protein Expression Plasmid Vector	PHLAP92526569	Plasmid vector containing HLA-C*12:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:184 protein. This plasmid can be used for constructing HLA-C*12:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:185 Protein Expression Plasmid Vector	PHLAP92526570	Plasmid vector containing HLA-C*12:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:185 protein. This plasmid can be used for constructing HLA-C*12:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:186 Protein Expression Plasmid Vector	PHLAP92526571	Plasmid vector containing HLA-C*12:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:186 protein. This plasmid can be used for constructing HLA-C*12:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:187 Protein Expression Plasmid Vector	PHLAP92526572	Plasmid vector containing HLA-C*12:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:187 protein. This plasmid can be used for constructing HLA-C*12:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:188 Protein Expression Plasmid Vector	PHLAP92526573	Plasmid vector containing HLA-C*12:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:188 protein. This plasmid can be used for constructing HLA-C*12:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:189 Protein Expression Plasmid Vector	PHLAP92526574	Plasmid vector containing HLA-C*12:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:189 protein. This plasmid can be used for constructing HLA-C*12:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:19 Protein Expression Plasmid Vector	PHLAP92526575	Plasmid vector containing HLA-C*12:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:19 protein. This plasmid can be used for constructing HLA-C*12:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:190 Protein Expression Plasmid Vector	PHLAP92526576	Plasmid vector containing HLA-C*12:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:190 protein. This plasmid can be used for constructing HLA-C*12:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:191 Protein Expression Plasmid Vector	PHLAP92526577	Plasmid vector containing HLA-C*12:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:191 protein. This plasmid can be used for constructing HLA-C*12:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:192 Protein Expression Plasmid Vector	PHLAP92526578	Plasmid vector containing HLA-C*12:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:192 protein. This plasmid can be used for constructing HLA-C*12:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:193 Protein Expression Plasmid Vector	PHLAP92526579	Plasmid vector containing HLA-C*12:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:193 protein. This plasmid can be used for constructing HLA-C*12:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:194 Protein Expression Plasmid Vector	PHLAP92526580	Plasmid vector containing HLA-C*12:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:194 protein. This plasmid can be used for constructing HLA-C*12:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:195:01 Protein Expression Plasmid Vector	PHLAP92526581	Plasmid vector containing HLA-C*12:195:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:195:01 protein. This plasmid can be used for constructing HLA-C*12:195:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:195:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:195:02 Protein Expression Plasmid Vector	PHLAP92526582	Plasmid vector containing HLA-C*12:195:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:195:02 protein. This plasmid can be used for constructing HLA-C*12:195:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:195:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:195:03 Protein Expression Plasmid Vector	PHLAP92526583	Plasmid vector containing HLA-C*12:195:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:195:03 protein. This plasmid can be used for constructing HLA-C*12:195:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:195:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:196 Protein Expression Plasmid Vector	PHLAP92526584	Plasmid vector containing HLA-C*12:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:196 protein. This plasmid can be used for constructing HLA-C*12:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:197 Protein Expression Plasmid Vector	PHLAP92526585	Plasmid vector containing HLA-C*12:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:197 protein. This plasmid can be used for constructing HLA-C*12:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:198 Protein Expression Plasmid Vector	PHLAP92526586	Plasmid vector containing HLA-C*12:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:198 protein. This plasmid can be used for constructing HLA-C*12:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:199:01 Protein Expression Plasmid Vector	PHLAP92526587	Plasmid vector containing HLA-C*12:199:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:199:01 protein. This plasmid can be used for constructing HLA-C*12:199:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:199:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:199:02 Protein Expression Plasmid Vector	PHLAP92526588	Plasmid vector containing HLA-C*12:199:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:199:02 protein. This plasmid can be used for constructing HLA-C*12:199:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:199:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:20 Protein Expression Plasmid Vector	PHLAP92526589	Plasmid vector containing HLA-C*12:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:20 protein. This plasmid can be used for constructing HLA-C*12:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:200 Protein Expression Plasmid Vector	PHLAP92526590	Plasmid vector containing HLA-C*12:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:200 protein. This plasmid can be used for constructing HLA-C*12:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:201 Protein Expression Plasmid Vector	PHLAP92526591	Plasmid vector containing HLA-C*12:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:201 protein. This plasmid can be used for constructing HLA-C*12:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:202 Protein Expression Plasmid Vector	PHLAP92526592	Plasmid vector containing HLA-C*12:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:202 protein. This plasmid can be used for constructing HLA-C*12:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:203 Protein Expression Plasmid Vector	PHLAP92526593	Plasmid vector containing HLA-C*12:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:203 protein. This plasmid can be used for constructing HLA-C*12:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:204 Protein Expression Plasmid Vector	PHLAP92526594	Plasmid vector containing HLA-C*12:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:204 protein. This plasmid can be used for constructing HLA-C*12:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:205 Protein Expression Plasmid Vector	PHLAP92526595	Plasmid vector containing HLA-C*12:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:205 protein. This plasmid can be used for constructing HLA-C*12:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:206 Protein Expression Plasmid Vector	PHLAP92526596	Plasmid vector containing HLA-C*12:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:206 protein. This plasmid can be used for constructing HLA-C*12:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:207 Protein Expression Plasmid Vector	PHLAP92526597	Plasmid vector containing HLA-C*12:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:207 protein. This plasmid can be used for constructing HLA-C*12:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:208 Protein Expression Plasmid Vector	PHLAP92526598	Plasmid vector containing HLA-C*12:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:208 protein. This plasmid can be used for constructing HLA-C*12:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:209 Protein Expression Plasmid Vector	PHLAP92526599	Plasmid vector containing HLA-C*12:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:209 protein. This plasmid can be used for constructing HLA-C*12:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:21 Protein Expression Plasmid Vector	PHLAP92526600	Plasmid vector containing HLA-C*12:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:21 protein. This plasmid can be used for constructing HLA-C*12:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:210 Protein Expression Plasmid Vector	PHLAP92526601	Plasmid vector containing HLA-C*12:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:210 protein. This plasmid can be used for constructing HLA-C*12:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:211 Protein Expression Plasmid Vector	PHLAP92526602	Plasmid vector containing HLA-C*12:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:211 protein. This plasmid can be used for constructing HLA-C*12:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:212 Protein Expression Plasmid Vector	PHLAP92526603	Plasmid vector containing HLA-C*12:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:212 protein. This plasmid can be used for constructing HLA-C*12:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:213 Protein Expression Plasmid Vector	PHLAP92526604	Plasmid vector containing HLA-C*12:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:213 protein. This plasmid can be used for constructing HLA-C*12:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:214 Protein Expression Plasmid Vector	PHLAP92526605	Plasmid vector containing HLA-C*12:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:214 protein. This plasmid can be used for constructing HLA-C*12:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:215 Protein Expression Plasmid Vector	PHLAP92526606	Plasmid vector containing HLA-C*12:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:215 protein. This plasmid can be used for constructing HLA-C*12:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:216 Protein Expression Plasmid Vector	PHLAP92526607	Plasmid vector containing HLA-C*12:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:216 protein. This plasmid can be used for constructing HLA-C*12:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:217 Protein Expression Plasmid Vector	PHLAP92526608	Plasmid vector containing HLA-C*12:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:217 protein. This plasmid can be used for constructing HLA-C*12:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:218 Protein Expression Plasmid Vector	PHLAP92526609	Plasmid vector containing HLA-C*12:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:218 protein. This plasmid can be used for constructing HLA-C*12:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:219N Protein Expression Plasmid Vector	PHLAP925266110	Plasmid vector containing HLA-C*12:219N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:219N protein. This plasmid can be used for constructing HLA-C*12:219N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:219N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:22 Protein Expression Plasmid Vector	PHLAP925266111	Plasmid vector containing HLA-C*12:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:22 protein. This plasmid can be used for constructing HLA-C*12:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:220 Protein Expression Plasmid Vector	PHLAP925266112	Plasmid vector containing HLA-C*12:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:220 protein. This plasmid can be used for constructing HLA-C*12:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:221 Protein Expression Plasmid Vector	PHLAP925266113	Plasmid vector containing HLA-C*12:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:221 protein. This plasmid can be used for constructing HLA-C*12:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:222 Protein Expression Plasmid Vector	PHLAP925266114	Plasmid vector containing HLA-C*12:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:222 protein. This plasmid can be used for constructing HLA-C*12:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:223 Protein Expression Plasmid Vector	PHLAP925266115	Plasmid vector containing HLA-C*12:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:223 protein. This plasmid can be used for constructing HLA-C*12:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:224 Protein Expression Plasmid Vector	PHLAP92526616	Plasmid vector containing HLA-C*12:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:224 protein. This plasmid can be used for constructing HLA-C*12:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:225 Protein Expression Plasmid Vector	PHLAP92526617	Plasmid vector containing HLA-C*12:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:225 protein. This plasmid can be used for constructing HLA-C*12:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:226 Protein Expression Plasmid Vector	PHLAP92526618	Plasmid vector containing HLA-C*12:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:226 protein. This plasmid can be used for constructing HLA-C*12:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:227 Protein Expression Plasmid Vector	PHLAP92526619	Plasmid vector containing HLA-C*12:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:227 protein. This plasmid can be used for constructing HLA-C*12:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:228 Protein Expression Plasmid Vector	PHLAP92526620	Plasmid vector containing HLA-C*12:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:228 protein. This plasmid can be used for constructing HLA-C*12:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:229 Protein Expression Plasmid Vector	PHLAP92526621	Plasmid vector containing HLA-C*12:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:229 protein. This plasmid can be used for constructing HLA-C*12:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:23 Protein Expression Plasmid Vector	PHLAP92526622	Plasmid vector containing HLA-C*12:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:23 protein. This plasmid can be used for constructing HLA-C*12:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:230 Protein Expression Plasmid Vector	PHLAP92526623	Plasmid vector containing HLA-C*12:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:230 protein. This plasmid can be used for constructing HLA-C*12:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:231 Protein Expression Plasmid Vector	PHLAP92526624	Plasmid vector containing HLA-C*12:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:231 protein. This plasmid can be used for constructing HLA-C*12:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:232N Protein Expression Plasmid Vector	PHLAP92526625	Plasmid vector containing HLA-C*12:232N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:232N protein. This plasmid can be used for constructing HLA-C*12:232N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:232N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:233 Protein Expression Plasmid Vector	PHLAP92526626	Plasmid vector containing HLA-C*12:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:233 protein. This plasmid can be used for constructing HLA-C*12:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:234 Protein Expression Plasmid Vector	PHLAP92526627	Plasmid vector containing HLA-C*12:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:234 protein. This plasmid can be used for constructing HLA-C*12:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:235 Protein Expression Plasmid Vector	PHLAP92526628	Plasmid vector containing HLA-C*12:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:235 protein. This plasmid can be used for constructing HLA-C*12:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:236N Protein Expression Plasmid Vector	PHLAP92526629	Plasmid vector containing HLA-C*12:236N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:236N protein. This plasmid can be used for constructing HLA-C*12:236N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:236N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:237 Protein Expression Plasmid Vector	PHLAP92526630	Plasmid vector containing HLA-C*12:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:237 protein. This plasmid can be used for constructing HLA-C*12:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:238 Protein Expression Plasmid Vector	PHLAP92526631	Plasmid vector containing HLA-C*12:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:238 protein. This plasmid can be used for constructing HLA-C*12:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:239 Protein Expression Plasmid Vector	PHLAP92526632	Plasmid vector containing HLA-C*12:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:239 protein. This plasmid can be used for constructing HLA-C*12:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:24:01 Protein Expression Plasmid Vector	PHLAP92526633	Plasmid vector containing HLA-C*12:24:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:24:01 protein. This plasmid can be used for constructing HLA-C*12:24:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:24:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:24:02 Protein Expression Plasmid Vector	PHLAP92526634	Plasmid vector containing HLA-C*12:24:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:24:02 protein. This plasmid can be used for constructing HLA-C*12:24:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:24:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:240 Protein Expression Plasmid Vector	PHLAP92526635	Plasmid vector containing HLA-C*12:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:240 protein. This plasmid can be used for constructing HLA-C*12:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:241 Protein Expression Plasmid Vector	PHLAP92526636	Plasmid vector containing HLA-C*12:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:241 protein. This plasmid can be used for constructing HLA-C*12:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:242 Protein Expression Plasmid Vector	PHLAP92526637	Plasmid vector containing HLA-C*12:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:242 protein. This plasmid can be used for constructing HLA-C*12:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:243 Protein Expression Plasmid Vector	PHLAP92526638	Plasmid vector containing HLA-C*12:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:243 protein. This plasmid can be used for constructing HLA-C*12:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:244 Protein Expression Plasmid Vector	PHLAP92526639	Plasmid vector containing HLA-C*12:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:244 protein. This plasmid can be used for constructing HLA-C*12:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:245 Protein Expression Plasmid Vector	PHLAP92526640	Plasmid vector containing HLA-C*12:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:245 protein. This plasmid can be used for constructing HLA-C*12:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:246 Protein Expression Plasmid Vector	PHLAP92526641	Plasmid vector containing HLA-C*12:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:246 protein. This plasmid can be used for constructing HLA-C*12:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:247 Protein Expression Plasmid Vector	PHLAP92526642	Plasmid vector containing HLA-C*12:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:247 protein. This plasmid can be used for constructing HLA-C*12:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:248 Protein Expression Plasmid Vector	PHLAP92526643	Plasmid vector containing HLA-C*12:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:248 protein. This plasmid can be used for constructing HLA-C*12:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:249 Protein Expression Plasmid Vector	PHLAP92526644	Plasmid vector containing HLA-C*12:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:249 protein. This plasmid can be used for constructing HLA-C*12:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:25 Protein Expression Plasmid Vector	PHLAP92526645	Plasmid vector containing HLA-C*12:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:25 protein. This plasmid can be used for constructing HLA-C*12:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:250 Protein Expression Plasmid Vector	PHLAP92526646	Plasmid vector containing HLA-C*12:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:250 protein. This plasmid can be used for constructing HLA-C*12:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:251 Protein Expression Plasmid Vector	PHLAP92526647	Plasmid vector containing HLA-C*12:251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:251 protein. This plasmid can be used for constructing HLA-C*12:251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:252 Protein Expression Plasmid Vector	PHLAP92526648	Plasmid vector containing HLA-C*12:252 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:252 protein. This plasmid can be used for constructing HLA-C*12:252 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:252 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:253 Protein Expression Plasmid Vector	PHLAP92526649	Plasmid vector containing HLA-C*12:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:253 protein. This plasmid can be used for constructing HLA-C*12:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:254 Protein Expression Plasmid Vector	PHLAP92526650	Plasmid vector containing HLA-C*12:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:254 protein. This plasmid can be used for constructing HLA-C*12:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:255 Protein Expression Plasmid Vector	PHLAP92526651	Plasmid vector containing HLA-C*12:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:255 protein. This plasmid can be used for constructing HLA-C*12:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:256 Protein Expression Plasmid Vector	PHLAP92526652	Plasmid vector containing HLA-C*12:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:256 protein. This plasmid can be used for constructing HLA-C*12:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:257 Protein Expression Plasmid Vector	PHLAP92526653	Plasmid vector containing HLA-C*12:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:257 protein. This plasmid can be used for constructing HLA-C*12:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:258 Protein Expression Plasmid Vector	PHLAP92526654	Plasmid vector containing HLA-C*12:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:258 protein. This plasmid can be used for constructing HLA-C*12:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:259 Protein Expression Plasmid Vector	PHLAP92526655	Plasmid vector containing HLA-C*12:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:259 protein. This plasmid can be used for constructing HLA-C*12:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:26 Protein Expression Plasmid Vector	PHLAP92526656	Plasmid vector containing HLA-C*12:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:26 protein. This plasmid can be used for constructing HLA-C*12:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:260:01 Protein Expression Plasmid Vector	PHLAP92526657	Plasmid vector containing HLA-C*12:260:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:260:01 protein. This plasmid can be used for constructing HLA-C*12:260:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:260:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:260:02 Protein Expression Plasmid Vector	PHLAP92526658	Plasmid vector containing HLA-C*12:260:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:260:02 protein. This plasmid can be used for constructing HLA-C*12:260:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:260:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:261 Protein Expression Plasmid Vector	PHLAP92526659	Plasmid vector containing HLA-C*12:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:261 protein. This plasmid can be used for constructing HLA-C*12:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:262 Protein Expression Plasmid Vector	PHLAP92526660	Plasmid vector containing HLA-C*12:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:262 protein. This plasmid can be used for constructing HLA-C*12:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:263 Protein Expression Plasmid Vector	PHLAP92526661	Plasmid vector containing HLA-C*12:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:263 protein. This plasmid can be used for constructing HLA-C*12:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:264 Protein Expression Plasmid Vector	PHLAP92526662	Plasmid vector containing HLA-C*12:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:264 protein. This plasmid can be used for constructing HLA-C*12:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:265 Protein Expression Plasmid Vector	PHLAP92526663	Plasmid vector containing HLA-C*12:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:265 protein. This plasmid can be used for constructing HLA-C*12:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:266 Protein Expression Plasmid Vector	PHLAP92526664	Plasmid vector containing HLA-C*12:266 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:266 protein. This plasmid can be used for constructing HLA-C*12:266 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:266 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:267 Protein Expression Plasmid Vector	PHLAP92526665	Plasmid vector containing HLA-C*12:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:267 protein. This plasmid can be used for constructing HLA-C*12:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:268 Protein Expression Plasmid Vector	PHLAP92526666	Plasmid vector containing HLA-C*12:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:268 protein. This plasmid can be used for constructing HLA-C*12:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:269 Protein Expression Plasmid Vector	PHLAP92526667	Plasmid vector containing HLA-C*12:269 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:269 protein. This plasmid can be used for constructing HLA-C*12:269 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:269 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:27 Protein Expression Plasmid Vector	PHLAP92526668	Plasmid vector containing HLA-C*12:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:27 protein. This plasmid can be used for constructing HLA-C*12:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:270N Protein Expression Plasmid Vector	PHLAP92526669	Plasmid vector containing HLA-C*12:270N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:270N protein. This plasmid can be used for constructing HLA-C*12:270N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:270N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:271 Protein Expression Plasmid Vector	PHLAP92526670	Plasmid vector containing HLA-C*12:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:271 protein. This plasmid can be used for constructing HLA-C*12:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:272 Protein Expression Plasmid Vector	PHLAP92526671	Plasmid vector containing HLA-C*12:272 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:272 protein. This plasmid can be used for constructing HLA-C*12:272 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:272 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:273 Protein Expression Plasmid Vector	PHLAP92526672	Plasmid vector containing HLA-C*12:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:273 protein. This plasmid can be used for constructing HLA-C*12:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:274:01N Protein Expression Plasmid Vector	PHLAP92526673	Plasmid vector containing HLA-C*12:274:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:274:01N protein. This plasmid can be used for constructing HLA-C*12:274:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:274:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:274:02N Protein Expression Plasmid Vector	PHLAP92526674	Plasmid vector containing HLA-C*12:274:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:274:02N protein. This plasmid can be used for constructing HLA-C*12:274:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:274:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:275 Protein Expression Plasmid Vector	PHLAP92526675	Plasmid vector containing HLA-C*12:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:275 protein. This plasmid can be used for constructing HLA-C*12:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:276 Protein Expression Plasmid Vector	PHLAP92526676	Plasmid vector containing HLA-C*12:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:276 protein. This plasmid can be used for constructing HLA-C*12:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:277 Protein Expression Plasmid Vector	PHLAP92526677	Plasmid vector containing HLA-C*12:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:277 protein. This plasmid can be used for constructing HLA-C*12:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:278 Protein Expression Plasmid Vector	PHLAP92526678	Plasmid vector containing HLA-C*12:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:278 protein. This plasmid can be used for constructing HLA-C*12:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:279 Protein Expression Plasmid Vector	PHLAP92526679	Plasmid vector containing HLA-C*12:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:279 protein. This plasmid can be used for constructing HLA-C*12:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:28 Protein Expression Plasmid Vector	PHLAP92526680	Plasmid vector containing HLA-C*12:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:28 protein. This plasmid can be used for constructing HLA-C*12:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:280 Protein Expression Plasmid Vector	PHLAP92526681	Plasmid vector containing HLA-C*12:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:280 protein. This plasmid can be used for constructing HLA-C*12:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:281 Protein Expression Plasmid Vector	PHLAP92526682	Plasmid vector containing HLA-C*12:281 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:281 protein. This plasmid can be used for constructing HLA-C*12:281 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:281 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:282 Protein Expression Plasmid Vector	PHLAP92526683	Plasmid vector containing HLA-C*12:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:282 protein. This plasmid can be used for constructing HLA-C*12:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:283 Protein Expression Plasmid Vector	PHLAP92526684	Plasmid vector containing HLA-C*12:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:283 protein. This plasmid can be used for constructing HLA-C*12:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:284 Protein Expression Plasmid Vector	PHLAP92526685	Plasmid vector containing HLA-C*12:284 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:284 protein. This plasmid can be used for constructing HLA-C*12:284 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:284 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:285 Protein Expression Plasmid Vector	PHLAP92526686	Plasmid vector containing HLA-C*12:285 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:285 protein. This plasmid can be used for constructing HLA-C*12:285 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:285 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:286 Protein Expression Plasmid Vector	PHLAP92526687	Plasmid vector containing HLA-C*12:286 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:286 protein. This plasmid can be used for constructing HLA-C*12:286 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:286 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:287 Protein Expression Plasmid Vector	PHLAP92526688	Plasmid vector containing HLA-C*12:287 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:287 protein. This plasmid can be used for constructing HLA-C*12:287 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:287 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:288 Protein Expression Plasmid Vector	PHLAP92526689	Plasmid vector containing HLA-C*12:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:288 protein. This plasmid can be used for constructing HLA-C*12:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:289 Protein Expression Plasmid Vector	PHLAP92526690	Plasmid vector containing HLA-C*12:289 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:289 protein. This plasmid can be used for constructing HLA-C*12:289 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:289 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:29 Protein Expression Plasmid Vector	PHLAP92526691	Plasmid vector containing HLA-C*12:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:29 protein. This plasmid can be used for constructing HLA-C*12:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:290 Protein Expression Plasmid Vector	PHLAP92526692	Plasmid vector containing HLA-C*12:290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:290 protein. This plasmid can be used for constructing HLA-C*12:290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:291 Protein Expression Plasmid Vector	PHLAP92526693	Plasmid vector containing HLA-C*12:291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:291 protein. This plasmid can be used for constructing HLA-C*12:291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:292 Protein Expression Plasmid Vector	PHLAP92526694	Plasmid vector containing HLA-C*12:292 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:292 protein. This plasmid can be used for constructing HLA-C*12:292 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:292 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:293 Protein Expression Plasmid Vector	PHLAP92526695	Plasmid vector containing HLA-C*12:293 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:293 protein. This plasmid can be used for constructing HLA-C*12:293 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:293 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:294 Protein Expression Plasmid Vector	PHLAP92526696	Plasmid vector containing HLA-C*12:294 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:294 protein. This plasmid can be used for constructing HLA-C*12:294 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:294 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:295N Protein Expression Plasmid Vector	PHLAP92526697	Plasmid vector containing HLA-C*12:295N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:295N protein. This plasmid can be used for constructing HLA-C*12:295N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:295N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:296 Protein Expression Plasmid Vector	PHLAP92526698	Plasmid vector containing HLA-C*12:296 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:296 protein. This plasmid can be used for constructing HLA-C*12:296 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:296 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:297 Protein Expression Plasmid Vector	PHLAP92526699	Plasmid vector containing HLA-C*12:297 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:297 protein. This plasmid can be used for constructing HLA-C*12:297 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:297 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:298 Protein Expression Plasmid Vector	PHLAP925267000	Plasmid vector containing HLA-C*12:298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:298 protein. This plasmid can be used for constructing HLA-C*12:298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:299N Protein Expression Plasmid Vector	PHLAP925267001	Plasmid vector containing HLA-C*12:299N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:299N protein. This plasmid can be used for constructing HLA-C*12:299N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:299N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:30 Protein Expression Plasmid Vector	PHLAP925267002	Plasmid vector containing HLA-C*12:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:30 protein. This plasmid can be used for constructing HLA-C*12:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:300 Protein Expression Plasmid Vector	PHLAP925267003	Plasmid vector containing HLA-C*12:300 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:300 protein. This plasmid can be used for constructing HLA-C*12:300 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:300 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:301 Protein Expression Plasmid Vector	PHLAP92526704	Plasmid vector containing HLA-C*12:301 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:301 protein. This plasmid can be used for constructing HLA-C*12:301 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:301 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:302 Protein Expression Plasmid Vector	PHLAP92526705	Plasmid vector containing HLA-C*12:302 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:302 protein. This plasmid can be used for constructing HLA-C*12:302 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:302 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:303 Protein Expression Plasmid Vector	PHLAP92526706	Plasmid vector containing HLA-C*12:303 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:303 protein. This plasmid can be used for constructing HLA-C*12:303 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:303 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:304 Protein Expression Plasmid Vector	PHLAP92526707	Plasmid vector containing HLA-C*12:304 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:304 protein. This plasmid can be used for constructing HLA-C*12:304 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:304 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:305 Protein Expression Plasmid Vector	PHLAP92526708	Plasmid vector containing HLA-C*12:305 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:305 protein. This plasmid can be used for constructing HLA-C*12:305 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:305 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:306 Protein Expression Plasmid Vector	PHLAP92526709	Plasmid vector containing HLA-C*12:306 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:306 protein. This plasmid can be used for constructing HLA-C*12:306 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:306 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:307 Protein Expression Plasmid Vector	PHLAP92526710	Plasmid vector containing HLA-C*12:307 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:307 protein. This plasmid can be used for constructing HLA-C*12:307 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:307 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:308 Protein Expression Plasmid Vector	PHLAP92526711	Plasmid vector containing HLA-C*12:308 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:308 protein. This plasmid can be used for constructing HLA-C*12:308 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:308 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:309 Protein Expression Plasmid Vector	PHLAP92526712	Plasmid vector containing HLA-C*12:309 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:309 protein. This plasmid can be used for constructing HLA-C*12:309 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:309 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:31:01 Protein Expression Plasmid Vector	PHLAP92526713	Plasmid vector containing HLA-C*12:31:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:31:01 protein. This plasmid can be used for constructing HLA-C*12:31:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:31:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:31:02 Protein Expression Plasmid Vector	PHLAP92526714	Plasmid vector containing HLA-C*12:31:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:31:02 protein. This plasmid can be used for constructing HLA-C*12:31:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:31:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:310 Protein Expression Plasmid Vector	PHLAP92526715	Plasmid vector containing HLA-C*12:310 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:310 protein. This plasmid can be used for constructing HLA-C*12:310 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:310 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:311N Protein Expression Plasmid Vector	PHLAP92526716	Plasmid vector containing HLA-C*12:311N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:311N protein. This plasmid can be used for constructing HLA-C*12:311N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:311N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:312 Protein Expression Plasmid Vector	PHLAP92526717	Plasmid vector containing HLA-C*12:312 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:312 protein. This plasmid can be used for constructing HLA-C*12:312 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:312 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:313 Protein Expression Plasmid Vector	PHLAP92526718	Plasmid vector containing HLA-C*12:313 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:313 protein. This plasmid can be used for constructing HLA-C*12:313 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:313 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:314 Protein Expression Plasmid Vector	PHLAP92526719	Plasmid vector containing HLA-C*12:314 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:314 protein. This plasmid can be used for constructing HLA-C*12:314 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:314 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:315 Protein Expression Plasmid Vector	PHLAP92526720	Plasmid vector containing HLA-C*12:315 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:315 protein. This plasmid can be used for constructing HLA-C*12:315 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:315 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:316 Protein Expression Plasmid Vector	PHLAP92526721	Plasmid vector containing HLA-C*12:316 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:316 protein. This plasmid can be used for constructing HLA-C*12:316 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:316 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:317 Protein Expression Plasmid Vector	PHLAP92526722	Plasmid vector containing HLA-C*12:317 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:317 protein. This plasmid can be used for constructing HLA-C*12:317 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:317 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:318 Protein Expression Plasmid Vector	PHLAP92526723	Plasmid vector containing HLA-C*12:318 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:318 protein. This plasmid can be used for constructing HLA-C*12:318 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:318 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:319 Protein Expression Plasmid Vector	PHLAP92526724	Plasmid vector containing HLA-C*12:319 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:319 protein. This plasmid can be used for constructing HLA-C*12:319 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:319 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:32 Protein Expression Plasmid Vector	PHLAP92526725	Plasmid vector containing HLA-C*12:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:32 protein. This plasmid can be used for constructing HLA-C*12:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:320 Protein Expression Plasmid Vector	PHLAP92526726	Plasmid vector containing HLA-C*12:320 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:320 protein. This plasmid can be used for constructing HLA-C*12:320 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:320 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:321 Protein Expression Plasmid Vector	PHLAP92526727	Plasmid vector containing HLA-C*12:321 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:321 protein. This plasmid can be used for constructing HLA-C*12:321 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:321 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:322 Protein Expression Plasmid Vector	PHLAP92526728	Plasmid vector containing HLA-C*12:322 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:322 protein. This plasmid can be used for constructing HLA-C*12:322 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:322 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:323 Protein Expression Plasmid Vector	PHLAP92526729	Plasmid vector containing HLA-C*12:323 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:323 protein. This plasmid can be used for constructing HLA-C*12:323 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:323 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:324N Protein Expression Plasmid Vector	PHLAP92526730	Plasmid vector containing HLA-C*12:324N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:324N protein. This plasmid can be used for constructing HLA-C*12:324N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:324N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:325 Protein Expression Plasmid Vector	PHLAP92526731	Plasmid vector containing HLA-C*12:325 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:325 protein. This plasmid can be used for constructing HLA-C*12:325 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:325 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:326 Protein Expression Plasmid Vector	PHLAP92526732	Plasmid vector containing HLA-C*12:326 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:326 protein. This plasmid can be used for constructing HLA-C*12:326 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:326 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:327N Protein Expression Plasmid Vector	PHLAP92526733	Plasmid vector containing HLA-C*12:327N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:327N protein. This plasmid can be used for constructing HLA-C*12:327N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:327N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:328 Protein Expression Plasmid Vector	PHLAP92526734	Plasmid vector containing HLA-C*12:328 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:328 protein. This plasmid can be used for constructing HLA-C*12:328 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:328 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:329N Protein Expression Plasmid Vector	PHLAP92526735	Plasmid vector containing HLA-C*12:329N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:329N protein. This plasmid can be used for constructing HLA-C*12:329N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:329N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:33 Protein Expression Plasmid Vector	PHLAP92526736	Plasmid vector containing HLA-C*12:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:33 protein. This plasmid can be used for constructing HLA-C*12:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:330Q Protein Expression Plasmid Vector	PHLAP92526737	Plasmid vector containing HLA-C*12:330Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:330Q protein. This plasmid can be used for constructing HLA-C*12:330Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:330Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:331 Protein Expression Plasmid Vector	PHLAP92526738	Plasmid vector containing HLA-C*12:331 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:331 protein. This plasmid can be used for constructing HLA-C*12:331 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:331 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:332 Protein Expression Plasmid Vector	PHLAP92526739	Plasmid vector containing HLA-C*12:332 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:332 protein. This plasmid can be used for constructing HLA-C*12:332 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:332 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:333 Protein Expression Plasmid Vector	PHLAP92526740	Plasmid vector containing HLA-C*12:333 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:333 protein. This plasmid can be used for constructing HLA-C*12:333 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:333 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:334 Protein Expression Plasmid Vector	PHLAP92526741	Plasmid vector containing HLA-C*12:334 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:334 protein. This plasmid can be used for constructing HLA-C*12:334 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:334 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:335 Protein Expression Plasmid Vector	PHLAP92526742	Plasmid vector containing HLA-C*12:335 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:335 protein. This plasmid can be used for constructing HLA-C*12:335 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:335 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:336 Protein Expression Plasmid Vector	PHLAP92526743	Plasmid vector containing HLA-C*12:336 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:336 protein. This plasmid can be used for constructing HLA-C*12:336 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:336 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:337 Protein Expression Plasmid Vector	PHLAP92526744	Plasmid vector containing HLA-C*12:337 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:337 protein. This plasmid can be used for constructing HLA-C*12:337 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:337 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:338 Protein Expression Plasmid Vector	PHLAP92526745	Plasmid vector containing HLA-C*12:338 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:338 protein. This plasmid can be used for constructing HLA-C*12:338 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:338 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:339 Protein Expression Plasmid Vector	PHLAP92526746	Plasmid vector containing HLA-C*12:339 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:339 protein. This plasmid can be used for constructing HLA-C*12:339 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:339 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:34 Protein Expression Plasmid Vector	PHLAP92526747	Plasmid vector containing HLA-C*12:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:34 protein. This plasmid can be used for constructing HLA-C*12:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:340 Protein Expression Plasmid Vector	PHLAP92526748	Plasmid vector containing HLA-C*12:340 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:340 protein. This plasmid can be used for constructing HLA-C*12:340 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:340 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:341 Protein Expression Plasmid Vector	PHLAP92526749	Plasmid vector containing HLA-C*12:341 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:341 protein. This plasmid can be used for constructing HLA-C*12:341 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:341 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:342Q Protein Expression Plasmid Vector	PHLAP92526750	Plasmid vector containing HLA-C*12:342Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:342Q protein. This plasmid can be used for constructing HLA-C*12:342Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:342Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:343N Protein Expression Plasmid Vector	PHLAP92526751	Plasmid vector containing HLA-C*12:343N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:343N protein. This plasmid can be used for constructing HLA-C*12:343N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:343N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:344 Protein Expression Plasmid Vector	PHLAP92526752	Plasmid vector containing HLA-C*12:344 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:344 protein. This plasmid can be used for constructing HLA-C*12:344 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:344 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:345N Protein Expression Plasmid Vector	PHLAP92526753	Plasmid vector containing HLA-C*12:345N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:345N protein. This plasmid can be used for constructing HLA-C*12:345N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:345N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:346 Protein Expression Plasmid Vector	PHLAP92526754	Plasmid vector containing HLA-C*12:346 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:346 protein. This plasmid can be used for constructing HLA-C*12:346 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:346 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:347 Protein Expression Plasmid Vector	PHLAP92526755	Plasmid vector containing HLA-C*12:347 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:347 protein. This plasmid can be used for constructing HLA-C*12:347 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:347 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:348 Protein Expression Plasmid Vector	PHLAP92526756	Plasmid vector containing HLA-C*12:348 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:348 protein. This plasmid can be used for constructing HLA-C*12:348 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:348 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:349 Protein Expression Plasmid Vector	PHLAP92526757	Plasmid vector containing HLA-C*12:349 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:349 protein. This plasmid can be used for constructing HLA-C*12:349 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:349 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:35 Protein Expression Plasmid Vector	PHLAP92526758	Plasmid vector containing HLA-C*12:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:35 protein. This plasmid can be used for constructing HLA-C*12:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:350 Protein Expression Plasmid Vector	PHLAP92526759	Plasmid vector containing HLA-C*12:350 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:350 protein. This plasmid can be used for constructing HLA-C*12:350 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:350 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:351Q Protein Expression Plasmid Vector	PHLAP92526760	Plasmid vector containing HLA-C*12:351Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:351Q protein. This plasmid can be used for constructing HLA-C*12:351Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:351Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:352 Protein Expression Plasmid Vector	PHLAP92526761	Plasmid vector containing HLA-C*12:352 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:352 protein. This plasmid can be used for constructing HLA-C*12:352 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:352 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:353 Protein Expression Plasmid Vector	PHLAP92526762	Plasmid vector containing HLA-C*12:353 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:353 protein. This plasmid can be used for constructing HLA-C*12:353 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:353 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:354 Protein Expression Plasmid Vector	PHLAP92526763	Plasmid vector containing HLA-C*12:354 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:354 protein. This plasmid can be used for constructing HLA-C*12:354 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:354 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:355 Protein Expression Plasmid Vector	PHLAP92526764	Plasmid vector containing HLA-C*12:355 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:355 protein. This plasmid can be used for constructing HLA-C*12:355 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:355 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:356 Protein Expression Plasmid Vector	PHLAP92526765	Plasmid vector containing HLA-C*12:356 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:356 protein. This plasmid can be used for constructing HLA-C*12:356 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:356 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:357 Protein Expression Plasmid Vector	PHLAP92526766	Plasmid vector containing HLA-C*12:357 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:357 protein. This plasmid can be used for constructing HLA-C*12:357 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:357 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:358 Protein Expression Plasmid Vector	PHLAP92526767	Plasmid vector containing HLA-C*12:358 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:358 protein. This plasmid can be used for constructing HLA-C*12:358 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:358 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:359 Protein Expression Plasmid Vector	PHLAP92526768	Plasmid vector containing HLA-C*12:359 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:359 protein. This plasmid can be used for constructing HLA-C*12:359 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:359 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:36 Protein Expression Plasmid Vector	PHLAP92526769	Plasmid vector containing HLA-C*12:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:36 protein. This plasmid can be used for constructing HLA-C*12:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:360 Protein Expression Plasmid Vector	PHLAP92526770	Plasmid vector containing HLA-C*12:360 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:360 protein. This plasmid can be used for constructing HLA-C*12:360 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:360 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:361 Protein Expression Plasmid Vector	PHLAP92526771	Plasmid vector containing HLA-C*12:361 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:361 protein. This plasmid can be used for constructing HLA-C*12:361 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:361 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:362 Protein Expression Plasmid Vector	PHLAP92526772	Plasmid vector containing HLA-C*12:362 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:362 protein. This plasmid can be used for constructing HLA-C*12:362 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:362 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:363 Protein Expression Plasmid Vector	PHLAP92526773	Plasmid vector containing HLA-C*12:363 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:363 protein. This plasmid can be used for constructing HLA-C*12:363 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:363 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:364 Protein Expression Plasmid Vector	PHLAP92526774	Plasmid vector containing HLA-C*12:364 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:364 protein. This plasmid can be used for constructing HLA-C*12:364 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:364 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:365 Protein Expression Plasmid Vector	PHLAP92526775	Plasmid vector containing HLA-C*12:365 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:365 protein. This plasmid can be used for constructing HLA-C*12:365 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:365 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:366 Protein Expression Plasmid Vector	PHLAP92526776	Plasmid vector containing HLA-C*12:366 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:366 protein. This plasmid can be used for constructing HLA-C*12:366 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:366 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:367 Protein Expression Plasmid Vector	PHLAP92526777	Plasmid vector containing HLA-C*12:367 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:367 protein. This plasmid can be used for constructing HLA-C*12:367 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:367 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:368 Protein Expression Plasmid Vector	PHLAP92526778	Plasmid vector containing HLA-C*12:368 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:368 protein. This plasmid can be used for constructing HLA-C*12:368 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:368 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:369 Protein Expression Plasmid Vector	PHLAP92526779	Plasmid vector containing HLA-C*12:369 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:369 protein. This plasmid can be used for constructing HLA-C*12:369 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:369 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:37 Protein Expression Plasmid Vector	PHLAP92526780	Plasmid vector containing HLA-C*12:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:37 protein. This plasmid can be used for constructing HLA-C*12:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:370 Protein Expression Plasmid Vector	PHLAP92526781	Plasmid vector containing HLA-C*12:370 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:370 protein. This plasmid can be used for constructing HLA-C*12:370 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:370 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:371 Protein Expression Plasmid Vector	PHLAP92526782	Plasmid vector containing HLA-C*12:371 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:371 protein. This plasmid can be used for constructing HLA-C*12:371 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:371 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:372 Protein Expression Plasmid Vector	PHLAP92526783	Plasmid vector containing HLA-C*12:372 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:372 protein. This plasmid can be used for constructing HLA-C*12:372 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:372 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:373 Protein Expression Plasmid Vector	PHLAP92526784	Plasmid vector containing HLA-C*12:373 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:373 protein. This plasmid can be used for constructing HLA-C*12:373 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:373 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:374 Protein Expression Plasmid Vector	PHLAP92526785	Plasmid vector containing HLA-C*12:374 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:374 protein. This plasmid can be used for constructing HLA-C*12:374 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:374 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:375 Protein Expression Plasmid Vector	PHLAP92526786	Plasmid vector containing HLA-C*12:375 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:375 protein. This plasmid can be used for constructing HLA-C*12:375 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:375 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:376 Protein Expression Plasmid Vector	PHLAP92526787	Plasmid vector containing HLA-C*12:376 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:376 protein. This plasmid can be used for constructing HLA-C*12:376 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:376 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:377 Protein Expression Plasmid Vector	PHLAP92526788	Plasmid vector containing HLA-C*12:377 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:377 protein. This plasmid can be used for constructing HLA-C*12:377 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:377 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:378 Protein Expression Plasmid Vector	PHLAP92526789	Plasmid vector containing HLA-C*12:378 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:378 protein. This plasmid can be used for constructing HLA-C*12:378 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:378 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:379 Protein Expression Plasmid Vector	PHLAP92526790	Plasmid vector containing HLA-C*12:379 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:379 protein. This plasmid can be used for constructing HLA-C*12:379 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:379 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:38 Protein Expression Plasmid Vector	PHLAP92526791	Plasmid vector containing HLA-C*12:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:38 protein. This plasmid can be used for constructing HLA-C*12:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:380 Protein Expression Plasmid Vector	PHLAP92526792	Plasmid vector containing HLA-C*12:380 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:380 protein. This plasmid can be used for constructing HLA-C*12:380 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:380 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:381 Protein Expression Plasmid Vector	PHLAP92526793	Plasmid vector containing HLA-C*12:381 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:381 protein. This plasmid can be used for constructing HLA-C*12:381 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:381 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:382 Protein Expression Plasmid Vector	PHLAP92526794	Plasmid vector containing HLA-C*12:382 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:382 protein. This plasmid can be used for constructing HLA-C*12:382 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:382 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:383 Protein Expression Plasmid Vector	PHLAP92526795	Plasmid vector containing HLA-C*12:383 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:383 protein. This plasmid can be used for constructing HLA-C*12:383 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:383 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:384 Protein Expression Plasmid Vector	PHLAP92526796	Plasmid vector containing HLA-C*12:384 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:384 protein. This plasmid can be used for constructing HLA-C*12:384 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:384 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:385 Protein Expression Plasmid Vector	PHLAP92526797	Plasmid vector containing HLA-C*12:385 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:385 protein. This plasmid can be used for constructing HLA-C*12:385 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:385 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:386 Protein Expression Plasmid Vector	PHLAP92526798	Plasmid vector containing HLA-C*12:386 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:386 protein. This plasmid can be used for constructing HLA-C*12:386 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:386 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:387 Protein Expression Plasmid Vector	PHLAP92526799	Plasmid vector containing HLA-C*12:387 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:387 protein. This plasmid can be used for constructing HLA-C*12:387 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:387 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:388 Protein Expression Plasmid Vector	PHLAP92526800	Plasmid vector containing HLA-C*12:388 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:388 protein. This plasmid can be used for constructing HLA-C*12:388 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:388 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:389 Protein Expression Plasmid Vector	PHLAP92526801	Plasmid vector containing HLA-C*12:389 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:389 protein. This plasmid can be used for constructing HLA-C*12:389 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:389 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:390 Protein Expression Plasmid Vector	PHLAP92526802	Plasmid vector containing HLA-C*12:390 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:390 protein. This plasmid can be used for constructing HLA-C*12:390 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:390 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:391 Protein Expression Plasmid Vector	PHLAP92526803	Plasmid vector containing HLA-C*12:391 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:391 protein. This plasmid can be used for constructing HLA-C*12:391 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:391 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:392 Protein Expression Plasmid Vector	PHLAP92526804	Plasmid vector containing HLA-C*12:392 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:392 protein. This plasmid can be used for constructing HLA-C*12:392 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:392 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:393Q Protein Expression Plasmid Vector	PHLAP92526805	Plasmid vector containing HLA-C*12:393Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:393Q protein. This plasmid can be used for constructing HLA-C*12:393Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:393Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:394 Protein Expression Plasmid Vector	PHLAP92526806	Plasmid vector containing HLA-C*12:394 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:394 protein. This plasmid can be used for constructing HLA-C*12:394 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:394 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:395 Protein Expression Plasmid Vector	PHLAP92526807	Plasmid vector containing HLA-C*12:395 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:395 protein. This plasmid can be used for constructing HLA-C*12:395 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:395 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:396 Protein Expression Plasmid Vector	PHLAP92526808	Plasmid vector containing HLA-C*12:396 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:396 protein. This plasmid can be used for constructing HLA-C*12:396 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:396 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:397 Protein Expression Plasmid Vector	PHLAP92526809	Plasmid vector containing HLA-C*12:397 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:397 protein. This plasmid can be used for constructing HLA-C*12:397 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:397 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:398 Protein Expression Plasmid Vector	PHLAP925268110	Plasmid vector containing HLA-C*12:398 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:398 protein. This plasmid can be used for constructing HLA-C*12:398 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:398 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:399 Protein Expression Plasmid Vector	PHLAP925268111	Plasmid vector containing HLA-C*12:399 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:399 protein. This plasmid can be used for constructing HLA-C*12:399 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:399 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:39N Protein Expression Plasmid Vector	PHLAP925268112	Plasmid vector containing HLA-C*12:39N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:39N protein. This plasmid can be used for constructing HLA-C*12:39N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:39N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:40 Protein Expression Plasmid Vector	PHLAP925268113	Plasmid vector containing HLA-C*12:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:40 protein. This plasmid can be used for constructing HLA-C*12:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:400 Protein Expression Plasmid Vector	PHLAP925268114	Plasmid vector containing HLA-C*12:400 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:400 protein. This plasmid can be used for constructing HLA-C*12:400 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:400 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:401 Protein Expression Plasmid Vector	PHLAP925268115	Plasmid vector containing HLA-C*12:401 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:401 protein. This plasmid can be used for constructing HLA-C*12:401 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:401 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:402 Protein Expression Plasmid Vector	PHLAP92526816	Plasmid vector containing HLA-C*12:402 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:402 protein. This plasmid can be used for constructing HLA-C*12:402 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:402 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:403 Protein Expression Plasmid Vector	PHLAP92526817	Plasmid vector containing HLA-C*12:403 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:403 protein. This plasmid can be used for constructing HLA-C*12:403 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:403 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:404 Protein Expression Plasmid Vector	PHLAP92526818	Plasmid vector containing HLA-C*12:404 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:404 protein. This plasmid can be used for constructing HLA-C*12:404 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:404 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:405 Protein Expression Plasmid Vector	PHLAP92526819	Plasmid vector containing HLA-C*12:405 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:405 protein. This plasmid can be used for constructing HLA-C*12:405 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:405 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:406 Protein Expression Plasmid Vector	PHLAP92526820	Plasmid vector containing HLA-C*12:406 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:406 protein. This plasmid can be used for constructing HLA-C*12:406 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:406 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:407 Protein Expression Plasmid Vector	PHLAP92526821	Plasmid vector containing HLA-C*12:407 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:407 protein. This plasmid can be used for constructing HLA-C*12:407 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:407 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:408 Protein Expression Plasmid Vector	PHLAP92526822	Plasmid vector containing HLA-C*12:408 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:408 protein. This plasmid can be used for constructing HLA-C*12:408 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:408 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:409 Protein Expression Plasmid Vector	PHLAP92526823	Plasmid vector containing HLA-C*12:409 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:409 protein. This plasmid can be used for constructing HLA-C*12:409 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:409 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:41 Protein Expression Plasmid Vector	PHLAP92526824	Plasmid vector containing HLA-C*12:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:41 protein. This plasmid can be used for constructing HLA-C*12:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:410 Protein Expression Plasmid Vector	PHLAP92526825	Plasmid vector containing HLA-C*12:410 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:410 protein. This plasmid can be used for constructing HLA-C*12:410 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:410 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:411 Protein Expression Plasmid Vector	PHLAP92526826	Plasmid vector containing HLA-C*12:411 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:411 protein. This plasmid can be used for constructing HLA-C*12:411 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:411 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:412 Protein Expression Plasmid Vector	PHLAP92526827	Plasmid vector containing HLA-C*12:412 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:412 protein. This plasmid can be used for constructing HLA-C*12:412 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:412 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:413 Protein Expression Plasmid Vector	PHLAP92526828	Plasmid vector containing HLA-C*12:413 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:413 protein. This plasmid can be used for constructing HLA-C*12:413 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:413 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:414 Protein Expression Plasmid Vector	PHLAP92526829	Plasmid vector containing HLA-C*12:414 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:414 protein. This plasmid can be used for constructing HLA-C*12:414 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:414 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:415 Protein Expression Plasmid Vector	PHLAP92526830	Plasmid vector containing HLA-C*12:415 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:415 protein. This plasmid can be used for constructing HLA-C*12:415 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:415 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:416 Protein Expression Plasmid Vector	PHLAP92526831	Plasmid vector containing HLA-C*12:416 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:416 protein. This plasmid can be used for constructing HLA-C*12:416 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:416 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:417 Protein Expression Plasmid Vector	PHLAP92526832	Plasmid vector containing HLA-C*12:417 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:417 protein. This plasmid can be used for constructing HLA-C*12:417 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:417 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:418 Protein Expression Plasmid Vector	PHLAP92526833	Plasmid vector containing HLA-C*12:418 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:418 protein. This plasmid can be used for constructing HLA-C*12:418 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:418 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:419 Protein Expression Plasmid Vector	PHLAP92526834	Plasmid vector containing HLA-C*12:419 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:419 protein. This plasmid can be used for constructing HLA-C*12:419 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:419 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:420 Protein Expression Plasmid Vector	PHLAP92526835	Plasmid vector containing HLA-C*12:420 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:420 protein. This plasmid can be used for constructing HLA-C*12:420 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:420 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:421N Protein Expression Plasmid Vector	PHLAP92526836	Plasmid vector containing HLA-C*12:421N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:421N protein. This plasmid can be used for constructing HLA-C*12:421N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:421N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:422 Protein Expression Plasmid Vector	PHLAP92526837	Plasmid vector containing HLA-C*12:422 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:422 protein. This plasmid can be used for constructing HLA-C*12:422 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:422 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:423 Protein Expression Plasmid Vector	PHLAP92526838	Plasmid vector containing HLA-C*12:423 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:423 protein. This plasmid can be used for constructing HLA-C*12:423 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:423 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:424 Protein Expression Plasmid Vector	PHLAP92526839	Plasmid vector containing HLA-C*12:424 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:424 protein. This plasmid can be used for constructing HLA-C*12:424 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:424 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:425 Protein Expression Plasmid Vector	PHLAP92526840	Plasmid vector containing HLA-C*12:425 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:425 protein. This plasmid can be used for constructing HLA-C*12:425 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:425 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:426 Protein Expression Plasmid Vector	PHLAP92526841	Plasmid vector containing HLA-C*12:426 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:426 protein. This plasmid can be used for constructing HLA-C*12:426 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:426 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:427 Protein Expression Plasmid Vector	PHLAP92526842	Plasmid vector containing HLA-C*12:427 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:427 protein. This plasmid can be used for constructing HLA-C*12:427 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:427 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:428N Protein Expression Plasmid Vector	PHLAP92526843	Plasmid vector containing HLA-C*12:428N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:428N protein. This plasmid can be used for constructing HLA-C*12:428N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:428N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:429 Protein Expression Plasmid Vector	PHLAP92526844	Plasmid vector containing HLA-C*12:429 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:429 protein. This plasmid can be used for constructing HLA-C*12:429 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:429 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:42Q Protein Expression Plasmid Vector	PHLAP92526845	Plasmid vector containing HLA-C*12:42Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:42Q protein. This plasmid can be used for constructing HLA-C*12:42Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:42Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:43 Protein Expression Plasmid Vector	PHLAP92526846	Plasmid vector containing HLA-C*12:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:43 protein. This plasmid can be used for constructing HLA-C*12:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:430 Protein Expression Plasmid Vector	PHLAP92526847	Plasmid vector containing HLA-C*12:430 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:430 protein. This plasmid can be used for constructing HLA-C*12:430 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:430 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:431 Protein Expression Plasmid Vector	PHLAP92526848	Plasmid vector containing HLA-C*12:431 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:431 protein. This plasmid can be used for constructing HLA-C*12:431 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:431 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:432N Protein Expression Plasmid Vector	PHLAP92526849	Plasmid vector containing HLA-C*12:432N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:432N protein. This plasmid can be used for constructing HLA-C*12:432N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:432N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:433 Protein Expression Plasmid Vector	PHLAP92526850	Plasmid vector containing HLA-C*12:433 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:433 protein. This plasmid can be used for constructing HLA-C*12:433 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:433 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:434 Protein Expression Plasmid Vector	PHLAP92526851	Plasmid vector containing HLA-C*12:434 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:434 protein. This plasmid can be used for constructing HLA-C*12:434 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:434 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:435 Protein Expression Plasmid Vector	PHLAP92526852	Plasmid vector containing HLA-C*12:435 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:435 protein. This plasmid can be used for constructing HLA-C*12:435 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:435 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:436 Protein Expression Plasmid Vector	PHLAP92526853	Plasmid vector containing HLA-C*12:436 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:436 protein. This plasmid can be used for constructing HLA-C*12:436 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:436 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:437N Protein Expression Plasmid Vector	PHLAP92526854	Plasmid vector containing HLA-C*12:437N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:437N protein. This plasmid can be used for constructing HLA-C*12:437N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:437N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:44 Protein Expression Plasmid Vector	PHLAP92526855	Plasmid vector containing HLA-C*12:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:44 protein. This plasmid can be used for constructing HLA-C*12:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:45 Protein Expression Plasmid Vector	PHLAP92526856	Plasmid vector containing HLA-C*12:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:45 protein. This plasmid can be used for constructing HLA-C*12:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:46N Protein Expression Plasmid Vector	PHLAP92526857	Plasmid vector containing HLA-C*12:46N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:46N protein. This plasmid can be used for constructing HLA-C*12:46N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:46N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:47 Protein Expression Plasmid Vector	PHLAP92526858	Plasmid vector containing HLA-C*12:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:47 protein. This plasmid can be used for constructing HLA-C*12:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:48 Protein Expression Plasmid Vector	PHLAP92526859	Plasmid vector containing HLA-C*12:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:48 protein. This plasmid can be used for constructing HLA-C*12:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:49 Protein Expression Plasmid Vector	PHLAP92526860	Plasmid vector containing HLA-C*12:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:49 protein. This plasmid can be used for constructing HLA-C*12:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:50 Protein Expression Plasmid Vector	PHLAP92526861	Plasmid vector containing HLA-C*12:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:50 protein. This plasmid can be used for constructing HLA-C*12:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:51 Protein Expression Plasmid Vector	PHLAP92526862	Plasmid vector containing HLA-C*12:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:51 protein. This plasmid can be used for constructing HLA-C*12:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:52 Protein Expression Plasmid Vector	PHLAP92526863	Plasmid vector containing HLA-C*12:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:52 protein. This plasmid can be used for constructing HLA-C*12:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:53 Protein Expression Plasmid Vector	PHLAP92526864	Plasmid vector containing HLA-C*12:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:53 protein. This plasmid can be used for constructing HLA-C*12:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:54 Protein Expression Plasmid Vector	PHLAP92526865	Plasmid vector containing HLA-C*12:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:54 protein. This plasmid can be used for constructing HLA-C*12:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:55 Protein Expression Plasmid Vector	PHLAP92526866	Plasmid vector containing HLA-C*12:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:55 protein. This plasmid can be used for constructing HLA-C*12:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:56 Protein Expression Plasmid Vector	PHLAP92526867	Plasmid vector containing HLA-C*12:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:56 protein. This plasmid can be used for constructing HLA-C*12:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:57:01 Protein Expression Plasmid Vector	PHLAP92526868	Plasmid vector containing HLA-C*12:57:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:57:01 protein. This plasmid can be used for constructing HLA-C*12:57:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:57:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:57:02 Protein Expression Plasmid Vector	PHLAP92526869	Plasmid vector containing HLA-C*12:57:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:57:02 protein. This plasmid can be used for constructing HLA-C*12:57:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:57:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:58 Protein Expression Plasmid Vector	PHLAP92526870	Plasmid vector containing HLA-C*12:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:58 protein. This plasmid can be used for constructing HLA-C*12:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:59 Protein Expression Plasmid Vector	PHLAP92526871	Plasmid vector containing HLA-C*12:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:59 protein. This plasmid can be used for constructing HLA-C*12:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:60 Protein Expression Plasmid Vector	PHLAP925268712	Plasmid vector containing HLA-C*12:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:60 protein. This plasmid can be used for constructing HLA-C*12:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:61 Protein Expression Plasmid Vector	PHLAP925268713	Plasmid vector containing HLA-C*12:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:61 protein. This plasmid can be used for constructing HLA-C*12:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:62 Protein Expression Plasmid Vector	PHLAP925268714	Plasmid vector containing HLA-C*12:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:62 protein. This plasmid can be used for constructing HLA-C*12:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:63 Protein Expression Plasmid Vector	PHLAP925268715	Plasmid vector containing HLA-C*12:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:63 protein. This plasmid can be used for constructing HLA-C*12:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:64 Protein Expression Plasmid Vector	PHLAP925268716	Plasmid vector containing HLA-C*12:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:64 protein. This plasmid can be used for constructing HLA-C*12:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:65 Protein Expression Plasmid Vector	PHLAP925268717	Plasmid vector containing HLA-C*12:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:65 protein. This plasmid can be used for constructing HLA-C*12:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:66 Protein Expression Plasmid Vector	PHLAP925268718	Plasmid vector containing HLA-C*12:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:66 protein. This plasmid can be used for constructing HLA-C*12:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:67 Protein Expression Plasmid Vector	PHLAP925268719	Plasmid vector containing HLA-C*12:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:67 protein. This plasmid can be used for constructing HLA-C*12:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:68 Protein Expression Plasmid Vector	PHLAP92526880	Plasmid vector containing HLA-C*12:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:68 protein. This plasmid can be used for constructing HLA-C*12:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:69 Protein Expression Plasmid Vector	PHLAP92526881	Plasmid vector containing HLA-C*12:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:69 protein. This plasmid can be used for constructing HLA-C*12:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:70 Protein Expression Plasmid Vector	PHLAP92526882	Plasmid vector containing HLA-C*12:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:70 protein. This plasmid can be used for constructing HLA-C*12:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:71 Protein Expression Plasmid Vector	PHLAP92526883	Plasmid vector containing HLA-C*12:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:71 protein. This plasmid can be used for constructing HLA-C*12:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:72 Protein Expression Plasmid Vector	PHLAP92526884	Plasmid vector containing HLA-C*12:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:72 protein. This plasmid can be used for constructing HLA-C*12:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:73 Protein Expression Plasmid Vector	PHLAP92526885	Plasmid vector containing HLA-C*12:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:73 protein. This plasmid can be used for constructing HLA-C*12:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:74 Protein Expression Plasmid Vector	PHLAP92526886	Plasmid vector containing HLA-C*12:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:74 protein. This plasmid can be used for constructing HLA-C*12:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:75 Protein Expression Plasmid Vector	PHLAP92526887	Plasmid vector containing HLA-C*12:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:75 protein. This plasmid can be used for constructing HLA-C*12:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:76 Protein Expression Plasmid Vector	PHLAP92526888	Plasmid vector containing HLA-C*12:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:76 protein. This plasmid can be used for constructing HLA-C*12:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:77 Protein Expression Plasmid Vector	PHLAP92526889	Plasmid vector containing HLA-C*12:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:77 protein. This plasmid can be used for constructing HLA-C*12:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:78 Protein Expression Plasmid Vector	PHLAP92526890	Plasmid vector containing HLA-C*12:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:78 protein. This plasmid can be used for constructing HLA-C*12:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:79 Protein Expression Plasmid Vector	PHLAP92526891	Plasmid vector containing HLA-C*12:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:79 protein. This plasmid can be used for constructing HLA-C*12:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:80N Protein Expression Plasmid Vector	PHLAP92526892	Plasmid vector containing HLA-C*12:80N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:80N protein. This plasmid can be used for constructing HLA-C*12:80N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:80N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:81 Protein Expression Plasmid Vector	PHLAP92526893	Plasmid vector containing HLA-C*12:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:81 protein. This plasmid can be used for constructing HLA-C*12:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:82 Protein Expression Plasmid Vector	PHLAP92526894	Plasmid vector containing HLA-C*12:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:82 protein. This plasmid can be used for constructing HLA-C*12:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:83 Protein Expression Plasmid Vector	PHLAP92526895	Plasmid vector containing HLA-C*12:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:83 protein. This plasmid can be used for constructing HLA-C*12:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:84N Protein Expression Plasmid Vector	PHLAP92526896	Plasmid vector containing HLA-C*12:84N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:84N protein. This plasmid can be used for constructing HLA-C*12:84N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:84N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:85:01 Protein Expression Plasmid Vector	PHLAP92526897	Plasmid vector containing HLA-C*12:85:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:85:01 protein. This plasmid can be used for constructing HLA-C*12:85:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:85:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:85:02 Protein Expression Plasmid Vector	PHLAP92526898	Plasmid vector containing HLA-C*12:85:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:85:02 protein. This plasmid can be used for constructing HLA-C*12:85:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:85:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:86 Protein Expression Plasmid Vector	PHLAP92526899	Plasmid vector containing HLA-C*12:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:86 protein. This plasmid can be used for constructing HLA-C*12:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:87 Protein Expression Plasmid Vector	PHLAP925269000	Plasmid vector containing HLA-C*12:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:87 protein. This plasmid can be used for constructing HLA-C*12:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:88 Protein Expression Plasmid Vector	PHLAP925269001	Plasmid vector containing HLA-C*12:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:88 protein. This plasmid can be used for constructing HLA-C*12:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:89 Protein Expression Plasmid Vector	PHLAP925269002	Plasmid vector containing HLA-C*12:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:89 protein. This plasmid can be used for constructing HLA-C*12:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:90 Protein Expression Plasmid Vector	PHLAP925269003	Plasmid vector containing HLA-C*12:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:90 protein. This plasmid can be used for constructing HLA-C*12:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:91 Protein Expression Plasmid Vector	PHLAP92526904	Plasmid vector containing HLA-C*12:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:91 protein. This plasmid can be used for constructing HLA-C*12:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:92 Protein Expression Plasmid Vector	PHLAP92526905	Plasmid vector containing HLA-C*12:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:92 protein. This plasmid can be used for constructing HLA-C*12:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:93 Protein Expression Plasmid Vector	PHLAP92526906	Plasmid vector containing HLA-C*12:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:93 protein. This plasmid can be used for constructing HLA-C*12:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:94 Protein Expression Plasmid Vector	PHLAP92526907	Plasmid vector containing HLA-C*12:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:94 protein. This plasmid can be used for constructing HLA-C*12:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:95 Protein Expression Plasmid Vector	PHLAP92526908	Plasmid vector containing HLA-C*12:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:95 protein. This plasmid can be used for constructing HLA-C*12:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:96:01 Protein Expression Plasmid Vector	PHLAP92526909	Plasmid vector containing HLA-C*12:96:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:96:01 protein. This plasmid can be used for constructing HLA-C*12:96:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:96:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:96:02 Protein Expression Plasmid Vector	PHLAP925269110	Plasmid vector containing HLA-C*12:96:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:96:02 protein. This plasmid can be used for constructing HLA-C*12:96:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:96:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:97 Protein Expression Plasmid Vector	PHLAP925269111	Plasmid vector containing HLA-C*12:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:97 protein. This plasmid can be used for constructing HLA-C*12:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*12:98 Protein Expression Plasmid Vector	PHLAP92526912	Plasmid vector containing HLA-C*12:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:98 protein. This plasmid can be used for constructing HLA-C*12:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:99:01 Protein Expression Plasmid Vector	PHLAP92526913	Plasmid vector containing HLA-C*12:99:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:99:01 protein. This plasmid can be used for constructing HLA-C*12:99:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:99:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*12:99:02 Protein Expression Plasmid Vector	PHLAP92526914	Plasmid vector containing HLA-C*12:99:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*12:99:02 protein. This plasmid can be used for constructing HLA-C*12:99:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*12:99:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:01 Protein Expression Plasmid Vector	PHLAP92526915	Plasmid vector containing HLA-C*14:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:01 protein. This plasmid can be used for constructing HLA-C*14:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:02 Protein Expression Plasmid Vector	PHLAP92526916	Plasmid vector containing HLA-C*14:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:02 protein. This plasmid can be used for constructing HLA-C*14:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:03 Protein Expression Plasmid Vector	PHLAP92526917	Plasmid vector containing HLA-C*14:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:03 protein. This plasmid can be used for constructing HLA-C*14:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:04 Protein Expression Plasmid Vector	PHLAP92526918	Plasmid vector containing HLA-C*14:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:04 protein. This plasmid can be used for constructing HLA-C*14:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:02:01:05 Protein Expression Plasmid Vector	PHLAP92526919	Plasmid vector containing HLA-C*14:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:05 protein. This plasmid can be used for constructing HLA-C*14:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:06 Protein Expression Plasmid Vector	PHLAP92526920	Plasmid vector containing HLA-C*14:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:06 protein. This plasmid can be used for constructing HLA-C*14:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:07 Protein Expression Plasmid Vector	PHLAP92526921	Plasmid vector containing HLA-C*14:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:07 protein. This plasmid can be used for constructing HLA-C*14:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:08 Protein Expression Plasmid Vector	PHLAP92526922	Plasmid vector containing HLA-C*14:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:08 protein. This plasmid can be used for constructing HLA-C*14:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:09 Protein Expression Plasmid Vector	PHLAP92526923	Plasmid vector containing HLA-C*14:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:09 protein. This plasmid can be used for constructing HLA-C*14:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:10 Protein Expression Plasmid Vector	PHLAP92526924	Plasmid vector containing HLA-C*14:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:10 protein. This plasmid can be used for constructing HLA-C*14:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:11 Protein Expression Plasmid Vector	PHLAP92526925	Plasmid vector containing HLA-C*14:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:11 protein. This plasmid can be used for constructing HLA-C*14:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:02:01:12 Protein Expression Plasmid Vector	PHLAP92526926	Plasmid vector containing HLA-C*14:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:12 protein. This plasmid can be used for constructing HLA-C*14:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:13 Protein Expression Plasmid Vector	PHLAP92526927	Plasmid vector containing HLA-C*14:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:13 protein. This plasmid can be used for constructing HLA-C*14:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:14 Protein Expression Plasmid Vector	PHLAP92526928	Plasmid vector containing HLA-C*14:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:14 protein. This plasmid can be used for constructing HLA-C*14:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:15 Protein Expression Plasmid Vector	PHLAP92526929	Plasmid vector containing HLA-C*14:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:15 protein. This plasmid can be used for constructing HLA-C*14:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:16 Protein Expression Plasmid Vector	PHLAP92526930	Plasmid vector containing HLA-C*14:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:16 protein. This plasmid can be used for constructing HLA-C*14:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:17 Protein Expression Plasmid Vector	PHLAP92526931	Plasmid vector containing HLA-C*14:02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:17 protein. This plasmid can be used for constructing HLA-C*14:02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:18 Protein Expression Plasmid Vector	PHLAP92526932	Plasmid vector containing HLA-C*14:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:18 protein. This plasmid can be used for constructing HLA-C*14:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:02:01:19 Protein Expression Plasmid Vector	PHLAP92526933	Plasmid vector containing HLA-C*14:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:19 protein. This plasmid can be used for constructing HLA-C*14:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:20 Protein Expression Plasmid Vector	PHLAP92526934	Plasmid vector containing HLA-C*14:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:20 protein. This plasmid can be used for constructing HLA-C*14:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:21 Protein Expression Plasmid Vector	PHLAP92526935	Plasmid vector containing HLA-C*14:02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:21 protein. This plasmid can be used for constructing HLA-C*14:02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:22 Protein Expression Plasmid Vector	PHLAP92526936	Plasmid vector containing HLA-C*14:02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:22 protein. This plasmid can be used for constructing HLA-C*14:02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:23 Protein Expression Plasmid Vector	PHLAP92526937	Plasmid vector containing HLA-C*14:02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:23 protein. This plasmid can be used for constructing HLA-C*14:02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:24 Protein Expression Plasmid Vector	PHLAP92526938	Plasmid vector containing HLA-C*14:02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:24 protein. This plasmid can be used for constructing HLA-C*14:02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:25 Protein Expression Plasmid Vector	PHLAP92526939	Plasmid vector containing HLA-C*14:02:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:25 protein. This plasmid can be used for constructing HLA-C*14:02:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:02:01:26 Protein Expression Plasmid Vector	PHLAP92526940	Plasmid vector containing HLA-C*14:02:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:26 protein. This plasmid can be used for constructing HLA-C*14:02:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:27 Protein Expression Plasmid Vector	PHLAP92526941	Plasmid vector containing HLA-C*14:02:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:27 protein. This plasmid can be used for constructing HLA-C*14:02:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:28 Protein Expression Plasmid Vector	PHLAP92526942	Plasmid vector containing HLA-C*14:02:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:28 protein. This plasmid can be used for constructing HLA-C*14:02:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:29 Protein Expression Plasmid Vector	PHLAP92526943	Plasmid vector containing HLA-C*14:02:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:29 protein. This plasmid can be used for constructing HLA-C*14:02:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:30 Protein Expression Plasmid Vector	PHLAP92526944	Plasmid vector containing HLA-C*14:02:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:30 protein. This plasmid can be used for constructing HLA-C*14:02:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:31 Protein Expression Plasmid Vector	PHLAP92526945	Plasmid vector containing HLA-C*14:02:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:31 protein. This plasmid can be used for constructing HLA-C*14:02:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:32 Protein Expression Plasmid Vector	PHLAP92526946	Plasmid vector containing HLA-C*14:02:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:32 protein. This plasmid can be used for constructing HLA-C*14:02:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:02:01:33 Protein Expression Plasmid Vector	PHLAP92526947	Plasmid vector containing HLA-C*14:02:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:33 protein. This plasmid can be used for constructing HLA-C*14:02:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:34 Protein Expression Plasmid Vector	PHLAP92526948	Plasmid vector containing HLA-C*14:02:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:34 protein. This plasmid can be used for constructing HLA-C*14:02:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:35 Protein Expression Plasmid Vector	PHLAP92526949	Plasmid vector containing HLA-C*14:02:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:35 protein. This plasmid can be used for constructing HLA-C*14:02:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:01:36 Protein Expression Plasmid Vector	PHLAP92526950	Plasmid vector containing HLA-C*14:02:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:01:36 protein. This plasmid can be used for constructing HLA-C*14:02:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:02 Protein Expression Plasmid Vector	PHLAP92526951	Plasmid vector containing HLA-C*14:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:02 protein. This plasmid can be used for constructing HLA-C*14:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:03 Protein Expression Plasmid Vector	PHLAP92526952	Plasmid vector containing HLA-C*14:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:03 protein. This plasmid can be used for constructing HLA-C*14:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:04 Protein Expression Plasmid Vector	PHLAP92526953	Plasmid vector containing HLA-C*14:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:04 protein. This plasmid can be used for constructing HLA-C*14:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:02:05 Protein Expression Plasmid Vector	PHLAP92526954	Plasmid vector containing HLA-C*14:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:05 protein. This plasmid can be used for constructing HLA-C*14:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:06 Protein Expression Plasmid Vector	PHLAP92526955	Plasmid vector containing HLA-C*14:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:06 protein. This plasmid can be used for constructing HLA-C*14:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:07 Protein Expression Plasmid Vector	PHLAP92526956	Plasmid vector containing HLA-C*14:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:07 protein. This plasmid can be used for constructing HLA-C*14:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:08 Protein Expression Plasmid Vector	PHLAP92526957	Plasmid vector containing HLA-C*14:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:08 protein. This plasmid can be used for constructing HLA-C*14:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:09 Protein Expression Plasmid Vector	PHLAP92526958	Plasmid vector containing HLA-C*14:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:09 protein. This plasmid can be used for constructing HLA-C*14:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:10 Protein Expression Plasmid Vector	PHLAP92526959	Plasmid vector containing HLA-C*14:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:10 protein. This plasmid can be used for constructing HLA-C*14:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:11 Protein Expression Plasmid Vector	PHLAP92526960	Plasmid vector containing HLA-C*14:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:11 protein. This plasmid can be used for constructing HLA-C*14:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:12 Protein Expression Plasmid Vector	PHLAP92526961	Plasmid vector containing HLA-C*14:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:12 protein. This plasmid can be used for constructing HLA-C*14:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:02:13 Protein Expression Plasmid Vector	PHLAP92526962	Plasmid vector containing HLA-C*14:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:13 protein. This plasmid can be used for constructing HLA-C*14:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:14 Protein Expression Plasmid Vector	PHLAP92526963	Plasmid vector containing HLA-C*14:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:14 protein. This plasmid can be used for constructing HLA-C*14:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:15 Protein Expression Plasmid Vector	PHLAP92526964	Plasmid vector containing HLA-C*14:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:15 protein. This plasmid can be used for constructing HLA-C*14:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:16 Protein Expression Plasmid Vector	PHLAP92526965	Plasmid vector containing HLA-C*14:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:16 protein. This plasmid can be used for constructing HLA-C*14:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:17 Protein Expression Plasmid Vector	PHLAP92526966	Plasmid vector containing HLA-C*14:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:17 protein. This plasmid can be used for constructing HLA-C*14:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:18 Protein Expression Plasmid Vector	PHLAP92526967	Plasmid vector containing HLA-C*14:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:18 protein. This plasmid can be used for constructing HLA-C*14:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:19 Protein Expression Plasmid Vector	PHLAP92526968	Plasmid vector containing HLA-C*14:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:19 protein. This plasmid can be used for constructing HLA-C*14:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:20 Protein Expression Plasmid Vector	PHLAP92526969	Plasmid vector containing HLA-C*14:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:20 protein. This plasmid can be used for constructing HLA-C*14:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:02:21 Protein Expression Plasmid Vector	PHLAP92526970	Plasmid vector containing HLA-C*14:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:21 protein. This plasmid can be used for constructing HLA-C*14:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:22 Protein Expression Plasmid Vector	PHLAP92526971	Plasmid vector containing HLA-C*14:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:22 protein. This plasmid can be used for constructing HLA-C*14:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:23 Protein Expression Plasmid Vector	PHLAP92526972	Plasmid vector containing HLA-C*14:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:23 protein. This plasmid can be used for constructing HLA-C*14:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:24 Protein Expression Plasmid Vector	PHLAP92526973	Plasmid vector containing HLA-C*14:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:24 protein. This plasmid can be used for constructing HLA-C*14:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:25 Protein Expression Plasmid Vector	PHLAP92526974	Plasmid vector containing HLA-C*14:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:25 protein. This plasmid can be used for constructing HLA-C*14:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:26 Protein Expression Plasmid Vector	PHLAP92526975	Plasmid vector containing HLA-C*14:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:26 protein. This plasmid can be used for constructing HLA-C*14:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:27 Protein Expression Plasmid Vector	PHLAP92526976	Plasmid vector containing HLA-C*14:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:27 protein. This plasmid can be used for constructing HLA-C*14:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:28 Protein Expression Plasmid Vector	PHLAP92526977	Plasmid vector containing HLA-C*14:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:28 protein. This plasmid can be used for constructing HLA-C*14:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:02:29 Protein Expression Plasmid Vector	PHLAP92526978	Plasmid vector containing HLA-C*14:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:29 protein. This plasmid can be used for constructing HLA-C*14:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:30 Protein Expression Plasmid Vector	PHLAP92526979	Plasmid vector containing HLA-C*14:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:30 protein. This plasmid can be used for constructing HLA-C*14:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:31 Protein Expression Plasmid Vector	PHLAP92526980	Plasmid vector containing HLA-C*14:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:31 protein. This plasmid can be used for constructing HLA-C*14:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:32 Protein Expression Plasmid Vector	PHLAP92526981	Plasmid vector containing HLA-C*14:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:32 protein. This plasmid can be used for constructing HLA-C*14:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:33 Protein Expression Plasmid Vector	PHLAP92526982	Plasmid vector containing HLA-C*14:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:33 protein. This plasmid can be used for constructing HLA-C*14:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:34 Protein Expression Plasmid Vector	PHLAP92526983	Plasmid vector containing HLA-C*14:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:34 protein. This plasmid can be used for constructing HLA-C*14:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:35 Protein Expression Plasmid Vector	PHLAP92526984	Plasmid vector containing HLA-C*14:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:35 protein. This plasmid can be used for constructing HLA-C*14:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:36 Protein Expression Plasmid Vector	PHLAP92526985	Plasmid vector containing HLA-C*14:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:36 protein. This plasmid can be used for constructing HLA-C*14:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:02:37 Protein Expression Plasmid Vector	PHLAP92526986	Plasmid vector containing HLA-C*14:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:37 protein. This plasmid can be used for constructing HLA-C*14:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:38 Protein Expression Plasmid Vector	PHLAP92526987	Plasmid vector containing HLA-C*14:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:38 protein. This plasmid can be used for constructing HLA-C*14:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:39 Protein Expression Plasmid Vector	PHLAP92526988	Plasmid vector containing HLA-C*14:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:39 protein. This plasmid can be used for constructing HLA-C*14:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:40 Protein Expression Plasmid Vector	PHLAP92526989	Plasmid vector containing HLA-C*14:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:40 protein. This plasmid can be used for constructing HLA-C*14:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:41 Protein Expression Plasmid Vector	PHLAP92526990	Plasmid vector containing HLA-C*14:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:41 protein. This plasmid can be used for constructing HLA-C*14:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:42 Protein Expression Plasmid Vector	PHLAP92526991	Plasmid vector containing HLA-C*14:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:42 protein. This plasmid can be used for constructing HLA-C*14:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:02:43 Protein Expression Plasmid Vector	PHLAP92526992	Plasmid vector containing HLA-C*14:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:02:43 protein. This plasmid can be used for constructing HLA-C*14:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:03:01:01 Protein Expression Plasmid Vector	PHLAP92526993	Plasmid vector containing HLA-C*14:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:03:01:01 protein. This plasmid can be used for constructing HLA-C*14:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:03:01:02 Protein Expression Plasmid Vector	PHLAP92526994	Plasmid vector containing HLA-C*14:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:03:01:02 protein. This plasmid can be used for constructing HLA-C*14:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:03:01:03 Protein Expression Plasmid Vector	PHLAP92526995	Plasmid vector containing HLA-C*14:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:03:01:03 protein. This plasmid can be used for constructing HLA-C*14:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:03:02 Protein Expression Plasmid Vector	PHLAP92526996	Plasmid vector containing HLA-C*14:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:03:02 protein. This plasmid can be used for constructing HLA-C*14:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:03:03 Protein Expression Plasmid Vector	PHLAP92526997	Plasmid vector containing HLA-C*14:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:03:03 protein. This plasmid can be used for constructing HLA-C*14:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:03:04 Protein Expression Plasmid Vector	PHLAP92526998	Plasmid vector containing HLA-C*14:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:03:04 protein. This plasmid can be used for constructing HLA-C*14:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:03:05 Protein Expression Plasmid Vector	PHLAP92526999	Plasmid vector containing HLA-C*14:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:03:05 protein. This plasmid can be used for constructing HLA-C*14:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:04 Protein Expression Plasmid Vector	PHLAP92527000	Plasmid vector containing HLA-C*14:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:04 protein. This plasmid can be used for constructing HLA-C*14:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:05 Protein Expression Plasmid Vector	PHLAP92527001	Plasmid vector containing HLA-C*14:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:05 protein. This plasmid can be used for constructing HLA-C*14:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:06 Protein Expression Plasmid Vector	PHLAP92527002	Plasmid vector containing HLA-C*14:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:06 protein. This plasmid can be used for constructing HLA-C*14:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:07N Protein Expression Plasmid Vector	PHLAP92527003	Plasmid vector containing HLA-C*14:07N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:07N protein. This plasmid can be used for constructing HLA-C*14:07N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:07N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:08 Protein Expression Plasmid Vector	PHLAP92527004	Plasmid vector containing HLA-C*14:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:08 protein. This plasmid can be used for constructing HLA-C*14:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:09 Protein Expression Plasmid Vector	PHLAP92527005	Plasmid vector containing HLA-C*14:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:09 protein. This plasmid can be used for constructing HLA-C*14:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:10 Protein Expression Plasmid Vector	PHLAP92527006	Plasmid vector containing HLA-C*14:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:10 protein. This plasmid can be used for constructing HLA-C*14:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:100 Protein Expression Plasmid Vector	PHLAP92527007	Plasmid vector containing HLA-C*14:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:100 protein. This plasmid can be used for constructing HLA-C*14:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:101 Protein Expression Plasmid Vector	PHLAP92527008	Plasmid vector containing HLA-C*14:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:101 protein. This plasmid can be used for constructing HLA-C*14:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:102 Protein Expression Plasmid Vector	PHLAP92527009	Plasmid vector containing HLA-C*14:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:102 protein. This plasmid can be used for constructing HLA-C*14:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:103 Protein Expression Plasmid Vector	PHLAP92527010	Plasmid vector containing HLA-C*14:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:103 protein. This plasmid can be used for constructing HLA-C*14:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:104 Protein Expression Plasmid Vector	PHLAP92527011	Plasmid vector containing HLA-C*14:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:104 protein. This plasmid can be used for constructing HLA-C*14:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:105Q Protein Expression Plasmid Vector	PHLAP92527012	Plasmid vector containing HLA-C*14:105Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:105Q protein. This plasmid can be used for constructing HLA-C*14:105Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:105Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:106 Protein Expression Plasmid Vector	PHLAP92527013	Plasmid vector containing HLA-C*14:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:106 protein. This plasmid can be used for constructing HLA-C*14:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:107 Protein Expression Plasmid Vector	PHLAP92527014	Plasmid vector containing HLA-C*14:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:107 protein. This plasmid can be used for constructing HLA-C*14:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:108 Protein Expression Plasmid Vector	PHLAP92527015	Plasmid vector containing HLA-C*14:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:108 protein. This plasmid can be used for constructing HLA-C*14:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:109 Protein Expression Plasmid Vector	PHLAP92527016	Plasmid vector containing HLA-C*14:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:109 protein. This plasmid can be used for constructing HLA-C*14:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:11 Protein Expression Plasmid Vector	PHLAP92527017	Plasmid vector containing HLA-C*14:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:11 protein. This plasmid can be used for constructing HLA-C*14:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:110 Protein Expression Plasmid Vector	PHLAP92527018	Plasmid vector containing HLA-C*14:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:110 protein. This plasmid can be used for constructing HLA-C*14:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:111 Protein Expression Plasmid Vector	PHLAP92527019	Plasmid vector containing HLA-C*14:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:111 protein. This plasmid can be used for constructing HLA-C*14:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:112 Protein Expression Plasmid Vector	PHLAP925270220	Plasmid vector containing HLA-C*14:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:112 protein. This plasmid can be used for constructing HLA-C*14:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:113 Protein Expression Plasmid Vector	PHLAP925270221	Plasmid vector containing HLA-C*14:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:113 protein. This plasmid can be used for constructing HLA-C*14:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:114 Protein Expression Plasmid Vector	PHLAP925270222	Plasmid vector containing HLA-C*14:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:114 protein. This plasmid can be used for constructing HLA-C*14:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:115 Protein Expression Plasmid Vector	PHLAP925270223	Plasmid vector containing HLA-C*14:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:115 protein. This plasmid can be used for constructing HLA-C*14:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:116 Protein Expression Plasmid Vector	PHLAP925270224	Plasmid vector containing HLA-C*14:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:116 protein. This plasmid can be used for constructing HLA-C*14:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:117N Protein Expression Plasmid Vector	PHLAP925270225	Plasmid vector containing HLA-C*14:117N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:117N protein. This plasmid can be used for constructing HLA-C*14:117N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:117N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:118 Protein Expression Plasmid Vector	PHLAP92527026	Plasmid vector containing HLA-C*14:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:118 protein. This plasmid can be used for constructing HLA-C*14:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:119 Protein Expression Plasmid Vector	PHLAP92527027	Plasmid vector containing HLA-C*14:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:119 protein. This plasmid can be used for constructing HLA-C*14:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:12 Protein Expression Plasmid Vector	PHLAP92527028	Plasmid vector containing HLA-C*14:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:12 protein. This plasmid can be used for constructing HLA-C*14:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:120 Protein Expression Plasmid Vector	PHLAP92527029	Plasmid vector containing HLA-C*14:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:120 protein. This plasmid can be used for constructing HLA-C*14:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:121 Protein Expression Plasmid Vector	PHLAP92527030	Plasmid vector containing HLA-C*14:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:121 protein. This plasmid can be used for constructing HLA-C*14:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:122 Protein Expression Plasmid Vector	PHLAP92527031	Plasmid vector containing HLA-C*14:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:122 protein. This plasmid can be used for constructing HLA-C*14:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:123 Protein Expression Plasmid Vector	PHLAP92527032	Plasmid vector containing HLA-C*14:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:123 protein. This plasmid can be used for constructing HLA-C*14:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:124 Protein Expression Plasmid Vector	PHLAP92527033	Plasmid vector containing HLA-C*14:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:124 protein. This plasmid can be used for constructing HLA-C*14:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:125 Protein Expression Plasmid Vector	PHLAP92527034	Plasmid vector containing HLA-C*14:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:125 protein. This plasmid can be used for constructing HLA-C*14:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:126 Protein Expression Plasmid Vector	PHLAP92527035	Plasmid vector containing HLA-C*14:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:126 protein. This plasmid can be used for constructing HLA-C*14:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:127 Protein Expression Plasmid Vector	PHLAP92527036	Plasmid vector containing HLA-C*14:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:127 protein. This plasmid can be used for constructing HLA-C*14:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:128 Protein Expression Plasmid Vector	PHLAP92527037	Plasmid vector containing HLA-C*14:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:128 protein. This plasmid can be used for constructing HLA-C*14:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:129 Protein Expression Plasmid Vector	PHLAP92527038	Plasmid vector containing HLA-C*14:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:129 protein. This plasmid can be used for constructing HLA-C*14:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:13 Protein Expression Plasmid Vector	PHLAP92527039	Plasmid vector containing HLA-C*14:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:13 protein. This plasmid can be used for constructing HLA-C*14:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:130 Protein Expression Plasmid Vector	PHLAP92527040	Plasmid vector containing HLA-C*14:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:130 protein. This plasmid can be used for constructing HLA-C*14:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:131 Protein Expression Plasmid Vector	PHLAP92527041	Plasmid vector containing HLA-C*14:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:131 protein. This plasmid can be used for constructing HLA-C*14:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:132 Protein Expression Plasmid Vector	PHLAP92527042	Plasmid vector containing HLA-C*14:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:132 protein. This plasmid can be used for constructing HLA-C*14:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:133 Protein Expression Plasmid Vector	PHLAP92527043	Plasmid vector containing HLA-C*14:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:133 protein. This plasmid can be used for constructing HLA-C*14:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:134 Protein Expression Plasmid Vector	PHLAP92527044	Plasmid vector containing HLA-C*14:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:134 protein. This plasmid can be used for constructing HLA-C*14:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:135 Protein Expression Plasmid Vector	PHLAP92527045	Plasmid vector containing HLA-C*14:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:135 protein. This plasmid can be used for constructing HLA-C*14:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:136 Protein Expression Plasmid Vector	PHLAP92527046	Plasmid vector containing HLA-C*14:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:136 protein. This plasmid can be used for constructing HLA-C*14:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:137 Protein Expression Plasmid Vector	PHLAP92527047	Plasmid vector containing HLA-C*14:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:137 protein. This plasmid can be used for constructing HLA-C*14:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:138 Protein Expression Plasmid Vector	PHLAP92527048	Plasmid vector containing HLA-C*14:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:138 protein. This plasmid can be used for constructing HLA-C*14:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:139 Protein Expression Plasmid Vector	PHLAP92527049	Plasmid vector containing HLA-C*14:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:139 protein. This plasmid can be used for constructing HLA-C*14:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:14 Protein Expression Plasmid Vector	PHLAP92527050	Plasmid vector containing HLA-C*14:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:14 protein. This plasmid can be used for constructing HLA-C*14:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:140 Protein Expression Plasmid Vector	PHLAP92527051	Plasmid vector containing HLA-C*14:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:140 protein. This plasmid can be used for constructing HLA-C*14:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:141N Protein Expression Plasmid Vector	PHLAP92527052	Plasmid vector containing HLA-C*14:141N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:141N protein. This plasmid can be used for constructing HLA-C*14:141N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:141N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:142 Protein Expression Plasmid Vector	PHLAP92527053	Plasmid vector containing HLA-C*14:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:142 protein. This plasmid can be used for constructing HLA-C*14:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:143 Protein Expression Plasmid Vector	PHLAP92527054	Plasmid vector containing HLA-C*14:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:143 protein. This plasmid can be used for constructing HLA-C*14:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:144 Protein Expression Plasmid Vector	PHLAP92527055	Plasmid vector containing HLA-C*14:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:144 protein. This plasmid can be used for constructing HLA-C*14:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:145 Protein Expression Plasmid Vector	PHLAP92527056	Plasmid vector containing HLA-C*14:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:145 protein. This plasmid can be used for constructing HLA-C*14:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:146 Protein Expression Plasmid Vector	PHLAP92527057	Plasmid vector containing HLA-C*14:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:146 protein. This plasmid can be used for constructing HLA-C*14:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:147 Protein Expression Plasmid Vector	PHLAP92527058	Plasmid vector containing HLA-C*14:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:147 protein. This plasmid can be used for constructing HLA-C*14:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:148N Protein Expression Plasmid Vector	PHLAP92527059	Plasmid vector containing HLA-C*14:148N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:148N protein. This plasmid can be used for constructing HLA-C*14:148N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:148N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:149 Protein Expression Plasmid Vector	PHLAP92527060	Plasmid vector containing HLA-C*14:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:149 protein. This plasmid can be used for constructing HLA-C*14:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:15 Protein Expression Plasmid Vector	PHLAP92527061	Plasmid vector containing HLA-C*14:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:15 protein. This plasmid can be used for constructing HLA-C*14:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:150 Protein Expression Plasmid Vector	PHLAP92527062	Plasmid vector containing HLA-C*14:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:150 protein. This plasmid can be used for constructing HLA-C*14:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:151 Protein Expression Plasmid Vector	PHLAP92527063	Plasmid vector containing HLA-C*14:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:151 protein. This plasmid can be used for constructing HLA-C*14:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:152 Protein Expression Plasmid Vector	PHLAP92527064	Plasmid vector containing HLA-C*14:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:152 protein. This plasmid can be used for constructing HLA-C*14:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:153 Protein Expression Plasmid Vector	PHLAP92527065	Plasmid vector containing HLA-C*14:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:153 protein. This plasmid can be used for constructing HLA-C*14:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:154 Protein Expression Plasmid Vector	PHLAP92527066	Plasmid vector containing HLA-C*14:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:154 protein. This plasmid can be used for constructing HLA-C*14:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:155 Protein Expression Plasmid Vector	PHLAP92527067	Plasmid vector containing HLA-C*14:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:155 protein. This plasmid can be used for constructing HLA-C*14:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:156N Protein Expression Plasmid Vector	PHLAP92527068	Plasmid vector containing HLA-C*14:156N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:156N protein. This plasmid can be used for constructing HLA-C*14:156N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:156N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:157 Protein Expression Plasmid Vector	PHLAP92527069	Plasmid vector containing HLA-C*14:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:157 protein. This plasmid can be used for constructing HLA-C*14:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:158Q Protein Expression Plasmid Vector	PHLAP92527070	Plasmid vector containing HLA-C*14:158Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:158Q protein. This plasmid can be used for constructing HLA-C*14:158Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:158Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:159 Protein Expression Plasmid Vector	PHLAP92527071	Plasmid vector containing HLA-C*14:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:159 protein. This plasmid can be used for constructing HLA-C*14:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:16 Protein Expression Plasmid Vector	PHLAP92527072	Plasmid vector containing HLA-C*14:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:16 protein. This plasmid can be used for constructing HLA-C*14:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:160 Protein Expression Plasmid Vector	PHLAP92527073	Plasmid vector containing HLA-C*14:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:160 protein. This plasmid can be used for constructing HLA-C*14:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:161 Protein Expression Plasmid Vector	PHLAP92527074	Plasmid vector containing HLA-C*14:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:161 protein. This plasmid can be used for constructing HLA-C*14:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:162 Protein Expression Plasmid Vector	PHLAP92527075	Plasmid vector containing HLA-C*14:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:162 protein. This plasmid can be used for constructing HLA-C*14:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:163 Protein Expression Plasmid Vector	PHLAP92527076	Plasmid vector containing HLA-C*14:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:163 protein. This plasmid can be used for constructing HLA-C*14:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:164 Protein Expression Plasmid Vector	PHLAP92527077	Plasmid vector containing HLA-C*14:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:164 protein. This plasmid can be used for constructing HLA-C*14:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:165 Protein Expression Plasmid Vector	PHLAP92527078	Plasmid vector containing HLA-C*14:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:165 protein. This plasmid can be used for constructing HLA-C*14:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:166 Protein Expression Plasmid Vector	PHLAP92527079	Plasmid vector containing HLA-C*14:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:166 protein. This plasmid can be used for constructing HLA-C*14:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:167 Protein Expression Plasmid Vector	PHLAP92527080	Plasmid vector containing HLA-C*14:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:167 protein. This plasmid can be used for constructing HLA-C*14:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:168 Protein Expression Plasmid Vector	PHLAP92527081	Plasmid vector containing HLA-C*14:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:168 protein. This plasmid can be used for constructing HLA-C*14:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:169 Protein Expression Plasmid Vector	PHLAP92527082	Plasmid vector containing HLA-C*14:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:169 protein. This plasmid can be used for constructing HLA-C*14:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:17 Protein Expression Plasmid Vector	PHLAP92527083	Plasmid vector containing HLA-C*14:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:17 protein. This plasmid can be used for constructing HLA-C*14:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:170 Protein Expression Plasmid Vector	PHLAP92527084	Plasmid vector containing HLA-C*14:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:170 protein. This plasmid can be used for constructing HLA-C*14:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:171 Protein Expression Plasmid Vector	PHLAP92527085	Plasmid vector containing HLA-C*14:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:171 protein. This plasmid can be used for constructing HLA-C*14:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:18 Protein Expression Plasmid Vector	PHLAP92527086	Plasmid vector containing HLA-C*14:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:18 protein. This plasmid can be used for constructing HLA-C*14:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:19 Protein Expression Plasmid Vector	PHLAP92527087	Plasmid vector containing HLA-C*14:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:19 protein. This plasmid can be used for constructing HLA-C*14:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:20 Protein Expression Plasmid Vector	PHLAP92527088	Plasmid vector containing HLA-C*14:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:20 protein. This plasmid can be used for constructing HLA-C*14:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:21N Protein Expression Plasmid Vector	PHLAP92527089	Plasmid vector containing HLA-C*14:21N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:21N protein. This plasmid can be used for constructing HLA-C*14:21N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:21N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:22 Protein Expression Plasmid Vector	PHLAP92527090	Plasmid vector containing HLA-C*14:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:22 protein. This plasmid can be used for constructing HLA-C*14:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:23 Protein Expression Plasmid Vector	PHLAP92527091	Plasmid vector containing HLA-C*14:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:23 protein. This plasmid can be used for constructing HLA-C*14:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:24:01 Protein Expression Plasmid Vector	PHLAP92527092	Plasmid vector containing HLA-C*14:24:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:24:01 protein. This plasmid can be used for constructing HLA-C*14:24:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:24:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:24:02 Protein Expression Plasmid Vector	PHLAP92527093	Plasmid vector containing HLA-C*14:24:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:24:02 protein. This plasmid can be used for constructing HLA-C*14:24:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:24:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:25 Protein Expression Plasmid Vector	PHLAP92527094	Plasmid vector containing HLA-C*14:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:25 protein. This plasmid can be used for constructing HLA-C*14:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:26 Protein Expression Plasmid Vector	PHLAP92527095	Plasmid vector containing HLA-C*14:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:26 protein. This plasmid can be used for constructing HLA-C*14:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:27 Protein Expression Plasmid Vector	PHLAP92527096	Plasmid vector containing HLA-C*14:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:27 protein. This plasmid can be used for constructing HLA-C*14:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:28:01 Protein Expression Plasmid Vector	PHLAP92527097	Plasmid vector containing HLA-C*14:28:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:28:01 protein. This plasmid can be used for constructing HLA-C*14:28:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:28:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:28:02 Protein Expression Plasmid Vector	PHLAP92527098	Plasmid vector containing HLA-C*14:28:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:28:02 protein. This plasmid can be used for constructing HLA-C*14:28:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:28:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:29 Protein Expression Plasmid Vector	PHLAP92527099	Plasmid vector containing HLA-C*14:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:29 protein. This plasmid can be used for constructing HLA-C*14:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:30 Protein Expression Plasmid Vector	PHLAP925271000	Plasmid vector containing HLA-C*14:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:30 protein. This plasmid can be used for constructing HLA-C*14:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:31 Protein Expression Plasmid Vector	PHLAP925271001	Plasmid vector containing HLA-C*14:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:31 protein. This plasmid can be used for constructing HLA-C*14:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:32 Protein Expression Plasmid Vector	PHLAP925271002	Plasmid vector containing HLA-C*14:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:32 protein. This plasmid can be used for constructing HLA-C*14:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:33 Protein Expression Plasmid Vector	PHLAP925271003	Plasmid vector containing HLA-C*14:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:33 protein. This plasmid can be used for constructing HLA-C*14:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:34 Protein Expression Plasmid Vector	PHLAP925271004	Plasmid vector containing HLA-C*14:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:34 protein. This plasmid can be used for constructing HLA-C*14:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:35N Protein Expression Plasmid Vector	PHLAP925271005	Plasmid vector containing HLA-C*14:35N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:35N protein. This plasmid can be used for constructing HLA-C*14:35N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:35N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:36 Protein Expression Plasmid Vector	PHLAP92527106	Plasmid vector containing HLA-C*14:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:36 protein. This plasmid can be used for constructing HLA-C*14:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:37 Protein Expression Plasmid Vector	PHLAP92527107	Plasmid vector containing HLA-C*14:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:37 protein. This plasmid can be used for constructing HLA-C*14:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:38 Protein Expression Plasmid Vector	PHLAP92527108	Plasmid vector containing HLA-C*14:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:38 protein. This plasmid can be used for constructing HLA-C*14:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:39 Protein Expression Plasmid Vector	PHLAP92527109	Plasmid vector containing HLA-C*14:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:39 protein. This plasmid can be used for constructing HLA-C*14:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:40 Protein Expression Plasmid Vector	PHLAP92527110	Plasmid vector containing HLA-C*14:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:40 protein. This plasmid can be used for constructing HLA-C*14:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:41 Protein Expression Plasmid Vector	PHLAP92527111	Plasmid vector containing HLA-C*14:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:41 protein. This plasmid can be used for constructing HLA-C*14:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:42 Protein Expression Plasmid Vector	PHLAP92527112	Plasmid vector containing HLA-C*14:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:42 protein. This plasmid can be used for constructing HLA-C*14:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:43 Protein Expression Plasmid Vector	PHLAP92527113	Plasmid vector containing HLA-C*14:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:43 protein. This plasmid can be used for constructing HLA-C*14:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:44 Protein Expression Plasmid Vector	PHLAP92527114	Plasmid vector containing HLA-C*14:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:44 protein. This plasmid can be used for constructing HLA-C*14:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:45 Protein Expression Plasmid Vector	PHLAP92527115	Plasmid vector containing HLA-C*14:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:45 protein. This plasmid can be used for constructing HLA-C*14:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:46:01 Protein Expression Plasmid Vector	PHLAP92527116	Plasmid vector containing HLA-C*14:46:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:46:01 protein. This plasmid can be used for constructing HLA-C*14:46:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:46:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:46:02 Protein Expression Plasmid Vector	PHLAP92527117	Plasmid vector containing HLA-C*14:46:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:46:02 protein. This plasmid can be used for constructing HLA-C*14:46:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:46:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:47:01N Protein Expression Plasmid Vector	PHLAP92527118	Plasmid vector containing HLA-C*14:47:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:47:01N protein. This plasmid can be used for constructing HLA-C*14:47:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:47:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:47:02N Protein Expression Plasmid Vector	PHLAP92527119	Plasmid vector containing HLA-C*14:47:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:47:02N protein. This plasmid can be used for constructing HLA-C*14:47:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:47:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:48 Protein Expression Plasmid Vector	PHLAP925271210	Plasmid vector containing HLA-C*14:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:48 protein. This plasmid can be used for constructing HLA-C*14:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:49 Protein Expression Plasmid Vector	PHLAP925271211	Plasmid vector containing HLA-C*14:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:49 protein. This plasmid can be used for constructing HLA-C*14:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:50 Protein Expression Plasmid Vector	PHLAP92527122	Plasmid vector containing HLA-C*14:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:50 protein. This plasmid can be used for constructing HLA-C*14:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:51 Protein Expression Plasmid Vector	PHLAP92527123	Plasmid vector containing HLA-C*14:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:51 protein. This plasmid can be used for constructing HLA-C*14:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:52 Protein Expression Plasmid Vector	PHLAP92527124	Plasmid vector containing HLA-C*14:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:52 protein. This plasmid can be used for constructing HLA-C*14:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:53 Protein Expression Plasmid Vector	PHLAP92527125	Plasmid vector containing HLA-C*14:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:53 protein. This plasmid can be used for constructing HLA-C*14:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:54 Protein Expression Plasmid Vector	PHLAP92527126	Plasmid vector containing HLA-C*14:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:54 protein. This plasmid can be used for constructing HLA-C*14:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:55 Protein Expression Plasmid Vector	PHLAP92527127	Plasmid vector containing HLA-C*14:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:55 protein. This plasmid can be used for constructing HLA-C*14:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:56 Protein Expression Plasmid Vector	PHLAP92527128	Plasmid vector containing HLA-C*14:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:56 protein. This plasmid can be used for constructing HLA-C*14:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:57 Protein Expression Plasmid Vector	PHLAP92527129	Plasmid vector containing HLA-C*14:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:57 protein. This plasmid can be used for constructing HLA-C*14:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:58 Protein Expression Plasmid Vector	PHLAP92527130	Plasmid vector containing HLA-C*14:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:58 protein. This plasmid can be used for constructing HLA-C*14:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:59 Protein Expression Plasmid Vector	PHLAP92527131	Plasmid vector containing HLA-C*14:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:59 protein. This plasmid can be used for constructing HLA-C*14:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:60 Protein Expression Plasmid Vector	PHLAP92527132	Plasmid vector containing HLA-C*14:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:60 protein. This plasmid can be used for constructing HLA-C*14:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:61 Protein Expression Plasmid Vector	PHLAP92527133	Plasmid vector containing HLA-C*14:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:61 protein. This plasmid can be used for constructing HLA-C*14:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:62 Protein Expression Plasmid Vector	PHLAP92527134	Plasmid vector containing HLA-C*14:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:62 protein. This plasmid can be used for constructing HLA-C*14:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:63 Protein Expression Plasmid Vector	PHLAP92527135	Plasmid vector containing HLA-C*14:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:63 protein. This plasmid can be used for constructing HLA-C*14:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:64 Protein Expression Plasmid Vector	PHLAP92527136	Plasmid vector containing HLA-C*14:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:64 protein. This plasmid can be used for constructing HLA-C*14:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:65 Protein Expression Plasmid Vector	PHLAP92527137	Plasmid vector containing HLA-C*14:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:65 protein. This plasmid can be used for constructing HLA-C*14:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:66 Protein Expression Plasmid Vector	PHLAP92527138	Plasmid vector containing HLA-C*14:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:66 protein. This plasmid can be used for constructing HLA-C*14:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:67 Protein Expression Plasmid Vector	PHLAP92527139	Plasmid vector containing HLA-C*14:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:67 protein. This plasmid can be used for constructing HLA-C*14:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:68 Protein Expression Plasmid Vector	PHLAP92527140	Plasmid vector containing HLA-C*14:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:68 protein. This plasmid can be used for constructing HLA-C*14:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:69 Protein Expression Plasmid Vector	PHLAP92527141	Plasmid vector containing HLA-C*14:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:69 protein. This plasmid can be used for constructing HLA-C*14:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:70 Protein Expression Plasmid Vector	PHLAP92527142	Plasmid vector containing HLA-C*14:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:70 protein. This plasmid can be used for constructing HLA-C*14:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:71 Protein Expression Plasmid Vector	PHLAP92527143	Plasmid vector containing HLA-C*14:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:71 protein. This plasmid can be used for constructing HLA-C*14:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:72 Protein Expression Plasmid Vector	PHLAP92527144	Plasmid vector containing HLA-C*14:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:72 protein. This plasmid can be used for constructing HLA-C*14:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:73 Protein Expression Plasmid Vector	PHLAP92527145	Plasmid vector containing HLA-C*14:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:73 protein. This plasmid can be used for constructing HLA-C*14:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:74 Protein Expression Plasmid Vector	PHLAP92527146	Plasmid vector containing HLA-C*14:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:74 protein. This plasmid can be used for constructing HLA-C*14:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:75 Protein Expression Plasmid Vector	PHLAP92527147	Plasmid vector containing HLA-C*14:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:75 protein. This plasmid can be used for constructing HLA-C*14:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:76 Protein Expression Plasmid Vector	PHLAP92527148	Plasmid vector containing HLA-C*14:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:76 protein. This plasmid can be used for constructing HLA-C*14:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:77 Protein Expression Plasmid Vector	PHLAP92527149	Plasmid vector containing HLA-C*14:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:77 protein. This plasmid can be used for constructing HLA-C*14:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:78 Protein Expression Plasmid Vector	PHLAP925271510	Plasmid vector containing HLA-C*14:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:78 protein. This plasmid can be used for constructing HLA-C*14:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:79 Protein Expression Plasmid Vector	PHLAP925271511	Plasmid vector containing HLA-C*14:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:79 protein. This plasmid can be used for constructing HLA-C*14:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:80 Protein Expression Plasmid Vector	PHLAP925271512	Plasmid vector containing HLA-C*14:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:80 protein. This plasmid can be used for constructing HLA-C*14:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:81 Protein Expression Plasmid Vector	PHLAP925271513	Plasmid vector containing HLA-C*14:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:81 protein. This plasmid can be used for constructing HLA-C*14:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:82 Protein Expression Plasmid Vector	PHLAP92527154	Plasmid vector containing HLA-C*14:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:82 protein. This plasmid can be used for constructing HLA-C*14:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:83 Protein Expression Plasmid Vector	PHLAP92527155	Plasmid vector containing HLA-C*14:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:83 protein. This plasmid can be used for constructing HLA-C*14:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:84 Protein Expression Plasmid Vector	PHLAP92527156	Plasmid vector containing HLA-C*14:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:84 protein. This plasmid can be used for constructing HLA-C*14:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:85 Protein Expression Plasmid Vector	PHLAP92527157	Plasmid vector containing HLA-C*14:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:85 protein. This plasmid can be used for constructing HLA-C*14:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:86 Protein Expression Plasmid Vector	PHLAP92527158	Plasmid vector containing HLA-C*14:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:86 protein. This plasmid can be used for constructing HLA-C*14:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:87 Protein Expression Plasmid Vector	PHLAP92527159	Plasmid vector containing HLA-C*14:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:87 protein. This plasmid can be used for constructing HLA-C*14:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:88 Protein Expression Plasmid Vector	PHLAP92527160	Plasmid vector containing HLA-C*14:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:88 protein. This plasmid can be used for constructing HLA-C*14:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:89 Protein Expression Plasmid Vector	PHLAP92527161	Plasmid vector containing HLA-C*14:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:89 protein. This plasmid can be used for constructing HLA-C*14:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:90 Protein Expression Plasmid Vector	PHLAP92527162	Plasmid vector containing HLA-C*14:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:90 protein. This plasmid can be used for constructing HLA-C*14:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:91 Protein Expression Plasmid Vector	PHLAP92527163	Plasmid vector containing HLA-C*14:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:91 protein. This plasmid can be used for constructing HLA-C*14:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:92 Protein Expression Plasmid Vector	PHLAP92527164	Plasmid vector containing HLA-C*14:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:92 protein. This plasmid can be used for constructing HLA-C*14:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:93N Protein Expression Plasmid Vector	PHLAP92527165	Plasmid vector containing HLA-C*14:93N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:93N protein. This plasmid can be used for constructing HLA-C*14:93N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:93N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:94 Protein Expression Plasmid Vector	PHLAP92527166	Plasmid vector containing HLA-C*14:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:94 protein. This plasmid can be used for constructing HLA-C*14:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:95 Protein Expression Plasmid Vector	PHLAP92527167	Plasmid vector containing HLA-C*14:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:95 protein. This plasmid can be used for constructing HLA-C*14:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:96 Protein Expression Plasmid Vector	PHLAP92527168	Plasmid vector containing HLA-C*14:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:96 protein. This plasmid can be used for constructing HLA-C*14:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:97N Protein Expression Plasmid Vector	PHLAP92527169	Plasmid vector containing HLA-C*14:97N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:97N protein. This plasmid can be used for constructing HLA-C*14:97N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:97N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*14:98 Protein Expression Plasmid Vector	PHLAP92527170	Plasmid vector containing HLA-C*14:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:98 protein. This plasmid can be used for constructing HLA-C*14:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*14:99N Protein Expression Plasmid Vector	PHLAP92527171	Plasmid vector containing HLA-C*14:99N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*14:99N protein. This plasmid can be used for constructing HLA-C*14:99N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*14:99N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:01 Protein Expression Plasmid Vector	PHLAP92527172	Plasmid vector containing HLA-C*15:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:01 protein. This plasmid can be used for constructing HLA-C*15:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:02 Protein Expression Plasmid Vector	PHLAP92527173	Plasmid vector containing HLA-C*15:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:02 protein. This plasmid can be used for constructing HLA-C*15:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:03 Protein Expression Plasmid Vector	PHLAP92527174	Plasmid vector containing HLA-C*15:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:03 protein. This plasmid can be used for constructing HLA-C*15:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:04 Protein Expression Plasmid Vector	PHLAP92527175	Plasmid vector containing HLA-C*15:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:04 protein. This plasmid can be used for constructing HLA-C*15:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:05 Protein Expression Plasmid Vector	PHLAP92527176	Plasmid vector containing HLA-C*15:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:05 protein. This plasmid can be used for constructing HLA-C*15:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:01:06 Protein Expression Plasmid Vector	PHLAP92527177	Plasmid vector containing HLA-C*15:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:06 protein. This plasmid can be used for constructing HLA-C*15:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:07 Protein Expression Plasmid Vector	PHLAP92527178	Plasmid vector containing HLA-C*15:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:07 protein. This plasmid can be used for constructing HLA-C*15:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:08N Protein Expression Plasmid Vector	PHLAP92527179	Plasmid vector containing HLA-C*15:02:01:08N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:08N protein. This plasmid can be used for constructing HLA-C*15:02:01:08N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:08N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:09 Protein Expression Plasmid Vector	PHLAP92527180	Plasmid vector containing HLA-C*15:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:09 protein. This plasmid can be used for constructing HLA-C*15:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:10 Protein Expression Plasmid Vector	PHLAP92527181	Plasmid vector containing HLA-C*15:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:10 protein. This plasmid can be used for constructing HLA-C*15:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:11 Protein Expression Plasmid Vector	PHLAP92527182	Plasmid vector containing HLA-C*15:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:11 protein. This plasmid can be used for constructing HLA-C*15:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:12 Protein Expression Plasmid Vector	PHLAP92527183	Plasmid vector containing HLA-C*15:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:12 protein. This plasmid can be used for constructing HLA-C*15:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:01:13 Protein Expression Plasmid Vector	PHLAP92527184	Plasmid vector containing HLA-C*15:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:13 protein. This plasmid can be used for constructing HLA-C*15:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:14 Protein Expression Plasmid Vector	PHLAP92527185	Plasmid vector containing HLA-C*15:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:14 protein. This plasmid can be used for constructing HLA-C*15:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:15 Protein Expression Plasmid Vector	PHLAP92527186	Plasmid vector containing HLA-C*15:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:15 protein. This plasmid can be used for constructing HLA-C*15:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:16 Protein Expression Plasmid Vector	PHLAP92527187	Plasmid vector containing HLA-C*15:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:16 protein. This plasmid can be used for constructing HLA-C*15:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:17 Protein Expression Plasmid Vector	PHLAP92527188	Plasmid vector containing HLA-C*15:02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:17 protein. This plasmid can be used for constructing HLA-C*15:02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:18 Protein Expression Plasmid Vector	PHLAP92527189	Plasmid vector containing HLA-C*15:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:18 protein. This plasmid can be used for constructing HLA-C*15:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:19 Protein Expression Plasmid Vector	PHLAP92527190	Plasmid vector containing HLA-C*15:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:19 protein. This plasmid can be used for constructing HLA-C*15:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:01:20 Protein Expression Plasmid Vector	PHLAP92527191	Plasmid vector containing HLA-C*15:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:20 protein. This plasmid can be used for constructing HLA-C*15:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:21 Protein Expression Plasmid Vector	PHLAP92527192	Plasmid vector containing HLA-C*15:02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:21 protein. This plasmid can be used for constructing HLA-C*15:02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:22 Protein Expression Plasmid Vector	PHLAP92527193	Plasmid vector containing HLA-C*15:02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:22 protein. This plasmid can be used for constructing HLA-C*15:02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:23 Protein Expression Plasmid Vector	PHLAP92527194	Plasmid vector containing HLA-C*15:02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:23 protein. This plasmid can be used for constructing HLA-C*15:02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:24 Protein Expression Plasmid Vector	PHLAP92527195	Plasmid vector containing HLA-C*15:02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:24 protein. This plasmid can be used for constructing HLA-C*15:02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:25 Protein Expression Plasmid Vector	PHLAP92527196	Plasmid vector containing HLA-C*15:02:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:25 protein. This plasmid can be used for constructing HLA-C*15:02:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:26 Protein Expression Plasmid Vector	PHLAP92527197	Plasmid vector containing HLA-C*15:02:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:26 protein. This plasmid can be used for constructing HLA-C*15:02:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:01:27 Protein Expression Plasmid Vector	PHLAP92527198	Plasmid vector containing HLA-C*15:02:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:27 protein. This plasmid can be used for constructing HLA-C*15:02:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:28 Protein Expression Plasmid Vector	PHLAP92527199	Plasmid vector containing HLA-C*15:02:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:28 protein. This plasmid can be used for constructing HLA-C*15:02:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:29 Protein Expression Plasmid Vector	PHLAP925272000	Plasmid vector containing HLA-C*15:02:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:29 protein. This plasmid can be used for constructing HLA-C*15:02:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:30Q Protein Expression Plasmid Vector	PHLAP925272001	Plasmid vector containing HLA-C*15:02:01:30Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:30Q protein. This plasmid can be used for constructing HLA-C*15:02:01:30Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:30Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:31 Protein Expression Plasmid Vector	PHLAP925272002	Plasmid vector containing HLA-C*15:02:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:31 protein. This plasmid can be used for constructing HLA-C*15:02:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:32 Protein Expression Plasmid Vector	PHLAP925272003	Plasmid vector containing HLA-C*15:02:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:32 protein. This plasmid can be used for constructing HLA-C*15:02:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:33 Protein Expression Plasmid Vector	PHLAP925272004	Plasmid vector containing HLA-C*15:02:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:33 protein. This plasmid can be used for constructing HLA-C*15:02:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:01:34 Protein Expression Plasmid Vector	PHLAP92527205	Plasmid vector containing HLA-C*15:02:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:34 protein. This plasmid can be used for constructing HLA-C*15:02:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:35Q Protein Expression Plasmid Vector	PHLAP92527206	Plasmid vector containing HLA-C*15:02:01:35Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:35Q protein. This plasmid can be used for constructing HLA-C*15:02:01:35Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:35Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:36 Protein Expression Plasmid Vector	PHLAP92527207	Plasmid vector containing HLA-C*15:02:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:36 protein. This plasmid can be used for constructing HLA-C*15:02:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:37 Protein Expression Plasmid Vector	PHLAP92527208	Plasmid vector containing HLA-C*15:02:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:37 protein. This plasmid can be used for constructing HLA-C*15:02:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:38 Protein Expression Plasmid Vector	PHLAP92527209	Plasmid vector containing HLA-C*15:02:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:38 protein. This plasmid can be used for constructing HLA-C*15:02:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:39 Protein Expression Plasmid Vector	PHLAP92527210	Plasmid vector containing HLA-C*15:02:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:39 protein. This plasmid can be used for constructing HLA-C*15:02:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:40 Protein Expression Plasmid Vector	PHLAP92527211	Plasmid vector containing HLA-C*15:02:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:40 protein. This plasmid can be used for constructing HLA-C*15:02:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:01:41 Protein Expression Plasmid Vector	PHLAP92527212	Plasmid vector containing HLA-C*15:02:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:41 protein. This plasmid can be used for constructing HLA-C*15:02:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:42 Protein Expression Plasmid Vector	PHLAP92527213	Plasmid vector containing HLA-C*15:02:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:42 protein. This plasmid can be used for constructing HLA-C*15:02:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:43 Protein Expression Plasmid Vector	PHLAP92527214	Plasmid vector containing HLA-C*15:02:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:43 protein. This plasmid can be used for constructing HLA-C*15:02:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:44 Protein Expression Plasmid Vector	PHLAP92527215	Plasmid vector containing HLA-C*15:02:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:44 protein. This plasmid can be used for constructing HLA-C*15:02:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:45 Protein Expression Plasmid Vector	PHLAP92527216	Plasmid vector containing HLA-C*15:02:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:45 protein. This plasmid can be used for constructing HLA-C*15:02:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:46 Protein Expression Plasmid Vector	PHLAP92527217	Plasmid vector containing HLA-C*15:02:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:46 protein. This plasmid can be used for constructing HLA-C*15:02:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:47 Protein Expression Plasmid Vector	PHLAP92527218	Plasmid vector containing HLA-C*15:02:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:47 protein. This plasmid can be used for constructing HLA-C*15:02:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:01:48 Protein Expression Plasmid Vector	PHLAP92527219	Plasmid vector containing HLA-C*15:02:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:48 protein. This plasmid can be used for constructing HLA-C*15:02:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:49 Protein Expression Plasmid Vector	PHLAP92527220	Plasmid vector containing HLA-C*15:02:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:49 protein. This plasmid can be used for constructing HLA-C*15:02:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:50 Protein Expression Plasmid Vector	PHLAP92527221	Plasmid vector containing HLA-C*15:02:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:50 protein. This plasmid can be used for constructing HLA-C*15:02:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:51 Protein Expression Plasmid Vector	PHLAP92527222	Plasmid vector containing HLA-C*15:02:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:51 protein. This plasmid can be used for constructing HLA-C*15:02:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:52 Protein Expression Plasmid Vector	PHLAP92527223	Plasmid vector containing HLA-C*15:02:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:52 protein. This plasmid can be used for constructing HLA-C*15:02:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:53 Protein Expression Plasmid Vector	PHLAP92527224	Plasmid vector containing HLA-C*15:02:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:53 protein. This plasmid can be used for constructing HLA-C*15:02:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:54 Protein Expression Plasmid Vector	PHLAP92527225	Plasmid vector containing HLA-C*15:02:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:54 protein. This plasmid can be used for constructing HLA-C*15:02:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:01:55 Protein Expression Plasmid Vector	PHLAP92527226	Plasmid vector containing HLA-C*15:02:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:55 protein. This plasmid can be used for constructing HLA-C*15:02:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:56 Protein Expression Plasmid Vector	PHLAP92527227	Plasmid vector containing HLA-C*15:02:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:56 protein. This plasmid can be used for constructing HLA-C*15:02:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:57 Protein Expression Plasmid Vector	PHLAP92527228	Plasmid vector containing HLA-C*15:02:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:57 protein. This plasmid can be used for constructing HLA-C*15:02:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:58 Protein Expression Plasmid Vector	PHLAP92527229	Plasmid vector containing HLA-C*15:02:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:58 protein. This plasmid can be used for constructing HLA-C*15:02:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:59 Protein Expression Plasmid Vector	PHLAP92527230	Plasmid vector containing HLA-C*15:02:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:59 protein. This plasmid can be used for constructing HLA-C*15:02:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:60 Protein Expression Plasmid Vector	PHLAP92527231	Plasmid vector containing HLA-C*15:02:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:60 protein. This plasmid can be used for constructing HLA-C*15:02:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:61 Protein Expression Plasmid Vector	PHLAP92527232	Plasmid vector containing HLA-C*15:02:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:61 protein. This plasmid can be used for constructing HLA-C*15:02:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:01:62Q Protein Expression Plasmid Vector	PHLAP92527233	Plasmid vector containing HLA-C*15:02:01:62Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:62Q protein. This plasmid can be used for constructing HLA-C*15:02:01:62Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:62Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:63 Protein Expression Plasmid Vector	PHLAP92527234	Plasmid vector containing HLA-C*15:02:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:63 protein. This plasmid can be used for constructing HLA-C*15:02:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:64 Protein Expression Plasmid Vector	PHLAP92527235	Plasmid vector containing HLA-C*15:02:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:64 protein. This plasmid can be used for constructing HLA-C*15:02:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:65Q Protein Expression Plasmid Vector	PHLAP92527236	Plasmid vector containing HLA-C*15:02:01:65Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:65Q protein. This plasmid can be used for constructing HLA-C*15:02:01:65Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:65Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:66 Protein Expression Plasmid Vector	PHLAP92527237	Plasmid vector containing HLA-C*15:02:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:66 protein. This plasmid can be used for constructing HLA-C*15:02:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:67 Protein Expression Plasmid Vector	PHLAP92527238	Plasmid vector containing HLA-C*15:02:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:67 protein. This plasmid can be used for constructing HLA-C*15:02:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:68 Protein Expression Plasmid Vector	PHLAP92527239	Plasmid vector containing HLA-C*15:02:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:68 protein. This plasmid can be used for constructing HLA-C*15:02:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:01:69Q Protein Expression Plasmid Vector	PHLAP925272400	Plasmid vector containing HLA-C*15:02:01:69Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:69Q protein. This plasmid can be used for constructing HLA-C*15:02:01:69Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:69Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:01:70 Protein Expression Plasmid Vector	PHLAP925272401	Plasmid vector containing HLA-C*15:02:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:01:70 protein. This plasmid can be used for constructing HLA-C*15:02:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:02:01 Protein Expression Plasmid Vector	PHLAP925272402	Plasmid vector containing HLA-C*15:02:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:02:01 protein. This plasmid can be used for constructing HLA-C*15:02:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:02:02 Protein Expression Plasmid Vector	PHLAP925272403	Plasmid vector containing HLA-C*15:02:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:02:02 protein. This plasmid can be used for constructing HLA-C*15:02:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:03 Protein Expression Plasmid Vector	PHLAP925272404	Plasmid vector containing HLA-C*15:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:03 protein. This plasmid can be used for constructing HLA-C*15:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:04 Protein Expression Plasmid Vector	PHLAP925272405	Plasmid vector containing HLA-C*15:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:04 protein. This plasmid can be used for constructing HLA-C*15:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:05 Protein Expression Plasmid Vector	PHLAP925272406	Plasmid vector containing HLA-C*15:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:05 protein. This plasmid can be used for constructing HLA-C*15:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:06 Protein Expression Plasmid Vector	PHLAP92527247	Plasmid vector containing HLA-C*15:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:06 protein. This plasmid can be used for constructing HLA-C*15:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:07 Protein Expression Plasmid Vector	PHLAP92527248	Plasmid vector containing HLA-C*15:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:07 protein. This plasmid can be used for constructing HLA-C*15:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:08 Protein Expression Plasmid Vector	PHLAP92527249	Plasmid vector containing HLA-C*15:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:08 protein. This plasmid can be used for constructing HLA-C*15:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:09 Protein Expression Plasmid Vector	PHLAP925272500	Plasmid vector containing HLA-C*15:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:09 protein. This plasmid can be used for constructing HLA-C*15:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:10 Protein Expression Plasmid Vector	PHLAP925272501	Plasmid vector containing HLA-C*15:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:10 protein. This plasmid can be used for constructing HLA-C*15:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:11 Protein Expression Plasmid Vector	PHLAP925272502	Plasmid vector containing HLA-C*15:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:11 protein. This plasmid can be used for constructing HLA-C*15:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:12 Protein Expression Plasmid Vector	PHLAP925272503	Plasmid vector containing HLA-C*15:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:12 protein. This plasmid can be used for constructing HLA-C*15:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:13 Protein Expression Plasmid Vector	PHLAP925272504	Plasmid vector containing HLA-C*15:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:13 protein. This plasmid can be used for constructing HLA-C*15:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:14 Protein Expression Plasmid Vector	PHLAP92527255	Plasmid vector containing HLA-C*15:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:14 protein. This plasmid can be used for constructing HLA-C*15:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:15 Protein Expression Plasmid Vector	PHLAP92527256	Plasmid vector containing HLA-C*15:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:15 protein. This plasmid can be used for constructing HLA-C*15:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:16 Protein Expression Plasmid Vector	PHLAP92527257	Plasmid vector containing HLA-C*15:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:16 protein. This plasmid can be used for constructing HLA-C*15:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:17 Protein Expression Plasmid Vector	PHLAP92527258	Plasmid vector containing HLA-C*15:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:17 protein. This plasmid can be used for constructing HLA-C*15:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:18 Protein Expression Plasmid Vector	PHLAP92527259	Plasmid vector containing HLA-C*15:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:18 protein. This plasmid can be used for constructing HLA-C*15:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:19 Protein Expression Plasmid Vector	PHLAP92527260	Plasmid vector containing HLA-C*15:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:19 protein. This plasmid can be used for constructing HLA-C*15:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:20 Protein Expression Plasmid Vector	PHLAP92527261	Plasmid vector containing HLA-C*15:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:20 protein. This plasmid can be used for constructing HLA-C*15:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:21 Protein Expression Plasmid Vector	PHLAP92527262	Plasmid vector containing HLA-C*15:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:21 protein. This plasmid can be used for constructing HLA-C*15:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:22 Protein Expression Plasmid Vector	PHLAP92527263	Plasmid vector containing HLA-C*15:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:22 protein. This plasmid can be used for constructing HLA-C*15:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:23 Protein Expression Plasmid Vector	PHLAP92527264	Plasmid vector containing HLA-C*15:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:23 protein. This plasmid can be used for constructing HLA-C*15:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:24 Protein Expression Plasmid Vector	PHLAP92527265	Plasmid vector containing HLA-C*15:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:24 protein. This plasmid can be used for constructing HLA-C*15:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:25 Protein Expression Plasmid Vector	PHLAP92527266	Plasmid vector containing HLA-C*15:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:25 protein. This plasmid can be used for constructing HLA-C*15:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:26 Protein Expression Plasmid Vector	PHLAP92527267	Plasmid vector containing HLA-C*15:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:26 protein. This plasmid can be used for constructing HLA-C*15:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:27 Protein Expression Plasmid Vector	PHLAP92527268	Plasmid vector containing HLA-C*15:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:27 protein. This plasmid can be used for constructing HLA-C*15:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:28 Protein Expression Plasmid Vector	PHLAP92527269	Plasmid vector containing HLA-C*15:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:28 protein. This plasmid can be used for constructing HLA-C*15:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:29 Protein Expression Plasmid Vector	PHLAP92527270	Plasmid vector containing HLA-C*15:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:29 protein. This plasmid can be used for constructing HLA-C*15:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:30 Protein Expression Plasmid Vector	PHLAP92527271	Plasmid vector containing HLA-C*15:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:30 protein. This plasmid can be used for constructing HLA-C*15:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:31 Protein Expression Plasmid Vector	PHLAP92527272	Plasmid vector containing HLA-C*15:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:31 protein. This plasmid can be used for constructing HLA-C*15:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:32 Protein Expression Plasmid Vector	PHLAP92527273	Plasmid vector containing HLA-C*15:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:32 protein. This plasmid can be used for constructing HLA-C*15:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:33:01 Protein Expression Plasmid Vector	PHLAP92527274	Plasmid vector containing HLA-C*15:02:33:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:33:01 protein. This plasmid can be used for constructing HLA-C*15:02:33:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:33:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:33:02 Protein Expression Plasmid Vector	PHLAP92527275	Plasmid vector containing HLA-C*15:02:33:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:33:02 protein. This plasmid can be used for constructing HLA-C*15:02:33:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:33:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:34 Protein Expression Plasmid Vector	PHLAP92527276	Plasmid vector containing HLA-C*15:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:34 protein. This plasmid can be used for constructing HLA-C*15:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:35 Protein Expression Plasmid Vector	PHLAP92527277	Plasmid vector containing HLA-C*15:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:35 protein. This plasmid can be used for constructing HLA-C*15:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:36 Protein Expression Plasmid Vector	PHLAP92527278	Plasmid vector containing HLA-C*15:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:36 protein. This plasmid can be used for constructing HLA-C*15:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:37 Protein Expression Plasmid Vector	PHLAP92527279	Plasmid vector containing HLA-C*15:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:37 protein. This plasmid can be used for constructing HLA-C*15:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:38 Protein Expression Plasmid Vector	PHLAP92527280	Plasmid vector containing HLA-C*15:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:38 protein. This plasmid can be used for constructing HLA-C*15:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:39 Protein Expression Plasmid Vector	PHLAP92527281	Plasmid vector containing HLA-C*15:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:39 protein. This plasmid can be used for constructing HLA-C*15:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:40 Protein Expression Plasmid Vector	PHLAP92527282	Plasmid vector containing HLA-C*15:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:40 protein. This plasmid can be used for constructing HLA-C*15:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:41 Protein Expression Plasmid Vector	PHLAP92527283	Plasmid vector containing HLA-C*15:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:41 protein. This plasmid can be used for constructing HLA-C*15:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:42 Protein Expression Plasmid Vector	PHLAP92527284	Plasmid vector containing HLA-C*15:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:42 protein. This plasmid can be used for constructing HLA-C*15:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:43 Protein Expression Plasmid Vector	PHLAP92527285	Plasmid vector containing HLA-C*15:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:43 protein. This plasmid can be used for constructing HLA-C*15:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:44 Protein Expression Plasmid Vector	PHLAP92527286	Plasmid vector containing HLA-C*15:02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:44 protein. This plasmid can be used for constructing HLA-C*15:02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:45 Protein Expression Plasmid Vector	PHLAP92527287	Plasmid vector containing HLA-C*15:02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:45 protein. This plasmid can be used for constructing HLA-C*15:02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:46 Protein Expression Plasmid Vector	PHLAP92527288	Plasmid vector containing HLA-C*15:02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:46 protein. This plasmid can be used for constructing HLA-C*15:02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:47 Protein Expression Plasmid Vector	PHLAP92527289	Plasmid vector containing HLA-C*15:02:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:47 protein. This plasmid can be used for constructing HLA-C*15:02:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:48 Protein Expression Plasmid Vector	PHLAP92527290	Plasmid vector containing HLA-C*15:02:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:48 protein. This plasmid can be used for constructing HLA-C*15:02:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:49 Protein Expression Plasmid Vector	PHLAP92527291	Plasmid vector containing HLA-C*15:02:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:49 protein. This plasmid can be used for constructing HLA-C*15:02:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:50 Protein Expression Plasmid Vector	PHLAP92527292	Plasmid vector containing HLA-C*15:02:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:50 protein. This plasmid can be used for constructing HLA-C*15:02:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:51 Protein Expression Plasmid Vector	PHLAP92527293	Plasmid vector containing HLA-C*15:02:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:51 protein. This plasmid can be used for constructing HLA-C*15:02:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:52 Protein Expression Plasmid Vector	PHLAP92527294	Plasmid vector containing HLA-C*15:02:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:52 protein. This plasmid can be used for constructing HLA-C*15:02:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:53 Protein Expression Plasmid Vector	PHLAP92527295	Plasmid vector containing HLA-C*15:02:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:53 protein. This plasmid can be used for constructing HLA-C*15:02:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:54 Protein Expression Plasmid Vector	PHLAP92527296	Plasmid vector containing HLA-C*15:02:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:54 protein. This plasmid can be used for constructing HLA-C*15:02:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:55 Protein Expression Plasmid Vector	PHLAP92527297	Plasmid vector containing HLA-C*15:02:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:55 protein. This plasmid can be used for constructing HLA-C*15:02:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:56 Protein Expression Plasmid Vector	PHLAP92527298	Plasmid vector containing HLA-C*15:02:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:56 protein. This plasmid can be used for constructing HLA-C*15:02:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:57 Protein Expression Plasmid Vector	PHLAP92527299	Plasmid vector containing HLA-C*15:02:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:57 protein. This plasmid can be used for constructing HLA-C*15:02:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:58 Protein Expression Plasmid Vector	PHLAP92527300	Plasmid vector containing HLA-C*15:02:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:58 protein. This plasmid can be used for constructing HLA-C*15:02:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:59 Protein Expression Plasmid Vector	PHLAP92527301	Plasmid vector containing HLA-C*15:02:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:59 protein. This plasmid can be used for constructing HLA-C*15:02:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:60 Protein Expression Plasmid Vector	PHLAP92527302	Plasmid vector containing HLA-C*15:02:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:60 protein. This plasmid can be used for constructing HLA-C*15:02:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:02:61 Protein Expression Plasmid Vector	PHLAP92527303	Plasmid vector containing HLA-C*15:02:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:61 protein. This plasmid can be used for constructing HLA-C*15:02:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:62 Protein Expression Plasmid Vector	PHLAP92527304	Plasmid vector containing HLA-C*15:02:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:62 protein. This plasmid can be used for constructing HLA-C*15:02:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:63 Protein Expression Plasmid Vector	PHLAP92527305	Plasmid vector containing HLA-C*15:02:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:63 protein. This plasmid can be used for constructing HLA-C*15:02:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:64 Protein Expression Plasmid Vector	PHLAP92527306	Plasmid vector containing HLA-C*15:02:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:64 protein. This plasmid can be used for constructing HLA-C*15:02:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:65 Protein Expression Plasmid Vector	PHLAP92527307	Plasmid vector containing HLA-C*15:02:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:65 protein. This plasmid can be used for constructing HLA-C*15:02:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:66 Protein Expression Plasmid Vector	PHLAP92527308	Plasmid vector containing HLA-C*15:02:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:66 protein. This plasmid can be used for constructing HLA-C*15:02:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:02:67 Protein Expression Plasmid Vector	PHLAP92527309	Plasmid vector containing HLA-C*15:02:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:02:67 protein. This plasmid can be used for constructing HLA-C*15:02:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:02:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:03 Protein Expression Plasmid Vector	PHLAP92527310	Plasmid vector containing HLA-C*15:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:03 protein. This plasmid can be used for constructing HLA-C*15:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:04:01:01 Protein Expression Plasmid Vector	PHLAP92527311	Plasmid vector containing HLA-C*15:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:04:01:01 protein. This plasmid can be used for constructing HLA-C*15:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:04:01:02 Protein Expression Plasmid Vector	PHLAP92527312	Plasmid vector containing HLA-C*15:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:04:01:02 protein. This plasmid can be used for constructing HLA-C*15:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:04:01:03 Protein Expression Plasmid Vector	PHLAP92527313	Plasmid vector containing HLA-C*15:04:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:04:01:03 protein. This plasmid can be used for constructing HLA-C*15:04:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:04:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:04:02 Protein Expression Plasmid Vector	PHLAP92527314	Plasmid vector containing HLA-C*15:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:04:02 protein. This plasmid can be used for constructing HLA-C*15:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:04:03 Protein Expression Plasmid Vector	PHLAP92527315	Plasmid vector containing HLA-C*15:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:04:03 protein. This plasmid can be used for constructing HLA-C*15:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:04:04 Protein Expression Plasmid Vector	PHLAP92527316	Plasmid vector containing HLA-C*15:04:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:04:04 protein. This plasmid can be used for constructing HLA-C*15:04:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:04:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:04:05 Protein Expression Plasmid Vector	PHLAP92527317	Plasmid vector containing HLA-C*15:04:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:04:05 protein. This plasmid can be used for constructing HLA-C*15:04:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:04:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:04:06 Protein Expression Plasmid Vector	PHLAP92527318	Plasmid vector containing HLA-C*15:04:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:04:06 protein. This plasmid can be used for constructing HLA-C*15:04:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:04:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:01:01 Protein Expression Plasmid Vector	PHLAP92527319	Plasmid vector containing HLA-C*15:05:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:01:01 protein. This plasmid can be used for constructing HLA-C*15:05:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:01:02 Protein Expression Plasmid Vector	PHLAP92527320	Plasmid vector containing HLA-C*15:05:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:01:02 protein. This plasmid can be used for constructing HLA-C*15:05:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:01:03 Protein Expression Plasmid Vector	PHLAP92527321	Plasmid vector containing HLA-C*15:05:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:01:03 protein. This plasmid can be used for constructing HLA-C*15:05:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:01:04 Protein Expression Plasmid Vector	PHLAP92527322	Plasmid vector containing HLA-C*15:05:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:01:04 protein. This plasmid can be used for constructing HLA-C*15:05:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:01:05 Protein Expression Plasmid Vector	PHLAP92527323	Plasmid vector containing HLA-C*15:05:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:01:05 protein. This plasmid can be used for constructing HLA-C*15:05:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:01 Protein Expression Plasmid Vector	PHLAP92527324	Plasmid vector containing HLA-C*15:05:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:01 protein. This plasmid can be used for constructing HLA-C*15:05:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:05:02:02 Protein Expression Plasmid Vector	PHLAP92527325	Plasmid vector containing HLA-C*15:05:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:02 protein. This plasmid can be used for constructing HLA-C*15:05:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:03 Protein Expression Plasmid Vector	PHLAP92527326	Plasmid vector containing HLA-C*15:05:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:03 protein. This plasmid can be used for constructing HLA-C*15:05:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:04 Protein Expression Plasmid Vector	PHLAP92527327	Plasmid vector containing HLA-C*15:05:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:04 protein. This plasmid can be used for constructing HLA-C*15:05:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:05 Protein Expression Plasmid Vector	PHLAP92527328	Plasmid vector containing HLA-C*15:05:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:05 protein. This plasmid can be used for constructing HLA-C*15:05:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:06 Protein Expression Plasmid Vector	PHLAP92527329	Plasmid vector containing HLA-C*15:05:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:06 protein. This plasmid can be used for constructing HLA-C*15:05:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:07 Protein Expression Plasmid Vector	PHLAP92527330	Plasmid vector containing HLA-C*15:05:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:07 protein. This plasmid can be used for constructing HLA-C*15:05:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:08 Protein Expression Plasmid Vector	PHLAP92527331	Plasmid vector containing HLA-C*15:05:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:08 protein. This plasmid can be used for constructing HLA-C*15:05:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:05:02:09 Protein Expression Plasmid Vector	PHLAP92527332	Plasmid vector containing HLA-C*15:05:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:09 protein. This plasmid can be used for constructing HLA-C*15:05:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:10 Protein Expression Plasmid Vector	PHLAP92527333	Plasmid vector containing HLA-C*15:05:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:10 protein. This plasmid can be used for constructing HLA-C*15:05:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:11 Protein Expression Plasmid Vector	PHLAP92527334	Plasmid vector containing HLA-C*15:05:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:11 protein. This plasmid can be used for constructing HLA-C*15:05:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:12 Protein Expression Plasmid Vector	PHLAP92527335	Plasmid vector containing HLA-C*15:05:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:12 protein. This plasmid can be used for constructing HLA-C*15:05:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:13 Protein Expression Plasmid Vector	PHLAP92527336	Plasmid vector containing HLA-C*15:05:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:13 protein. This plasmid can be used for constructing HLA-C*15:05:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:02:14 Protein Expression Plasmid Vector	PHLAP92527337	Plasmid vector containing HLA-C*15:05:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:02:14 protein. This plasmid can be used for constructing HLA-C*15:05:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:03 Protein Expression Plasmid Vector	PHLAP92527338	Plasmid vector containing HLA-C*15:05:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:03 protein. This plasmid can be used for constructing HLA-C*15:05:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:05:04 Protein Expression Plasmid Vector	PHLAP92527339	Plasmid vector containing HLA-C*15:05:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:04 protein. This plasmid can be used for constructing HLA-C*15:05:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:05 Protein Expression Plasmid Vector	PHLAP925273340	Plasmid vector containing HLA-C*15:05:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:05 protein. This plasmid can be used for constructing HLA-C*15:05:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:06 Protein Expression Plasmid Vector	PHLAP925273341	Plasmid vector containing HLA-C*15:05:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:06 protein. This plasmid can be used for constructing HLA-C*15:05:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:07 Protein Expression Plasmid Vector	PHLAP925273342	Plasmid vector containing HLA-C*15:05:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:07 protein. This plasmid can be used for constructing HLA-C*15:05:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:08 Protein Expression Plasmid Vector	PHLAP925273343	Plasmid vector containing HLA-C*15:05:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:08 protein. This plasmid can be used for constructing HLA-C*15:05:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:09 Protein Expression Plasmid Vector	PHLAP925273344	Plasmid vector containing HLA-C*15:05:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:09 protein. This plasmid can be used for constructing HLA-C*15:05:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:10 Protein Expression Plasmid Vector	PHLAP925273345	Plasmid vector containing HLA-C*15:05:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:10 protein. This plasmid can be used for constructing HLA-C*15:05:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:11 Protein Expression Plasmid Vector	PHLAP925273346	Plasmid vector containing HLA-C*15:05:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:11 protein. This plasmid can be used for constructing HLA-C*15:05:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:05:12 Protein Expression Plasmid Vector	PHLAP92527347	Plasmid vector containing HLA-C*15:05:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:12 protein. This plasmid can be used for constructing HLA-C*15:05:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:13 Protein Expression Plasmid Vector	PHLAP92527348	Plasmid vector containing HLA-C*15:05:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:13 protein. This plasmid can be used for constructing HLA-C*15:05:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:14 Protein Expression Plasmid Vector	PHLAP92527349	Plasmid vector containing HLA-C*15:05:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:14 protein. This plasmid can be used for constructing HLA-C*15:05:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:15 Protein Expression Plasmid Vector	PHLAP92527350	Plasmid vector containing HLA-C*15:05:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:15 protein. This plasmid can be used for constructing HLA-C*15:05:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:16 Protein Expression Plasmid Vector	PHLAP92527351	Plasmid vector containing HLA-C*15:05:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:16 protein. This plasmid can be used for constructing HLA-C*15:05:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:17 Protein Expression Plasmid Vector	PHLAP92527352	Plasmid vector containing HLA-C*15:05:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:17 protein. This plasmid can be used for constructing HLA-C*15:05:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:18 Protein Expression Plasmid Vector	PHLAP92527353	Plasmid vector containing HLA-C*15:05:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:18 protein. This plasmid can be used for constructing HLA-C*15:05:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:19 Protein Expression Plasmid Vector	PHLAP92527354	Plasmid vector containing HLA-C*15:05:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:19 protein. This plasmid can be used for constructing HLA-C*15:05:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:05:20 Protein Expression Plasmid Vector	PHLAP92527355	Plasmid vector containing HLA-C*15:05:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:20 protein. This plasmid can be used for constructing HLA-C*15:05:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:21 Protein Expression Plasmid Vector	PHLAP92527356	Plasmid vector containing HLA-C*15:05:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:21 protein. This plasmid can be used for constructing HLA-C*15:05:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:05:22 Protein Expression Plasmid Vector	PHLAP92527357	Plasmid vector containing HLA-C*15:05:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:05:22 protein. This plasmid can be used for constructing HLA-C*15:05:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:05:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:06:01:01 Protein Expression Plasmid Vector	PHLAP92527358	Plasmid vector containing HLA-C*15:06:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:06:01:01 protein. This plasmid can be used for constructing HLA-C*15:06:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:06:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:06:01:02 Protein Expression Plasmid Vector	PHLAP92527359	Plasmid vector containing HLA-C*15:06:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:06:01:02 protein. This plasmid can be used for constructing HLA-C*15:06:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:06:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:06:02 Protein Expression Plasmid Vector	PHLAP92527360	Plasmid vector containing HLA-C*15:06:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:06:02 protein. This plasmid can be used for constructing HLA-C*15:06:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:06:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:06:03 Protein Expression Plasmid Vector	PHLAP92527361	Plasmid vector containing HLA-C*15:06:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:06:03 protein. This plasmid can be used for constructing HLA-C*15:06:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:06:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:07:01:01 Protein Expression Plasmid Vector	PHLAP92527362	Plasmid vector containing HLA-C*15:07:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:07:01:01 protein. This plasmid can be used for constructing HLA-C*15:07:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:07:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:07:01:02 Protein Expression Plasmid Vector	PHLAP92527363	Plasmid vector containing HLA-C*15:07:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:07:01:02 protein. This plasmid can be used for constructing HLA-C*15:07:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:07:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:08:01 Protein Expression Plasmid Vector	PHLAP92527364	Plasmid vector containing HLA-C*15:08:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:08:01 protein. This plasmid can be used for constructing HLA-C*15:08:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:08:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:08:02 Protein Expression Plasmid Vector	PHLAP92527365	Plasmid vector containing HLA-C*15:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:08:02 protein. This plasmid can be used for constructing HLA-C*15:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:09:01:01 Protein Expression Plasmid Vector	PHLAP92527366	Plasmid vector containing HLA-C*15:09:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:09:01:01 protein. This plasmid can be used for constructing HLA-C*15:09:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:09:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:09:01:02 Protein Expression Plasmid Vector	PHLAP92527367	Plasmid vector containing HLA-C*15:09:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:09:01:02 protein. This plasmid can be used for constructing HLA-C*15:09:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:09:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:09:02 Protein Expression Plasmid Vector	PHLAP92527368	Plasmid vector containing HLA-C*15:09:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:09:02 protein. This plasmid can be used for constructing HLA-C*15:09:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:09:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:10:01 Protein Expression Plasmid Vector	PHLAP92527369	Plasmid vector containing HLA-C*15:10:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:10:01 protein. This plasmid can be used for constructing HLA-C*15:10:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:10:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:10:02 Protein Expression Plasmid Vector	PHLAP92527370	Plasmid vector containing HLA-C*15:10:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:10:02 protein. This plasmid can be used for constructing HLA-C*15:10:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:10:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:10:03 Protein Expression Plasmid Vector	PHLAP92527371	Plasmid vector containing HLA-C*15:10:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:10:03 protein. This plasmid can be used for constructing HLA-C*15:10:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:10:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:10:04 Protein Expression Plasmid Vector	PHLAP92527372	Plasmid vector containing HLA-C*15:10:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:10:04 protein. This plasmid can be used for constructing HLA-C*15:10:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:10:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:100 Protein Expression Plasmid Vector	PHLAP92527373	Plasmid vector containing HLA-C*15:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:100 protein. This plasmid can be used for constructing HLA-C*15:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:101 Protein Expression Plasmid Vector	PHLAP92527374	Plasmid vector containing HLA-C*15:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:101 protein. This plasmid can be used for constructing HLA-C*15:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:102 Protein Expression Plasmid Vector	PHLAP92527375	Plasmid vector containing HLA-C*15:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:102 protein. This plasmid can be used for constructing HLA-C*15:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:103 Protein Expression Plasmid Vector	PHLAP92527376	Plasmid vector containing HLA-C*15:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:103 protein. This plasmid can be used for constructing HLA-C*15:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:104 Protein Expression Plasmid Vector	PHLAP92527377	Plasmid vector containing HLA-C*15:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:104 protein. This plasmid can be used for constructing HLA-C*15:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:105Q Protein Expression Plasmid Vector	PHLAP92527378	Plasmid vector containing HLA-C*15:105Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:105Q protein. This plasmid can be used for constructing HLA-C*15:105Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:105Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:106 Protein Expression Plasmid Vector	PHLAP92527379	Plasmid vector containing HLA-C*15:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:106 protein. This plasmid can be used for constructing HLA-C*15:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:107 Protein Expression Plasmid Vector	PHLAP92527380	Plasmid vector containing HLA-C*15:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:107 protein. This plasmid can be used for constructing HLA-C*15:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:108 Protein Expression Plasmid Vector	PHLAP92527381	Plasmid vector containing HLA-C*15:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:108 protein. This plasmid can be used for constructing HLA-C*15:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:109 Protein Expression Plasmid Vector	PHLAP92527382	Plasmid vector containing HLA-C*15:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:109 protein. This plasmid can be used for constructing HLA-C*15:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:11 Protein Expression Plasmid Vector	PHLAP92527383	Plasmid vector containing HLA-C*15:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:11 protein. This plasmid can be used for constructing HLA-C*15:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:110 Protein Expression Plasmid Vector	PHLAP92527384	Plasmid vector containing HLA-C*15:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:110 protein. This plasmid can be used for constructing HLA-C*15:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:111 Protein Expression Plasmid Vector	PHLAP92527385	Plasmid vector containing HLA-C*15:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:111 protein. This plasmid can be used for constructing HLA-C*15:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:112 Protein Expression Plasmid Vector	PHLAP92527386	Plasmid vector containing HLA-C*15:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:112 protein. This plasmid can be used for constructing HLA-C*15:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:113 Protein Expression Plasmid Vector	PHLAP92527387	Plasmid vector containing HLA-C*15:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:113 protein. This plasmid can be used for constructing HLA-C*15:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:114 Protein Expression Plasmid Vector	PHLAP92527388	Plasmid vector containing HLA-C*15:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:114 protein. This plasmid can be used for constructing HLA-C*15:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:115N Protein Expression Plasmid Vector	PHLAP92527389	Plasmid vector containing HLA-C*15:115N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:115N protein. This plasmid can be used for constructing HLA-C*15:115N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:115N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:116 Protein Expression Plasmid Vector	PHLAP92527390	Plasmid vector containing HLA-C*15:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:116 protein. This plasmid can be used for constructing HLA-C*15:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:117 Protein Expression Plasmid Vector	PHLAP92527391	Plasmid vector containing HLA-C*15:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:117 protein. This plasmid can be used for constructing HLA-C*15:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:118 Protein Expression Plasmid Vector	PHLAP92527392	Plasmid vector containing HLA-C*15:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:118 protein. This plasmid can be used for constructing HLA-C*15:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:119 Protein Expression Plasmid Vector	PHLAP92527393	Plasmid vector containing HLA-C*15:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:119 protein. This plasmid can be used for constructing HLA-C*15:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:12 Protein Expression Plasmid Vector	PHLAP92527394	Plasmid vector containing HLA-C*15:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:12 protein. This plasmid can be used for constructing HLA-C*15:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:120 Protein Expression Plasmid Vector	PHLAP92527395	Plasmid vector containing HLA-C*15:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:120 protein. This plasmid can be used for constructing HLA-C*15:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:121 Protein Expression Plasmid Vector	PHLAP92527396	Plasmid vector containing HLA-C*15:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:121 protein. This plasmid can be used for constructing HLA-C*15:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:122N Protein Expression Plasmid Vector	PHLAP92527397	Plasmid vector containing HLA-C*15:122N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:122N protein. This plasmid can be used for constructing HLA-C*15:122N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:122N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:123:01 Protein Expression Plasmid Vector	PHLAP92527398	Plasmid vector containing HLA-C*15:123:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:123:01 protein. This plasmid can be used for constructing HLA-C*15:123:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:123:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:123:02 Protein Expression Plasmid Vector	PHLAP92527399	Plasmid vector containing HLA-C*15:123:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:123:02 protein. This plasmid can be used for constructing HLA-C*15:123:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:123:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:124 Protein Expression Plasmid Vector	PHLAP925274000	Plasmid vector containing HLA-C*15:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:124 protein. This plasmid can be used for constructing HLA-C*15:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:125 Protein Expression Plasmid Vector	PHLAP92527401	Plasmid vector containing HLA-C*15:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:125 protein. This plasmid can be used for constructing HLA-C*15:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:126 Protein Expression Plasmid Vector	PHLAP92527402	Plasmid vector containing HLA-C*15:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:126 protein. This plasmid can be used for constructing HLA-C*15:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:127 Protein Expression Plasmid Vector	PHLAP92527403	Plasmid vector containing HLA-C*15:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:127 protein. This plasmid can be used for constructing HLA-C*15:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:128 Protein Expression Plasmid Vector	PHLAP92527404	Plasmid vector containing HLA-C*15:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:128 protein. This plasmid can be used for constructing HLA-C*15:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:129 Protein Expression Plasmid Vector	PHLAP92527405	Plasmid vector containing HLA-C*15:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:129 protein. This plasmid can be used for constructing HLA-C*15:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:13:01:01 Protein Expression Plasmid Vector	PHLAP92527406	Plasmid vector containing HLA-C*15:13:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:13:01:01 protein. This plasmid can be used for constructing HLA-C*15:13:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:13:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:13:01:02 Protein Expression Plasmid Vector	PHLAP92527407	Plasmid vector containing HLA-C*15:13:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:13:01:02 protein. This plasmid can be used for constructing HLA-C*15:13:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:13:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:13:02 Protein Expression Plasmid Vector	PHLAP92527408	Plasmid vector containing HLA-C*15:13:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:13:02 protein. This plasmid can be used for constructing HLA-C*15:13:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:13:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:13:03 Protein Expression Plasmid Vector	PHLAP92527409	Plasmid vector containing HLA-C*15:13:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:13:03 protein. This plasmid can be used for constructing HLA-C*15:13:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:13:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:130 Protein Expression Plasmid Vector	PHLAP925274110	Plasmid vector containing HLA-C*15:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:130 protein. This plasmid can be used for constructing HLA-C*15:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:131 Protein Expression Plasmid Vector	PHLAP925274111	Plasmid vector containing HLA-C*15:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:131 protein. This plasmid can be used for constructing HLA-C*15:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:132 Protein Expression Plasmid Vector	PHLAP925274112	Plasmid vector containing HLA-C*15:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:132 protein. This plasmid can be used for constructing HLA-C*15:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:133 Protein Expression Plasmid Vector	PHLAP925274113	Plasmid vector containing HLA-C*15:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:133 protein. This plasmid can be used for constructing HLA-C*15:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:134 Protein Expression Plasmid Vector	PHLAP925274114	Plasmid vector containing HLA-C*15:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:134 protein. This plasmid can be used for constructing HLA-C*15:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:135 Protein Expression Plasmid Vector	PHLAP925274115	Plasmid vector containing HLA-C*15:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:135 protein. This plasmid can be used for constructing HLA-C*15:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:136 Protein Expression Plasmid Vector	PHLAP925274116	Plasmid vector containing HLA-C*15:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:136 protein. This plasmid can be used for constructing HLA-C*15:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:137 Protein Expression Plasmid Vector	PHLAP92527417	Plasmid vector containing HLA-C*15:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:137 protein. This plasmid can be used for constructing HLA-C*15:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:138 Protein Expression Plasmid Vector	PHLAP92527418	Plasmid vector containing HLA-C*15:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:138 protein. This plasmid can be used for constructing HLA-C*15:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:139 Protein Expression Plasmid Vector	PHLAP92527419	Plasmid vector containing HLA-C*15:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:139 protein. This plasmid can be used for constructing HLA-C*15:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:140 Protein Expression Plasmid Vector	PHLAP925274220	Plasmid vector containing HLA-C*15:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:140 protein. This plasmid can be used for constructing HLA-C*15:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:141 Protein Expression Plasmid Vector	PHLAP925274221	Plasmid vector containing HLA-C*15:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:141 protein. This plasmid can be used for constructing HLA-C*15:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:142 Protein Expression Plasmid Vector	PHLAP925274222	Plasmid vector containing HLA-C*15:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:142 protein. This plasmid can be used for constructing HLA-C*15:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:143 Protein Expression Plasmid Vector	PHLAP925274223	Plasmid vector containing HLA-C*15:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:143 protein. This plasmid can be used for constructing HLA-C*15:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:144 Protein Expression Plasmid Vector	PHLAP925274224	Plasmid vector containing HLA-C*15:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:144 protein. This plasmid can be used for constructing HLA-C*15:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:145N Protein Expression Plasmid Vector	PHLAP92527425	Plasmid vector containing HLA-C*15:145N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:145N protein. This plasmid can be used for constructing HLA-C*15:145N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:145N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:146 Protein Expression Plasmid Vector	PHLAP92527426	Plasmid vector containing HLA-C*15:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:146 protein. This plasmid can be used for constructing HLA-C*15:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:147 Protein Expression Plasmid Vector	PHLAP92527427	Plasmid vector containing HLA-C*15:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:147 protein. This plasmid can be used for constructing HLA-C*15:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:148 Protein Expression Plasmid Vector	PHLAP92527428	Plasmid vector containing HLA-C*15:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:148 protein. This plasmid can be used for constructing HLA-C*15:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:149 Protein Expression Plasmid Vector	PHLAP92527429	Plasmid vector containing HLA-C*15:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:149 protein. This plasmid can be used for constructing HLA-C*15:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:15 Protein Expression Plasmid Vector	PHLAP92527430	Plasmid vector containing HLA-C*15:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:15 protein. This plasmid can be used for constructing HLA-C*15:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:150 Protein Expression Plasmid Vector	PHLAP92527431	Plasmid vector containing HLA-C*15:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:150 protein. This plasmid can be used for constructing HLA-C*15:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:151 Protein Expression Plasmid Vector	PHLAP92527432	Plasmid vector containing HLA-C*15:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:151 protein. This plasmid can be used for constructing HLA-C*15:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:152:01 Protein Expression Plasmid Vector	PHLAP92527433	Plasmid vector containing HLA-C*15:152:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:152:01 protein. This plasmid can be used for constructing HLA-C*15:152:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:152:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:152:02 Protein Expression Plasmid Vector	PHLAP92527434	Plasmid vector containing HLA-C*15:152:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:152:02 protein. This plasmid can be used for constructing HLA-C*15:152:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:152:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:152:03 Protein Expression Plasmid Vector	PHLAP92527435	Plasmid vector containing HLA-C*15:152:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:152:03 protein. This plasmid can be used for constructing HLA-C*15:152:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:152:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:152:04 Protein Expression Plasmid Vector	PHLAP92527436	Plasmid vector containing HLA-C*15:152:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:152:04 protein. This plasmid can be used for constructing HLA-C*15:152:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:152:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:153 Protein Expression Plasmid Vector	PHLAP92527437	Plasmid vector containing HLA-C*15:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:153 protein. This plasmid can be used for constructing HLA-C*15:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:154 Protein Expression Plasmid Vector	PHLAP92527438	Plasmid vector containing HLA-C*15:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:154 protein. This plasmid can be used for constructing HLA-C*15:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:155 Protein Expression Plasmid Vector	PHLAP92527439	Plasmid vector containing HLA-C*15:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:155 protein. This plasmid can be used for constructing HLA-C*15:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:156N Protein Expression Plasmid Vector	PHLAP92527440	Plasmid vector containing HLA-C*15:156N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:156N protein. This plasmid can be used for constructing HLA-C*15:156N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:156N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:157 Protein Expression Plasmid Vector	PHLAP92527441	Plasmid vector containing HLA-C*15:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:157 protein. This plasmid can be used for constructing HLA-C*15:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:158 Protein Expression Plasmid Vector	PHLAP92527442	Plasmid vector containing HLA-C*15:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:158 protein. This plasmid can be used for constructing HLA-C*15:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:159 Protein Expression Plasmid Vector	PHLAP92527443	Plasmid vector containing HLA-C*15:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:159 protein. This plasmid can be used for constructing HLA-C*15:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:16:01 Protein Expression Plasmid Vector	PHLAP92527444	Plasmid vector containing HLA-C*15:16:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:16:01 protein. This plasmid can be used for constructing HLA-C*15:16:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:16:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:16:02 Protein Expression Plasmid Vector	PHLAP92527445	Plasmid vector containing HLA-C*15:16:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:16:02 protein. This plasmid can be used for constructing HLA-C*15:16:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:16:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:160N Protein Expression Plasmid Vector	PHLAP92527446	Plasmid vector containing HLA-C*15:160N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:160N protein. This plasmid can be used for constructing HLA-C*15:160N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:160N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:161 Protein Expression Plasmid Vector	PHLAP92527447	Plasmid vector containing HLA-C*15:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:161 protein. This plasmid can be used for constructing HLA-C*15:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:162 Protein Expression Plasmid Vector	PHLAP92527448	Plasmid vector containing HLA-C*15:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:162 protein. This plasmid can be used for constructing HLA-C*15:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:163 Protein Expression Plasmid Vector	PHLAP92527449	Plasmid vector containing HLA-C*15:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:163 protein. This plasmid can be used for constructing HLA-C*15:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:164N Protein Expression Plasmid Vector	PHLAP92527450	Plasmid vector containing HLA-C*15:164N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:164N protein. This plasmid can be used for constructing HLA-C*15:164N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:164N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:165 Protein Expression Plasmid Vector	PHLAP92527451	Plasmid vector containing HLA-C*15:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:165 protein. This plasmid can be used for constructing HLA-C*15:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:166 Protein Expression Plasmid Vector	PHLAP92527452	Plasmid vector containing HLA-C*15:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:166 protein. This plasmid can be used for constructing HLA-C*15:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:167 Protein Expression Plasmid Vector	PHLAP92527453	Plasmid vector containing HLA-C*15:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:167 protein. This plasmid can be used for constructing HLA-C*15:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:168 Protein Expression Plasmid Vector	PHLAP92527454	Plasmid vector containing HLA-C*15:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:168 protein. This plasmid can be used for constructing HLA-C*15:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:169 Protein Expression Plasmid Vector	PHLAP92527455	Plasmid vector containing HLA-C*15:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:169 protein. This plasmid can be used for constructing HLA-C*15:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:17 Protein Expression Plasmid Vector	PHLAP92527456	Plasmid vector containing HLA-C*15:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:17 protein. This plasmid can be used for constructing HLA-C*15:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:170 Protein Expression Plasmid Vector	PHLAP92527457	Plasmid vector containing HLA-C*15:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:170 protein. This plasmid can be used for constructing HLA-C*15:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:171 Protein Expression Plasmid Vector	PHLAP92527458	Plasmid vector containing HLA-C*15:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:171 protein. This plasmid can be used for constructing HLA-C*15:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:172 Protein Expression Plasmid Vector	PHLAP92527459	Plasmid vector containing HLA-C*15:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:172 protein. This plasmid can be used for constructing HLA-C*15:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:173 Protein Expression Plasmid Vector	PHLAP92527460	Plasmid vector containing HLA-C*15:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:173 protein. This plasmid can be used for constructing HLA-C*15:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:174 Protein Expression Plasmid Vector	PHLAP92527461	Plasmid vector containing HLA-C*15:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:174 protein. This plasmid can be used for constructing HLA-C*15:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:175 Protein Expression Plasmid Vector	PHLAP92527462	Plasmid vector containing HLA-C*15:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:175 protein. This plasmid can be used for constructing HLA-C*15:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:176 Protein Expression Plasmid Vector	PHLAP92527463	Plasmid vector containing HLA-C*15:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:176 protein. This plasmid can be used for constructing HLA-C*15:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:177N Protein Expression Plasmid Vector	PHLAP92527464	Plasmid vector containing HLA-C*15:177N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:177N protein. This plasmid can be used for constructing HLA-C*15:177N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:177N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:178 Protein Expression Plasmid Vector	PHLAP92527465	Plasmid vector containing HLA-C*15:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:178 protein. This plasmid can be used for constructing HLA-C*15:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:179 Protein Expression Plasmid Vector	PHLAP92527466	Plasmid vector containing HLA-C*15:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:179 protein. This plasmid can be used for constructing HLA-C*15:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:18 Protein Expression Plasmid Vector	PHLAP92527467	Plasmid vector containing HLA-C*15:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:18 protein. This plasmid can be used for constructing HLA-C*15:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:180 Protein Expression Plasmid Vector	PHLAP92527468	Plasmid vector containing HLA-C*15:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:180 protein. This plasmid can be used for constructing HLA-C*15:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:181 Protein Expression Plasmid Vector	PHLAP92527469	Plasmid vector containing HLA-C*15:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:181 protein. This plasmid can be used for constructing HLA-C*15:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:182 Protein Expression Plasmid Vector	PHLAP92527470	Plasmid vector containing HLA-C*15:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:182 protein. This plasmid can be used for constructing HLA-C*15:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:183 Protein Expression Plasmid Vector	PHLAP92527471	Plasmid vector containing HLA-C*15:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:183 protein. This plasmid can be used for constructing HLA-C*15:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:184 Protein Expression Plasmid Vector	PHLAP92527472	Plasmid vector containing HLA-C*15:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:184 protein. This plasmid can be used for constructing HLA-C*15:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:185N Protein Expression Plasmid Vector	PHLAP92527473	Plasmid vector containing HLA-C*15:185N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:185N protein. This plasmid can be used for constructing HLA-C*15:185N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:185N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:186 Protein Expression Plasmid Vector	PHLAP92527474	Plasmid vector containing HLA-C*15:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:186 protein. This plasmid can be used for constructing HLA-C*15:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:187 Protein Expression Plasmid Vector	PHLAP92527475	Plasmid vector containing HLA-C*15:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:187 protein. This plasmid can be used for constructing HLA-C*15:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:188N Protein Expression Plasmid Vector	PHLAP92527476	Plasmid vector containing HLA-C*15:188N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:188N protein. This plasmid can be used for constructing HLA-C*15:188N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:188N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:189N Protein Expression Plasmid Vector	PHLAP92527477	Plasmid vector containing HLA-C*15:189N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:189N protein. This plasmid can be used for constructing HLA-C*15:189N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:189N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:19 Protein Expression Plasmid Vector	PHLAP92527478	Plasmid vector containing HLA-C*15:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:19 protein. This plasmid can be used for constructing HLA-C*15:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:190 Protein Expression Plasmid Vector	PHLAP92527479	Plasmid vector containing HLA-C*15:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:190 protein. This plasmid can be used for constructing HLA-C*15:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:191 Protein Expression Plasmid Vector	PHLAP92527480	Plasmid vector containing HLA-C*15:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:191 protein. This plasmid can be used for constructing HLA-C*15:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:192 Protein Expression Plasmid Vector	PHLAP92527481	Plasmid vector containing HLA-C*15:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:192 protein. This plasmid can be used for constructing HLA-C*15:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:193 Protein Expression Plasmid Vector	PHLAP92527482	Plasmid vector containing HLA-C*15:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:193 protein. This plasmid can be used for constructing HLA-C*15:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:194 Protein Expression Plasmid Vector	PHLAP92527483	Plasmid vector containing HLA-C*15:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:194 protein. This plasmid can be used for constructing HLA-C*15:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:195 Protein Expression Plasmid Vector	PHLAP92527484	Plasmid vector containing HLA-C*15:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:195 protein. This plasmid can be used for constructing HLA-C*15:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:196 Protein Expression Plasmid Vector	PHLAP92527485	Plasmid vector containing HLA-C*15:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:196 protein. This plasmid can be used for constructing HLA-C*15:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:197 Protein Expression Plasmid Vector	PHLAP92527486	Plasmid vector containing HLA-C*15:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:197 protein. This plasmid can be used for constructing HLA-C*15:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:198 Protein Expression Plasmid Vector	PHLAP92527487	Plasmid vector containing HLA-C*15:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:198 protein. This plasmid can be used for constructing HLA-C*15:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:199 Protein Expression Plasmid Vector	PHLAP92527488	Plasmid vector containing HLA-C*15:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:199 protein. This plasmid can be used for constructing HLA-C*15:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:20 Protein Expression Plasmid Vector	PHLAP92527489	Plasmid vector containing HLA-C*15:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:20 protein. This plasmid can be used for constructing HLA-C*15:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:200 Protein Expression Plasmid Vector	PHLAP92527490	Plasmid vector containing HLA-C*15:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:200 protein. This plasmid can be used for constructing HLA-C*15:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:201 Protein Expression Plasmid Vector	PHLAP92527491	Plasmid vector containing HLA-C*15:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:201 protein. This plasmid can be used for constructing HLA-C*15:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:202 Protein Expression Plasmid Vector	PHLAP92527492	Plasmid vector containing HLA-C*15:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:202 protein. This plasmid can be used for constructing HLA-C*15:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:203 Protein Expression Plasmid Vector	PHLAP92527493	Plasmid vector containing HLA-C*15:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:203 protein. This plasmid can be used for constructing HLA-C*15:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:204 Protein Expression Plasmid Vector	PHLAP92527494	Plasmid vector containing HLA-C*15:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:204 protein. This plasmid can be used for constructing HLA-C*15:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:205 Protein Expression Plasmid Vector	PHLAP92527495	Plasmid vector containing HLA-C*15:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:205 protein. This plasmid can be used for constructing HLA-C*15:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:206 Protein Expression Plasmid Vector	PHLAP92527496	Plasmid vector containing HLA-C*15:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:206 protein. This plasmid can be used for constructing HLA-C*15:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:207 Protein Expression Plasmid Vector	PHLAP92527497	Plasmid vector containing HLA-C*15:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:207 protein. This plasmid can be used for constructing HLA-C*15:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:208 Protein Expression Plasmid Vector	PHLAP92527498	Plasmid vector containing HLA-C*15:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:208 protein. This plasmid can be used for constructing HLA-C*15:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:209 Protein Expression Plasmid Vector	PHLAP92527499	Plasmid vector containing HLA-C*15:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:209 protein. This plasmid can be used for constructing HLA-C*15:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:21 Protein Expression Plasmid Vector	PHLAP925275000	Plasmid vector containing HLA-C*15:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:21 protein. This plasmid can be used for constructing HLA-C*15:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:210 Protein Expression Plasmid Vector	PHLAP925275001	Plasmid vector containing HLA-C*15:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:210 protein. This plasmid can be used for constructing HLA-C*15:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:211 Protein Expression Plasmid Vector	PHLAP925275002	Plasmid vector containing HLA-C*15:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:211 protein. This plasmid can be used for constructing HLA-C*15:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:212 Protein Expression Plasmid Vector	PHLAP925275003	Plasmid vector containing HLA-C*15:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:212 protein. This plasmid can be used for constructing HLA-C*15:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:213N Protein Expression Plasmid Vector	PHLAP92527504	Plasmid vector containing HLA-C*15:213N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:213N protein. This plasmid can be used for constructing HLA-C*15:213N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:213N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:214 Protein Expression Plasmid Vector	PHLAP92527505	Plasmid vector containing HLA-C*15:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:214 protein. This plasmid can be used for constructing HLA-C*15:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:215 Protein Expression Plasmid Vector	PHLAP92527506	Plasmid vector containing HLA-C*15:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:215 protein. This plasmid can be used for constructing HLA-C*15:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:216N Protein Expression Plasmid Vector	PHLAP92527507	Plasmid vector containing HLA-C*15:216N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:216N protein. This plasmid can be used for constructing HLA-C*15:216N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:216N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:217 Protein Expression Plasmid Vector	PHLAP92527508	Plasmid vector containing HLA-C*15:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:217 protein. This plasmid can be used for constructing HLA-C*15:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:218 Protein Expression Plasmid Vector	PHLAP92527509	Plasmid vector containing HLA-C*15:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:218 protein. This plasmid can be used for constructing HLA-C*15:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:219 Protein Expression Plasmid Vector	PHLAP92527510	Plasmid vector containing HLA-C*15:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:219 protein. This plasmid can be used for constructing HLA-C*15:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:22 Protein Expression Plasmid Vector	PHLAP92527511	Plasmid vector containing HLA-C*15:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:22 protein. This plasmid can be used for constructing HLA-C*15:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:220 Protein Expression Plasmid Vector	PHLAP92527512	Plasmid vector containing HLA-C*15:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:220 protein. This plasmid can be used for constructing HLA-C*15:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:221 Protein Expression Plasmid Vector	PHLAP92527513	Plasmid vector containing HLA-C*15:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:221 protein. This plasmid can be used for constructing HLA-C*15:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:222 Protein Expression Plasmid Vector	PHLAP92527514	Plasmid vector containing HLA-C*15:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:222 protein. This plasmid can be used for constructing HLA-C*15:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:223 Protein Expression Plasmid Vector	PHLAP92527515	Plasmid vector containing HLA-C*15:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:223 protein. This plasmid can be used for constructing HLA-C*15:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:224 Protein Expression Plasmid Vector	PHLAP92527516	Plasmid vector containing HLA-C*15:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:224 protein. This plasmid can be used for constructing HLA-C*15:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:225 Protein Expression Plasmid Vector	PHLAP92527517	Plasmid vector containing HLA-C*15:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:225 protein. This plasmid can be used for constructing HLA-C*15:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:226 Protein Expression Plasmid Vector	PHLAP92527518	Plasmid vector containing HLA-C*15:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:226 protein. This plasmid can be used for constructing HLA-C*15:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:227 Protein Expression Plasmid Vector	PHLAP92527519	Plasmid vector containing HLA-C*15:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:227 protein. This plasmid can be used for constructing HLA-C*15:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:228 Protein Expression Plasmid Vector	PHLAP92527520	Plasmid vector containing HLA-C*15:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:228 protein. This plasmid can be used for constructing HLA-C*15:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:229 Protein Expression Plasmid Vector	PHLAP92527521	Plasmid vector containing HLA-C*15:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:229 protein. This plasmid can be used for constructing HLA-C*15:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:23:01 Protein Expression Plasmid Vector	PHLAP92527522	Plasmid vector containing HLA-C*15:23:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:23:01 protein. This plasmid can be used for constructing HLA-C*15:23:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:23:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:23:02 Protein Expression Plasmid Vector	PHLAP92527523	Plasmid vector containing HLA-C*15:23:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:23:02 protein. This plasmid can be used for constructing HLA-C*15:23:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:23:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:230 Protein Expression Plasmid Vector	PHLAP92527524	Plasmid vector containing HLA-C*15:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:230 protein. This plasmid can be used for constructing HLA-C*15:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:231 Protein Expression Plasmid Vector	PHLAP92527525	Plasmid vector containing HLA-C*15:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:231 protein. This plasmid can be used for constructing HLA-C*15:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:232 Protein Expression Plasmid Vector	PHLAP92527526	Plasmid vector containing HLA-C*15:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:232 protein. This plasmid can be used for constructing HLA-C*15:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:233 Protein Expression Plasmid Vector	PHLAP92527527	Plasmid vector containing HLA-C*15:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:233 protein. This plasmid can be used for constructing HLA-C*15:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:234 Protein Expression Plasmid Vector	PHLAP92527528	Plasmid vector containing HLA-C*15:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:234 protein. This plasmid can be used for constructing HLA-C*15:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:235Q Protein Expression Plasmid Vector	PHLAP92527529	Plasmid vector containing HLA-C*15:235Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:235Q protein. This plasmid can be used for constructing HLA-C*15:235Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:235Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:236 Protein Expression Plasmid Vector	PHLAP92527530	Plasmid vector containing HLA-C*15:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:236 protein. This plasmid can be used for constructing HLA-C*15:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:237 Protein Expression Plasmid Vector	PHLAP92527531	Plasmid vector containing HLA-C*15:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:237 protein. This plasmid can be used for constructing HLA-C*15:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:238N Protein Expression Plasmid Vector	PHLAP92527532	Plasmid vector containing HLA-C*15:238N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:238N protein. This plasmid can be used for constructing HLA-C*15:238N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:238N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:239 Protein Expression Plasmid Vector	PHLAP92527533	Plasmid vector containing HLA-C*15:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:239 protein. This plasmid can be used for constructing HLA-C*15:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:24 Protein Expression Plasmid Vector	PHLAP92527534	Plasmid vector containing HLA-C*15:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:24 protein. This plasmid can be used for constructing HLA-C*15:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:240 Protein Expression Plasmid Vector	PHLAP92527535	Plasmid vector containing HLA-C*15:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:240 protein. This plasmid can be used for constructing HLA-C*15:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:241 Protein Expression Plasmid Vector	PHLAP92527536	Plasmid vector containing HLA-C*15:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:241 protein. This plasmid can be used for constructing HLA-C*15:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:242 Protein Expression Plasmid Vector	PHLAP92527537	Plasmid vector containing HLA-C*15:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:242 protein. This plasmid can be used for constructing HLA-C*15:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:243Q Protein Expression Plasmid Vector	PHLAP92527538	Plasmid vector containing HLA-C*15:243Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:243Q protein. This plasmid can be used for constructing HLA-C*15:243Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:243Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:244 Protein Expression Plasmid Vector	PHLAP92527539	Plasmid vector containing HLA-C*15:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:244 protein. This plasmid can be used for constructing HLA-C*15:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:245 Protein Expression Plasmid Vector	PHLAP92527540	Plasmid vector containing HLA-C*15:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:245 protein. This plasmid can be used for constructing HLA-C*15:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:246 Protein Expression Plasmid Vector	PHLAP92527541	Plasmid vector containing HLA-C*15:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:246 protein. This plasmid can be used for constructing HLA-C*15:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:247N Protein Expression Plasmid Vector	PHLAP92527542	Plasmid vector containing HLA-C*15:247N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:247N protein. This plasmid can be used for constructing HLA-C*15:247N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:247N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:248 Protein Expression Plasmid Vector	PHLAP92527543	Plasmid vector containing HLA-C*15:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:248 protein. This plasmid can be used for constructing HLA-C*15:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:249 Protein Expression Plasmid Vector	PHLAP92527544	Plasmid vector containing HLA-C*15:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:249 protein. This plasmid can be used for constructing HLA-C*15:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:25 Protein Expression Plasmid Vector	PHLAP92527545	Plasmid vector containing HLA-C*15:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:25 protein. This plasmid can be used for constructing HLA-C*15:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:250 Protein Expression Plasmid Vector	PHLAP92527546	Plasmid vector containing HLA-C*15:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:250 protein. This plasmid can be used for constructing HLA-C*15:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:251 Protein Expression Plasmid Vector	PHLAP92527547	Plasmid vector containing HLA-C*15:251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:251 protein. This plasmid can be used for constructing HLA-C*15:251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:252 Protein Expression Plasmid Vector	PHLAP92527548	Plasmid vector containing HLA-C*15:252 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:252 protein. This plasmid can be used for constructing HLA-C*15:252 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:252 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:253Q Protein Expression Plasmid Vector	PHLAP92527549	Plasmid vector containing HLA-C*15:253Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:253Q protein. This plasmid can be used for constructing HLA-C*15:253Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:253Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:254 Protein Expression Plasmid Vector	PHLAP92527550	Plasmid vector containing HLA-C*15:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:254 protein. This plasmid can be used for constructing HLA-C*15:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:255 Protein Expression Plasmid Vector	PHLAP92527551	Plasmid vector containing HLA-C*15:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:255 protein. This plasmid can be used for constructing HLA-C*15:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:256N Protein Expression Plasmid Vector	PHLAP92527552	Plasmid vector containing HLA-C*15:256N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:256N protein. This plasmid can be used for constructing HLA-C*15:256N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:256N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:257 Protein Expression Plasmid Vector	PHLAP92527553	Plasmid vector containing HLA-C*15:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:257 protein. This plasmid can be used for constructing HLA-C*15:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:258 Protein Expression Plasmid Vector	PHLAP92527554	Plasmid vector containing HLA-C*15:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:258 protein. This plasmid can be used for constructing HLA-C*15:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:259 Protein Expression Plasmid Vector	PHLAP92527555	Plasmid vector containing HLA-C*15:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:259 protein. This plasmid can be used for constructing HLA-C*15:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:26 Protein Expression Plasmid Vector	PHLAP92527556	Plasmid vector containing HLA-C*15:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:26 protein. This plasmid can be used for constructing HLA-C*15:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:260 Protein Expression Plasmid Vector	PHLAP92527557	Plasmid vector containing HLA-C*15:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:260 protein. This plasmid can be used for constructing HLA-C*15:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:261 Protein Expression Plasmid Vector	PHLAP92527558	Plasmid vector containing HLA-C*15:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:261 protein. This plasmid can be used for constructing HLA-C*15:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:262 Protein Expression Plasmid Vector	PHLAP92527559	Plasmid vector containing HLA-C*15:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:262 protein. This plasmid can be used for constructing HLA-C*15:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:263 Protein Expression Plasmid Vector	PHLAP92527560	Plasmid vector containing HLA-C*15:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:263 protein. This plasmid can be used for constructing HLA-C*15:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:264 Protein Expression Plasmid Vector	PHLAP92527561	Plasmid vector containing HLA-C*15:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:264 protein. This plasmid can be used for constructing HLA-C*15:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:265 Protein Expression Plasmid Vector	PHLAP92527562	Plasmid vector containing HLA-C*15:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:265 protein. This plasmid can be used for constructing HLA-C*15:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:266 Protein Expression Plasmid Vector	PHLAP92527563	Plasmid vector containing HLA-C*15:266 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:266 protein. This plasmid can be used for constructing HLA-C*15:266 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:266 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:267 Protein Expression Plasmid Vector	PHLAP92527564	Plasmid vector containing HLA-C*15:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:267 protein. This plasmid can be used for constructing HLA-C*15:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:268 Protein Expression Plasmid Vector	PHLAP92527565	Plasmid vector containing HLA-C*15:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:268 protein. This plasmid can be used for constructing HLA-C*15:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:269N Protein Expression Plasmid Vector	PHLAP92527566	Plasmid vector containing HLA-C*15:269N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:269N protein. This plasmid can be used for constructing HLA-C*15:269N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:269N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:27 Protein Expression Plasmid Vector	PHLAP92527567	Plasmid vector containing HLA-C*15:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:27 protein. This plasmid can be used for constructing HLA-C*15:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:270Q Protein Expression Plasmid Vector	PHLAP92527568	Plasmid vector containing HLA-C*15:270Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:270Q protein. This plasmid can be used for constructing HLA-C*15:270Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:270Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:271N Protein Expression Plasmid Vector	PHLAP92527569	Plasmid vector containing HLA-C*15:271N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:271N protein. This plasmid can be used for constructing HLA-C*15:271N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:271N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:272Q Protein Expression Plasmid Vector	PHLAP92527570	Plasmid vector containing HLA-C*15:272Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:272Q protein. This plasmid can be used for constructing HLA-C*15:272Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:272Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:273 Protein Expression Plasmid Vector	PHLAP92527571	Plasmid vector containing HLA-C*15:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:273 protein. This plasmid can be used for constructing HLA-C*15:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:274 Protein Expression Plasmid Vector	PHLAP92527572	Plasmid vector containing HLA-C*15:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:274 protein. This plasmid can be used for constructing HLA-C*15:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:275 Protein Expression Plasmid Vector	PHLAP92527573	Plasmid vector containing HLA-C*15:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:275 protein. This plasmid can be used for constructing HLA-C*15:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:276 Protein Expression Plasmid Vector	PHLAP92527574	Plasmid vector containing HLA-C*15:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:276 protein. This plasmid can be used for constructing HLA-C*15:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:277 Protein Expression Plasmid Vector	PHLAP92527575	Plasmid vector containing HLA-C*15:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:277 protein. This plasmid can be used for constructing HLA-C*15:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:278 Protein Expression Plasmid Vector	PHLAP92527576	Plasmid vector containing HLA-C*15:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:278 protein. This plasmid can be used for constructing HLA-C*15:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:279 Protein Expression Plasmid Vector	PHLAP92527577	Plasmid vector containing HLA-C*15:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:279 protein. This plasmid can be used for constructing HLA-C*15:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:28 Protein Expression Plasmid Vector	PHLAP92527578	Plasmid vector containing HLA-C*15:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:28 protein. This plasmid can be used for constructing HLA-C*15:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:280 Protein Expression Plasmid Vector	PHLAP92527579	Plasmid vector containing HLA-C*15:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:280 protein. This plasmid can be used for constructing HLA-C*15:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:281 Protein Expression Plasmid Vector	PHLAP92527580	Plasmid vector containing HLA-C*15:281 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:281 protein. This plasmid can be used for constructing HLA-C*15:281 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:281 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:282 Protein Expression Plasmid Vector	PHLAP92527581	Plasmid vector containing HLA-C*15:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:282 protein. This plasmid can be used for constructing HLA-C*15:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:283 Protein Expression Plasmid Vector	PHLAP92527582	Plasmid vector containing HLA-C*15:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:283 protein. This plasmid can be used for constructing HLA-C*15:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:284 Protein Expression Plasmid Vector	PHLAP92527583	Plasmid vector containing HLA-C*15:284 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:284 protein. This plasmid can be used for constructing HLA-C*15:284 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:284 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:285 Protein Expression Plasmid Vector	PHLAP92527584	Plasmid vector containing HLA-C*15:285 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:285 protein. This plasmid can be used for constructing HLA-C*15:285 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:285 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:286 Protein Expression Plasmid Vector	PHLAP92527585	Plasmid vector containing HLA-C*15:286 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:286 protein. This plasmid can be used for constructing HLA-C*15:286 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:286 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:287 Protein Expression Plasmid Vector	PHLAP92527586	Plasmid vector containing HLA-C*15:287 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:287 protein. This plasmid can be used for constructing HLA-C*15:287 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:287 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:288 Protein Expression Plasmid Vector	PHLAP92527587	Plasmid vector containing HLA-C*15:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:288 protein. This plasmid can be used for constructing HLA-C*15:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:289 Protein Expression Plasmid Vector	PHLAP92527588	Plasmid vector containing HLA-C*15:289 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:289 protein. This plasmid can be used for constructing HLA-C*15:289 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:289 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:29 Protein Expression Plasmid Vector	PHLAP92527589	Plasmid vector containing HLA-C*15:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:29 protein. This plasmid can be used for constructing HLA-C*15:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:290 Protein Expression Plasmid Vector	PHLAP92527590	Plasmid vector containing HLA-C*15:290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:290 protein. This plasmid can be used for constructing HLA-C*15:290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:291N Protein Expression Plasmid Vector	PHLAP92527591	Plasmid vector containing HLA-C*15:291N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:291N protein. This plasmid can be used for constructing HLA-C*15:291N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:291N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:292 Protein Expression Plasmid Vector	PHLAP92527592	Plasmid vector containing HLA-C*15:292 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:292 protein. This plasmid can be used for constructing HLA-C*15:292 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:292 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:293 Protein Expression Plasmid Vector	PHLAP92527593	Plasmid vector containing HLA-C*15:293 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:293 protein. This plasmid can be used for constructing HLA-C*15:293 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:293 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:30 Protein Expression Plasmid Vector	PHLAP92527594	Plasmid vector containing HLA-C*15:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:30 protein. This plasmid can be used for constructing HLA-C*15:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:31 Protein Expression Plasmid Vector	PHLAP92527595	Plasmid vector containing HLA-C*15:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:31 protein. This plasmid can be used for constructing HLA-C*15:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:32Q Protein Expression Plasmid Vector	PHLAP92527596	Plasmid vector containing HLA-C*15:32Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:32Q protein. This plasmid can be used for constructing HLA-C*15:32Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:32Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:33 Protein Expression Plasmid Vector	PHLAP92527597	Plasmid vector containing HLA-C*15:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:33 protein. This plasmid can be used for constructing HLA-C*15:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:34 Protein Expression Plasmid Vector	PHLAP92527598	Plasmid vector containing HLA-C*15:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:34 protein. This plasmid can be used for constructing HLA-C*15:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:35 Protein Expression Plasmid Vector	PHLAP92527599	Plasmid vector containing HLA-C*15:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:35 protein. This plasmid can be used for constructing HLA-C*15:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:36 Protein Expression Plasmid Vector	PHLAP92527600	Plasmid vector containing HLA-C*15:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:36 protein. This plasmid can be used for constructing HLA-C*15:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:37 Protein Expression Plasmid Vector	PHLAP92527601	Plasmid vector containing HLA-C*15:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:37 protein. This plasmid can be used for constructing HLA-C*15:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:38 Protein Expression Plasmid Vector	PHLAP92527602	Plasmid vector containing HLA-C*15:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:38 protein. This plasmid can be used for constructing HLA-C*15:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:39 Protein Expression Plasmid Vector	PHLAP92527603	Plasmid vector containing HLA-C*15:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:39 protein. This plasmid can be used for constructing HLA-C*15:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:40 Protein Expression Plasmid Vector	PHLAP92527604	Plasmid vector containing HLA-C*15:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:40 protein. This plasmid can be used for constructing HLA-C*15:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:41 Protein Expression Plasmid Vector	PHLAP92527605	Plasmid vector containing HLA-C*15:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:41 protein. This plasmid can be used for constructing HLA-C*15:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:42 Protein Expression Plasmid Vector	PHLAP92527606	Plasmid vector containing HLA-C*15:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:42 protein. This plasmid can be used for constructing HLA-C*15:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:43 Protein Expression Plasmid Vector	PHLAP92527607	Plasmid vector containing HLA-C*15:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:43 protein. This plasmid can be used for constructing HLA-C*15:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:44:01 Protein Expression Plasmid Vector	PHLAP92527608	Plasmid vector containing HLA-C*15:44:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:44:01 protein. This plasmid can be used for constructing HLA-C*15:44:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:44:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:44:02 Protein Expression Plasmid Vector	PHLAP92527609	Plasmid vector containing HLA-C*15:44:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:44:02 protein. This plasmid can be used for constructing HLA-C*15:44:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:44:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:45 Protein Expression Plasmid Vector	PHLAP925276110	Plasmid vector containing HLA-C*15:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:45 protein. This plasmid can be used for constructing HLA-C*15:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:46 Protein Expression Plasmid Vector	PHLAP925276111	Plasmid vector containing HLA-C*15:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:46 protein. This plasmid can be used for constructing HLA-C*15:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:47 Protein Expression Plasmid Vector	PHLAP925276112	Plasmid vector containing HLA-C*15:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:47 protein. This plasmid can be used for constructing HLA-C*15:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:48 Protein Expression Plasmid Vector	PHLAP925276113	Plasmid vector containing HLA-C*15:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:48 protein. This plasmid can be used for constructing HLA-C*15:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:49 Protein Expression Plasmid Vector	PHLAP925276114	Plasmid vector containing HLA-C*15:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:49 protein. This plasmid can be used for constructing HLA-C*15:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:50 Protein Expression Plasmid Vector	PHLAP925276115	Plasmid vector containing HLA-C*15:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:50 protein. This plasmid can be used for constructing HLA-C*15:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:51 Protein Expression Plasmid Vector	PHLAP92527616	Plasmid vector containing HLA-C*15:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:51 protein. This plasmid can be used for constructing HLA-C*15:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:52:01 Protein Expression Plasmid Vector	PHLAP92527617	Plasmid vector containing HLA-C*15:52:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:52:01 protein. This plasmid can be used for constructing HLA-C*15:52:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:52:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:52:02 Protein Expression Plasmid Vector	PHLAP92527618	Plasmid vector containing HLA-C*15:52:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:52:02 protein. This plasmid can be used for constructing HLA-C*15:52:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:52:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:53 Protein Expression Plasmid Vector	PHLAP92527619	Plasmid vector containing HLA-C*15:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:53 protein. This plasmid can be used for constructing HLA-C*15:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:54 Protein Expression Plasmid Vector	PHLAP92527620	Plasmid vector containing HLA-C*15:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:54 protein. This plasmid can be used for constructing HLA-C*15:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:55 Protein Expression Plasmid Vector	PHLAP92527621	Plasmid vector containing HLA-C*15:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:55 protein. This plasmid can be used for constructing HLA-C*15:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:56 Protein Expression Plasmid Vector	PHLAP92527622	Plasmid vector containing HLA-C*15:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:56 protein. This plasmid can be used for constructing HLA-C*15:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:57 Protein Expression Plasmid Vector	PHLAP92527623	Plasmid vector containing HLA-C*15:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:57 protein. This plasmid can be used for constructing HLA-C*15:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:58 Protein Expression Plasmid Vector	PHLAP92527624	Plasmid vector containing HLA-C*15:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:58 protein. This plasmid can be used for constructing HLA-C*15:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:59 Protein Expression Plasmid Vector	PHLAP92527625	Plasmid vector containing HLA-C*15:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:59 protein. This plasmid can be used for constructing HLA-C*15:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:60 Protein Expression Plasmid Vector	PHLAP92527626	Plasmid vector containing HLA-C*15:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:60 protein. This plasmid can be used for constructing HLA-C*15:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:61 Protein Expression Plasmid Vector	PHLAP92527627	Plasmid vector containing HLA-C*15:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:61 protein. This plasmid can be used for constructing HLA-C*15:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:62 Protein Expression Plasmid Vector	PHLAP92527628	Plasmid vector containing HLA-C*15:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:62 protein. This plasmid can be used for constructing HLA-C*15:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:63 Protein Expression Plasmid Vector	PHLAP92527629	Plasmid vector containing HLA-C*15:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:63 protein. This plasmid can be used for constructing HLA-C*15:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:64 Protein Expression Plasmid Vector	PHLAP92527630	Plasmid vector containing HLA-C*15:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:64 protein. This plasmid can be used for constructing HLA-C*15:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:65 Protein Expression Plasmid Vector	PHLAP92527631	Plasmid vector containing HLA-C*15:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:65 protein. This plasmid can be used for constructing HLA-C*15:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:66 Protein Expression Plasmid Vector	PHLAP925276312	Plasmid vector containing HLA-C*15:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:66 protein. This plasmid can be used for constructing HLA-C*15:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:67 Protein Expression Plasmid Vector	PHLAP925276313	Plasmid vector containing HLA-C*15:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:67 protein. This plasmid can be used for constructing HLA-C*15:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:68 Protein Expression Plasmid Vector	PHLAP925276314	Plasmid vector containing HLA-C*15:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:68 protein. This plasmid can be used for constructing HLA-C*15:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:69 Protein Expression Plasmid Vector	PHLAP925276315	Plasmid vector containing HLA-C*15:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:69 protein. This plasmid can be used for constructing HLA-C*15:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:70 Protein Expression Plasmid Vector	PHLAP925276316	Plasmid vector containing HLA-C*15:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:70 protein. This plasmid can be used for constructing HLA-C*15:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:71 Protein Expression Plasmid Vector	PHLAP925276317	Plasmid vector containing HLA-C*15:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:71 protein. This plasmid can be used for constructing HLA-C*15:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:72 Protein Expression Plasmid Vector	PHLAP925276318	Plasmid vector containing HLA-C*15:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:72 protein. This plasmid can be used for constructing HLA-C*15:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:73 Protein Expression Plasmid Vector	PHLAP925276319	Plasmid vector containing HLA-C*15:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:73 protein. This plasmid can be used for constructing HLA-C*15:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:74 Protein Expression Plasmid Vector	PHLAP92527640	Plasmid vector containing HLA-C*15:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:74 protein. This plasmid can be used for constructing HLA-C*15:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:75 Protein Expression Plasmid Vector	PHLAP92527641	Plasmid vector containing HLA-C*15:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:75 protein. This plasmid can be used for constructing HLA-C*15:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:76 Protein Expression Plasmid Vector	PHLAP92527642	Plasmid vector containing HLA-C*15:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:76 protein. This plasmid can be used for constructing HLA-C*15:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:77 Protein Expression Plasmid Vector	PHLAP92527643	Plasmid vector containing HLA-C*15:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:77 protein. This plasmid can be used for constructing HLA-C*15:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:78:01 Protein Expression Plasmid Vector	PHLAP92527644	Plasmid vector containing HLA-C*15:78:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:78:01 protein. This plasmid can be used for constructing HLA-C*15:78:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:78:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:78:02 Protein Expression Plasmid Vector	PHLAP92527645	Plasmid vector containing HLA-C*15:78:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:78:02 protein. This plasmid can be used for constructing HLA-C*15:78:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:78:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:79 Protein Expression Plasmid Vector	PHLAP92527646	Plasmid vector containing HLA-C*15:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:79 protein. This plasmid can be used for constructing HLA-C*15:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:80 Protein Expression Plasmid Vector	PHLAP92527647	Plasmid vector containing HLA-C*15:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:80 protein. This plasmid can be used for constructing HLA-C*15:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:81 Protein Expression Plasmid Vector	PHLAP92527648	Plasmid vector containing HLA-C*15:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:81 protein. This plasmid can be used for constructing HLA-C*15:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:82 Protein Expression Plasmid Vector	PHLAP92527649	Plasmid vector containing HLA-C*15:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:82 protein. This plasmid can be used for constructing HLA-C*15:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:83 Protein Expression Plasmid Vector	PHLAP92527650	Plasmid vector containing HLA-C*15:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:83 protein. This plasmid can be used for constructing HLA-C*15:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:84Q Protein Expression Plasmid Vector	PHLAP92527651	Plasmid vector containing HLA-C*15:84Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:84Q protein. This plasmid can be used for constructing HLA-C*15:84Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:84Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:85 Protein Expression Plasmid Vector	PHLAP92527652	Plasmid vector containing HLA-C*15:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:85 protein. This plasmid can be used for constructing HLA-C*15:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:86 Protein Expression Plasmid Vector	PHLAP92527653	Plasmid vector containing HLA-C*15:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:86 protein. This plasmid can be used for constructing HLA-C*15:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:87 Protein Expression Plasmid Vector	PHLAP92527654	Plasmid vector containing HLA-C*15:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:87 protein. This plasmid can be used for constructing HLA-C*15:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:88 Protein Expression Plasmid Vector	PHLAP92527655	Plasmid vector containing HLA-C*15:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:88 protein. This plasmid can be used for constructing HLA-C*15:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:89 Protein Expression Plasmid Vector	PHLAP92527656	Plasmid vector containing HLA-C*15:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:89 protein. This plasmid can be used for constructing HLA-C*15:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:90 Protein Expression Plasmid Vector	PHLAP92527657	Plasmid vector containing HLA-C*15:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:90 protein. This plasmid can be used for constructing HLA-C*15:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:91 Protein Expression Plasmid Vector	PHLAP92527658	Plasmid vector containing HLA-C*15:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:91 protein. This plasmid can be used for constructing HLA-C*15:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:92N Protein Expression Plasmid Vector	PHLAP92527659	Plasmid vector containing HLA-C*15:92N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:92N protein. This plasmid can be used for constructing HLA-C*15:92N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:92N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:93 Protein Expression Plasmid Vector	PHLAP92527660	Plasmid vector containing HLA-C*15:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:93 protein. This plasmid can be used for constructing HLA-C*15:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:94 Protein Expression Plasmid Vector	PHLAP92527661	Plasmid vector containing HLA-C*15:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:94 protein. This plasmid can be used for constructing HLA-C*15:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:95N Protein Expression Plasmid Vector	PHLAP92527662	Plasmid vector containing HLA-C*15:95N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:95N protein. This plasmid can be used for constructing HLA-C*15:95N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:95N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:96Q Protein Expression Plasmid Vector	PHLAP92527663	Plasmid vector containing HLA-C*15:96Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:96Q protein. This plasmid can be used for constructing HLA-C*15:96Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:96Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*15:97 Protein Expression Plasmid Vector	PHLAP92527664	Plasmid vector containing HLA-C*15:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:97 protein. This plasmid can be used for constructing HLA-C*15:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:98 Protein Expression Plasmid Vector	PHLAP92527665	Plasmid vector containing HLA-C*15:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:98 protein. This plasmid can be used for constructing HLA-C*15:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*15:99 Protein Expression Plasmid Vector	PHLAP92527666	Plasmid vector containing HLA-C*15:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*15:99 protein. This plasmid can be used for constructing HLA-C*15:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*15:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:01 Protein Expression Plasmid Vector	PHLAP92527667	Plasmid vector containing HLA-C*16:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:01 protein. This plasmid can be used for constructing HLA-C*16:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:02 Protein Expression Plasmid Vector	PHLAP92527668	Plasmid vector containing HLA-C*16:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:02 protein. This plasmid can be used for constructing HLA-C*16:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:03 Protein Expression Plasmid Vector	PHLAP92527669	Plasmid vector containing HLA-C*16:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:03 protein. This plasmid can be used for constructing HLA-C*16:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:04 Protein Expression Plasmid Vector	PHLAP92527670	Plasmid vector containing HLA-C*16:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:04 protein. This plasmid can be used for constructing HLA-C*16:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:01:05 Protein Expression Plasmid Vector	PHLAP92527671	Plasmid vector containing HLA-C*16:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:05 protein. This plasmid can be used for constructing HLA-C*16:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:06 Protein Expression Plasmid Vector	PHLAP92527672	Plasmid vector containing HLA-C*16:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:06 protein. This plasmid can be used for constructing HLA-C*16:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:07 Protein Expression Plasmid Vector	PHLAP92527673	Plasmid vector containing HLA-C*16:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:07 protein. This plasmid can be used for constructing HLA-C*16:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:08 Protein Expression Plasmid Vector	PHLAP92527674	Plasmid vector containing HLA-C*16:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:08 protein. This plasmid can be used for constructing HLA-C*16:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:09 Protein Expression Plasmid Vector	PHLAP92527675	Plasmid vector containing HLA-C*16:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:09 protein. This plasmid can be used for constructing HLA-C*16:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:10 Protein Expression Plasmid Vector	PHLAP92527676	Plasmid vector containing HLA-C*16:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:10 protein. This plasmid can be used for constructing HLA-C*16:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:11 Protein Expression Plasmid Vector	PHLAP92527677	Plasmid vector containing HLA-C*16:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:11 protein. This plasmid can be used for constructing HLA-C*16:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:01:12 Protein Expression Plasmid Vector	PHLAP92527678	Plasmid vector containing HLA-C*16:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:12 protein. This plasmid can be used for constructing HLA-C*16:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:13 Protein Expression Plasmid Vector	PHLAP92527679	Plasmid vector containing HLA-C*16:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:13 protein. This plasmid can be used for constructing HLA-C*16:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:14 Protein Expression Plasmid Vector	PHLAP92527680	Plasmid vector containing HLA-C*16:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:14 protein. This plasmid can be used for constructing HLA-C*16:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:15 Protein Expression Plasmid Vector	PHLAP92527681	Plasmid vector containing HLA-C*16:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:15 protein. This plasmid can be used for constructing HLA-C*16:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:16 Protein Expression Plasmid Vector	PHLAP92527682	Plasmid vector containing HLA-C*16:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:16 protein. This plasmid can be used for constructing HLA-C*16:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:17 Protein Expression Plasmid Vector	PHLAP92527683	Plasmid vector containing HLA-C*16:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:17 protein. This plasmid can be used for constructing HLA-C*16:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:18 Protein Expression Plasmid Vector	PHLAP92527684	Plasmid vector containing HLA-C*16:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:18 protein. This plasmid can be used for constructing HLA-C*16:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:01:19 Protein Expression Plasmid Vector	PHLAP92527685	Plasmid vector containing HLA-C*16:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:19 protein. This plasmid can be used for constructing HLA-C*16:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:20 Protein Expression Plasmid Vector	PHLAP92527686	Plasmid vector containing HLA-C*16:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:20 protein. This plasmid can be used for constructing HLA-C*16:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:21 Protein Expression Plasmid Vector	PHLAP92527687	Plasmid vector containing HLA-C*16:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:21 protein. This plasmid can be used for constructing HLA-C*16:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:22 Protein Expression Plasmid Vector	PHLAP92527688	Plasmid vector containing HLA-C*16:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:22 protein. This plasmid can be used for constructing HLA-C*16:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:23 Protein Expression Plasmid Vector	PHLAP92527689	Plasmid vector containing HLA-C*16:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:23 protein. This plasmid can be used for constructing HLA-C*16:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:24 Protein Expression Plasmid Vector	PHLAP92527690	Plasmid vector containing HLA-C*16:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:24 protein. This plasmid can be used for constructing HLA-C*16:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:25 Protein Expression Plasmid Vector	PHLAP92527691	Plasmid vector containing HLA-C*16:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:25 protein. This plasmid can be used for constructing HLA-C*16:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:01:26 Protein Expression Plasmid Vector	PHLAP92527692	Plasmid vector containing HLA-C*16:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:26 protein. This plasmid can be used for constructing HLA-C*16:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:27 Protein Expression Plasmid Vector	PHLAP92527693	Plasmid vector containing HLA-C*16:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:27 protein. This plasmid can be used for constructing HLA-C*16:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:28 Protein Expression Plasmid Vector	PHLAP92527694	Plasmid vector containing HLA-C*16:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:28 protein. This plasmid can be used for constructing HLA-C*16:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:29 Protein Expression Plasmid Vector	PHLAP92527695	Plasmid vector containing HLA-C*16:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:29 protein. This plasmid can be used for constructing HLA-C*16:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:30 Protein Expression Plasmid Vector	PHLAP92527696	Plasmid vector containing HLA-C*16:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:30 protein. This plasmid can be used for constructing HLA-C*16:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:31 Protein Expression Plasmid Vector	PHLAP92527697	Plasmid vector containing HLA-C*16:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:31 protein. This plasmid can be used for constructing HLA-C*16:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:32 Protein Expression Plasmid Vector	PHLAP92527698	Plasmid vector containing HLA-C*16:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:32 protein. This plasmid can be used for constructing HLA-C*16:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:01:33 Protein Expression Plasmid Vector	PHLAP92527699	Plasmid vector containing HLA-C*16:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:33 protein. This plasmid can be used for constructing HLA-C*16:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:34 Protein Expression Plasmid Vector	PHLAP92527700	Plasmid vector containing HLA-C*16:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:34 protein. This plasmid can be used for constructing HLA-C*16:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:35 Protein Expression Plasmid Vector	PHLAP92527701	Plasmid vector containing HLA-C*16:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:35 protein. This plasmid can be used for constructing HLA-C*16:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:36 Protein Expression Plasmid Vector	PHLAP92527702	Plasmid vector containing HLA-C*16:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:36 protein. This plasmid can be used for constructing HLA-C*16:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:37 Protein Expression Plasmid Vector	PHLAP92527703	Plasmid vector containing HLA-C*16:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:37 protein. This plasmid can be used for constructing HLA-C*16:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:38 Protein Expression Plasmid Vector	PHLAP92527704	Plasmid vector containing HLA-C*16:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:38 protein. This plasmid can be used for constructing HLA-C*16:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:39 Protein Expression Plasmid Vector	PHLAP92527705	Plasmid vector containing HLA-C*16:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:39 protein. This plasmid can be used for constructing HLA-C*16:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:01:40 Protein Expression Plasmid Vector	PHLAP92527706	Plasmid vector containing HLA-C*16:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:40 protein. This plasmid can be used for constructing HLA-C*16:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:41 Protein Expression Plasmid Vector	PHLAP92527707	Plasmid vector containing HLA-C*16:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:41 protein. This plasmid can be used for constructing HLA-C*16:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:42Q Protein Expression Plasmid Vector	PHLAP92527708	Plasmid vector containing HLA-C*16:01:01:42Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:42Q protein. This plasmid can be used for constructing HLA-C*16:01:01:42Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:42Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:01:43 Protein Expression Plasmid Vector	PHLAP92527709	Plasmid vector containing HLA-C*16:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:01:43 protein. This plasmid can be used for constructing HLA-C*16:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:02 Protein Expression Plasmid Vector	PHLAP92527710	Plasmid vector containing HLA-C*16:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:02 protein. This plasmid can be used for constructing HLA-C*16:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:03 Protein Expression Plasmid Vector	PHLAP92527711	Plasmid vector containing HLA-C*16:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:03 protein. This plasmid can be used for constructing HLA-C*16:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:04 Protein Expression Plasmid Vector	PHLAP92527712	Plasmid vector containing HLA-C*16:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:04 protein. This plasmid can be used for constructing HLA-C*16:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:05 Protein Expression Plasmid Vector	PHLAP92527713	Plasmid vector containing HLA-C*16:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:05 protein. This plasmid can be used for constructing HLA-C*16:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:06 Protein Expression Plasmid Vector	PHLAP92527714	Plasmid vector containing HLA-C*16:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:06 protein. This plasmid can be used for constructing HLA-C*16:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:07 Protein Expression Plasmid Vector	PHLAP92527715	Plasmid vector containing HLA-C*16:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:07 protein. This plasmid can be used for constructing HLA-C*16:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:08 Protein Expression Plasmid Vector	PHLAP92527716	Plasmid vector containing HLA-C*16:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:08 protein. This plasmid can be used for constructing HLA-C*16:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:09 Protein Expression Plasmid Vector	PHLAP92527717	Plasmid vector containing HLA-C*16:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:09 protein. This plasmid can be used for constructing HLA-C*16:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:10 Protein Expression Plasmid Vector	PHLAP92527718	Plasmid vector containing HLA-C*16:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:10 protein. This plasmid can be used for constructing HLA-C*16:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:11 Protein Expression Plasmid Vector	PHLAP92527719	Plasmid vector containing HLA-C*16:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:11 protein. This plasmid can be used for constructing HLA-C*16:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:12 Protein Expression Plasmid Vector	PHLAP92527720	Plasmid vector containing HLA-C*16:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:12 protein. This plasmid can be used for constructing HLA-C*16:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:13 Protein Expression Plasmid Vector	PHLAP92527721	Plasmid vector containing HLA-C*16:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:13 protein. This plasmid can be used for constructing HLA-C*16:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:14 Protein Expression Plasmid Vector	PHLAP92527722	Plasmid vector containing HLA-C*16:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:14 protein. This plasmid can be used for constructing HLA-C*16:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:15 Protein Expression Plasmid Vector	PHLAP92527723	Plasmid vector containing HLA-C*16:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:15 protein. This plasmid can be used for constructing HLA-C*16:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:16 Protein Expression Plasmid Vector	PHLAP92527724	Plasmid vector containing HLA-C*16:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:16 protein. This plasmid can be used for constructing HLA-C*16:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:17 Protein Expression Plasmid Vector	PHLAP92527725	Plasmid vector containing HLA-C*16:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:17 protein. This plasmid can be used for constructing HLA-C*16:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:18 Protein Expression Plasmid Vector	PHLAP92527726	Plasmid vector containing HLA-C*16:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:18 protein. This plasmid can be used for constructing HLA-C*16:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:19 Protein Expression Plasmid Vector	PHLAP92527727	Plasmid vector containing HLA-C*16:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:19 protein. This plasmid can be used for constructing HLA-C*16:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:20 Protein Expression Plasmid Vector	PHLAP92527728	Plasmid vector containing HLA-C*16:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:20 protein. This plasmid can be used for constructing HLA-C*16:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:21 Protein Expression Plasmid Vector	PHLAP92527729	Plasmid vector containing HLA-C*16:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:21 protein. This plasmid can be used for constructing HLA-C*16:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:22 Protein Expression Plasmid Vector	PHLAP92527730	Plasmid vector containing HLA-C*16:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:22 protein. This plasmid can be used for constructing HLA-C*16:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:23 Protein Expression Plasmid Vector	PHLAP92527731	Plasmid vector containing HLA-C*16:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:23 protein. This plasmid can be used for constructing HLA-C*16:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:24 Protein Expression Plasmid Vector	PHLAP92527732	Plasmid vector containing HLA-C*16:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:24 protein. This plasmid can be used for constructing HLA-C*16:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:25 Protein Expression Plasmid Vector	PHLAP92527733	Plasmid vector containing HLA-C*16:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:25 protein. This plasmid can be used for constructing HLA-C*16:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:26 Protein Expression Plasmid Vector	PHLAP92527734	Plasmid vector containing HLA-C*16:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:26 protein. This plasmid can be used for constructing HLA-C*16:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:27 Protein Expression Plasmid Vector	PHLAP92527735	Plasmid vector containing HLA-C*16:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:27 protein. This plasmid can be used for constructing HLA-C*16:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:28 Protein Expression Plasmid Vector	PHLAP92527736	Plasmid vector containing HLA-C*16:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:28 protein. This plasmid can be used for constructing HLA-C*16:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:29 Protein Expression Plasmid Vector	PHLAP92527737	Plasmid vector containing HLA-C*16:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:29 protein. This plasmid can be used for constructing HLA-C*16:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:30 Protein Expression Plasmid Vector	PHLAP92527738	Plasmid vector containing HLA-C*16:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:30 protein. This plasmid can be used for constructing HLA-C*16:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:31 Protein Expression Plasmid Vector	PHLAP92527739	Plasmid vector containing HLA-C*16:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:31 protein. This plasmid can be used for constructing HLA-C*16:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:32 Protein Expression Plasmid Vector	PHLAP92527740	Plasmid vector containing HLA-C*16:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:32 protein. This plasmid can be used for constructing HLA-C*16:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:33 Protein Expression Plasmid Vector	PHLAP92527741	Plasmid vector containing HLA-C*16:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:33 protein. This plasmid can be used for constructing HLA-C*16:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:34 Protein Expression Plasmid Vector	PHLAP92527742	Plasmid vector containing HLA-C*16:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:34 protein. This plasmid can be used for constructing HLA-C*16:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:35 Protein Expression Plasmid Vector	PHLAP92527743	Plasmid vector containing HLA-C*16:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:35 protein. This plasmid can be used for constructing HLA-C*16:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:36 Protein Expression Plasmid Vector	PHLAP92527744	Plasmid vector containing HLA-C*16:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:36 protein. This plasmid can be used for constructing HLA-C*16:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:37 Protein Expression Plasmid Vector	PHLAP925277745	Plasmid vector containing HLA-C*16:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:37 protein. This plasmid can be used for constructing HLA-C*16:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:38 Protein Expression Plasmid Vector	PHLAP925277746	Plasmid vector containing HLA-C*16:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:38 protein. This plasmid can be used for constructing HLA-C*16:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:39 Protein Expression Plasmid Vector	PHLAP925277747	Plasmid vector containing HLA-C*16:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:39 protein. This plasmid can be used for constructing HLA-C*16:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:40 Protein Expression Plasmid Vector	PHLAP925277748	Plasmid vector containing HLA-C*16:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:40 protein. This plasmid can be used for constructing HLA-C*16:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:41 Protein Expression Plasmid Vector	PHLAP925277749	Plasmid vector containing HLA-C*16:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:41 protein. This plasmid can be used for constructing HLA-C*16:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:42 Protein Expression Plasmid Vector	PHLAP9252775 0	Plasmid vector containing HLA-C*16:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:42 protein. This plasmid can be used for constructing HLA-C*16:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:43 Protein Expression Plasmid Vector	PHLAP9252775 1	Plasmid vector containing HLA-C*16:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:43 protein. This plasmid can be used for constructing HLA-C*16:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:44 Protein Expression Plasmid Vector	PHLAP9252775 2	Plasmid vector containing HLA-C*16:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:44 protein. This plasmid can be used for constructing HLA-C*16:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:45:01 Protein Expression Plasmid Vector	PHLAP92527753	Plasmid vector containing HLA-C*16:01:45:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:45:01 protein. This plasmid can be used for constructing HLA-C*16:01:45:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:45:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:45:02 Protein Expression Plasmid Vector	PHLAP92527754	Plasmid vector containing HLA-C*16:01:45:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:45:02 protein. This plasmid can be used for constructing HLA-C*16:01:45:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:45:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:46 Protein Expression Plasmid Vector	PHLAP92527755	Plasmid vector containing HLA-C*16:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:46 protein. This plasmid can be used for constructing HLA-C*16:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:47 Protein Expression Plasmid Vector	PHLAP92527756	Plasmid vector containing HLA-C*16:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:47 protein. This plasmid can be used for constructing HLA-C*16:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:48 Protein Expression Plasmid Vector	PHLAP92527757	Plasmid vector containing HLA-C*16:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:48 protein. This plasmid can be used for constructing HLA-C*16:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:49 Protein Expression Plasmid Vector	PHLAP92527758	Plasmid vector containing HLA-C*16:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:49 protein. This plasmid can be used for constructing HLA-C*16:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:50 Protein Expression Plasmid Vector	PHLAP92527759	Plasmid vector containing HLA-C*16:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:50 protein. This plasmid can be used for constructing HLA-C*16:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:01:51 Protein Expression Plasmid Vector	PHLAP92527760	Plasmid vector containing HLA-C*16:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:51 protein. This plasmid can be used for constructing HLA-C*16:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:01:52 Protein Expression Plasmid Vector	PHLAP92527761	Plasmid vector containing HLA-C*16:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:01:52 protein. This plasmid can be used for constructing HLA-C*16:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:01:01 Protein Expression Plasmid Vector	PHLAP92527762	Plasmid vector containing HLA-C*16:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:01:01 protein. This plasmid can be used for constructing HLA-C*16:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:01:02 Protein Expression Plasmid Vector	PHLAP92527763	Plasmid vector containing HLA-C*16:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:01:02 protein. This plasmid can be used for constructing HLA-C*16:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:01:03 Protein Expression Plasmid Vector	PHLAP92527764	Plasmid vector containing HLA-C*16:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:01:03 protein. This plasmid can be used for constructing HLA-C*16:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:01:04 Protein Expression Plasmid Vector	PHLAP92527765	Plasmid vector containing HLA-C*16:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:01:04 protein. This plasmid can be used for constructing HLA-C*16:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:01:05 Protein Expression Plasmid Vector	PHLAP92527766	Plasmid vector containing HLA-C*16:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:01:05 protein. This plasmid can be used for constructing HLA-C*16:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:01:06 Protein Expression Plasmid Vector	PHLAP92527767	Plasmid vector containing HLA-C*16:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:01:06 protein. This plasmid can be used for constructing HLA-C*16:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:02:01:07 Protein Expression Plasmid Vector	PHLAP92527768	Plasmid vector containing HLA-C*16:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:01:07 protein. This plasmid can be used for constructing HLA-C*16:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:02 Protein Expression Plasmid Vector	PHLAP92527769	Plasmid vector containing HLA-C*16:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:02 protein. This plasmid can be used for constructing HLA-C*16:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:03 Protein Expression Plasmid Vector	PHLAP92527770	Plasmid vector containing HLA-C*16:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:03 protein. This plasmid can be used for constructing HLA-C*16:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:04 Protein Expression Plasmid Vector	PHLAP92527771	Plasmid vector containing HLA-C*16:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:04 protein. This plasmid can be used for constructing HLA-C*16:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:05 Protein Expression Plasmid Vector	PHLAP92527772	Plasmid vector containing HLA-C*16:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:05 protein. This plasmid can be used for constructing HLA-C*16:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:06 Protein Expression Plasmid Vector	PHLAP92527773	Plasmid vector containing HLA-C*16:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:06 protein. This plasmid can be used for constructing HLA-C*16:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:07 Protein Expression Plasmid Vector	PHLAP92527774	Plasmid vector containing HLA-C*16:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:07 protein. This plasmid can be used for constructing HLA-C*16:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:08 Protein Expression Plasmid Vector	PHLAP92527775	Plasmid vector containing HLA-C*16:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:08 protein. This plasmid can be used for constructing HLA-C*16:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:02:09 Protein Expression Plasmid Vector	PHLAP92527776	Plasmid vector containing HLA-C*16:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:09 protein. This plasmid can be used for constructing HLA-C*16:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:10 Protein Expression Plasmid Vector	PHLAP92527777	Plasmid vector containing HLA-C*16:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:10 protein. This plasmid can be used for constructing HLA-C*16:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:11 Protein Expression Plasmid Vector	PHLAP92527778	Plasmid vector containing HLA-C*16:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:11 protein. This plasmid can be used for constructing HLA-C*16:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:12 Protein Expression Plasmid Vector	PHLAP92527779	Plasmid vector containing HLA-C*16:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:12 protein. This plasmid can be used for constructing HLA-C*16:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:13 Protein Expression Plasmid Vector	PHLAP92527780	Plasmid vector containing HLA-C*16:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:13 protein. This plasmid can be used for constructing HLA-C*16:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:14 Protein Expression Plasmid Vector	PHLAP92527781	Plasmid vector containing HLA-C*16:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:14 protein. This plasmid can be used for constructing HLA-C*16:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:15 Protein Expression Plasmid Vector	PHLAP92527782	Plasmid vector containing HLA-C*16:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:15 protein. This plasmid can be used for constructing HLA-C*16:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:16 Protein Expression Plasmid Vector	PHLAP92527783	Plasmid vector containing HLA-C*16:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:16 protein. This plasmid can be used for constructing HLA-C*16:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:02:17 Protein Expression Plasmid Vector	PHLAP92527784	Plasmid vector containing HLA-C*16:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:17 protein. This plasmid can be used for constructing HLA-C*16:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:18 Protein Expression Plasmid Vector	PHLAP92527785	Plasmid vector containing HLA-C*16:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:18 protein. This plasmid can be used for constructing HLA-C*16:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:19 Protein Expression Plasmid Vector	PHLAP92527786	Plasmid vector containing HLA-C*16:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:19 protein. This plasmid can be used for constructing HLA-C*16:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:20 Protein Expression Plasmid Vector	PHLAP92527787	Plasmid vector containing HLA-C*16:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:20 protein. This plasmid can be used for constructing HLA-C*16:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:21 Protein Expression Plasmid Vector	PHLAP92527788	Plasmid vector containing HLA-C*16:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:21 protein. This plasmid can be used for constructing HLA-C*16:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:22 Protein Expression Plasmid Vector	PHLAP92527789	Plasmid vector containing HLA-C*16:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:22 protein. This plasmid can be used for constructing HLA-C*16:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:23 Protein Expression Plasmid Vector	PHLAP92527790	Plasmid vector containing HLA-C*16:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:23 protein. This plasmid can be used for constructing HLA-C*16:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:02:24 Protein Expression Plasmid Vector	PHLAP92527791	Plasmid vector containing HLA-C*16:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:02:24 protein. This plasmid can be used for constructing HLA-C*16:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:04:01:01 Protein Expression Plasmid Vector	PHLAP92527792	Plasmid vector containing HLA-C*16:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:04:01:01 protein. This plasmid can be used for constructing HLA-C*16:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:04:01:02 Protein Expression Plasmid Vector	PHLAP92527793	Plasmid vector containing HLA-C*16:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:04:01:02 protein. This plasmid can be used for constructing HLA-C*16:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:04:01:03 Protein Expression Plasmid Vector	PHLAP92527794	Plasmid vector containing HLA-C*16:04:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:04:01:03 protein. This plasmid can be used for constructing HLA-C*16:04:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:04:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:04:03 Protein Expression Plasmid Vector	PHLAP92527795	Plasmid vector containing HLA-C*16:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:04:03 protein. This plasmid can be used for constructing HLA-C*16:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:04:04 Protein Expression Plasmid Vector	PHLAP92527796	Plasmid vector containing HLA-C*16:04:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:04:04 protein. This plasmid can be used for constructing HLA-C*16:04:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:04:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:04:05 Protein Expression Plasmid Vector	PHLAP92527797	Plasmid vector containing HLA-C*16:04:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:04:05 protein. This plasmid can be used for constructing HLA-C*16:04:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:04:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:06 Protein Expression Plasmid Vector	PHLAP92527798	Plasmid vector containing HLA-C*16:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:06 protein. This plasmid can be used for constructing HLA-C*16:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:07:01 Protein Expression Plasmid Vector	PHLAP92527799	Plasmid vector containing HLA-C*16:07:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:07:01 protein. This plasmid can be used for constructing HLA-C*16:07:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:07:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:07:02 Protein Expression Plasmid Vector	PHLAP92527800	Plasmid vector containing HLA-C*16:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:07:02 protein. This plasmid can be used for constructing HLA-C*16:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:08 Protein Expression Plasmid Vector	PHLAP92527801	Plasmid vector containing HLA-C*16:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:08 protein. This plasmid can be used for constructing HLA-C*16:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:09 Protein Expression Plasmid Vector	PHLAP92527802	Plasmid vector containing HLA-C*16:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:09 protein. This plasmid can be used for constructing HLA-C*16:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:10 Protein Expression Plasmid Vector	PHLAP92527803	Plasmid vector containing HLA-C*16:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:10 protein. This plasmid can be used for constructing HLA-C*16:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:100 Protein Expression Plasmid Vector	PHLAP92527804	Plasmid vector containing HLA-C*16:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:100 protein. This plasmid can be used for constructing HLA-C*16:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:101 Protein Expression Plasmid Vector	PHLAP92527805	Plasmid vector containing HLA-C*16:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:101 protein. This plasmid can be used for constructing HLA-C*16:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:102 Protein Expression Plasmid Vector	PHLAP92527806	Plasmid vector containing HLA-C*16:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:102 protein. This plasmid can be used for constructing HLA-C*16:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:103 Protein Expression Plasmid Vector	PHLAP92527807	Plasmid vector containing HLA-C*16:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:103 protein. This plasmid can be used for constructing HLA-C*16:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:104 Protein Expression Plasmid Vector	PHLAP92527808	Plasmid vector containing HLA-C*16:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:104 protein. This plasmid can be used for constructing HLA-C*16:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:105 Protein Expression Plasmid Vector	PHLAP92527809	Plasmid vector containing HLA-C*16:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:105 protein. This plasmid can be used for constructing HLA-C*16:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:106 Protein Expression Plasmid Vector	PHLAP925278110	Plasmid vector containing HLA-C*16:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:106 protein. This plasmid can be used for constructing HLA-C*16:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:107 Protein Expression Plasmid Vector	PHLAP925278111	Plasmid vector containing HLA-C*16:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:107 protein. This plasmid can be used for constructing HLA-C*16:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:108 Protein Expression Plasmid Vector	PHLAP925278112	Plasmid vector containing HLA-C*16:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:108 protein. This plasmid can be used for constructing HLA-C*16:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:109 Protein Expression Plasmid Vector	PHLAP925278113	Plasmid vector containing HLA-C*16:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:109 protein. This plasmid can be used for constructing HLA-C*16:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:11 Protein Expression Plasmid Vector	PHLAP925278114	Plasmid vector containing HLA-C*16:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:11 protein. This plasmid can be used for constructing HLA-C*16:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:110 Protein Expression Plasmid Vector	PHLAP92527815	Plasmid vector containing HLA-C*16:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:110 protein. This plasmid can be used for constructing HLA-C*16:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:111 Protein Expression Plasmid Vector	PHLAP92527816	Plasmid vector containing HLA-C*16:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:111 protein. This plasmid can be used for constructing HLA-C*16:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:112 Protein Expression Plasmid Vector	PHLAP92527817	Plasmid vector containing HLA-C*16:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:112 protein. This plasmid can be used for constructing HLA-C*16:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:113 Protein Expression Plasmid Vector	PHLAP92527818	Plasmid vector containing HLA-C*16:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:113 protein. This plasmid can be used for constructing HLA-C*16:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:114 Protein Expression Plasmid Vector	PHLAP92527819	Plasmid vector containing HLA-C*16:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:114 protein. This plasmid can be used for constructing HLA-C*16:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:115 Protein Expression Plasmid Vector	PHLAP92527820	Plasmid vector containing HLA-C*16:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:115 protein. This plasmid can be used for constructing HLA-C*16:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:116 Protein Expression Plasmid Vector	PHLAP92527821	Plasmid vector containing HLA-C*16:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:116 protein. This plasmid can be used for constructing HLA-C*16:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:117 Protein Expression Plasmid Vector	PHLAP92527822	Plasmid vector containing HLA-C*16:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:117 protein. This plasmid can be used for constructing HLA-C*16:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:118 Protein Expression Plasmid Vector	PHLAP92527823	Plasmid vector containing HLA-C*16:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:118 protein. This plasmid can be used for constructing HLA-C*16:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:119 Protein Expression Plasmid Vector	PHLAP92527824	Plasmid vector containing HLA-C*16:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:119 protein. This plasmid can be used for constructing HLA-C*16:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:12 Protein Expression Plasmid Vector	PHLAP92527825	Plasmid vector containing HLA-C*16:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:12 protein. This plasmid can be used for constructing HLA-C*16:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:120 Protein Expression Plasmid Vector	PHLAP92527826	Plasmid vector containing HLA-C*16:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:120 protein. This plasmid can be used for constructing HLA-C*16:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:121 Protein Expression Plasmid Vector	PHLAP92527827	Plasmid vector containing HLA-C*16:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:121 protein. This plasmid can be used for constructing HLA-C*16:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:122 Protein Expression Plasmid Vector	PHLAP92527828	Plasmid vector containing HLA-C*16:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:122 protein. This plasmid can be used for constructing HLA-C*16:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:123N Protein Expression Plasmid Vector	PHLAP92527829	Plasmid vector containing HLA-C*16:123N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:123N protein. This plasmid can be used for constructing HLA-C*16:123N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:123N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:124 Protein Expression Plasmid Vector	PHLAP92527830	Plasmid vector containing HLA-C*16:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:124 protein. This plasmid can be used for constructing HLA-C*16:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:125 Protein Expression Plasmid Vector	PHLAP92527831	Plasmid vector containing HLA-C*16:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:125 protein. This plasmid can be used for constructing HLA-C*16:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:126 Protein Expression Plasmid Vector	PHLAP92527832	Plasmid vector containing HLA-C*16:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:126 protein. This plasmid can be used for constructing HLA-C*16:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:127 Protein Expression Plasmid Vector	PHLAP92527833	Plasmid vector containing HLA-C*16:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:127 protein. This plasmid can be used for constructing HLA-C*16:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:128 Protein Expression Plasmid Vector	PHLAP92527834	Plasmid vector containing HLA-C*16:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:128 protein. This plasmid can be used for constructing HLA-C*16:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:129 Protein Expression Plasmid Vector	PHLAP92527835	Plasmid vector containing HLA-C*16:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:129 protein. This plasmid can be used for constructing HLA-C*16:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:13 Protein Expression Plasmid Vector	PHLAP92527836	Plasmid vector containing HLA-C*16:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:13 protein. This plasmid can be used for constructing HLA-C*16:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:130 Protein Expression Plasmid Vector	PHLAP92527837	Plasmid vector containing HLA-C*16:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:130 protein. This plasmid can be used for constructing HLA-C*16:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:131 Protein Expression Plasmid Vector	PHLAP92527838	Plasmid vector containing HLA-C*16:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:131 protein. This plasmid can be used for constructing HLA-C*16:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:132N Protein Expression Plasmid Vector	PHLAP92527839	Plasmid vector containing HLA-C*16:132N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:132N protein. This plasmid can be used for constructing HLA-C*16:132N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:132N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:133 Protein Expression Plasmid Vector	PHLAP92527840	Plasmid vector containing HLA-C*16:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:133 protein. This plasmid can be used for constructing HLA-C*16:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:134 Protein Expression Plasmid Vector	PHLAP92527841	Plasmid vector containing HLA-C*16:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:134 protein. This plasmid can be used for constructing HLA-C*16:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:135 Protein Expression Plasmid Vector	PHLAP92527842	Plasmid vector containing HLA-C*16:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:135 protein. This plasmid can be used for constructing HLA-C*16:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:136 Protein Expression Plasmid Vector	PHLAP92527843	Plasmid vector containing HLA-C*16:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:136 protein. This plasmid can be used for constructing HLA-C*16:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:137 Protein Expression Plasmid Vector	PHLAP92527844	Plasmid vector containing HLA-C*16:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:137 protein. This plasmid can be used for constructing HLA-C*16:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:138 Protein Expression Plasmid Vector	PHLAP92527845	Plasmid vector containing HLA-C*16:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:138 protein. This plasmid can be used for constructing HLA-C*16:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:139 Protein Expression Plasmid Vector	PHLAP92527846	Plasmid vector containing HLA-C*16:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:139 protein. This plasmid can be used for constructing HLA-C*16:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:14 Protein Expression Plasmid Vector	PHLAP92527847	Plasmid vector containing HLA-C*16:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:14 protein. This plasmid can be used for constructing HLA-C*16:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:140 Protein Expression Plasmid Vector	PHLAP92527848	Plasmid vector containing HLA-C*16:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:140 protein. This plasmid can be used for constructing HLA-C*16:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:141 Protein Expression Plasmid Vector	PHLAP92527849	Plasmid vector containing HLA-C*16:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:141 protein. This plasmid can be used for constructing HLA-C*16:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:142 Protein Expression Plasmid Vector	PHLAP925278500	Plasmid vector containing HLA-C*16:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:142 protein. This plasmid can be used for constructing HLA-C*16:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:143 Protein Expression Plasmid Vector	PHLAP925278501	Plasmid vector containing HLA-C*16:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:143 protein. This plasmid can be used for constructing HLA-C*16:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:144 Protein Expression Plasmid Vector	PHLAP925278502	Plasmid vector containing HLA-C*16:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:144 protein. This plasmid can be used for constructing HLA-C*16:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:145 Protein Expression Plasmid Vector	PHLAP925278503	Plasmid vector containing HLA-C*16:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:145 protein. This plasmid can be used for constructing HLA-C*16:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:146 Protein Expression Plasmid Vector	PHLAP925278504	Plasmid vector containing HLA-C*16:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:146 protein. This plasmid can be used for constructing HLA-C*16:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:147 Protein Expression Plasmid Vector	PHLAP92527855	Plasmid vector containing HLA-C*16:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:147 protein. This plasmid can be used for constructing HLA-C*16:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:148 Protein Expression Plasmid Vector	PHLAP92527856	Plasmid vector containing HLA-C*16:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:148 protein. This plasmid can be used for constructing HLA-C*16:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:149 Protein Expression Plasmid Vector	PHLAP92527857	Plasmid vector containing HLA-C*16:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:149 protein. This plasmid can be used for constructing HLA-C*16:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:15:01 Protein Expression Plasmid Vector	PHLAP92527858	Plasmid vector containing HLA-C*16:15:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:15:01 protein. This plasmid can be used for constructing HLA-C*16:15:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:15:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:15:02 Protein Expression Plasmid Vector	PHLAP92527859	Plasmid vector containing HLA-C*16:15:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:15:02 protein. This plasmid can be used for constructing HLA-C*16:15:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:15:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:150 Protein Expression Plasmid Vector	PHLAP92527860	Plasmid vector containing HLA-C*16:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:150 protein. This plasmid can be used for constructing HLA-C*16:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:151 Protein Expression Plasmid Vector	PHLAP92527861	Plasmid vector containing HLA-C*16:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:151 protein. This plasmid can be used for constructing HLA-C*16:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:152 Protein Expression Plasmid Vector	PHLAP92527862	Plasmid vector containing HLA-C*16:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:152 protein. This plasmid can be used for constructing HLA-C*16:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:153 Protein Expression Plasmid Vector	PHLAP92527863	Plasmid vector containing HLA-C*16:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:153 protein. This plasmid can be used for constructing HLA-C*16:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:154 Protein Expression Plasmid Vector	PHLAP92527864	Plasmid vector containing HLA-C*16:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:154 protein. This plasmid can be used for constructing HLA-C*16:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:155 Protein Expression Plasmid Vector	PHLAP92527865	Plasmid vector containing HLA-C*16:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:155 protein. This plasmid can be used for constructing HLA-C*16:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:156 Protein Expression Plasmid Vector	PHLAP92527866	Plasmid vector containing HLA-C*16:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:156 protein. This plasmid can be used for constructing HLA-C*16:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:157 Protein Expression Plasmid Vector	PHLAP92527867	Plasmid vector containing HLA-C*16:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:157 protein. This plasmid can be used for constructing HLA-C*16:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:158 Protein Expression Plasmid Vector	PHLAP92527868	Plasmid vector containing HLA-C*16:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:158 protein. This plasmid can be used for constructing HLA-C*16:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:159 Protein Expression Plasmid Vector	PHLAP92527869	Plasmid vector containing HLA-C*16:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:159 protein. This plasmid can be used for constructing HLA-C*16:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:160 Protein Expression Plasmid Vector	PHLAP92527870	Plasmid vector containing HLA-C*16:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:160 protein. This plasmid can be used for constructing HLA-C*16:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:161 Protein Expression Plasmid Vector	PHLAP92527871	Plasmid vector containing HLA-C*16:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:161 protein. This plasmid can be used for constructing HLA-C*16:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:162 Protein Expression Plasmid Vector	PHLAP92527872	Plasmid vector containing HLA-C*16:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:162 protein. This plasmid can be used for constructing HLA-C*16:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:163 Protein Expression Plasmid Vector	PHLAP92527873	Plasmid vector containing HLA-C*16:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:163 protein. This plasmid can be used for constructing HLA-C*16:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:164 Protein Expression Plasmid Vector	PHLAP92527874	Plasmid vector containing HLA-C*16:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:164 protein. This plasmid can be used for constructing HLA-C*16:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:165 Protein Expression Plasmid Vector	PHLAP92527875	Plasmid vector containing HLA-C*16:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:165 protein. This plasmid can be used for constructing HLA-C*16:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:166 Protein Expression Plasmid Vector	PHLAP92527876	Plasmid vector containing HLA-C*16:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:166 protein. This plasmid can be used for constructing HLA-C*16:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:167 Protein Expression Plasmid Vector	PHLAP92527877	Plasmid vector containing HLA-C*16:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:167 protein. This plasmid can be used for constructing HLA-C*16:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:168 Protein Expression Plasmid Vector	PHLAP92527878	Plasmid vector containing HLA-C*16:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:168 protein. This plasmid can be used for constructing HLA-C*16:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:169 Protein Expression Plasmid Vector	PHLAP92527879	Plasmid vector containing HLA-C*16:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:169 protein. This plasmid can be used for constructing HLA-C*16:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:16Q Protein Expression Plasmid Vector	PHLAP925278880	Plasmid vector containing HLA-C*16:16Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:16Q protein. This plasmid can be used for constructing HLA-C*16:16Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:16Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:17 Protein Expression Plasmid Vector	PHLAP925278881	Plasmid vector containing HLA-C*16:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:17 protein. This plasmid can be used for constructing HLA-C*16:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:170 Protein Expression Plasmid Vector	PHLAP925278882	Plasmid vector containing HLA-C*16:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:170 protein. This plasmid can be used for constructing HLA-C*16:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:171 Protein Expression Plasmid Vector	PHLAP925278883	Plasmid vector containing HLA-C*16:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:171 protein. This plasmid can be used for constructing HLA-C*16:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:172 Protein Expression Plasmid Vector	PHLAP925278884	Plasmid vector containing HLA-C*16:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:172 protein. This plasmid can be used for constructing HLA-C*16:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:173 Protein Expression Plasmid Vector	PHLAP925278885	Plasmid vector containing HLA-C*16:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:173 protein. This plasmid can be used for constructing HLA-C*16:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:174Q Protein Expression Plasmid Vector	PHLAP925278886	Plasmid vector containing HLA-C*16:174Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:174Q protein. This plasmid can be used for constructing HLA-C*16:174Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:174Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:175 Protein Expression Plasmid Vector	PHLAP92527887	Plasmid vector containing HLA-C*16:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:175 protein. This plasmid can be used for constructing HLA-C*16:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:176 Protein Expression Plasmid Vector	PHLAP92527888	Plasmid vector containing HLA-C*16:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:176 protein. This plasmid can be used for constructing HLA-C*16:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:177 Protein Expression Plasmid Vector	PHLAP92527889	Plasmid vector containing HLA-C*16:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:177 protein. This plasmid can be used for constructing HLA-C*16:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:178 Protein Expression Plasmid Vector	PHLAP92527890	Plasmid vector containing HLA-C*16:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:178 protein. This plasmid can be used for constructing HLA-C*16:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:179 Protein Expression Plasmid Vector	PHLAP92527891	Plasmid vector containing HLA-C*16:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:179 protein. This plasmid can be used for constructing HLA-C*16:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:18 Protein Expression Plasmid Vector	PHLAP92527892	Plasmid vector containing HLA-C*16:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:18 protein. This plasmid can be used for constructing HLA-C*16:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:180 Protein Expression Plasmid Vector	PHLAP92527893	Plasmid vector containing HLA-C*16:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:180 protein. This plasmid can be used for constructing HLA-C*16:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:181 Protein Expression Plasmid Vector	PHLAP92527894	Plasmid vector containing HLA-C*16:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:181 protein. This plasmid can be used for constructing HLA-C*16:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:182 Protein Expression Plasmid Vector	PHLAP92527895	Plasmid vector containing HLA-C*16:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:182 protein. This plasmid can be used for constructing HLA-C*16:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:183 Protein Expression Plasmid Vector	PHLAP92527896	Plasmid vector containing HLA-C*16:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:183 protein. This plasmid can be used for constructing HLA-C*16:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:184 Protein Expression Plasmid Vector	PHLAP92527897	Plasmid vector containing HLA-C*16:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:184 protein. This plasmid can be used for constructing HLA-C*16:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:185 Protein Expression Plasmid Vector	PHLAP92527898	Plasmid vector containing HLA-C*16:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:185 protein. This plasmid can be used for constructing HLA-C*16:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:186N Protein Expression Plasmid Vector	PHLAP92527899	Plasmid vector containing HLA-C*16:186N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:186N protein. This plasmid can be used for constructing HLA-C*16:186N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:186N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:187 Protein Expression Plasmid Vector	PHLAP92527900	Plasmid vector containing HLA-C*16:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:187 protein. This plasmid can be used for constructing HLA-C*16:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:188 Protein Expression Plasmid Vector	PHLAP92527901	Plasmid vector containing HLA-C*16:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:188 protein. This plasmid can be used for constructing HLA-C*16:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:189 Protein Expression Plasmid Vector	PHLAP92527902	Plasmid vector containing HLA-C*16:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:189 protein. This plasmid can be used for constructing HLA-C*16:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:19 Protein Expression Plasmid Vector	PHLAP92527903	Plasmid vector containing HLA-C*16:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:19 protein. This plasmid can be used for constructing HLA-C*16:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:190 Protein Expression Plasmid Vector	PHLAP92527904	Plasmid vector containing HLA-C*16:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:190 protein. This plasmid can be used for constructing HLA-C*16:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:191 Protein Expression Plasmid Vector	PHLAP92527905	Plasmid vector containing HLA-C*16:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:191 protein. This plasmid can be used for constructing HLA-C*16:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:192 Protein Expression Plasmid Vector	PHLAP92527906	Plasmid vector containing HLA-C*16:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:192 protein. This plasmid can be used for constructing HLA-C*16:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:193 Protein Expression Plasmid Vector	PHLAP92527907	Plasmid vector containing HLA-C*16:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:193 protein. This plasmid can be used for constructing HLA-C*16:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:194 Protein Expression Plasmid Vector	PHLAP92527908	Plasmid vector containing HLA-C*16:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:194 protein. This plasmid can be used for constructing HLA-C*16:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:195N Protein Expression Plasmid Vector	PHLAP92527909	Plasmid vector containing HLA-C*16:195N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:195N protein. This plasmid can be used for constructing HLA-C*16:195N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:195N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:196 Protein Expression Plasmid Vector	PHLAP92527910	Plasmid vector containing HLA-C*16:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:196 protein. This plasmid can be used for constructing HLA-C*16:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:197 Protein Expression Plasmid Vector	PHLAP92527911	Plasmid vector containing HLA-C*16:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:197 protein. This plasmid can be used for constructing HLA-C*16:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:198 Protein Expression Plasmid Vector	PHLAP92527912	Plasmid vector containing HLA-C*16:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:198 protein. This plasmid can be used for constructing HLA-C*16:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:199N Protein Expression Plasmid Vector	PHLAP92527913	Plasmid vector containing HLA-C*16:199N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:199N protein. This plasmid can be used for constructing HLA-C*16:199N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:199N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:20 Protein Expression Plasmid Vector	PHLAP92527914	Plasmid vector containing HLA-C*16:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:20 protein. This plasmid can be used for constructing HLA-C*16:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:200 Protein Expression Plasmid Vector	PHLAP92527915	Plasmid vector containing HLA-C*16:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:200 protein. This plasmid can be used for constructing HLA-C*16:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:201 Protein Expression Plasmid Vector	PHLAP92527916	Plasmid vector containing HLA-C*16:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:201 protein. This plasmid can be used for constructing HLA-C*16:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:202 Protein Expression Plasmid Vector	PHLAP92527917	Plasmid vector containing HLA-C*16:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:202 protein. This plasmid can be used for constructing HLA-C*16:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:203 Protein Expression Plasmid Vector	PHLAP92527918	Plasmid vector containing HLA-C*16:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:203 protein. This plasmid can be used for constructing HLA-C*16:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:204 Protein Expression Plasmid Vector	PHLAP92527919	Plasmid vector containing HLA-C*16:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:204 protein. This plasmid can be used for constructing HLA-C*16:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:205 Protein Expression Plasmid Vector	PHLAP92527920	Plasmid vector containing HLA-C*16:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:205 protein. This plasmid can be used for constructing HLA-C*16:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:206N Protein Expression Plasmid Vector	PHLAP92527921	Plasmid vector containing HLA-C*16:206N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:206N protein. This plasmid can be used for constructing HLA-C*16:206N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:206N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:207 Protein Expression Plasmid Vector	PHLAP92527922	Plasmid vector containing HLA-C*16:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:207 protein. This plasmid can be used for constructing HLA-C*16:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:208 Protein Expression Plasmid Vector	PHLAP92527923	Plasmid vector containing HLA-C*16:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:208 protein. This plasmid can be used for constructing HLA-C*16:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:209 Protein Expression Plasmid Vector	PHLAP92527924	Plasmid vector containing HLA-C*16:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:209 protein. This plasmid can be used for constructing HLA-C*16:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:21 Protein Expression Plasmid Vector	PHLAP92527925	Plasmid vector containing HLA-C*16:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:21 protein. This plasmid can be used for constructing HLA-C*16:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:210 Protein Expression Plasmid Vector	PHLAP92527926	Plasmid vector containing HLA-C*16:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:210 protein. This plasmid can be used for constructing HLA-C*16:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:211 Protein Expression Plasmid Vector	PHLAP92527927	Plasmid vector containing HLA-C*16:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:211 protein. This plasmid can be used for constructing HLA-C*16:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:212 Protein Expression Plasmid Vector	PHLAP92527928	Plasmid vector containing HLA-C*16:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:212 protein. This plasmid can be used for constructing HLA-C*16:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:213 Protein Expression Plasmid Vector	PHLAP92527929	Plasmid vector containing HLA-C*16:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:213 protein. This plasmid can be used for constructing HLA-C*16:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:214 Protein Expression Plasmid Vector	PHLAP92527930	Plasmid vector containing HLA-C*16:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:214 protein. This plasmid can be used for constructing HLA-C*16:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:215 Protein Expression Plasmid Vector	PHLAP92527931	Plasmid vector containing HLA-C*16:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:215 protein. This plasmid can be used for constructing HLA-C*16:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:216 Protein Expression Plasmid Vector	PHLAP92527932	Plasmid vector containing HLA-C*16:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:216 protein. This plasmid can be used for constructing HLA-C*16:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:217 Protein Expression Plasmid Vector	PHLAP92527933	Plasmid vector containing HLA-C*16:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:217 protein. This plasmid can be used for constructing HLA-C*16:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:218 Protein Expression Plasmid Vector	PHLAP92527934	Plasmid vector containing HLA-C*16:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:218 protein. This plasmid can be used for constructing HLA-C*16:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:219N Protein Expression Plasmid Vector	PHLAP92527935	Plasmid vector containing HLA-C*16:219N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:219N protein. This plasmid can be used for constructing HLA-C*16:219N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:219N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:22 Protein Expression Plasmid Vector	PHLAP92527936	Plasmid vector containing HLA-C*16:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:22 protein. This plasmid can be used for constructing HLA-C*16:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:220N Protein Expression Plasmid Vector	PHLAP92527937	Plasmid vector containing HLA-C*16:220N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:220N protein. This plasmid can be used for constructing HLA-C*16:220N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:220N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:221 Protein Expression Plasmid Vector	PHLAP92527938	Plasmid vector containing HLA-C*16:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:221 protein. This plasmid can be used for constructing HLA-C*16:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:222 Protein Expression Plasmid Vector	PHLAP92527939	Plasmid vector containing HLA-C*16:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:222 protein. This plasmid can be used for constructing HLA-C*16:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:223 Protein Expression Plasmid Vector	PHLAP92527940	Plasmid vector containing HLA-C*16:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:223 protein. This plasmid can be used for constructing HLA-C*16:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:224 Protein Expression Plasmid Vector	PHLAP92527941	Plasmid vector containing HLA-C*16:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:224 protein. This plasmid can be used for constructing HLA-C*16:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:225 Protein Expression Plasmid Vector	PHLAP92527942	Plasmid vector containing HLA-C*16:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:225 protein. This plasmid can be used for constructing HLA-C*16:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:226 Protein Expression Plasmid Vector	PHLAP92527943	Plasmid vector containing HLA-C*16:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:226 protein. This plasmid can be used for constructing HLA-C*16:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:227 Protein Expression Plasmid Vector	PHLAP92527944	Plasmid vector containing HLA-C*16:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:227 protein. This plasmid can be used for constructing HLA-C*16:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:228 Protein Expression Plasmid Vector	PHLAP92527945	Plasmid vector containing HLA-C*16:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:228 protein. This plasmid can be used for constructing HLA-C*16:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:229N Protein Expression Plasmid Vector	PHLAP92527946	Plasmid vector containing HLA-C*16:229N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:229N protein. This plasmid can be used for constructing HLA-C*16:229N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:229N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:23 Protein Expression Plasmid Vector	PHLAP92527947	Plasmid vector containing HLA-C*16:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:23 protein. This plasmid can be used for constructing HLA-C*16:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:230 Protein Expression Plasmid Vector	PHLAP92527948	Plasmid vector containing HLA-C*16:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:230 protein. This plasmid can be used for constructing HLA-C*16:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:24 Protein Expression Plasmid Vector	PHLAP92527949	Plasmid vector containing HLA-C*16:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:24 protein. This plasmid can be used for constructing HLA-C*16:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:25 Protein Expression Plasmid Vector	PHLAP92527950	Plasmid vector containing HLA-C*16:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:25 protein. This plasmid can be used for constructing HLA-C*16:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:26 Protein Expression Plasmid Vector	PHLAP92527951	Plasmid vector containing HLA-C*16:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:26 protein. This plasmid can be used for constructing HLA-C*16:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:27 Protein Expression Plasmid Vector	PHLAP92527952	Plasmid vector containing HLA-C*16:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:27 protein. This plasmid can be used for constructing HLA-C*16:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:28 Protein Expression Plasmid Vector	PHLAP92527953	Plasmid vector containing HLA-C*16:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:28 protein. This plasmid can be used for constructing HLA-C*16:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:29 Protein Expression Plasmid Vector	PHLAP92527954	Plasmid vector containing HLA-C*16:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:29 protein. This plasmid can be used for constructing HLA-C*16:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:30N Protein Expression Plasmid Vector	PHLAP92527955	Plasmid vector containing HLA-C*16:30N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:30N protein. This plasmid can be used for constructing HLA-C*16:30N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:30N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:31 Protein Expression Plasmid Vector	PHLAP92527956	Plasmid vector containing HLA-C*16:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:31 protein. This plasmid can be used for constructing HLA-C*16:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:32 Protein Expression Plasmid Vector	PHLAP92527957	Plasmid vector containing HLA-C*16:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:32 protein. This plasmid can be used for constructing HLA-C*16:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:33 Protein Expression Plasmid Vector	PHLAP92527958	Plasmid vector containing HLA-C*16:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:33 protein. This plasmid can be used for constructing HLA-C*16:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:34 Protein Expression Plasmid Vector	PHLAP92527959	Plasmid vector containing HLA-C*16:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:34 protein. This plasmid can be used for constructing HLA-C*16:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:35 Protein Expression Plasmid Vector	PHLAP92527960	Plasmid vector containing HLA-C*16:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:35 protein. This plasmid can be used for constructing HLA-C*16:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:36 Protein Expression Plasmid Vector	PHLAP92527961	Plasmid vector containing HLA-C*16:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:36 protein. This plasmid can be used for constructing HLA-C*16:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:37 Protein Expression Plasmid Vector	PHLAP92527962	Plasmid vector containing HLA-C*16:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:37 protein. This plasmid can be used for constructing HLA-C*16:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:38 Protein Expression Plasmid Vector	PHLAP92527963	Plasmid vector containing HLA-C*16:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:38 protein. This plasmid can be used for constructing HLA-C*16:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:39:01 Protein Expression Plasmid Vector	PHLAP92527964	Plasmid vector containing HLA-C*16:39:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:39:01 protein. This plasmid can be used for constructing HLA-C*16:39:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:39:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:39:02 Protein Expression Plasmid Vector	PHLAP92527965	Plasmid vector containing HLA-C*16:39:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:39:02 protein. This plasmid can be used for constructing HLA-C*16:39:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:39:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:40 Protein Expression Plasmid Vector	PHLAP92527966	Plasmid vector containing HLA-C*16:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:40 protein. This plasmid can be used for constructing HLA-C*16:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:41 Protein Expression Plasmid Vector	PHLAP92527967	Plasmid vector containing HLA-C*16:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:41 protein. This plasmid can be used for constructing HLA-C*16:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:42 Protein Expression Plasmid Vector	PHLAP92527968	Plasmid vector containing HLA-C*16:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:42 protein. This plasmid can be used for constructing HLA-C*16:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:43 Protein Expression Plasmid Vector	PHLAP92527969	Plasmid vector containing HLA-C*16:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:43 protein. This plasmid can be used for constructing HLA-C*16:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:44 Protein Expression Plasmid Vector	PHLAP925279700	Plasmid vector containing HLA-C*16:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:44 protein. This plasmid can be used for constructing HLA-C*16:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:45 Protein Expression Plasmid Vector	PHLAP925279701	Plasmid vector containing HLA-C*16:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:45 protein. This plasmid can be used for constructing HLA-C*16:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:46 Protein Expression Plasmid Vector	PHLAP925279702	Plasmid vector containing HLA-C*16:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:46 protein. This plasmid can be used for constructing HLA-C*16:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:47 Protein Expression Plasmid Vector	PHLAP925279703	Plasmid vector containing HLA-C*16:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:47 protein. This plasmid can be used for constructing HLA-C*16:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:48 Protein Expression Plasmid Vector	PHLAP925279704	Plasmid vector containing HLA-C*16:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:48 protein. This plasmid can be used for constructing HLA-C*16:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:49:01 Protein Expression Plasmid Vector	PHLAP92527975	Plasmid vector containing HLA-C*16:49:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:49:01 protein. This plasmid can be used for constructing HLA-C*16:49:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:49:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:49:02 Protein Expression Plasmid Vector	PHLAP92527976	Plasmid vector containing HLA-C*16:49:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:49:02 protein. This plasmid can be used for constructing HLA-C*16:49:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:49:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:50 Protein Expression Plasmid Vector	PHLAP92527977	Plasmid vector containing HLA-C*16:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:50 protein. This plasmid can be used for constructing HLA-C*16:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:51 Protein Expression Plasmid Vector	PHLAP92527978	Plasmid vector containing HLA-C*16:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:51 protein. This plasmid can be used for constructing HLA-C*16:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:52 Protein Expression Plasmid Vector	PHLAP92527979	Plasmid vector containing HLA-C*16:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:52 protein. This plasmid can be used for constructing HLA-C*16:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:53 Protein Expression Plasmid Vector	PHLAP92527980	Plasmid vector containing HLA-C*16:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:53 protein. This plasmid can be used for constructing HLA-C*16:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:54 Protein Expression Plasmid Vector	PHLAP92527981	Plasmid vector containing HLA-C*16:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:54 protein. This plasmid can be used for constructing HLA-C*16:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:55 Protein Expression Plasmid Vector	PHLAP92527982	Plasmid vector containing HLA-C*16:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:55 protein. This plasmid can be used for constructing HLA-C*16:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:56 Protein Expression Plasmid Vector	PHLAP92527983	Plasmid vector containing HLA-C*16:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:56 protein. This plasmid can be used for constructing HLA-C*16:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:57 Protein Expression Plasmid Vector	PHLAP92527984	Plasmid vector containing HLA-C*16:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:57 protein. This plasmid can be used for constructing HLA-C*16:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:58 Protein Expression Plasmid Vector	PHLAP92527985	Plasmid vector containing HLA-C*16:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:58 protein. This plasmid can be used for constructing HLA-C*16:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:59 Protein Expression Plasmid Vector	PHLAP92527986	Plasmid vector containing HLA-C*16:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:59 protein. This plasmid can be used for constructing HLA-C*16:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:60 Protein Expression Plasmid Vector	PHLAP92527987	Plasmid vector containing HLA-C*16:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:60 protein. This plasmid can be used for constructing HLA-C*16:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:61 Protein Expression Plasmid Vector	PHLAP92527988	Plasmid vector containing HLA-C*16:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:61 protein. This plasmid can be used for constructing HLA-C*16:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:62 Protein Expression Plasmid Vector	PHLAP92527989	Plasmid vector containing HLA-C*16:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:62 protein. This plasmid can be used for constructing HLA-C*16:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:63 Protein Expression Plasmid Vector	PHLAP92527990	Plasmid vector containing HLA-C*16:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:63 protein. This plasmid can be used for constructing HLA-C*16:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:64 Protein Expression Plasmid Vector	PHLAP92527991	Plasmid vector containing HLA-C*16:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:64 protein. This plasmid can be used for constructing HLA-C*16:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:65 Protein Expression Plasmid Vector	PHLAP92527992	Plasmid vector containing HLA-C*16:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:65 protein. This plasmid can be used for constructing HLA-C*16:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:66 Protein Expression Plasmid Vector	PHLAP92527993	Plasmid vector containing HLA-C*16:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:66 protein. This plasmid can be used for constructing HLA-C*16:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:67 Protein Expression Plasmid Vector	PHLAP92527994	Plasmid vector containing HLA-C*16:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:67 protein. This plasmid can be used for constructing HLA-C*16:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:68 Protein Expression Plasmid Vector	PHLAP92527995	Plasmid vector containing HLA-C*16:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:68 protein. This plasmid can be used for constructing HLA-C*16:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:69 Protein Expression Plasmid Vector	PHLAP92527996	Plasmid vector containing HLA-C*16:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:69 protein. This plasmid can be used for constructing HLA-C*16:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:70 Protein Expression Plasmid Vector	PHLAP92527997	Plasmid vector containing HLA-C*16:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:70 protein. This plasmid can be used for constructing HLA-C*16:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:71 Protein Expression Plasmid Vector	PHLAP92527998	Plasmid vector containing HLA-C*16:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:71 protein. This plasmid can be used for constructing HLA-C*16:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:72 Protein Expression Plasmid Vector	PHLAP92527999	Plasmid vector containing HLA-C*16:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:72 protein. This plasmid can be used for constructing HLA-C*16:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:73 Protein Expression Plasmid Vector	PHLAP925280000	Plasmid vector containing HLA-C*16:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:73 protein. This plasmid can be used for constructing HLA-C*16:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:74 Protein Expression Plasmid Vector	PHLAP925280001	Plasmid vector containing HLA-C*16:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:74 protein. This plasmid can be used for constructing HLA-C*16:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:75 Protein Expression Plasmid Vector	PHLAP925280002	Plasmid vector containing HLA-C*16:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:75 protein. This plasmid can be used for constructing HLA-C*16:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:76 Protein Expression Plasmid Vector	PHLAP925280003	Plasmid vector containing HLA-C*16:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:76 protein. This plasmid can be used for constructing HLA-C*16:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:77N Protein Expression Plasmid Vector	PHLAP925280004	Plasmid vector containing HLA-C*16:77N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:77N protein. This plasmid can be used for constructing HLA-C*16:77N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:77N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:78 Protein Expression Plasmid Vector	PHLAP925280005	Plasmid vector containing HLA-C*16:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:78 protein. This plasmid can be used for constructing HLA-C*16:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:79 Protein Expression Plasmid Vector	PHLAP925280006	Plasmid vector containing HLA-C*16:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:79 protein. This plasmid can be used for constructing HLA-C*16:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:80 Protein Expression Plasmid Vector	PHLAP92528007	Plasmid vector containing HLA-C*16:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:80 protein. This plasmid can be used for constructing HLA-C*16:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:81 Protein Expression Plasmid Vector	PHLAP92528008	Plasmid vector containing HLA-C*16:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:81 protein. This plasmid can be used for constructing HLA-C*16:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:82 Protein Expression Plasmid Vector	PHLAP92528009	Plasmid vector containing HLA-C*16:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:82 protein. This plasmid can be used for constructing HLA-C*16:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:83 Protein Expression Plasmid Vector	PHLAP925280010	Plasmid vector containing HLA-C*16:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:83 protein. This plasmid can be used for constructing HLA-C*16:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:84 Protein Expression Plasmid Vector	PHLAP925280011	Plasmid vector containing HLA-C*16:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:84 protein. This plasmid can be used for constructing HLA-C*16:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:85 Protein Expression Plasmid Vector	PHLAP925280012	Plasmid vector containing HLA-C*16:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:85 protein. This plasmid can be used for constructing HLA-C*16:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:86 Protein Expression Plasmid Vector	PHLAP925280013	Plasmid vector containing HLA-C*16:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:86 protein. This plasmid can be used for constructing HLA-C*16:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:87 Protein Expression Plasmid Vector	PHLAP925280014	Plasmid vector containing HLA-C*16:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:87 protein. This plasmid can be used for constructing HLA-C*16:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:88 Protein Expression Plasmid Vector	PHLAP92528015	Plasmid vector containing HLA-C*16:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:88 protein. This plasmid can be used for constructing HLA-C*16:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:89N Protein Expression Plasmid Vector	PHLAP92528016	Plasmid vector containing HLA-C*16:89N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:89N protein. This plasmid can be used for constructing HLA-C*16:89N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:89N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:90 Protein Expression Plasmid Vector	PHLAP92528017	Plasmid vector containing HLA-C*16:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:90 protein. This plasmid can be used for constructing HLA-C*16:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:91 Protein Expression Plasmid Vector	PHLAP92528018	Plasmid vector containing HLA-C*16:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:91 protein. This plasmid can be used for constructing HLA-C*16:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:92 Protein Expression Plasmid Vector	PHLAP92528019	Plasmid vector containing HLA-C*16:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:92 protein. This plasmid can be used for constructing HLA-C*16:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:93 Protein Expression Plasmid Vector	PHLAP92528020	Plasmid vector containing HLA-C*16:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:93 protein. This plasmid can be used for constructing HLA-C*16:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:94 Protein Expression Plasmid Vector	PHLAP92528021	Plasmid vector containing HLA-C*16:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:94 protein. This plasmid can be used for constructing HLA-C*16:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:95 Protein Expression Plasmid Vector	PHLAP92528022	Plasmid vector containing HLA-C*16:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:95 protein. This plasmid can be used for constructing HLA-C*16:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*16:96 Protein Expression Plasmid Vector	PHLAP92528023	Plasmid vector containing HLA-C*16:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:96 protein. This plasmid can be used for constructing HLA-C*16:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:97 Protein Expression Plasmid Vector	PHLAP92528024	Plasmid vector containing HLA-C*16:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:97 protein. This plasmid can be used for constructing HLA-C*16:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:98:01 Protein Expression Plasmid Vector	PHLAP92528025	Plasmid vector containing HLA-C*16:98:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:98:01 protein. This plasmid can be used for constructing HLA-C*16:98:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:98:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:98:02 Protein Expression Plasmid Vector	PHLAP92528026	Plasmid vector containing HLA-C*16:98:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:98:02 protein. This plasmid can be used for constructing HLA-C*16:98:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:98:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*16:99 Protein Expression Plasmid Vector	PHLAP92528027	Plasmid vector containing HLA-C*16:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*16:99 protein. This plasmid can be used for constructing HLA-C*16:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*16:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:01 Protein Expression Plasmid Vector	PHLAP92528028	Plasmid vector containing HLA-C*17:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:01 protein. This plasmid can be used for constructing HLA-C*17:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:02 Protein Expression Plasmid Vector	PHLAP92528029	Plasmid vector containing HLA-C*17:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:02 protein. This plasmid can be used for constructing HLA-C*17:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:01:01:03 Protein Expression Plasmid Vector	PHLAP92528030	Plasmid vector containing HLA-C*17:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:03 protein. This plasmid can be used for constructing HLA-C*17:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:04 Protein Expression Plasmid Vector	PHLAP92528031	Plasmid vector containing HLA-C*17:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:04 protein. This plasmid can be used for constructing HLA-C*17:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:05 Protein Expression Plasmid Vector	PHLAP92528032	Plasmid vector containing HLA-C*17:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:05 protein. This plasmid can be used for constructing HLA-C*17:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:06 Protein Expression Plasmid Vector	PHLAP92528033	Plasmid vector containing HLA-C*17:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:06 protein. This plasmid can be used for constructing HLA-C*17:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:07 Protein Expression Plasmid Vector	PHLAP92528034	Plasmid vector containing HLA-C*17:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:07 protein. This plasmid can be used for constructing HLA-C*17:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:08 Protein Expression Plasmid Vector	PHLAP92528035	Plasmid vector containing HLA-C*17:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:08 protein. This plasmid can be used for constructing HLA-C*17:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:09 Protein Expression Plasmid Vector	PHLAP92528036	Plasmid vector containing HLA-C*17:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:09 protein. This plasmid can be used for constructing HLA-C*17:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:01:01:10 Protein Expression Plasmid Vector	PHLAP92528037	Plasmid vector containing HLA-C*17:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:10 protein. This plasmid can be used for constructing HLA-C*17:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:11 Protein Expression Plasmid Vector	PHLAP92528038	Plasmid vector containing HLA-C*17:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:11 protein. This plasmid can be used for constructing HLA-C*17:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:12 Protein Expression Plasmid Vector	PHLAP92528039	Plasmid vector containing HLA-C*17:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:12 protein. This plasmid can be used for constructing HLA-C*17:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:13 Protein Expression Plasmid Vector	PHLAP92528040	Plasmid vector containing HLA-C*17:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:13 protein. This plasmid can be used for constructing HLA-C*17:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:14 Protein Expression Plasmid Vector	PHLAP92528041	Plasmid vector containing HLA-C*17:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:14 protein. This plasmid can be used for constructing HLA-C*17:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:15 Protein Expression Plasmid Vector	PHLAP92528042	Plasmid vector containing HLA-C*17:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:15 protein. This plasmid can be used for constructing HLA-C*17:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:16Q Protein Expression Plasmid Vector	PHLAP92528043	Plasmid vector containing HLA-C*17:01:01:16Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:16Q protein. This plasmid can be used for constructing HLA-C*17:01:01:16Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:16Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:01:01:17 Protein Expression Plasmid Vector	PHLAP92528044	Plasmid vector containing HLA-C*17:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:17 protein. This plasmid can be used for constructing HLA-C*17:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:18 Protein Expression Plasmid Vector	PHLAP92528045	Plasmid vector containing HLA-C*17:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:18 protein. This plasmid can be used for constructing HLA-C*17:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:19 Protein Expression Plasmid Vector	PHLAP92528046	Plasmid vector containing HLA-C*17:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:19 protein. This plasmid can be used for constructing HLA-C*17:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:20 Protein Expression Plasmid Vector	PHLAP92528047	Plasmid vector containing HLA-C*17:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:20 protein. This plasmid can be used for constructing HLA-C*17:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:21 Protein Expression Plasmid Vector	PHLAP92528048	Plasmid vector containing HLA-C*17:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:21 protein. This plasmid can be used for constructing HLA-C*17:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:22 Protein Expression Plasmid Vector	PHLAP92528049	Plasmid vector containing HLA-C*17:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:22 protein. This plasmid can be used for constructing HLA-C*17:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:23 Protein Expression Plasmid Vector	PHLAP92528050	Plasmid vector containing HLA-C*17:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:23 protein. This plasmid can be used for constructing HLA-C*17:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:01:01:24 Protein Expression Plasmid Vector	PHLAP92528051	Plasmid vector containing HLA-C*17:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:24 protein. This plasmid can be used for constructing HLA-C*17:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:25 Protein Expression Plasmid Vector	PHLAP92528052	Plasmid vector containing HLA-C*17:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:25 protein. This plasmid can be used for constructing HLA-C*17:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:26 Protein Expression Plasmid Vector	PHLAP92528053	Plasmid vector containing HLA-C*17:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:26 protein. This plasmid can be used for constructing HLA-C*17:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:27 Protein Expression Plasmid Vector	PHLAP92528054	Plasmid vector containing HLA-C*17:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:27 protein. This plasmid can be used for constructing HLA-C*17:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:28 Protein Expression Plasmid Vector	PHLAP92528055	Plasmid vector containing HLA-C*17:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:28 protein. This plasmid can be used for constructing HLA-C*17:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:29 Protein Expression Plasmid Vector	PHLAP92528056	Plasmid vector containing HLA-C*17:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:29 protein. This plasmid can be used for constructing HLA-C*17:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:30 Protein Expression Plasmid Vector	PHLAP92528057	Plasmid vector containing HLA-C*17:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:30 protein. This plasmid can be used for constructing HLA-C*17:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:01:01:31 Protein Expression Plasmid Vector	PHLAP92528058	Plasmid vector containing HLA-C*17:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:31 protein. This plasmid can be used for constructing HLA-C*17:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:01:32 Protein Expression Plasmid Vector	PHLAP92528059	Plasmid vector containing HLA-C*17:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:01:32 protein. This plasmid can be used for constructing HLA-C*17:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:02 Protein Expression Plasmid Vector	PHLAP92528060	Plasmid vector containing HLA-C*17:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:02 protein. This plasmid can be used for constructing HLA-C*17:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:03 Protein Expression Plasmid Vector	PHLAP92528061	Plasmid vector containing HLA-C*17:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:03 protein. This plasmid can be used for constructing HLA-C*17:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:04 Protein Expression Plasmid Vector	PHLAP92528062	Plasmid vector containing HLA-C*17:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:04 protein. This plasmid can be used for constructing HLA-C*17:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:05 Protein Expression Plasmid Vector	PHLAP92528063	Plasmid vector containing HLA-C*17:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:05 protein. This plasmid can be used for constructing HLA-C*17:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:06 Protein Expression Plasmid Vector	PHLAP92528064	Plasmid vector containing HLA-C*17:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:06 protein. This plasmid can be used for constructing HLA-C*17:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:07 Protein Expression Plasmid Vector	PHLAP92528065	Plasmid vector containing HLA-C*17:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:07 protein. This plasmid can be used for constructing HLA-C*17:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:01:08 Protein Expression Plasmid Vector	PHLAP92528066	Plasmid vector containing HLA-C*17:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:08 protein. This plasmid can be used for constructing HLA-C*17:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:09 Protein Expression Plasmid Vector	PHLAP92528067	Plasmid vector containing HLA-C*17:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:09 protein. This plasmid can be used for constructing HLA-C*17:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:10 Protein Expression Plasmid Vector	PHLAP92528068	Plasmid vector containing HLA-C*17:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:10 protein. This plasmid can be used for constructing HLA-C*17:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:11 Protein Expression Plasmid Vector	PHLAP92528069	Plasmid vector containing HLA-C*17:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:11 protein. This plasmid can be used for constructing HLA-C*17:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:12 Protein Expression Plasmid Vector	PHLAP92528070	Plasmid vector containing HLA-C*17:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:12 protein. This plasmid can be used for constructing HLA-C*17:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:13 Protein Expression Plasmid Vector	PHLAP92528071	Plasmid vector containing HLA-C*17:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:13 protein. This plasmid can be used for constructing HLA-C*17:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:14 Protein Expression Plasmid Vector	PHLAP92528072	Plasmid vector containing HLA-C*17:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:14 protein. This plasmid can be used for constructing HLA-C*17:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:15 Protein Expression Plasmid Vector	PHLAP92528073	Plasmid vector containing HLA-C*17:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:15 protein. This plasmid can be used for constructing HLA-C*17:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:01:16 Protein Expression Plasmid Vector	PHLAP92528074	Plasmid vector containing HLA-C*17:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:16 protein. This plasmid can be used for constructing HLA-C*17:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:17 Protein Expression Plasmid Vector	PHLAP92528075	Plasmid vector containing HLA-C*17:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:17 protein. This plasmid can be used for constructing HLA-C*17:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:18 Protein Expression Plasmid Vector	PHLAP92528076	Plasmid vector containing HLA-C*17:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:18 protein. This plasmid can be used for constructing HLA-C*17:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:19 Protein Expression Plasmid Vector	PHLAP92528077	Plasmid vector containing HLA-C*17:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:19 protein. This plasmid can be used for constructing HLA-C*17:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:01:20 Protein Expression Plasmid Vector	PHLAP92528078	Plasmid vector containing HLA-C*17:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:01:20 protein. This plasmid can be used for constructing HLA-C*17:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:02 Protein Expression Plasmid Vector	PHLAP92528079	Plasmid vector containing HLA-C*17:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:02 protein. This plasmid can be used for constructing HLA-C*17:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:01:01 Protein Expression Plasmid Vector	PHLAP92528080	Plasmid vector containing HLA-C*17:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:01 protein. This plasmid can be used for constructing HLA-C*17:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:01:02 Protein Expression Plasmid Vector	PHLAP92528081	Plasmid vector containing HLA-C*17:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:02 protein. This plasmid can be used for constructing HLA-C*17:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:03:01:03 Protein Expression Plasmid Vector	PHLAP92528082	Plasmid vector containing HLA-C*17:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:03 protein. This plasmid can be used for constructing HLA-C*17:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:01:04 Protein Expression Plasmid Vector	PHLAP92528083	Plasmid vector containing HLA-C*17:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:04 protein. This plasmid can be used for constructing HLA-C*17:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:01:05 Protein Expression Plasmid Vector	PHLAP92528084	Plasmid vector containing HLA-C*17:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:05 protein. This plasmid can be used for constructing HLA-C*17:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:01:06 Protein Expression Plasmid Vector	PHLAP92528085	Plasmid vector containing HLA-C*17:03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:06 protein. This plasmid can be used for constructing HLA-C*17:03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:01:07 Protein Expression Plasmid Vector	PHLAP92528086	Plasmid vector containing HLA-C*17:03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:07 protein. This plasmid can be used for constructing HLA-C*17:03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:01:08 Protein Expression Plasmid Vector	PHLAP92528087	Plasmid vector containing HLA-C*17:03:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:08 protein. This plasmid can be used for constructing HLA-C*17:03:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:01:09 Protein Expression Plasmid Vector	PHLAP92528088	Plasmid vector containing HLA-C*17:03:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:09 protein. This plasmid can be used for constructing HLA-C*17:03:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:03:01:10 Protein Expression Plasmid Vector	PHLAP92528089	Plasmid vector containing HLA-C*17:03:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:10 protein. This plasmid can be used for constructing HLA-C*17:03:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:01:11 Protein Expression Plasmid Vector	PHLAP92528090	Plasmid vector containing HLA-C*17:03:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:11 protein. This plasmid can be used for constructing HLA-C*17:03:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:01:12 Protein Expression Plasmid Vector	PHLAP92528091	Plasmid vector containing HLA-C*17:03:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:01:12 protein. This plasmid can be used for constructing HLA-C*17:03:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:02 Protein Expression Plasmid Vector	PHLAP92528092	Plasmid vector containing HLA-C*17:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:02 protein. This plasmid can be used for constructing HLA-C*17:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:03 Protein Expression Plasmid Vector	PHLAP92528093	Plasmid vector containing HLA-C*17:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:03 protein. This plasmid can be used for constructing HLA-C*17:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:04 Protein Expression Plasmid Vector	PHLAP92528094	Plasmid vector containing HLA-C*17:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:04 protein. This plasmid can be used for constructing HLA-C*17:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:03:05 Protein Expression Plasmid Vector	PHLAP92528095	Plasmid vector containing HLA-C*17:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:05 protein. This plasmid can be used for constructing HLA-C*17:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:03:06 Protein Expression Plasmid Vector	PHLAP92528096	Plasmid vector containing HLA-C*17:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:03:06 protein. This plasmid can be used for constructing HLA-C*17:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:04 Protein Expression Plasmid Vector	PHLAP92528097	Plasmid vector containing HLA-C*17:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:04 protein. This plasmid can be used for constructing HLA-C*17:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:05 Protein Expression Plasmid Vector	PHLAP92528098	Plasmid vector containing HLA-C*17:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:05 protein. This plasmid can be used for constructing HLA-C*17:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:06 Protein Expression Plasmid Vector	PHLAP92528099	Plasmid vector containing HLA-C*17:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:06 protein. This plasmid can be used for constructing HLA-C*17:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:07 Protein Expression Plasmid Vector	PHLAP925281000	Plasmid vector containing HLA-C*17:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:07 protein. This plasmid can be used for constructing HLA-C*17:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:08 Protein Expression Plasmid Vector	PHLAP925281001	Plasmid vector containing HLA-C*17:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:08 protein. This plasmid can be used for constructing HLA-C*17:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:09 Protein Expression Plasmid Vector	PHLAP925281002	Plasmid vector containing HLA-C*17:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:09 protein. This plasmid can be used for constructing HLA-C*17:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:10 Protein Expression Plasmid Vector	PHLAP925281003	Plasmid vector containing HLA-C*17:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:10 protein. This plasmid can be used for constructing HLA-C*17:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:11 Protein Expression Plasmid Vector	PHLAP92528104	Plasmid vector containing HLA-C*17:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:11 protein. This plasmid can be used for constructing HLA-C*17:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:12 Protein Expression Plasmid Vector	PHLAP92528105	Plasmid vector containing HLA-C*17:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:12 protein. This plasmid can be used for constructing HLA-C*17:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:13 Protein Expression Plasmid Vector	PHLAP92528106	Plasmid vector containing HLA-C*17:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:13 protein. This plasmid can be used for constructing HLA-C*17:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:14 Protein Expression Plasmid Vector	PHLAP92528107	Plasmid vector containing HLA-C*17:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:14 protein. This plasmid can be used for constructing HLA-C*17:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:15 Protein Expression Plasmid Vector	PHLAP92528108	Plasmid vector containing HLA-C*17:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:15 protein. This plasmid can be used for constructing HLA-C*17:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:16:01 Protein Expression Plasmid Vector	PHLAP92528109	Plasmid vector containing HLA-C*17:16:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:16:01 protein. This plasmid can be used for constructing HLA-C*17:16:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:16:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:16:02 Protein Expression Plasmid Vector	PHLAP92528110	Plasmid vector containing HLA-C*17:16:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:16:02 protein. This plasmid can be used for constructing HLA-C*17:16:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:16:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:17 Protein Expression Plasmid Vector	PHLAP92528111	Plasmid vector containing HLA-C*17:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:17 protein. This plasmid can be used for constructing HLA-C*17:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:18 Protein Expression Plasmid Vector	PHLAP925281112	Plasmid vector containing HLA-C*17:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:18 protein. This plasmid can be used for constructing HLA-C*17:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:19 Protein Expression Plasmid Vector	PHLAP925281113	Plasmid vector containing HLA-C*17:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:19 protein. This plasmid can be used for constructing HLA-C*17:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:20 Protein Expression Plasmid Vector	PHLAP925281114	Plasmid vector containing HLA-C*17:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:20 protein. This plasmid can be used for constructing HLA-C*17:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:21 Protein Expression Plasmid Vector	PHLAP925281115	Plasmid vector containing HLA-C*17:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:21 protein. This plasmid can be used for constructing HLA-C*17:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:22 Protein Expression Plasmid Vector	PHLAP925281116	Plasmid vector containing HLA-C*17:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:22 protein. This plasmid can be used for constructing HLA-C*17:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:23 Protein Expression Plasmid Vector	PHLAP925281117	Plasmid vector containing HLA-C*17:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:23 protein. This plasmid can be used for constructing HLA-C*17:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:24 Protein Expression Plasmid Vector	PHLAP925281118	Plasmid vector containing HLA-C*17:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:24 protein. This plasmid can be used for constructing HLA-C*17:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:25 Protein Expression Plasmid Vector	PHLAP925281119	Plasmid vector containing HLA-C*17:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:25 protein. This plasmid can be used for constructing HLA-C*17:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:26 Protein Expression Plasmid Vector	PHLAP92528120	Plasmid vector containing HLA-C*17:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:26 protein. This plasmid can be used for constructing HLA-C*17:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:27N Protein Expression Plasmid Vector	PHLAP92528121	Plasmid vector containing HLA-C*17:27N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:27N protein. This plasmid can be used for constructing HLA-C*17:27N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:27N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:28 Protein Expression Plasmid Vector	PHLAP92528122	Plasmid vector containing HLA-C*17:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:28 protein. This plasmid can be used for constructing HLA-C*17:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:29 Protein Expression Plasmid Vector	PHLAP92528123	Plasmid vector containing HLA-C*17:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:29 protein. This plasmid can be used for constructing HLA-C*17:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:30 Protein Expression Plasmid Vector	PHLAP92528124	Plasmid vector containing HLA-C*17:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:30 protein. This plasmid can be used for constructing HLA-C*17:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:31 Protein Expression Plasmid Vector	PHLAP92528125	Plasmid vector containing HLA-C*17:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:31 protein. This plasmid can be used for constructing HLA-C*17:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:32 Protein Expression Plasmid Vector	PHLAP92528126	Plasmid vector containing HLA-C*17:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:32 protein. This plasmid can be used for constructing HLA-C*17:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:33 Protein Expression Plasmid Vector	PHLAP92528127	Plasmid vector containing HLA-C*17:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:33 protein. This plasmid can be used for constructing HLA-C*17:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:34 Protein Expression Plasmid Vector	PHLAP92528128	Plasmid vector containing HLA-C*17:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:34 protein. This plasmid can be used for constructing HLA-C*17:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:35:01 Protein Expression Plasmid Vector	PHLAP92528129	Plasmid vector containing HLA-C*17:35:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:35:01 protein. This plasmid can be used for constructing HLA-C*17:35:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:35:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:35:02 Protein Expression Plasmid Vector	PHLAP92528130	Plasmid vector containing HLA-C*17:35:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:35:02 protein. This plasmid can be used for constructing HLA-C*17:35:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:35:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:36 Protein Expression Plasmid Vector	PHLAP92528131	Plasmid vector containing HLA-C*17:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:36 protein. This plasmid can be used for constructing HLA-C*17:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:37 Protein Expression Plasmid Vector	PHLAP92528132	Plasmid vector containing HLA-C*17:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:37 protein. This plasmid can be used for constructing HLA-C*17:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:38:01:01 Protein Expression Plasmid Vector	PHLAP92528133	Plasmid vector containing HLA-C*17:38:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:38:01:01 protein. This plasmid can be used for constructing HLA-C*17:38:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:38:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:38:01:02 Protein Expression Plasmid Vector	PHLAP92528134	Plasmid vector containing HLA-C*17:38:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:38:01:02 protein. This plasmid can be used for constructing HLA-C*17:38:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:38:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:39 Protein Expression Plasmid Vector	PHLAP92528135	Plasmid vector containing HLA-C*17:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:39 protein. This plasmid can be used for constructing HLA-C*17:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:40 Protein Expression Plasmid Vector	PHLAP92528136	Plasmid vector containing HLA-C*17:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:40 protein. This plasmid can be used for constructing HLA-C*17:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:41 Protein Expression Plasmid Vector	PHLAP92528137	Plasmid vector containing HLA-C*17:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:41 protein. This plasmid can be used for constructing HLA-C*17:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:42 Protein Expression Plasmid Vector	PHLAP92528138	Plasmid vector containing HLA-C*17:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:42 protein. This plasmid can be used for constructing HLA-C*17:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:43 Protein Expression Plasmid Vector	PHLAP92528139	Plasmid vector containing HLA-C*17:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:43 protein. This plasmid can be used for constructing HLA-C*17:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:44 Protein Expression Plasmid Vector	PHLAP92528140	Plasmid vector containing HLA-C*17:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:44 protein. This plasmid can be used for constructing HLA-C*17:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:45 Protein Expression Plasmid Vector	PHLAP92528141	Plasmid vector containing HLA-C*17:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:45 protein. This plasmid can be used for constructing HLA-C*17:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:46 Protein Expression Plasmid Vector	PHLAP92528142	Plasmid vector containing HLA-C*17:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:46 protein. This plasmid can be used for constructing HLA-C*17:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:47 Protein Expression Plasmid Vector	PHLAP92528143	Plasmid vector containing HLA-C*17:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:47 protein. This plasmid can be used for constructing HLA-C*17:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:48 Protein Expression Plasmid Vector	PHLAP92528144	Plasmid vector containing HLA-C*17:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:48 protein. This plasmid can be used for constructing HLA-C*17:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:49 Protein Expression Plasmid Vector	PHLAP92528145	Plasmid vector containing HLA-C*17:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:49 protein. This plasmid can be used for constructing HLA-C*17:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:50 Protein Expression Plasmid Vector	PHLAP92528146	Plasmid vector containing HLA-C*17:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:50 protein. This plasmid can be used for constructing HLA-C*17:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:51:01:01 Protein Expression Plasmid Vector	PHLAP92528147	Plasmid vector containing HLA-C*17:51:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:51:01:01 protein. This plasmid can be used for constructing HLA-C*17:51:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:51:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:51:01:02 Protein Expression Plasmid Vector	PHLAP92528148	Plasmid vector containing HLA-C*17:51:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:51:01:02 protein. This plasmid can be used for constructing HLA-C*17:51:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:51:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:51:02 Protein Expression Plasmid Vector	PHLAP92528149	Plasmid vector containing HLA-C*17:51:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:51:02 protein. This plasmid can be used for constructing HLA-C*17:51:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:51:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:52 Protein Expression Plasmid Vector	PHLAP92528150	Plasmid vector containing HLA-C*17:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:52 protein. This plasmid can be used for constructing HLA-C*17:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:53 Protein Expression Plasmid Vector	PHLAP92528151	Plasmid vector containing HLA-C*17:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:53 protein. This plasmid can be used for constructing HLA-C*17:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:54 Protein Expression Plasmid Vector	PHLAP92528152	Plasmid vector containing HLA-C*17:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:54 protein. This plasmid can be used for constructing HLA-C*17:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:55 Protein Expression Plasmid Vector	PHLAP92528153	Plasmid vector containing HLA-C*17:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:55 protein. This plasmid can be used for constructing HLA-C*17:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:56 Protein Expression Plasmid Vector	PHLAP92528154	Plasmid vector containing HLA-C*17:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:56 protein. This plasmid can be used for constructing HLA-C*17:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:57 Protein Expression Plasmid Vector	PHLAP92528155	Plasmid vector containing HLA-C*17:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:57 protein. This plasmid can be used for constructing HLA-C*17:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:58 Protein Expression Plasmid Vector	PHLAP92528156	Plasmid vector containing HLA-C*17:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:58 protein. This plasmid can be used for constructing HLA-C*17:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:59 Protein Expression Plasmid Vector	PHLAP92528157	Plasmid vector containing HLA-C*17:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:59 protein. This plasmid can be used for constructing HLA-C*17:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:60 Protein Expression Plasmid Vector	PHLAP92528158	Plasmid vector containing HLA-C*17:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:60 protein. This plasmid can be used for constructing HLA-C*17:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:61 Protein Expression Plasmid Vector	PHLAP92528159	Plasmid vector containing HLA-C*17:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:61 protein. This plasmid can be used for constructing HLA-C*17:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:62 Protein Expression Plasmid Vector	PHLAP92528160	Plasmid vector containing HLA-C*17:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:62 protein. This plasmid can be used for constructing HLA-C*17:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:63 Protein Expression Plasmid Vector	PHLAP92528161	Plasmid vector containing HLA-C*17:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:63 protein. This plasmid can be used for constructing HLA-C*17:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:64Q Protein Expression Plasmid Vector	PHLAP92528162	Plasmid vector containing HLA-C*17:64Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:64Q protein. This plasmid can be used for constructing HLA-C*17:64Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:64Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:65 Protein Expression Plasmid Vector	PHLAP92528163	Plasmid vector containing HLA-C*17:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:65 protein. This plasmid can be used for constructing HLA-C*17:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:66 Protein Expression Plasmid Vector	PHLAP92528164	Plasmid vector containing HLA-C*17:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:66 protein. This plasmid can be used for constructing HLA-C*17:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:67 Protein Expression Plasmid Vector	PHLAP92528165	Plasmid vector containing HLA-C*17:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:67 protein. This plasmid can be used for constructing HLA-C*17:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:68 Protein Expression Plasmid Vector	PHLAP92528166	Plasmid vector containing HLA-C*17:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:68 protein. This plasmid can be used for constructing HLA-C*17:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:69 Protein Expression Plasmid Vector	PHLAP92528167	Plasmid vector containing HLA-C*17:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:69 protein. This plasmid can be used for constructing HLA-C*17:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:70 Protein Expression Plasmid Vector	PHLAP92528168	Plasmid vector containing HLA-C*17:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:70 protein. This plasmid can be used for constructing HLA-C*17:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:71 Protein Expression Plasmid Vector	PHLAP92528169	Plasmid vector containing HLA-C*17:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:71 protein. This plasmid can be used for constructing HLA-C*17:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:72 Protein Expression Plasmid Vector	PHLAP92528170	Plasmid vector containing HLA-C*17:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:72 protein. This plasmid can be used for constructing HLA-C*17:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:73 Protein Expression Plasmid Vector	PHLAP92528171	Plasmid vector containing HLA-C*17:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:73 protein. This plasmid can be used for constructing HLA-C*17:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:74 Protein Expression Plasmid Vector	PHLAP92528172	Plasmid vector containing HLA-C*17:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:74 protein. This plasmid can be used for constructing HLA-C*17:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:75 Protein Expression Plasmid Vector	PHLAP92528173	Plasmid vector containing HLA-C*17:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:75 protein. This plasmid can be used for constructing HLA-C*17:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:76 Protein Expression Plasmid Vector	PHLAP92528174	Plasmid vector containing HLA-C*17:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:76 protein. This plasmid can be used for constructing HLA-C*17:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:77 Protein Expression Plasmid Vector	PHLAP92528175	Plasmid vector containing HLA-C*17:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:77 protein. This plasmid can be used for constructing HLA-C*17:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*17:78 Protein Expression Plasmid Vector	PHLAP92528176	Plasmid vector containing HLA-C*17:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:78 protein. This plasmid can be used for constructing HLA-C*17:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:79 Protein Expression Plasmid Vector	PHLAP92528177	Plasmid vector containing HLA-C*17:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:79 protein. This plasmid can be used for constructing HLA-C*17:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:80 Protein Expression Plasmid Vector	PHLAP92528178	Plasmid vector containing HLA-C*17:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:80 protein. This plasmid can be used for constructing HLA-C*17:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:81 Protein Expression Plasmid Vector	PHLAP92528179	Plasmid vector containing HLA-C*17:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:81 protein. This plasmid can be used for constructing HLA-C*17:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:82 Protein Expression Plasmid Vector	PHLAP92528180	Plasmid vector containing HLA-C*17:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:82 protein. This plasmid can be used for constructing HLA-C*17:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*17:83 Protein Expression Plasmid Vector	PHLAP92528181	Plasmid vector containing HLA-C*17:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*17:83 protein. This plasmid can be used for constructing HLA-C*17:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*17:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:01:01:01 Protein Expression Plasmid Vector	PHLAP92528182	Plasmid vector containing HLA-C*18:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:01:01:01 protein. This plasmid can be used for constructing HLA-C*18:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:01:01:02 Protein Expression Plasmid Vector	PHLAP92528183	Plasmid vector containing HLA-C*18:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:01:01:02 protein. This plasmid can be used for constructing HLA-C*18:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*18:01:01:03 Protein Expression Plasmid Vector	PHLAP92528184	Plasmid vector containing HLA-C*18:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:01:01:03 protein. This plasmid can be used for constructing HLA-C*18:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:01:02 Protein Expression Plasmid Vector	PHLAP92528185	Plasmid vector containing HLA-C*18:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:01:02 protein. This plasmid can be used for constructing HLA-C*18:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:02:01:01 Protein Expression Plasmid Vector	PHLAP92528186	Plasmid vector containing HLA-C*18:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:02:01:01 protein. This plasmid can be used for constructing HLA-C*18:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:02:01:02 Protein Expression Plasmid Vector	PHLAP92528187	Plasmid vector containing HLA-C*18:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:02:01:02 protein. This plasmid can be used for constructing HLA-C*18:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:02:01:03 Protein Expression Plasmid Vector	PHLAP92528188	Plasmid vector containing HLA-C*18:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:02:01:03 protein. This plasmid can be used for constructing HLA-C*18:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:02:01:04 Protein Expression Plasmid Vector	PHLAP92528189	Plasmid vector containing HLA-C*18:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:02:01:04 protein. This plasmid can be used for constructing HLA-C*18:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:02:02 Protein Expression Plasmid Vector	PHLAP92528190	Plasmid vector containing HLA-C*18:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:02:02 protein. This plasmid can be used for constructing HLA-C*18:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*18:02:03 Protein Expression Plasmid Vector	PHLAP92528191	Plasmid vector containing HLA-C*18:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:02:03 protein. This plasmid can be used for constructing HLA-C*18:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:02:04 Protein Expression Plasmid Vector	PHLAP92528192	Plasmid vector containing HLA-C*18:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:02:04 protein. This plasmid can be used for constructing HLA-C*18:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:02:05 Protein Expression Plasmid Vector	PHLAP92528193	Plasmid vector containing HLA-C*18:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:02:05 protein. This plasmid can be used for constructing HLA-C*18:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:03 Protein Expression Plasmid Vector	PHLAP92528194	Plasmid vector containing HLA-C*18:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:03 protein. This plasmid can be used for constructing HLA-C*18:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:04 Protein Expression Plasmid Vector	PHLAP92528195	Plasmid vector containing HLA-C*18:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:04 protein. This plasmid can be used for constructing HLA-C*18:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:05 Protein Expression Plasmid Vector	PHLAP92528196	Plasmid vector containing HLA-C*18:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:05 protein. This plasmid can be used for constructing HLA-C*18:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:06 Protein Expression Plasmid Vector	PHLAP92528197	Plasmid vector containing HLA-C*18:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:06 protein. This plasmid can be used for constructing HLA-C*18:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:07N Protein Expression Plasmid Vector	PHLAP92528198	Plasmid vector containing HLA-C*18:07N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:07N protein. This plasmid can be used for constructing HLA-C*18:07N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:07N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*18:08 Protein Expression Plasmid Vector	PHLAP92528199	Plasmid vector containing HLA-C*18:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:08 protein. This plasmid can be used for constructing HLA-C*18:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:09 Protein Expression Plasmid Vector	PHLAP925282000	Plasmid vector containing HLA-C*18:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:09 protein. This plasmid can be used for constructing HLA-C*18:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:10 Protein Expression Plasmid Vector	PHLAP925282001	Plasmid vector containing HLA-C*18:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:10 protein. This plasmid can be used for constructing HLA-C*18:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:11 Protein Expression Plasmid Vector	PHLAP925282002	Plasmid vector containing HLA-C*18:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:11 protein. This plasmid can be used for constructing HLA-C*18:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:12 Protein Expression Plasmid Vector	PHLAP925282003	Plasmid vector containing HLA-C*18:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:12 protein. This plasmid can be used for constructing HLA-C*18:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:13 Protein Expression Plasmid Vector	PHLAP925282004	Plasmid vector containing HLA-C*18:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:13 protein. This plasmid can be used for constructing HLA-C*18:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:14 Protein Expression Plasmid Vector	PHLAP925282005	Plasmid vector containing HLA-C*18:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:14 protein. This plasmid can be used for constructing HLA-C*18:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:15 Protein Expression Plasmid Vector	PHLAP925282006	Plasmid vector containing HLA-C*18:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:15 protein. This plasmid can be used for constructing HLA-C*18:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-C*18:16 Protein Expression Plasmid Vector	PHLAP92528207	Plasmid vector containing HLA-C*18:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:16 protein. This plasmid can be used for constructing HLA-C*18:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:17 Protein Expression Plasmid Vector	PHLAP92528208	Plasmid vector containing HLA-C*18:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:17 protein. This plasmid can be used for constructing HLA-C*18:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:18 Protein Expression Plasmid Vector	PHLAP92528209	Plasmid vector containing HLA-C*18:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:18 protein. This plasmid can be used for constructing HLA-C*18:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:19 Protein Expression Plasmid Vector	PHLAP92528210	Plasmid vector containing HLA-C*18:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:19 protein. This plasmid can be used for constructing HLA-C*18:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:20 Protein Expression Plasmid Vector	PHLAP92528211	Plasmid vector containing HLA-C*18:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:20 protein. This plasmid can be used for constructing HLA-C*18:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:21 Protein Expression Plasmid Vector	PHLAP92528212	Plasmid vector containing HLA-C*18:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:21 protein. This plasmid can be used for constructing HLA-C*18:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-C*18:22 Protein Expression Plasmid Vector	PHLAP92528213	Plasmid vector containing HLA-C*18:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-C*18:22 protein. This plasmid can be used for constructing HLA-C*18:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-C*18:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*0101 Protein Expression Plasmid Vector	PHLAP92528214	Plasmid vector containing HLA-Cw*0101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*0101 protein. This plasmid can be used for constructing HLA-Cw*0101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*0101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-Cw*0201 Protein Expression Plasmid Vector	PHLAP92528215	Plasmid vector containing HLA-Cw*0201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*0201 protein. This plasmid can be used for constructing HLA-Cw*0201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*0201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*020204 Protein Expression Plasmid Vector	PHLAP92528216	Plasmid vector containing HLA-Cw*020204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*020204 protein. This plasmid can be used for constructing HLA-Cw*020204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*020204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*021603 Protein Expression Plasmid Vector	PHLAP92528217	Plasmid vector containing HLA-Cw*021603 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*021603 protein. This plasmid can be used for constructing HLA-Cw*021603 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*021603 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*0301 Protein Expression Plasmid Vector	PHLAP92528218	Plasmid vector containing HLA-Cw*0301 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*0301 protein. This plasmid can be used for constructing HLA-Cw*0301 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*0301 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*0402 Protein Expression Plasmid Vector	PHLAP92528219	Plasmid vector containing HLA-Cw*0402 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*0402 protein. This plasmid can be used for constructing HLA-Cw*0402 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*0402 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*0421 Protein Expression Plasmid Vector	PHLAP92528220	Plasmid vector containing HLA-Cw*0421 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*0421 protein. This plasmid can be used for constructing HLA-Cw*0421 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*0421 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*0422 Protein Expression Plasmid Vector	PHLAP92528221	Plasmid vector containing HLA-Cw*0422 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*0422 protein. This plasmid can be used for constructing HLA-Cw*0422 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*0422 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*0502 Protein Expression Plasmid Vector	PHLAP92528222	Plasmid vector containing HLA-Cw*0502 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*0502 protein. This plasmid can be used for constructing HLA-Cw*0502 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*0502 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-Cw*0601 Protein Expression Plasmid Vector	PHLAP92528223	Plasmid vector containing HLA-Cw*0601 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*0601 protein. This plasmid can be used for constructing HLA-Cw*0601 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*0601 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*060202 Protein Expression Plasmid Vector	PHLAP92528224	Plasmid vector containing HLA-Cw*060202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*060202 protein. This plasmid can be used for constructing HLA-Cw*060202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*060202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*0734 Protein Expression Plasmid Vector	PHLAP92528225	Plasmid vector containing HLA-Cw*0734 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*0734 protein. This plasmid can be used for constructing HLA-Cw*0734 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*0734 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*1101 Protein Expression Plasmid Vector	PHLAP92528226	Plasmid vector containing HLA-Cw*1101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*1101 protein. This plasmid can be used for constructing HLA-Cw*1101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*1101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*1201 Protein Expression Plasmid Vector	PHLAP92528227	Plasmid vector containing HLA-Cw*1201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*1201 protein. This plasmid can be used for constructing HLA-Cw*1201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*1201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*1301 Protein Expression Plasmid Vector	PHLAP92528228	Plasmid vector containing HLA-Cw*1301 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*1301 protein. This plasmid can be used for constructing HLA-Cw*1301 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*1301 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*1401 Protein Expression Plasmid Vector	PHLAP92528229	Plasmid vector containing HLA-Cw*1401 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*1401 protein. This plasmid can be used for constructing HLA-Cw*1401 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*1401 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*1501 Protein Expression Plasmid Vector	PHLAP92528230	Plasmid vector containing HLA-Cw*1501 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*1501 protein. This plasmid can be used for constructing HLA-Cw*1501 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*1501 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-Cw*1514 Protein Expression Plasmid Vector	PHLAP92528231	Plasmid vector containing HLA-Cw*1514 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*1514 protein. This plasmid can be used for constructing HLA-Cw*1514 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*1514 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*1603 Protein Expression Plasmid Vector	PHLAP92528232	Plasmid vector containing HLA-Cw*1603 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*1603 protein. This plasmid can be used for constructing HLA-Cw*1603 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*1603 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*16042 Protein Expression Plasmid Vector	PHLAP92528233	Plasmid vector containing HLA-Cw*16042 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*16042 protein. This plasmid can be used for constructing HLA-Cw*16042 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*16042 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-Cw*1605 Protein Expression Plasmid Vector	PHLAP92528234	Plasmid vector containing HLA-Cw*1605 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-Cw*1605 protein. This plasmid can be used for constructing HLA-Cw*1605 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-Cw*1605 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92528235	Plasmid vector containing HLA-DMA*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:01 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92528236	Plasmid vector containing HLA-DMA*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:02 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92528237	Plasmid vector containing HLA-DMA*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:03 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92528238	Plasmid vector containing HLA-DMA*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:04 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92528239	Plasmid vector containing HLA-DMA*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:05 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92528240	Plasmid vector containing HLA-DMA*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:06 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92528241	Plasmid vector containing HLA-DMA*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:07 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:08 Protein Expression Plasmid Vector	PHLAP92528242	Plasmid vector containing HLA-DMA*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:08 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:09 Protein Expression Plasmid Vector	PHLAP92528243	Plasmid vector containing HLA-DMA*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:09 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:10 Protein Expression Plasmid Vector	PHLAP92528244	Plasmid vector containing HLA-DMA*01:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:10 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:01:01:11 Protein Expression Plasmid Vector	PHLAP92528245	Plasmid vector containing HLA-DMA*01:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:11 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:12 Protein Expression Plasmid Vector	PHLAP92528246	Plasmid vector containing HLA-DMA*01:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:12 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:13 Protein Expression Plasmid Vector	PHLAP92528247	Plasmid vector containing HLA-DMA*01:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:13 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:14 Protein Expression Plasmid Vector	PHLAP92528248	Plasmid vector containing HLA-DMA*01:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:14 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:15 Protein Expression Plasmid Vector	PHLAP92528249	Plasmid vector containing HLA-DMA*01:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:15 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:16 Protein Expression Plasmid Vector	PHLAP92528250	Plasmid vector containing HLA-DMA*01:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:16 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:17 Protein Expression Plasmid Vector	PHLAP92528251	Plasmid vector containing HLA-DMA*01:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:17 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:01:01:18 Protein Expression Plasmid Vector	PHLAP92528252	Plasmid vector containing HLA-DMA*01:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:18 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:19 Protein Expression Plasmid Vector	PHLAP92528253	Plasmid vector containing HLA-DMA*01:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:19 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:20 Protein Expression Plasmid Vector	PHLAP92528254	Plasmid vector containing HLA-DMA*01:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:20 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:21 Protein Expression Plasmid Vector	PHLAP92528255	Plasmid vector containing HLA-DMA*01:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:21 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:22 Protein Expression Plasmid Vector	PHLAP92528256	Plasmid vector containing HLA-DMA*01:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:22 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:23 Protein Expression Plasmid Vector	PHLAP92528257	Plasmid vector containing HLA-DMA*01:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:23 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:24 Protein Expression Plasmid Vector	PHLAP92528258	Plasmid vector containing HLA-DMA*01:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:24 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:01:01:25 Protein Expression Plasmid Vector	PHLAP92528259	Plasmid vector containing HLA-DMA*01:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:25 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:26 Protein Expression Plasmid Vector	PHLAP92528260	Plasmid vector containing HLA-DMA*01:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:26 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:27 Protein Expression Plasmid Vector	PHLAP92528261	Plasmid vector containing HLA-DMA*01:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:27 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:28 Protein Expression Plasmid Vector	PHLAP92528262	Plasmid vector containing HLA-DMA*01:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:28 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:29 Protein Expression Plasmid Vector	PHLAP92528263	Plasmid vector containing HLA-DMA*01:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:29 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:30 Protein Expression Plasmid Vector	PHLAP92528264	Plasmid vector containing HLA-DMA*01:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:30 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:31 Protein Expression Plasmid Vector	PHLAP92528265	Plasmid vector containing HLA-DMA*01:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:31 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:01:01:32 Protein Expression Plasmid Vector	PHLAP92528266	Plasmid vector containing HLA-DMA*01:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:32 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:33 Protein Expression Plasmid Vector	PHLAP92528267	Plasmid vector containing HLA-DMA*01:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:33 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:34 Protein Expression Plasmid Vector	PHLAP92528268	Plasmid vector containing HLA-DMA*01:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:34 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:35 Protein Expression Plasmid Vector	PHLAP92528269	Plasmid vector containing HLA-DMA*01:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:35 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:36 Protein Expression Plasmid Vector	PHLAP92528270	Plasmid vector containing HLA-DMA*01:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:36 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:37 Protein Expression Plasmid Vector	PHLAP92528271	Plasmid vector containing HLA-DMA*01:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:37 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:38 Protein Expression Plasmid Vector	PHLAP92528272	Plasmid vector containing HLA-DMA*01:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:38 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:01:01:39 Protein Expression Plasmid Vector	PHLAP92528273	Plasmid vector containing HLA-DMA*01:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:39 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:40 Protein Expression Plasmid Vector	PHLAP92528274	Plasmid vector containing HLA-DMA*01:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:40 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:41 Protein Expression Plasmid Vector	PHLAP92528275	Plasmid vector containing HLA-DMA*01:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:41 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:42 Protein Expression Plasmid Vector	PHLAP92528276	Plasmid vector containing HLA-DMA*01:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:42 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:43 Protein Expression Plasmid Vector	PHLAP92528277	Plasmid vector containing HLA-DMA*01:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:43 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:44 Protein Expression Plasmid Vector	PHLAP92528278	Plasmid vector containing HLA-DMA*01:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:44 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:45 Protein Expression Plasmid Vector	PHLAP92528279	Plasmid vector containing HLA-DMA*01:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:45 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:01:01:46 Protein Expression Plasmid Vector	PHLAP92528280	Plasmid vector containing HLA-DMA*01:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:46 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:47 Protein Expression Plasmid Vector	PHLAP92528281	Plasmid vector containing HLA-DMA*01:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:47 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:48 Protein Expression Plasmid Vector	PHLAP92528282	Plasmid vector containing HLA-DMA*01:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:48 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:49 Protein Expression Plasmid Vector	PHLAP92528283	Plasmid vector containing HLA-DMA*01:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:49 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:50 Protein Expression Plasmid Vector	PHLAP92528284	Plasmid vector containing HLA-DMA*01:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:50 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:51 Protein Expression Plasmid Vector	PHLAP92528285	Plasmid vector containing HLA-DMA*01:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:51 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:52 Protein Expression Plasmid Vector	PHLAP92528286	Plasmid vector containing HLA-DMA*01:01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:52 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:01:01:53 Protein Expression Plasmid Vector	PHLAP92528287	Plasmid vector containing HLA-DMA*01:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:53 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:54 Protein Expression Plasmid Vector	PHLAP92528288	Plasmid vector containing HLA-DMA*01:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:54 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:55 Protein Expression Plasmid Vector	PHLAP92528289	Plasmid vector containing HLA-DMA*01:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:55 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:56 Protein Expression Plasmid Vector	PHLAP92528290	Plasmid vector containing HLA-DMA*01:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:56 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:57 Protein Expression Plasmid Vector	PHLAP92528291	Plasmid vector containing HLA-DMA*01:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:57 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:58 Protein Expression Plasmid Vector	PHLAP92528292	Plasmid vector containing HLA-DMA*01:01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:58 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:59 Protein Expression Plasmid Vector	PHLAP92528293	Plasmid vector containing HLA-DMA*01:01:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:59 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:01:01:60 Protein Expression Plasmid Vector	PHLAP92528294	Plasmid vector containing HLA-DMA*01:01:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:60 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:01:61 Protein Expression Plasmid Vector	PHLAP92528295	Plasmid vector containing HLA-DMA*01:01:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:01:61 protein. This plasmid can be used for constructing HLA-DMA*01:01:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:02 Protein Expression Plasmid Vector	PHLAP92528296	Plasmid vector containing HLA-DMA*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:02 protein. This plasmid can be used for constructing HLA-DMA*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:01:03 Protein Expression Plasmid Vector	PHLAP92528297	Plasmid vector containing HLA-DMA*01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:01:03 protein. This plasmid can be used for constructing HLA-DMA*01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:02:01:01 Protein Expression Plasmid Vector	PHLAP92528298	Plasmid vector containing HLA-DMA*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:01 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:02:01:02 Protein Expression Plasmid Vector	PHLAP92528299	Plasmid vector containing HLA-DMA*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:02 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:02:01:03 Protein Expression Plasmid Vector	PHLAP92528300	Plasmid vector containing HLA-DMA*01:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:03 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:02:01:04 Protein Expression Plasmid Vector	PHLAP92528301	Plasmid vector containing HLA-DMA*01:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:04 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:02:01:05 Protein Expression Plasmid Vector	PHLAP92528302	Plasmid vector containing HLA-DMA*01:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:05 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:02:01:06 Protein Expression Plasmid Vector	PHLAP92528303	Plasmid vector containing HLA-DMA*01:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:06 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:02:01:07 Protein Expression Plasmid Vector	PHLAP92528304	Plasmid vector containing HLA-DMA*01:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:07 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:02:01:08 Protein Expression Plasmid Vector	PHLAP92528305	Plasmid vector containing HLA-DMA*01:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:08 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:02:01:09 Protein Expression Plasmid Vector	PHLAP92528306	Plasmid vector containing HLA-DMA*01:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:09 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:02:01:10 Protein Expression Plasmid Vector	PHLAP92528307	Plasmid vector containing HLA-DMA*01:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:10 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:02:01:11 Protein Expression Plasmid Vector	PHLAP92528308	Plasmid vector containing HLA-DMA*01:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:11 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:02:01:12 Protein Expression Plasmid Vector	PHLAP92528309	Plasmid vector containing HLA-DMA*01:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:02:01:12 protein. This plasmid can be used for constructing HLA-DMA*01:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:03:01:01 Protein Expression Plasmid Vector	PHLAP92528310	Plasmid vector containing HLA-DMA*01:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:03:01:01 protein. This plasmid can be used for constructing HLA-DMA*01:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:03:01:02 Protein Expression Plasmid Vector	PHLAP92528311	Plasmid vector containing HLA-DMA*01:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:03:01:02 protein. This plasmid can be used for constructing HLA-DMA*01:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:03:01:03 Protein Expression Plasmid Vector	PHLAP92528312	Plasmid vector containing HLA-DMA*01:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:03:01:03 protein. This plasmid can be used for constructing HLA-DMA*01:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:04 Protein Expression Plasmid Vector	PHLAP92528313	Plasmid vector containing HLA-DMA*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:04 protein. This plasmid can be used for constructing HLA-DMA*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:05 Protein Expression Plasmid Vector	PHLAP92528314	Plasmid vector containing HLA-DMA*01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:05 protein. This plasmid can be used for constructing HLA-DMA*01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMA*01:06 Protein Expression Plasmid Vector	PHLAP92528315	Plasmid vector containing HLA-DMA*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:06 protein. This plasmid can be used for constructing HLA-DMA*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:07 Protein Expression Plasmid Vector	PHLAP92528316	Plasmid vector containing HLA-DMA*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:07 protein. This plasmid can be used for constructing HLA-DMA*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:08 Protein Expression Plasmid Vector	PHLAP92528317	Plasmid vector containing HLA-DMA*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:08 protein. This plasmid can be used for constructing HLA-DMA*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:09 Protein Expression Plasmid Vector	PHLAP92528318	Plasmid vector containing HLA-DMA*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:09 protein. This plasmid can be used for constructing HLA-DMA*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMA*01:10 Protein Expression Plasmid Vector	PHLAP92528319	Plasmid vector containing HLA-DMA*01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMA*01:10 protein. This plasmid can be used for constructing HLA-DMA*01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMA*01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92528320	Plasmid vector containing HLA-DMB*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:01 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92528321	Plasmid vector containing HLA-DMB*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:02 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92528322	Plasmid vector containing HLA-DMB*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:03 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92528323	Plasmid vector containing HLA-DMB*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:04 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92528324	Plasmid vector containing HLA-DMB*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:05 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92528325	Plasmid vector containing HLA-DMB*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:06 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92528326	Plasmid vector containing HLA-DMB*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:07 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:08 Protein Expression Plasmid Vector	PHLAP92528327	Plasmid vector containing HLA-DMB*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:08 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:09 Protein Expression Plasmid Vector	PHLAP92528328	Plasmid vector containing HLA-DMB*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:09 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:10 Protein Expression Plasmid Vector	PHLAP92528329	Plasmid vector containing HLA-DMB*01:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:10 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:11 Protein Expression Plasmid Vector	PHLAP92528330	Plasmid vector containing HLA-DMB*01:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:11 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:12 Protein Expression Plasmid Vector	PHLAP92528331	Plasmid vector containing HLA-DMB*01:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:12 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:13 Protein Expression Plasmid Vector	PHLAP92528332	Plasmid vector containing HLA-DMB*01:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:13 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:14 Protein Expression Plasmid Vector	PHLAP92528333	Plasmid vector containing HLA-DMB*01:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:14 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:15 Protein Expression Plasmid Vector	PHLAP92528334	Plasmid vector containing HLA-DMB*01:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:15 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:16 Protein Expression Plasmid Vector	PHLAP92528335	Plasmid vector containing HLA-DMB*01:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:16 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:17 Protein Expression Plasmid Vector	PHLAP92528336	Plasmid vector containing HLA-DMB*01:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:17 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:18 Protein Expression Plasmid Vector	PHLAP92528337	Plasmid vector containing HLA-DMB*01:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:18 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:19 Protein Expression Plasmid Vector	PHLAP92528338	Plasmid vector containing HLA-DMB*01:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:19 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:20 Protein Expression Plasmid Vector	PHLAP92528339	Plasmid vector containing HLA-DMB*01:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:20 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:21 Protein Expression Plasmid Vector	PHLAP92528340	Plasmid vector containing HLA-DMB*01:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:21 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:22 Protein Expression Plasmid Vector	PHLAP92528341	Plasmid vector containing HLA-DMB*01:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:22 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:23 Protein Expression Plasmid Vector	PHLAP92528342	Plasmid vector containing HLA-DMB*01:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:23 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:24 Protein Expression Plasmid Vector	PHLAP925283443	Plasmid vector containing HLA-DMB*01:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:24 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:25 Protein Expression Plasmid Vector	PHLAP925283444	Plasmid vector containing HLA-DMB*01:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:25 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:26 Protein Expression Plasmid Vector	PHLAP925283445	Plasmid vector containing HLA-DMB*01:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:26 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:27 Protein Expression Plasmid Vector	PHLAP925283446	Plasmid vector containing HLA-DMB*01:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:27 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:28 Protein Expression Plasmid Vector	PHLAP925283447	Plasmid vector containing HLA-DMB*01:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:28 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:29 Protein Expression Plasmid Vector	PHLAP925283448	Plasmid vector containing HLA-DMB*01:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:29 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:30 Protein Expression Plasmid Vector	PHLAP925283449	Plasmid vector containing HLA-DMB*01:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:30 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:31 Protein Expression Plasmid Vector	PHLAP92528350	Plasmid vector containing HLA-DMB*01:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:31 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:32 Protein Expression Plasmid Vector	PHLAP92528351	Plasmid vector containing HLA-DMB*01:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:32 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:33 Protein Expression Plasmid Vector	PHLAP92528352	Plasmid vector containing HLA-DMB*01:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:33 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:34 Protein Expression Plasmid Vector	PHLAP92528353	Plasmid vector containing HLA-DMB*01:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:34 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:35 Protein Expression Plasmid Vector	PHLAP92528354	Plasmid vector containing HLA-DMB*01:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:35 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:36 Protein Expression Plasmid Vector	PHLAP92528355	Plasmid vector containing HLA-DMB*01:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:36 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:37 Protein Expression Plasmid Vector	PHLAP92528356	Plasmid vector containing HLA-DMB*01:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:37 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:38 Protein Expression Plasmid Vector	PHLAP92528357	Plasmid vector containing HLA-DMB*01:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:38 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:39 Protein Expression Plasmid Vector	PHLAP92528358	Plasmid vector containing HLA-DMB*01:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:39 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:40 Protein Expression Plasmid Vector	PHLAP92528359	Plasmid vector containing HLA-DMB*01:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:40 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:41 Protein Expression Plasmid Vector	PHLAP92528360	Plasmid vector containing HLA-DMB*01:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:41 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:42 Protein Expression Plasmid Vector	PHLAP92528361	Plasmid vector containing HLA-DMB*01:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:42 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:43 Protein Expression Plasmid Vector	PHLAP92528362	Plasmid vector containing HLA-DMB*01:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:43 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:44 Protein Expression Plasmid Vector	PHLAP92528363	Plasmid vector containing HLA-DMB*01:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:44 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:45 Protein Expression Plasmid Vector	PHLAP92528364	Plasmid vector containing HLA-DMB*01:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:45 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:46 Protein Expression Plasmid Vector	PHLAP92528365	Plasmid vector containing HLA-DMB*01:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:46 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:47 Protein Expression Plasmid Vector	PHLAP92528366	Plasmid vector containing HLA-DMB*01:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:47 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:48 Protein Expression Plasmid Vector	PHLAP92528367	Plasmid vector containing HLA-DMB*01:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:48 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:49 Protein Expression Plasmid Vector	PHLAP92528368	Plasmid vector containing HLA-DMB*01:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:49 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:50 Protein Expression Plasmid Vector	PHLAP92528369	Plasmid vector containing HLA-DMB*01:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:50 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:51 Protein Expression Plasmid Vector	PHLAP92528370	Plasmid vector containing HLA-DMB*01:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:51 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:52 Protein Expression Plasmid Vector	PHLAP92528371	Plasmid vector containing HLA-DMB*01:01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:52 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:53 Protein Expression Plasmid Vector	PHLAP92528372	Plasmid vector containing HLA-DMB*01:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:53 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:54 Protein Expression Plasmid Vector	PHLAP92528373	Plasmid vector containing HLA-DMB*01:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:54 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:55 Protein Expression Plasmid Vector	PHLAP92528374	Plasmid vector containing HLA-DMB*01:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:55 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:56 Protein Expression Plasmid Vector	PHLAP92528375	Plasmid vector containing HLA-DMB*01:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:56 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:57 Protein Expression Plasmid Vector	PHLAP92528376	Plasmid vector containing HLA-DMB*01:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:57 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:58 Protein Expression Plasmid Vector	PHLAP92528377	Plasmid vector containing HLA-DMB*01:01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:58 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:59 Protein Expression Plasmid Vector	PHLAP92528378	Plasmid vector containing HLA-DMB*01:01:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:59 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:60 Protein Expression Plasmid Vector	PHLAP92528379	Plasmid vector containing HLA-DMB*01:01:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:60 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:61 Protein Expression Plasmid Vector	PHLAP92528380	Plasmid vector containing HLA-DMB*01:01:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:61 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:62 Protein Expression Plasmid Vector	PHLAP92528381	Plasmid vector containing HLA-DMB*01:01:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:62 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:63 Protein Expression Plasmid Vector	PHLAP92528382	Plasmid vector containing HLA-DMB*01:01:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:63 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:64 Protein Expression Plasmid Vector	PHLAP92528383	Plasmid vector containing HLA-DMB*01:01:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:64 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:65 Protein Expression Plasmid Vector	PHLAP92528384	Plasmid vector containing HLA-DMB*01:01:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:65 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:66 Protein Expression Plasmid Vector	PHLAP92528385	Plasmid vector containing HLA-DMB*01:01:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:66 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:67 Protein Expression Plasmid Vector	PHLAP92528386	Plasmid vector containing HLA-DMB*01:01:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:67 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:68 Protein Expression Plasmid Vector	PHLAP92528387	Plasmid vector containing HLA-DMB*01:01:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:68 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:69 Protein Expression Plasmid Vector	PHLAP92528388	Plasmid vector containing HLA-DMB*01:01:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:69 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:70 Protein Expression Plasmid Vector	PHLAP92528389	Plasmid vector containing HLA-DMB*01:01:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:70 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:71 Protein Expression Plasmid Vector	PHLAP92528390	Plasmid vector containing HLA-DMB*01:01:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:71 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:72 Protein Expression Plasmid Vector	PHLAP92528391	Plasmid vector containing HLA-DMB*01:01:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:72 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:01:01:73 Protein Expression Plasmid Vector	PHLAP92528392	Plasmid vector containing HLA-DMB*01:01:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:73 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:01:01:74 Protein Expression Plasmid Vector	PHLAP92528393	Plasmid vector containing HLA-DMB*01:01:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:01:01:74 protein. This plasmid can be used for constructing HLA-DMB*01:01:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:01:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:02:01:01 Protein Expression Plasmid Vector	PHLAP92528394	Plasmid vector containing HLA-DMB*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:02:01:01 protein. This plasmid can be used for constructing HLA-DMB*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:02:01:02 Protein Expression Plasmid Vector	PHLAP92528395	Plasmid vector containing HLA-DMB*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:02:01:02 protein. This plasmid can be used for constructing HLA-DMB*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:02:01:03 Protein Expression Plasmid Vector	PHLAP92528396	Plasmid vector containing HLA-DMB*01:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:02:01:03 protein. This plasmid can be used for constructing HLA-DMB*01:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:02:01:04 Protein Expression Plasmid Vector	PHLAP92528397	Plasmid vector containing HLA-DMB*01:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:02:01:04 protein. This plasmid can be used for constructing HLA-DMB*01:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:02:01:05 Protein Expression Plasmid Vector	PHLAP92528398	Plasmid vector containing HLA-DMB*01:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:02:01:05 protein. This plasmid can be used for constructing HLA-DMB*01:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:02:01:06 Protein Expression Plasmid Vector	PHLAP92528399	Plasmid vector containing HLA-DMB*01:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:02:01:06 protein. This plasmid can be used for constructing HLA-DMB*01:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:02:01:07 Protein Expression Plasmid Vector	PHLAP92528400	Plasmid vector containing HLA-DMB*01:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:02:01:07 protein. This plasmid can be used for constructing HLA-DMB*01:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:01 Protein Expression Plasmid Vector	PHLAP92528401	Plasmid vector containing HLA-DMB*01:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:01 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:02 Protein Expression Plasmid Vector	PHLAP92528402	Plasmid vector containing HLA-DMB*01:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:02 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:03 Protein Expression Plasmid Vector	PHLAP92528403	Plasmid vector containing HLA-DMB*01:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:03 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:04 Protein Expression Plasmid Vector	PHLAP92528404	Plasmid vector containing HLA-DMB*01:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:04 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:05 Protein Expression Plasmid Vector	PHLAP92528405	Plasmid vector containing HLA-DMB*01:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:05 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:03:01:06 Protein Expression Plasmid Vector	PHLAP92528406	Plasmid vector containing HLA-DMB*01:03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:06 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:07 Protein Expression Plasmid Vector	PHLAP92528407	Plasmid vector containing HLA-DMB*01:03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:07 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:08 Protein Expression Plasmid Vector	PHLAP92528408	Plasmid vector containing HLA-DMB*01:03:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:08 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:09 Protein Expression Plasmid Vector	PHLAP92528409	Plasmid vector containing HLA-DMB*01:03:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:09 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:10 Protein Expression Plasmid Vector	PHLAP925284110	Plasmid vector containing HLA-DMB*01:03:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:10 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:11 Protein Expression Plasmid Vector	PHLAP925284111	Plasmid vector containing HLA-DMB*01:03:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:11 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:12 Protein Expression Plasmid Vector	PHLAP925284112	Plasmid vector containing HLA-DMB*01:03:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:12 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:03:01:13 Protein Expression Plasmid Vector	PHLAP925284113	Plasmid vector containing HLA-DMB*01:03:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:13 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:14 Protein Expression Plasmid Vector	PHLAP925284114	Plasmid vector containing HLA-DMB*01:03:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:14 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:15 Protein Expression Plasmid Vector	PHLAP925284115	Plasmid vector containing HLA-DMB*01:03:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:15 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:16 Protein Expression Plasmid Vector	PHLAP925284116	Plasmid vector containing HLA-DMB*01:03:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:16 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:17 Protein Expression Plasmid Vector	PHLAP925284117	Plasmid vector containing HLA-DMB*01:03:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:17 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:18 Protein Expression Plasmid Vector	PHLAP925284118	Plasmid vector containing HLA-DMB*01:03:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:18 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:19 Protein Expression Plasmid Vector	PHLAP925284119	Plasmid vector containing HLA-DMB*01:03:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:19 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:03:01:20 Protein Expression Plasmid Vector	PHLAP92528420	Plasmid vector containing HLA-DMB*01:03:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:20 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:21 Protein Expression Plasmid Vector	PHLAP92528421	Plasmid vector containing HLA-DMB*01:03:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:21 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:22 Protein Expression Plasmid Vector	PHLAP92528422	Plasmid vector containing HLA-DMB*01:03:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:22 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:23 Protein Expression Plasmid Vector	PHLAP92528423	Plasmid vector containing HLA-DMB*01:03:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:23 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:24 Protein Expression Plasmid Vector	PHLAP92528424	Plasmid vector containing HLA-DMB*01:03:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:24 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:25 Protein Expression Plasmid Vector	PHLAP92528425	Plasmid vector containing HLA-DMB*01:03:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:25 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:26 Protein Expression Plasmid Vector	PHLAP92528426	Plasmid vector containing HLA-DMB*01:03:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:26 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:03:01:27 Protein Expression Plasmid Vector	PHLAP92528427	Plasmid vector containing HLA-DMB*01:03:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:27 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:28 Protein Expression Plasmid Vector	PHLAP92528428	Plasmid vector containing HLA-DMB*01:03:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:28 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:01:29 Protein Expression Plasmid Vector	PHLAP92528429	Plasmid vector containing HLA-DMB*01:03:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:01:29 protein. This plasmid can be used for constructing HLA-DMB*01:03:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:03:02 Protein Expression Plasmid Vector	PHLAP92528430	Plasmid vector containing HLA-DMB*01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:03:02 protein. This plasmid can be used for constructing HLA-DMB*01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:04 Protein Expression Plasmid Vector	PHLAP92528431	Plasmid vector containing HLA-DMB*01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:04 protein. This plasmid can be used for constructing HLA-DMB*01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:05 Protein Expression Plasmid Vector	PHLAP92528432	Plasmid vector containing HLA-DMB*01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:05 protein. This plasmid can be used for constructing HLA-DMB*01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:06 Protein Expression Plasmid Vector	PHLAP92528433	Plasmid vector containing HLA-DMB*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:06 protein. This plasmid can be used for constructing HLA-DMB*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:07:01:01 Protein Expression Plasmid Vector	PHLAP92528434	Plasmid vector containing HLA-DMB*01:07:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:07:01:01 protein. This plasmid can be used for constructing HLA-DMB*01:07:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:07:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:07:01:02 Protein Expression Plasmid Vector	PHLAP92528435	Plasmid vector containing HLA-DMB*01:07:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:07:01:02 protein. This plasmid can be used for constructing HLA-DMB*01:07:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:07:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:07:01:03 Protein Expression Plasmid Vector	PHLAP92528436	Plasmid vector containing HLA-DMB*01:07:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:07:01:03 protein. This plasmid can be used for constructing HLA-DMB*01:07:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:07:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:07:01:04 Protein Expression Plasmid Vector	PHLAP92528437	Plasmid vector containing HLA-DMB*01:07:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:07:01:04 protein. This plasmid can be used for constructing HLA-DMB*01:07:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:07:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:07:01:05 Protein Expression Plasmid Vector	PHLAP92528438	Plasmid vector containing HLA-DMB*01:07:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:07:01:05 protein. This plasmid can be used for constructing HLA-DMB*01:07:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:07:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:07:01:06 Protein Expression Plasmid Vector	PHLAP92528439	Plasmid vector containing HLA-DMB*01:07:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:07:01:06 protein. This plasmid can be used for constructing HLA-DMB*01:07:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:07:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:07:01:07 Protein Expression Plasmid Vector	PHLAP92528440	Plasmid vector containing HLA-DMB*01:07:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:07:01:07 protein. This plasmid can be used for constructing HLA-DMB*01:07:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:07:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DMB*01:07:01:08 Protein Expression Plasmid Vector	PHLAP92528441	Plasmid vector containing HLA-DMB*01:07:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:07:01:08 protein. This plasmid can be used for constructing HLA-DMB*01:07:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:07:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:08 Protein Expression Plasmid Vector	PHLAP92528442	Plasmid vector containing HLA-DMB*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:08 protein. This plasmid can be used for constructing HLA-DMB*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DMB*01:09 Protein Expression Plasmid Vector	PHLAP92528443	Plasmid vector containing HLA-DMB*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DMB*01:09 protein. This plasmid can be used for constructing HLA-DMB*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DMB*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92528444	Plasmid vector containing HLA-DOA*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:01 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92528445	Plasmid vector containing HLA-DOA*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:02 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92528446	Plasmid vector containing HLA-DOA*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:03 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92528447	Plasmid vector containing HLA-DOA*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:04 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92528448	Plasmid vector containing HLA-DOA*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:05 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92528449	Plasmid vector containing HLA-DOA*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:06 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92528450	Plasmid vector containing HLA-DOA*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:07 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:08 Protein Expression Plasmid Vector	PHLAP92528451	Plasmid vector containing HLA-DOA*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:08 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:09 Protein Expression Plasmid Vector	PHLAP92528452	Plasmid vector containing HLA-DOA*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:09 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:10 Protein Expression Plasmid Vector	PHLAP92528453	Plasmid vector containing HLA-DOA*01:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:10 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:11 Protein Expression Plasmid Vector	PHLAP92528454	Plasmid vector containing HLA-DOA*01:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:11 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:01:12 Protein Expression Plasmid Vector	PHLAP92528455	Plasmid vector containing HLA-DOA*01:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:12 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:13 Protein Expression Plasmid Vector	PHLAP92528456	Plasmid vector containing HLA-DOA*01:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:13 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:14 Protein Expression Plasmid Vector	PHLAP92528457	Plasmid vector containing HLA-DOA*01:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:14 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:15 Protein Expression Plasmid Vector	PHLAP92528458	Plasmid vector containing HLA-DOA*01:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:15 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:16 Protein Expression Plasmid Vector	PHLAP92528459	Plasmid vector containing HLA-DOA*01:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:16 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:01:17 Protein Expression Plasmid Vector	PHLAP92528460	Plasmid vector containing HLA-DOA*01:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:01:17 protein. This plasmid can be used for constructing HLA-DOA*01:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:01 Protein Expression Plasmid Vector	PHLAP92528461	Plasmid vector containing HLA-DOA*01:01:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:01 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:02:02 Protein Expression Plasmid Vector	PHLAP92528462	Plasmid vector containing HLA-DOA*01:01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:02 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:03 Protein Expression Plasmid Vector	PHLAP92528463	Plasmid vector containing HLA-DOA*01:01:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:03 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:04 Protein Expression Plasmid Vector	PHLAP92528464	Plasmid vector containing HLA-DOA*01:01:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:04 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:05 Protein Expression Plasmid Vector	PHLAP92528465	Plasmid vector containing HLA-DOA*01:01:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:05 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:06 Protein Expression Plasmid Vector	PHLAP92528466	Plasmid vector containing HLA-DOA*01:01:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:06 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:07 Protein Expression Plasmid Vector	PHLAP92528467	Plasmid vector containing HLA-DOA*01:01:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:07 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:08 Protein Expression Plasmid Vector	PHLAP92528468	Plasmid vector containing HLA-DOA*01:01:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:08 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:02:09 Protein Expression Plasmid Vector	PHLAP92528469	Plasmid vector containing HLA-DOA*01:01:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:09 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:10 Protein Expression Plasmid Vector	PHLAP92528470	Plasmid vector containing HLA-DOA*01:01:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:10 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:11 Protein Expression Plasmid Vector	PHLAP92528471	Plasmid vector containing HLA-DOA*01:01:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:11 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:12 Protein Expression Plasmid Vector	PHLAP92528472	Plasmid vector containing HLA-DOA*01:01:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:12 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:13 Protein Expression Plasmid Vector	PHLAP92528473	Plasmid vector containing HLA-DOA*01:01:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:13 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:14 Protein Expression Plasmid Vector	PHLAP92528474	Plasmid vector containing HLA-DOA*01:01:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:14 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:15 Protein Expression Plasmid Vector	PHLAP92528475	Plasmid vector containing HLA-DOA*01:01:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:15 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:02:16 Protein Expression Plasmid Vector	PHLAP92528476	Plasmid vector containing HLA-DOA*01:01:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:16 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:17 Protein Expression Plasmid Vector	PHLAP92528477	Plasmid vector containing HLA-DOA*01:01:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:17 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:18 Protein Expression Plasmid Vector	PHLAP92528478	Plasmid vector containing HLA-DOA*01:01:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:18 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:19 Protein Expression Plasmid Vector	PHLAP92528479	Plasmid vector containing HLA-DOA*01:01:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:19 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:20 Protein Expression Plasmid Vector	PHLAP92528480	Plasmid vector containing HLA-DOA*01:01:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:20 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:21 Protein Expression Plasmid Vector	PHLAP92528481	Plasmid vector containing HLA-DOA*01:01:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:21 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:22 Protein Expression Plasmid Vector	PHLAP92528482	Plasmid vector containing HLA-DOA*01:01:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:22 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:02:23 Protein Expression Plasmid Vector	PHLAP92528483	Plasmid vector containing HLA-DOA*01:01:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:23 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:24 Protein Expression Plasmid Vector	PHLAP92528484	Plasmid vector containing HLA-DOA*01:01:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:24 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:25 Protein Expression Plasmid Vector	PHLAP92528485	Plasmid vector containing HLA-DOA*01:01:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:25 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:26 Protein Expression Plasmid Vector	PHLAP92528486	Plasmid vector containing HLA-DOA*01:01:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:26 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:27 Protein Expression Plasmid Vector	PHLAP92528487	Plasmid vector containing HLA-DOA*01:01:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:27 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:28 Protein Expression Plasmid Vector	PHLAP92528488	Plasmid vector containing HLA-DOA*01:01:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:28 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:29 Protein Expression Plasmid Vector	PHLAP92528489	Plasmid vector containing HLA-DOA*01:01:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:29 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:02:30 Protein Expression Plasmid Vector	PHLAP92528490	Plasmid vector containing HLA-DOA*01:01:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:30 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:31 Protein Expression Plasmid Vector	PHLAP92528491	Plasmid vector containing HLA-DOA*01:01:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:31 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:32 Protein Expression Plasmid Vector	PHLAP92528492	Plasmid vector containing HLA-DOA*01:01:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:32 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:33 Protein Expression Plasmid Vector	PHLAP92528493	Plasmid vector containing HLA-DOA*01:01:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:33 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:34 Protein Expression Plasmid Vector	PHLAP92528494	Plasmid vector containing HLA-DOA*01:01:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:34 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:35 Protein Expression Plasmid Vector	PHLAP92528495	Plasmid vector containing HLA-DOA*01:01:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:35 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:36 Protein Expression Plasmid Vector	PHLAP92528496	Plasmid vector containing HLA-DOA*01:01:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:36 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:02:37 Protein Expression Plasmid Vector	PHLAP92528497	Plasmid vector containing HLA-DOA*01:01:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:37 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:38 Protein Expression Plasmid Vector	PHLAP92528498	Plasmid vector containing HLA-DOA*01:01:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:38 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:39 Protein Expression Plasmid Vector	PHLAP92528499	Plasmid vector containing HLA-DOA*01:01:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:39 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:40 Protein Expression Plasmid Vector	PHLAP925285000	Plasmid vector containing HLA-DOA*01:01:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:40 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:41 Protein Expression Plasmid Vector	PHLAP925285001	Plasmid vector containing HLA-DOA*01:01:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:41 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:42 Protein Expression Plasmid Vector	PHLAP925285002	Plasmid vector containing HLA-DOA*01:01:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:42 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:43 Protein Expression Plasmid Vector	PHLAP925285003	Plasmid vector containing HLA-DOA*01:01:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:43 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:02:44 Protein Expression Plasmid Vector	PHLAP92528504	Plasmid vector containing HLA-DOA*01:01:02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:44 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:45 Protein Expression Plasmid Vector	PHLAP92528505	Plasmid vector containing HLA-DOA*01:01:02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:45 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:46 Protein Expression Plasmid Vector	PHLAP92528506	Plasmid vector containing HLA-DOA*01:01:02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:46 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:47 Protein Expression Plasmid Vector	PHLAP92528507	Plasmid vector containing HLA-DOA*01:01:02:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:47 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:48 Protein Expression Plasmid Vector	PHLAP92528508	Plasmid vector containing HLA-DOA*01:01:02:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:48 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:49 Protein Expression Plasmid Vector	PHLAP92528509	Plasmid vector containing HLA-DOA*01:01:02:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:49 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:50 Protein Expression Plasmid Vector	PHLAP92528510	Plasmid vector containing HLA-DOA*01:01:02:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:50 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:02:51 Protein Expression Plasmid Vector	PHLAP92528511	Plasmid vector containing HLA-DOA*01:01:02:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:51 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:52 Protein Expression Plasmid Vector	PHLAP92528512	Plasmid vector containing HLA-DOA*01:01:02:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:52 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:53 Protein Expression Plasmid Vector	PHLAP92528513	Plasmid vector containing HLA-DOA*01:01:02:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:53 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:54 Protein Expression Plasmid Vector	PHLAP92528514	Plasmid vector containing HLA-DOA*01:01:02:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:54 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:55 Protein Expression Plasmid Vector	PHLAP92528515	Plasmid vector containing HLA-DOA*01:01:02:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:55 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:56 Protein Expression Plasmid Vector	PHLAP92528516	Plasmid vector containing HLA-DOA*01:01:02:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:56 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:57 Protein Expression Plasmid Vector	PHLAP92528517	Plasmid vector containing HLA-DOA*01:01:02:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:57 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:02:58 Protein Expression Plasmid Vector	PHLAP92528518	Plasmid vector containing HLA-DOA*01:01:02:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:58 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:59 Protein Expression Plasmid Vector	PHLAP92528519	Plasmid vector containing HLA-DOA*01:01:02:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:59 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:60 Protein Expression Plasmid Vector	PHLAP92528520	Plasmid vector containing HLA-DOA*01:01:02:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:60 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:61 Protein Expression Plasmid Vector	PHLAP92528521	Plasmid vector containing HLA-DOA*01:01:02:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:61 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:62 Protein Expression Plasmid Vector	PHLAP92528522	Plasmid vector containing HLA-DOA*01:01:02:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:62 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:63 Protein Expression Plasmid Vector	PHLAP92528523	Plasmid vector containing HLA-DOA*01:01:02:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:63 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:64 Protein Expression Plasmid Vector	PHLAP92528524	Plasmid vector containing HLA-DOA*01:01:02:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:64 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:02:65 Protein Expression Plasmid Vector	PHLAP92528525	Plasmid vector containing HLA-DOA*01:01:02:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:65 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:02:66 Protein Expression Plasmid Vector	PHLAP92528526	Plasmid vector containing HLA-DOA*01:01:02:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:02:66 protein. This plasmid can be used for constructing HLA-DOA*01:01:02:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:02:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:03:01 Protein Expression Plasmid Vector	PHLAP92528527	Plasmid vector containing HLA-DOA*01:01:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:03:01 protein. This plasmid can be used for constructing HLA-DOA*01:01:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:03:02 Protein Expression Plasmid Vector	PHLAP92528528	Plasmid vector containing HLA-DOA*01:01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:03:02 protein. This plasmid can be used for constructing HLA-DOA*01:01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:03:03 Protein Expression Plasmid Vector	PHLAP92528529	Plasmid vector containing HLA-DOA*01:01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:03:03 protein. This plasmid can be used for constructing HLA-DOA*01:01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:03:04 Protein Expression Plasmid Vector	PHLAP92528530	Plasmid vector containing HLA-DOA*01:01:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:03:04 protein. This plasmid can be used for constructing HLA-DOA*01:01:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:03:05 Protein Expression Plasmid Vector	PHLAP92528531	Plasmid vector containing HLA-DOA*01:01:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:03:05 protein. This plasmid can be used for constructing HLA-DOA*01:01:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:03:06 Protein Expression Plasmid Vector	PHLAP92528532	Plasmid vector containing HLA-DOA*01:01:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:03:06 protein. This plasmid can be used for constructing HLA-DOA*01:01:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:03:07 Protein Expression Plasmid Vector	PHLAP92528533	Plasmid vector containing HLA-DOA*01:01:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:03:07 protein. This plasmid can be used for constructing HLA-DOA*01:01:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:03:08 Protein Expression Plasmid Vector	PHLAP92528534	Plasmid vector containing HLA-DOA*01:01:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:03:08 protein. This plasmid can be used for constructing HLA-DOA*01:01:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:01 Protein Expression Plasmid Vector	PHLAP92528535	Plasmid vector containing HLA-DOA*01:01:04:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:01 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:02 Protein Expression Plasmid Vector	PHLAP92528536	Plasmid vector containing HLA-DOA*01:01:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:02 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:03 Protein Expression Plasmid Vector	PHLAP92528537	Plasmid vector containing HLA-DOA*01:01:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:03 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:04 Protein Expression Plasmid Vector	PHLAP92528538	Plasmid vector containing HLA-DOA*01:01:04:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:04 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:04:05 Protein Expression Plasmid Vector	PHLAP92528539	Plasmid vector containing HLA-DOA*01:01:04:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:05 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:06 Protein Expression Plasmid Vector	PHLAP92528540	Plasmid vector containing HLA-DOA*01:01:04:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:06 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:07 Protein Expression Plasmid Vector	PHLAP92528541	Plasmid vector containing HLA-DOA*01:01:04:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:07 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:08 Protein Expression Plasmid Vector	PHLAP92528542	Plasmid vector containing HLA-DOA*01:01:04:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:08 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:09 Protein Expression Plasmid Vector	PHLAP92528543	Plasmid vector containing HLA-DOA*01:01:04:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:09 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:10 Protein Expression Plasmid Vector	PHLAP92528544	Plasmid vector containing HLA-DOA*01:01:04:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:10 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:11 Protein Expression Plasmid Vector	PHLAP92528545	Plasmid vector containing HLA-DOA*01:01:04:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:11 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:04:12 Protein Expression Plasmid Vector	PHLAP92528546	Plasmid vector containing HLA-DOA*01:01:04:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:12 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:13 Protein Expression Plasmid Vector	PHLAP92528547	Plasmid vector containing HLA-DOA*01:01:04:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:13 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:14 Protein Expression Plasmid Vector	PHLAP92528548	Plasmid vector containing HLA-DOA*01:01:04:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:14 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:15 Protein Expression Plasmid Vector	PHLAP92528549	Plasmid vector containing HLA-DOA*01:01:04:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:15 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:16 Protein Expression Plasmid Vector	PHLAP92528550	Plasmid vector containing HLA-DOA*01:01:04:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:16 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:04:17 Protein Expression Plasmid Vector	PHLAP92528551	Plasmid vector containing HLA-DOA*01:01:04:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:04:17 protein. This plasmid can be used for constructing HLA-DOA*01:01:04:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:04:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:05:01 Protein Expression Plasmid Vector	PHLAP92528552	Plasmid vector containing HLA-DOA*01:01:05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:05:01 protein. This plasmid can be used for constructing HLA-DOA*01:01:05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:05:02 Protein Expression Plasmid Vector	PHLAP92528553	Plasmid vector containing HLA-DOA*01:01:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:05:02 protein. This plasmid can be used for constructing HLA-DOA*01:01:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:06 Protein Expression Plasmid Vector	PHLAP92528554	Plasmid vector containing HLA-DOA*01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:06 protein. This plasmid can be used for constructing HLA-DOA*01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:07 Protein Expression Plasmid Vector	PHLAP92528555	Plasmid vector containing HLA-DOA*01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:07 protein. This plasmid can be used for constructing HLA-DOA*01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:08 Protein Expression Plasmid Vector	PHLAP92528556	Plasmid vector containing HLA-DOA*01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:08 protein. This plasmid can be used for constructing HLA-DOA*01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:09 Protein Expression Plasmid Vector	PHLAP92528557	Plasmid vector containing HLA-DOA*01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:09 protein. This plasmid can be used for constructing HLA-DOA*01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:10:01 Protein Expression Plasmid Vector	PHLAP92528558	Plasmid vector containing HLA-DOA*01:01:10:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:10:01 protein. This plasmid can be used for constructing HLA-DOA*01:01:10:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:10:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:10:02 Protein Expression Plasmid Vector	PHLAP92528559	Plasmid vector containing HLA-DOA*01:01:10:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:10:02 protein. This plasmid can be used for constructing HLA-DOA*01:01:10:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:10:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:01:11 Protein Expression Plasmid Vector	PHLAP92528560	Plasmid vector containing HLA-DOA*01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:11 protein. This plasmid can be used for constructing HLA-DOA*01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:12 Protein Expression Plasmid Vector	PHLAP92528561	Plasmid vector containing HLA-DOA*01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:12 protein. This plasmid can be used for constructing HLA-DOA*01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:13 Protein Expression Plasmid Vector	PHLAP92528562	Plasmid vector containing HLA-DOA*01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:13 protein. This plasmid can be used for constructing HLA-DOA*01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:01:14 Protein Expression Plasmid Vector	PHLAP92528563	Plasmid vector containing HLA-DOA*01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:01:14 protein. This plasmid can be used for constructing HLA-DOA*01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:02:01:01 Protein Expression Plasmid Vector	PHLAP92528564	Plasmid vector containing HLA-DOA*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:02:01:01 protein. This plasmid can be used for constructing HLA-DOA*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:02:01:02 Protein Expression Plasmid Vector	PHLAP92528565	Plasmid vector containing HLA-DOA*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:02:01:02 protein. This plasmid can be used for constructing HLA-DOA*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:02:01:03 Protein Expression Plasmid Vector	PHLAP92528566	Plasmid vector containing HLA-DOA*01:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:02:01:03 protein. This plasmid can be used for constructing HLA-DOA*01:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:03 Protein Expression Plasmid Vector	PHLAP92528567	Plasmid vector containing HLA-DOA*01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:03 protein. This plasmid can be used for constructing HLA-DOA*01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:04N Protein Expression Plasmid Vector	PHLAP92528568	Plasmid vector containing HLA-DOA*01:04N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:04N protein. This plasmid can be used for constructing HLA-DOA*01:04N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:04N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:05 Protein Expression Plasmid Vector	PHLAP92528569	Plasmid vector containing HLA-DOA*01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:05 protein. This plasmid can be used for constructing HLA-DOA*01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:06 Protein Expression Plasmid Vector	PHLAP92528570	Plasmid vector containing HLA-DOA*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:06 protein. This plasmid can be used for constructing HLA-DOA*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:07 Protein Expression Plasmid Vector	PHLAP92528571	Plasmid vector containing HLA-DOA*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:07 protein. This plasmid can be used for constructing HLA-DOA*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:08 Protein Expression Plasmid Vector	PHLAP92528572	Plasmid vector containing HLA-DOA*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:08 protein. This plasmid can be used for constructing HLA-DOA*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:09 Protein Expression Plasmid Vector	PHLAP92528573	Plasmid vector containing HLA-DOA*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:09 protein. This plasmid can be used for constructing HLA-DOA*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:10:01:01 Protein Expression Plasmid Vector	PHLAP92528574	Plasmid vector containing HLA-DOA*01:10:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:10:01:01 protein. This plasmid can be used for constructing HLA-DOA*01:10:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:10:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:10:01:02 Protein Expression Plasmid Vector	PHLAP92528575	Plasmid vector containing HLA-DOA*01:10:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:10:01:02 protein. This plasmid can be used for constructing HLA-DOA*01:10:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:10:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:11 Protein Expression Plasmid Vector	PHLAP92528576	Plasmid vector containing HLA-DOA*01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:11 protein. This plasmid can be used for constructing HLA-DOA*01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:12 Protein Expression Plasmid Vector	PHLAP92528577	Plasmid vector containing HLA-DOA*01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:12 protein. This plasmid can be used for constructing HLA-DOA*01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:13 Protein Expression Plasmid Vector	PHLAP92528578	Plasmid vector containing HLA-DOA*01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:13 protein. This plasmid can be used for constructing HLA-DOA*01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:14 Protein Expression Plasmid Vector	PHLAP92528579	Plasmid vector containing HLA-DOA*01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:14 protein. This plasmid can be used for constructing HLA-DOA*01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:15 Protein Expression Plasmid Vector	PHLAP92528580	Plasmid vector containing HLA-DOA*01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:15 protein. This plasmid can be used for constructing HLA-DOA*01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:16 Protein Expression Plasmid Vector	PHLAP92528581	Plasmid vector containing HLA-DOA*01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:16 protein. This plasmid can be used for constructing HLA-DOA*01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOA*01:17 Protein Expression Plasmid Vector	PHLAP92528582	Plasmid vector containing HLA-DOA*01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:17 protein. This plasmid can be used for constructing HLA-DOA*01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOA*01:18 Protein Expression Plasmid Vector	PHLAP92528583	Plasmid vector containing HLA-DOA*01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOA*01:18 protein. This plasmid can be used for constructing HLA-DOA*01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOA*01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:01 Protein Expression Plasmid Vector	PHLAP92528584	Plasmid vector containing HLA-DOB*01:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:01 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:02 Protein Expression Plasmid Vector	PHLAP92528585	Plasmid vector containing HLA-DOB*01:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:02 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:03 Protein Expression Plasmid Vector	PHLAP92528586	Plasmid vector containing HLA-DOB*01:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:03 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:04 Protein Expression Plasmid Vector	PHLAP92528587	Plasmid vector containing HLA-DOB*01:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:04 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:05 Protein Expression Plasmid Vector	PHLAP92528588	Plasmid vector containing HLA-DOB*01:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:05 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:06 Protein Expression Plasmid Vector	PHLAP92528589	Plasmid vector containing HLA-DOB*01:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:06 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:01:01:07 Protein Expression Plasmid Vector	PHLAP92528590	Plasmid vector containing HLA-DOB*01:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:07 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:08 Protein Expression Plasmid Vector	PHLAP92528591	Plasmid vector containing HLA-DOB*01:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:08 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:09 Protein Expression Plasmid Vector	PHLAP92528592	Plasmid vector containing HLA-DOB*01:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:09 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:10 Protein Expression Plasmid Vector	PHLAP92528593	Plasmid vector containing HLA-DOB*01:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:10 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:11 Protein Expression Plasmid Vector	PHLAP92528594	Plasmid vector containing HLA-DOB*01:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:11 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:12 Protein Expression Plasmid Vector	PHLAP92528595	Plasmid vector containing HLA-DOB*01:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:12 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:13 Protein Expression Plasmid Vector	PHLAP92528596	Plasmid vector containing HLA-DOB*01:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:13 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:01:01:14 Protein Expression Plasmid Vector	PHLAP92528597	Plasmid vector containing HLA-DOB*01:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:14 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:15 Protein Expression Plasmid Vector	PHLAP92528598	Plasmid vector containing HLA-DOB*01:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:15 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:16 Protein Expression Plasmid Vector	PHLAP92528599	Plasmid vector containing HLA-DOB*01:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:16 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:17 Protein Expression Plasmid Vector	PHLAP925286000	Plasmid vector containing HLA-DOB*01:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:17 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:18 Protein Expression Plasmid Vector	PHLAP925286001	Plasmid vector containing HLA-DOB*01:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:18 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:19 Protein Expression Plasmid Vector	PHLAP925286002	Plasmid vector containing HLA-DOB*01:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:19 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:20 Protein Expression Plasmid Vector	PHLAP925286003	Plasmid vector containing HLA-DOB*01:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:20 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:01:01:21 Protein Expression Plasmid Vector	PHLAP92528604	Plasmid vector containing HLA-DOB*01:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:21 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:22 Protein Expression Plasmid Vector	PHLAP92528605	Plasmid vector containing HLA-DOB*01:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:22 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:23 Protein Expression Plasmid Vector	PHLAP92528606	Plasmid vector containing HLA-DOB*01:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:23 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:24 Protein Expression Plasmid Vector	PHLAP92528607	Plasmid vector containing HLA-DOB*01:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:24 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:25 Protein Expression Plasmid Vector	PHLAP92528608	Plasmid vector containing HLA-DOB*01:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:25 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:26 Protein Expression Plasmid Vector	PHLAP92528609	Plasmid vector containing HLA-DOB*01:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:26 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:27 Protein Expression Plasmid Vector	PHLAP92528610	Plasmid vector containing HLA-DOB*01:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:27 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:01:01:28 Protein Expression Plasmid Vector	PHLAP92528611	Plasmid vector containing HLA-DOB*01:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:28 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:29 Protein Expression Plasmid Vector	PHLAP92528612	Plasmid vector containing HLA-DOB*01:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:29 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:30 Protein Expression Plasmid Vector	PHLAP92528613	Plasmid vector containing HLA-DOB*01:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:30 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:31 Protein Expression Plasmid Vector	PHLAP92528614	Plasmid vector containing HLA-DOB*01:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:31 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:32 Protein Expression Plasmid Vector	PHLAP92528615	Plasmid vector containing HLA-DOB*01:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:32 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:33 Protein Expression Plasmid Vector	PHLAP92528616	Plasmid vector containing HLA-DOB*01:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:33 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:34 Protein Expression Plasmid Vector	PHLAP92528617	Plasmid vector containing HLA-DOB*01:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:34 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:01:01:35 Protein Expression Plasmid Vector	PHLAP92528618	Plasmid vector containing HLA-DOB*01:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:35 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:36 Protein Expression Plasmid Vector	PHLAP92528619	Plasmid vector containing HLA-DOB*01:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:36 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:37 Protein Expression Plasmid Vector	PHLAP92528620	Plasmid vector containing HLA-DOB*01:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:37 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:38 Protein Expression Plasmid Vector	PHLAP92528621	Plasmid vector containing HLA-DOB*01:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:38 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:39 Protein Expression Plasmid Vector	PHLAP92528622	Plasmid vector containing HLA-DOB*01:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:39 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:40 Protein Expression Plasmid Vector	PHLAP92528623	Plasmid vector containing HLA-DOB*01:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:40 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:41 Protein Expression Plasmid Vector	PHLAP92528624	Plasmid vector containing HLA-DOB*01:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:41 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:01:01:42 Protein Expression Plasmid Vector	PHLAP92528625	Plasmid vector containing HLA-DOB*01:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:42 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:43 Protein Expression Plasmid Vector	PHLAP92528626	Plasmid vector containing HLA-DOB*01:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:43 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:44 Protein Expression Plasmid Vector	PHLAP92528627	Plasmid vector containing HLA-DOB*01:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:44 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:01:45 Protein Expression Plasmid Vector	PHLAP92528628	Plasmid vector containing HLA-DOB*01:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:01:45 protein. This plasmid can be used for constructing HLA-DOB*01:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:02 Protein Expression Plasmid Vector	PHLAP92528629	Plasmid vector containing HLA-DOB*01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:02 protein. This plasmid can be used for constructing HLA-DOB*01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:01 Protein Expression Plasmid Vector	PHLAP92528630	Plasmid vector containing HLA-DOB*01:01:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:01 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:02 Protein Expression Plasmid Vector	PHLAP92528631	Plasmid vector containing HLA-DOB*01:01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:02 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:01:03:03 Protein Expression Plasmid Vector	PHLAP92528632	Plasmid vector containing HLA-DOB*01:01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:03 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:04 Protein Expression Plasmid Vector	PHLAP92528633	Plasmid vector containing HLA-DOB*01:01:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:04 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:05 Protein Expression Plasmid Vector	PHLAP92528634	Plasmid vector containing HLA-DOB*01:01:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:05 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:06 Protein Expression Plasmid Vector	PHLAP92528635	Plasmid vector containing HLA-DOB*01:01:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:06 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:07 Protein Expression Plasmid Vector	PHLAP92528636	Plasmid vector containing HLA-DOB*01:01:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:07 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:08 Protein Expression Plasmid Vector	PHLAP92528637	Plasmid vector containing HLA-DOB*01:01:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:08 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:09 Protein Expression Plasmid Vector	PHLAP92528638	Plasmid vector containing HLA-DOB*01:01:03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:09 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:01:03:10 Protein Expression Plasmid Vector	PHLAP92528639	Plasmid vector containing HLA-DOB*01:01:03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:10 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:11 Protein Expression Plasmid Vector	PHLAP92528640	Plasmid vector containing HLA-DOB*01:01:03:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:11 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:12 Protein Expression Plasmid Vector	PHLAP92528641	Plasmid vector containing HLA-DOB*01:01:03:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:12 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:13 Protein Expression Plasmid Vector	PHLAP92528642	Plasmid vector containing HLA-DOB*01:01:03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:13 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:14 Protein Expression Plasmid Vector	PHLAP92528643	Plasmid vector containing HLA-DOB*01:01:03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:14 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:03:15 Protein Expression Plasmid Vector	PHLAP92528644	Plasmid vector containing HLA-DOB*01:01:03:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:03:15 protein. This plasmid can be used for constructing HLA-DOB*01:01:03:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:03:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:04 Protein Expression Plasmid Vector	PHLAP92528645	Plasmid vector containing HLA-DOB*01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:04 protein. This plasmid can be used for constructing HLA-DOB*01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:01:05:01 Protein Expression Plasmid Vector	PHLAP92528646	Plasmid vector containing HLA-DOB*01:01:05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:05:01 protein. This plasmid can be used for constructing HLA-DOB*01:01:05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:05:02 Protein Expression Plasmid Vector	PHLAP92528647	Plasmid vector containing HLA-DOB*01:01:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:05:02 protein. This plasmid can be used for constructing HLA-DOB*01:01:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:06 Protein Expression Plasmid Vector	PHLAP92528648	Plasmid vector containing HLA-DOB*01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:06 protein. This plasmid can be used for constructing HLA-DOB*01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:01:07 Protein Expression Plasmid Vector	PHLAP92528649	Plasmid vector containing HLA-DOB*01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:01:07 protein. This plasmid can be used for constructing HLA-DOB*01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:02:01:01 Protein Expression Plasmid Vector	PHLAP92528650	Plasmid vector containing HLA-DOB*01:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:02:01:01 protein. This plasmid can be used for constructing HLA-DOB*01:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:02:01:02 Protein Expression Plasmid Vector	PHLAP92528651	Plasmid vector containing HLA-DOB*01:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:02:01:02 protein. This plasmid can be used for constructing HLA-DOB*01:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:02:01:03 Protein Expression Plasmid Vector	PHLAP92528652	Plasmid vector containing HLA-DOB*01:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:02:01:03 protein. This plasmid can be used for constructing HLA-DOB*01:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:02:01:04 Protein Expression Plasmid Vector	PHLAP92528653	Plasmid vector containing HLA-DOB*01:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:02:01:04 protein. This plasmid can be used for constructing HLA-DOB*01:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:02:02 Protein Expression Plasmid Vector	PHLAP92528654	Plasmid vector containing HLA-DOB*01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:02:02 protein. This plasmid can be used for constructing HLA-DOB*01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:03:01:01 Protein Expression Plasmid Vector	PHLAP92528655	Plasmid vector containing HLA-DOB*01:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:03:01:01 protein. This plasmid can be used for constructing HLA-DOB*01:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:03:01:02 Protein Expression Plasmid Vector	PHLAP92528656	Plasmid vector containing HLA-DOB*01:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:03:01:02 protein. This plasmid can be used for constructing HLA-DOB*01:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:03:01:03 Protein Expression Plasmid Vector	PHLAP92528657	Plasmid vector containing HLA-DOB*01:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:03:01:03 protein. This plasmid can be used for constructing HLA-DOB*01:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:03:01:04 Protein Expression Plasmid Vector	PHLAP92528658	Plasmid vector containing HLA-DOB*01:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:03:01:04 protein. This plasmid can be used for constructing HLA-DOB*01:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:03:02 Protein Expression Plasmid Vector	PHLAP92528659	Plasmid vector containing HLA-DOB*01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:03:02 protein. This plasmid can be used for constructing HLA-DOB*01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:04:01:01 Protein Expression Plasmid Vector	PHLAP92528660	Plasmid vector containing HLA-DOB*01:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:04:01:01 protein. This plasmid can be used for constructing HLA-DOB*01:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:04:01:02 Protein Expression Plasmid Vector	PHLAP92528661	Plasmid vector containing HLA-DOB*01:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:04:01:02 protein. This plasmid can be used for constructing HLA-DOB*01:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:04:01:03 Protein Expression Plasmid Vector	PHLAP92528662	Plasmid vector containing HLA-DOB*01:04:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:04:01:03 protein. This plasmid can be used for constructing HLA-DOB*01:04:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:04:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:04:02:01 Protein Expression Plasmid Vector	PHLAP92528663	Plasmid vector containing HLA-DOB*01:04:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:04:02:01 protein. This plasmid can be used for constructing HLA-DOB*01:04:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:04:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:04:02:02 Protein Expression Plasmid Vector	PHLAP92528664	Plasmid vector containing HLA-DOB*01:04:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:04:02:02 protein. This plasmid can be used for constructing HLA-DOB*01:04:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:04:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:04:03:01 Protein Expression Plasmid Vector	PHLAP92528665	Plasmid vector containing HLA-DOB*01:04:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:04:03:01 protein. This plasmid can be used for constructing HLA-DOB*01:04:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:04:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:04:03:02 Protein Expression Plasmid Vector	PHLAP92528666	Plasmid vector containing HLA-DOB*01:04:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:04:03:02 protein. This plasmid can be used for constructing HLA-DOB*01:04:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:04:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:04:03:03 Protein Expression Plasmid Vector	PHLAP92528667	Plasmid vector containing HLA-DOB*01:04:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:04:03:03 protein. This plasmid can be used for constructing HLA-DOB*01:04:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:04:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:05:01:01 Protein Expression Plasmid Vector	PHLAP92528668	Plasmid vector containing HLA-DOB*01:05:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:05:01:01 protein. This plasmid can be used for constructing HLA-DOB*01:05:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:05:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:05:01:02 Protein Expression Plasmid Vector	PHLAP92528669	Plasmid vector containing HLA-DOB*01:05:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:05:01:02 protein. This plasmid can be used for constructing HLA-DOB*01:05:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:05:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:06 Protein Expression Plasmid Vector	PHLAP92528670	Plasmid vector containing HLA-DOB*01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:06 protein. This plasmid can be used for constructing HLA-DOB*01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:07 Protein Expression Plasmid Vector	PHLAP92528671	Plasmid vector containing HLA-DOB*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:07 protein. This plasmid can be used for constructing HLA-DOB*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:08 Protein Expression Plasmid Vector	PHLAP92528672	Plasmid vector containing HLA-DOB*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:08 protein. This plasmid can be used for constructing HLA-DOB*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:09 Protein Expression Plasmid Vector	PHLAP92528673	Plasmid vector containing HLA-DOB*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:09 protein. This plasmid can be used for constructing HLA-DOB*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:10:01:01 Protein Expression Plasmid Vector	PHLAP92528674	Plasmid vector containing HLA-DOB*01:10:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:10:01:01 protein. This plasmid can be used for constructing HLA-DOB*01:10:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:10:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:10:01:02 Protein Expression Plasmid Vector	PHLAP92528675	Plasmid vector containing HLA-DOB*01:10:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:10:01:02 protein. This plasmid can be used for constructing HLA-DOB*01:10:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:10:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:11 Protein Expression Plasmid Vector	PHLAP92528676	Plasmid vector containing HLA-DOB*01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:11 protein. This plasmid can be used for constructing HLA-DOB*01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:12 Protein Expression Plasmid Vector	PHLAP92528677	Plasmid vector containing HLA-DOB*01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:12 protein. This plasmid can be used for constructing HLA-DOB*01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:13 Protein Expression Plasmid Vector	PHLAP92528678	Plasmid vector containing HLA-DOB*01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:13 protein. This plasmid can be used for constructing HLA-DOB*01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:14 Protein Expression Plasmid Vector	PHLAP92528679	Plasmid vector containing HLA-DOB*01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:14 protein. This plasmid can be used for constructing HLA-DOB*01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:15 Protein Expression Plasmid Vector	PHLAP92528680	Plasmid vector containing HLA-DOB*01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:15 protein. This plasmid can be used for constructing HLA-DOB*01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:16 Protein Expression Plasmid Vector	PHLAP92528681	Plasmid vector containing HLA-DOB*01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:16 protein. This plasmid can be used for constructing HLA-DOB*01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DOB*01:17 Protein Expression Plasmid Vector	PHLAP92528682	Plasmid vector containing HLA-DOB*01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:17 protein. This plasmid can be used for constructing HLA-DOB*01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:18N Protein Expression Plasmid Vector	PHLAP92528683	Plasmid vector containing HLA-DOB*01:18N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:18N protein. This plasmid can be used for constructing HLA-DOB*01:18N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:18N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:19 Protein Expression Plasmid Vector	PHLAP92528684	Plasmid vector containing HLA-DOB*01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:19 protein. This plasmid can be used for constructing HLA-DOB*01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:20 Protein Expression Plasmid Vector	PHLAP92528685	Plasmid vector containing HLA-DOB*01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:20 protein. This plasmid can be used for constructing HLA-DOB*01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DOB*01:21 Protein Expression Plasmid Vector	PHLAP92528686	Plasmid vector containing HLA-DOB*01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DOB*01:21 protein. This plasmid can be used for constructing HLA-DOB*01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DOB*01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:01 Protein Expression Plasmid Vector	PHLAP92528687	Plasmid vector containing HLA-DPA1*01:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:01 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:02 Protein Expression Plasmid Vector	PHLAP92528688	Plasmid vector containing HLA-DPA1*01:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:02 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:03 Protein Expression Plasmid Vector	PHLAP92528689	Plasmid vector containing HLA-DPA1*01:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:03 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:04 Protein Expression Plasmid Vector	PHLAP92528690	Plasmid vector containing HLA-DPA1*01:03:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:04 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:05 Protein Expression Plasmid Vector	PHLAP92528691	Plasmid vector containing HLA-DPA1*01:03:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:05 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:06 Protein Expression Plasmid Vector	PHLAP92528692	Plasmid vector containing HLA-DPA1*01:03:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:06 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:07 Protein Expression Plasmid Vector	PHLAP92528693	Plasmid vector containing HLA-DPA1*01:03:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:07 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:08 Protein Expression Plasmid Vector	PHLAP92528694	Plasmid vector containing HLA-DPA1*01:03:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:08 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:09 Protein Expression Plasmid Vector	PHLAP92528695	Plasmid vector containing HLA-DPA1*01:03:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:09 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:10 Protein Expression Plasmid Vector	PHLAP92528696	Plasmid vector containing HLA-DPA1*01:03:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:10 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:100 Protein Expression Plasmid Vector	PHLAP92528697	Plasmid vector containing HLA-DPA1*01:03:01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:100 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:101Q Protein Expression Plasmid Vector	PHLAP92528698	Plasmid vector containing HLA-DPA1*01:03:01:101Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:101Q protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:101Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:101Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:102 Protein Expression Plasmid Vector	PHLAP92528699	Plasmid vector containing HLA-DPA1*01:03:01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:102 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:11 Protein Expression Plasmid Vector	PHLAP92528700	Plasmid vector containing HLA-DPA1*01:03:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:11 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:12 Protein Expression Plasmid Vector	PHLAP92528701	Plasmid vector containing HLA-DPA1*01:03:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:12 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:13 Protein Expression Plasmid Vector	PHLAP92528702	Plasmid vector containing HLA-DPA1*01:03:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:13 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:14 Protein Expression Plasmid Vector	PHLAP92528703	Plasmid vector containing HLA-DPA1*01:03:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:14 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:15 Protein Expression Plasmid Vector	PHLAP92528704	Plasmid vector containing HLA-DPA1*01:03:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:15 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:16 Protein Expression Plasmid Vector	PHLAP92528705	Plasmid vector containing HLA-DPA1*01:03:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:16 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:17 Protein Expression Plasmid Vector	PHLAP92528706	Plasmid vector containing HLA-DPA1*01:03:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:17 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:18Q Protein Expression Plasmid Vector	PHLAP92528707	Plasmid vector containing HLA-DPA1*01:03:01:18Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:18Q protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:18Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:18Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:19 Protein Expression Plasmid Vector	PHLAP92528708	Plasmid vector containing HLA-DPA1*01:03:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:19 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:20 Protein Expression Plasmid Vector	PHLAP92528709	Plasmid vector containing HLA-DPA1*01:03:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:20 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:21 Protein Expression Plasmid Vector	PHLAP92528710	Plasmid vector containing HLA-DPA1*01:03:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:21 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:22 Protein Expression Plasmid Vector	PHLAP92528711	Plasmid vector containing HLA-DPA1*01:03:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:22 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:23 Protein Expression Plasmid Vector	PHLAP92528712	Plasmid vector containing HLA-DPA1*01:03:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:23 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:24 Protein Expression Plasmid Vector	PHLAP92528713	Plasmid vector containing HLA-DPA1*01:03:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:24 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:25 Protein Expression Plasmid Vector	PHLAP92528714	Plasmid vector containing HLA-DPA1*01:03:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:25 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:26 Protein Expression Plasmid Vector	PHLAP92528715	Plasmid vector containing HLA-DPA1*01:03:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:26 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:27 Protein Expression Plasmid Vector	PHLAP92528716	Plasmid vector containing HLA-DPA1*01:03:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:27 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:28 Protein Expression Plasmid Vector	PHLAP92528717	Plasmid vector containing HLA-DPA1*01:03:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:28 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:29 Protein Expression Plasmid Vector	PHLAP92528718	Plasmid vector containing HLA-DPA1*01:03:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:29 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:30 Protein Expression Plasmid Vector	PHLAP92528719	Plasmid vector containing HLA-DPA1*01:03:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:30 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:31 Protein Expression Plasmid Vector	PHLAP92528720	Plasmid vector containing HLA-DPA1*01:03:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:31 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:32 Protein Expression Plasmid Vector	PHLAP92528721	Plasmid vector containing HLA-DPA1*01:03:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:32 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:33 Protein Expression Plasmid Vector	PHLAP92528722	Plasmid vector containing HLA-DPA1*01:03:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:33 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:34 Protein Expression Plasmid Vector	PHLAP92528723	Plasmid vector containing HLA-DPA1*01:03:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:34 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:35 Protein Expression Plasmid Vector	PHLAP92528724	Plasmid vector containing HLA-DPA1*01:03:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:35 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:36 Protein Expression Plasmid Vector	PHLAP92528725	Plasmid vector containing HLA-DPA1*01:03:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:36 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:37 Protein Expression Plasmid Vector	PHLAP92528726	Plasmid vector containing HLA-DPA1*01:03:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:37 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:38 Protein Expression Plasmid Vector	PHLAP92528727	Plasmid vector containing HLA-DPA1*01:03:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:38 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:39 Protein Expression Plasmid Vector	PHLAP92528728	Plasmid vector containing HLA-DPA1*01:03:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:39 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:40 Protein Expression Plasmid Vector	PHLAP92528729	Plasmid vector containing HLA-DPA1*01:03:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:40 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:41 Protein Expression Plasmid Vector	PHLAP92528730	Plasmid vector containing HLA-DPA1*01:03:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:41 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:42 Protein Expression Plasmid Vector	PHLAP925287321	Plasmid vector containing HLA-DPA1*01:03:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:42 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:43 Protein Expression Plasmid Vector	PHLAP925287322	Plasmid vector containing HLA-DPA1*01:03:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:43 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:44 Protein Expression Plasmid Vector	PHLAP925287323	Plasmid vector containing HLA-DPA1*01:03:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:44 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:45 Protein Expression Plasmid Vector	PHLAP925287324	Plasmid vector containing HLA-DPA1*01:03:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:45 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:46 Protein Expression Plasmid Vector	PHLAP925287325	Plasmid vector containing HLA-DPA1*01:03:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:46 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:47 Protein Expression Plasmid Vector	PHLAP925287326	Plasmid vector containing HLA-DPA1*01:03:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:47 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:48 Protein Expression Plasmid Vector	PHLAP925287327	Plasmid vector containing HLA-DPA1*01:03:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:48 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:49 Protein Expression Plasmid Vector	PHLAP92528738	Plasmid vector containing HLA-DPA1*01:03:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:49 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:50 Protein Expression Plasmid Vector	PHLAP92528739	Plasmid vector containing HLA-DPA1*01:03:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:50 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:51 Protein Expression Plasmid Vector	PHLAP92528740	Plasmid vector containing HLA-DPA1*01:03:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:51 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:52 Protein Expression Plasmid Vector	PHLAP92528741	Plasmid vector containing HLA-DPA1*01:03:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:52 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:53 Protein Expression Plasmid Vector	PHLAP92528742	Plasmid vector containing HLA-DPA1*01:03:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:53 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:54 Protein Expression Plasmid Vector	PHLAP92528743	Plasmid vector containing HLA-DPA1*01:03:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:54 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:55 Protein Expression Plasmid Vector	PHLAP92528744	Plasmid vector containing HLA-DPA1*01:03:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:55 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:56 Protein Expression Plasmid Vector	PHLAP92528745	Plasmid vector containing HLA-DPA1*01:03:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:56 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:57 Protein Expression Plasmid Vector	PHLAP92528746	Plasmid vector containing HLA-DPA1*01:03:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:57 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:58 Protein Expression Plasmid Vector	PHLAP92528747	Plasmid vector containing HLA-DPA1*01:03:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:58 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:59 Protein Expression Plasmid Vector	PHLAP92528748	Plasmid vector containing HLA-DPA1*01:03:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:59 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:60 Protein Expression Plasmid Vector	PHLAP92528749	Plasmid vector containing HLA-DPA1*01:03:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:60 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:61 Protein Expression Plasmid Vector	PHLAP92528750	Plasmid vector containing HLA-DPA1*01:03:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:61 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:62 Protein Expression Plasmid Vector	PHLAP92528751	Plasmid vector containing HLA-DPA1*01:03:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:62 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:63 Protein Expression Plasmid Vector	PHLAP92528752	Plasmid vector containing HLA-DPA1*01:03:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:63 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:64 Protein Expression Plasmid Vector	PHLAP92528753	Plasmid vector containing HLA-DPA1*01:03:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:64 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:65 Protein Expression Plasmid Vector	PHLAP92528754	Plasmid vector containing HLA-DPA1*01:03:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:65 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:66 Protein Expression Plasmid Vector	PHLAP92528755	Plasmid vector containing HLA-DPA1*01:03:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:66 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:67 Protein Expression Plasmid Vector	PHLAP92528756	Plasmid vector containing HLA-DPA1*01:03:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:67 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:68 Protein Expression Plasmid Vector	PHLAP92528757	Plasmid vector containing HLA-DPA1*01:03:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:68 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:69 Protein Expression Plasmid Vector	PHLAP92528758	Plasmid vector containing HLA-DPA1*01:03:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:69 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:70 Protein Expression Plasmid Vector	PHLAP92528759	Plasmid vector containing HLA-DPA1*01:03:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:70 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:71 Protein Expression Plasmid Vector	PHLAP92528760	Plasmid vector containing HLA-DPA1*01:03:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:71 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:72 Protein Expression Plasmid Vector	PHLAP92528761	Plasmid vector containing HLA-DPA1*01:03:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:72 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:73 Protein Expression Plasmid Vector	PHLAP92528762	Plasmid vector containing HLA-DPA1*01:03:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:73 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:74 Protein Expression Plasmid Vector	PHLAP92528763	Plasmid vector containing HLA-DPA1*01:03:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:74 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:75 Protein Expression Plasmid Vector	PHLAP92528764	Plasmid vector containing HLA-DPA1*01:03:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:75 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:76 Protein Expression Plasmid Vector	PHLAP92528765	Plasmid vector containing HLA-DPA1*01:03:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:76 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:77 Protein Expression Plasmid Vector	PHLAP92528766	Plasmid vector containing HLA-DPA1*01:03:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:77 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:78 Protein Expression Plasmid Vector	PHLAP92528767	Plasmid vector containing HLA-DPA1*01:03:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:78 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:79 Protein Expression Plasmid Vector	PHLAP92528768	Plasmid vector containing HLA-DPA1*01:03:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:79 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:80 Protein Expression Plasmid Vector	PHLAP92528769	Plasmid vector containing HLA-DPA1*01:03:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:80 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:81 Protein Expression Plasmid Vector	PHLAP92528770	Plasmid vector containing HLA-DPA1*01:03:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:81 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:82 Protein Expression Plasmid Vector	PHLAP92528771	Plasmid vector containing HLA-DPA1*01:03:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:82 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:83 Protein Expression Plasmid Vector	PHLAP92528772	Plasmid vector containing HLA-DPA1*01:03:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:83 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:84 Protein Expression Plasmid Vector	PHLAP925287773	Plasmid vector containing HLA-DPA1*01:03:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:84 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:85 Protein Expression Plasmid Vector	PHLAP925287774	Plasmid vector containing HLA-DPA1*01:03:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:85 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:86 Protein Expression Plasmid Vector	PHLAP925287775	Plasmid vector containing HLA-DPA1*01:03:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:86 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:87 Protein Expression Plasmid Vector	PHLAP925287776	Plasmid vector containing HLA-DPA1*01:03:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:87 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:88 Protein Expression Plasmid Vector	PHLAP925287777	Plasmid vector containing HLA-DPA1*01:03:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:88 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:89 Protein Expression Plasmid Vector	PHLAP925287778	Plasmid vector containing HLA-DPA1*01:03:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:89 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:90 Protein Expression Plasmid Vector	PHLAP925287779	Plasmid vector containing HLA-DPA1*01:03:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:90 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:91 Protein Expression Plasmid Vector	PHLAP92528780	Plasmid vector containing HLA-DPA1*01:03:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:91 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:92 Protein Expression Plasmid Vector	PHLAP92528781	Plasmid vector containing HLA-DPA1*01:03:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:92 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:93 Protein Expression Plasmid Vector	PHLAP92528782	Plasmid vector containing HLA-DPA1*01:03:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:93 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:94 Protein Expression Plasmid Vector	PHLAP92528783	Plasmid vector containing HLA-DPA1*01:03:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:94 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:95 Protein Expression Plasmid Vector	PHLAP92528784	Plasmid vector containing HLA-DPA1*01:03:01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:95 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:96 Protein Expression Plasmid Vector	PHLAP92528785	Plasmid vector containing HLA-DPA1*01:03:01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:96 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:97 Protein Expression Plasmid Vector	PHLAP92528786	Plasmid vector containing HLA-DPA1*01:03:01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:97 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:01:98 Protein Expression Plasmid Vector	PHLAP92528787	Plasmid vector containing HLA-DPA1*01:03:01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:98 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:01:99 Protein Expression Plasmid Vector	PHLAP92528788	Plasmid vector containing HLA-DPA1*01:03:01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:01:99 protein. This plasmid can be used for constructing HLA-DPA1*01:03:01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:02 Protein Expression Plasmid Vector	PHLAP92528789	Plasmid vector containing HLA-DPA1*01:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:02 protein. This plasmid can be used for constructing HLA-DPA1*01:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:03 Protein Expression Plasmid Vector	PHLAP92528790	Plasmid vector containing HLA-DPA1*01:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:03 protein. This plasmid can be used for constructing HLA-DPA1*01:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:04 Protein Expression Plasmid Vector	PHLAP92528791	Plasmid vector containing HLA-DPA1*01:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:04 protein. This plasmid can be used for constructing HLA-DPA1*01:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:05 Protein Expression Plasmid Vector	PHLAP92528792	Plasmid vector containing HLA-DPA1*01:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:05 protein. This plasmid can be used for constructing HLA-DPA1*01:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:06 Protein Expression Plasmid Vector	PHLAP92528793	Plasmid vector containing HLA-DPA1*01:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:06 protein. This plasmid can be used for constructing HLA-DPA1*01:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:07 Protein Expression Plasmid Vector	PHLAP92528794	Plasmid vector containing HLA-DPA1*01:03:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:07 protein. This plasmid can be used for constructing HLA-DPA1*01:03:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:08 Protein Expression Plasmid Vector	PHLAP92528795	Plasmid vector containing HLA-DPA1*01:03:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:08 protein. This plasmid can be used for constructing HLA-DPA1*01:03:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:09 Protein Expression Plasmid Vector	PHLAP92528796	Plasmid vector containing HLA-DPA1*01:03:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:09 protein. This plasmid can be used for constructing HLA-DPA1*01:03:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:10 Protein Expression Plasmid Vector	PHLAP92528797	Plasmid vector containing HLA-DPA1*01:03:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:10 protein. This plasmid can be used for constructing HLA-DPA1*01:03:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:11 Protein Expression Plasmid Vector	PHLAP92528798	Plasmid vector containing HLA-DPA1*01:03:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:11 protein. This plasmid can be used for constructing HLA-DPA1*01:03:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:12 Protein Expression Plasmid Vector	PHLAP92528799	Plasmid vector containing HLA-DPA1*01:03:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:12 protein. This plasmid can be used for constructing HLA-DPA1*01:03:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:13 Protein Expression Plasmid Vector	PHLAP928808000	Plasmid vector containing HLA-DPA1*01:03:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:13 protein. This plasmid can be used for constructing HLA-DPA1*01:03:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:14 Protein Expression Plasmid Vector	PHLAP92528801	Plasmid vector containing HLA-DPA1*01:03:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:14 protein. This plasmid can be used for constructing HLA-DPA1*01:03:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:15 Protein Expression Plasmid Vector	PHLAP92528802	Plasmid vector containing HLA-DPA1*01:03:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:15 protein. This plasmid can be used for constructing HLA-DPA1*01:03:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:16 Protein Expression Plasmid Vector	PHLAP92528803	Plasmid vector containing HLA-DPA1*01:03:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:16 protein. This plasmid can be used for constructing HLA-DPA1*01:03:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:17 Protein Expression Plasmid Vector	PHLAP92528804	Plasmid vector containing HLA-DPA1*01:03:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:17 protein. This plasmid can be used for constructing HLA-DPA1*01:03:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:18 Protein Expression Plasmid Vector	PHLAP92528805	Plasmid vector containing HLA-DPA1*01:03:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:18 protein. This plasmid can be used for constructing HLA-DPA1*01:03:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:19 Protein Expression Plasmid Vector	PHLAP92528806	Plasmid vector containing HLA-DPA1*01:03:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:19 protein. This plasmid can be used for constructing HLA-DPA1*01:03:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:20 Protein Expression Plasmid Vector	PHLAP92528807	Plasmid vector containing HLA-DPA1*01:03:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:20 protein. This plasmid can be used for constructing HLA-DPA1*01:03:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:21 Protein Expression Plasmid Vector	PHLAP92528808	Plasmid vector containing HLA-DPA1*01:03:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:21 protein. This plasmid can be used for constructing HLA-DPA1*01:03:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:22 Protein Expression Plasmid Vector	PHLAP92528809	Plasmid vector containing HLA-DPA1*01:03:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:22 protein. This plasmid can be used for constructing HLA-DPA1*01:03:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:23 Protein Expression Plasmid Vector	PHLAP92528810	Plasmid vector containing HLA-DPA1*01:03:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:23 protein. This plasmid can be used for constructing HLA-DPA1*01:03:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:24 Protein Expression Plasmid Vector	PHLAP92528811	Plasmid vector containing HLA-DPA1*01:03:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:24 protein. This plasmid can be used for constructing HLA-DPA1*01:03:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:25 Protein Expression Plasmid Vector	PHLAP92528812	Plasmid vector containing HLA-DPA1*01:03:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:25 protein. This plasmid can be used for constructing HLA-DPA1*01:03:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:26 Protein Expression Plasmid Vector	PHLAP92528813	Plasmid vector containing HLA-DPA1*01:03:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:26 protein. This plasmid can be used for constructing HLA-DPA1*01:03:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:27 Protein Expression Plasmid Vector	PHLAP92528814	Plasmid vector containing HLA-DPA1*01:03:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:27 protein. This plasmid can be used for constructing HLA-DPA1*01:03:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:28 Protein Expression Plasmid Vector	PHLAP925288815	Plasmid vector containing HLA-DPA1*01:03:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:28 protein. This plasmid can be used for constructing HLA-DPA1*01:03:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:29 Protein Expression Plasmid Vector	PHLAP925288816	Plasmid vector containing HLA-DPA1*01:03:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:29 protein. This plasmid can be used for constructing HLA-DPA1*01:03:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:30 Protein Expression Plasmid Vector	PHLAP925288817	Plasmid vector containing HLA-DPA1*01:03:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:30 protein. This plasmid can be used for constructing HLA-DPA1*01:03:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:31 Protein Expression Plasmid Vector	PHLAP925288818	Plasmid vector containing HLA-DPA1*01:03:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:31 protein. This plasmid can be used for constructing HLA-DPA1*01:03:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:32 Protein Expression Plasmid Vector	PHLAP925288819	Plasmid vector containing HLA-DPA1*01:03:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:32 protein. This plasmid can be used for constructing HLA-DPA1*01:03:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:33 Protein Expression Plasmid Vector	PHLAP9252882 0	Plasmid vector containing HLA-DPA1*01:03:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:33 protein. This plasmid can be used for constructing HLA-DPA1*01:03:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:34 Protein Expression Plasmid Vector	PHLAP9252882 1	Plasmid vector containing HLA-DPA1*01:03:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:34 protein. This plasmid can be used for constructing HLA-DPA1*01:03:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:35 Protein Expression Plasmid Vector	PHLAP92528822	Plasmid vector containing HLA-DPA1*01:03:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:35 protein. This plasmid can be used for constructing HLA-DPA1*01:03:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:36 Protein Expression Plasmid Vector	PHLAP92528823	Plasmid vector containing HLA-DPA1*01:03:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:36 protein. This plasmid can be used for constructing HLA-DPA1*01:03:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:37 Protein Expression Plasmid Vector	PHLAP92528824	Plasmid vector containing HLA-DPA1*01:03:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:37 protein. This plasmid can be used for constructing HLA-DPA1*01:03:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:38:01 Protein Expression Plasmid Vector	PHLAP92528825	Plasmid vector containing HLA-DPA1*01:03:38:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:38:01 protein. This plasmid can be used for constructing HLA-DPA1*01:03:38:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:38:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:38:02 Protein Expression Plasmid Vector	PHLAP92528826	Plasmid vector containing HLA-DPA1*01:03:38:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:38:02 protein. This plasmid can be used for constructing HLA-DPA1*01:03:38:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:38:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:39 Protein Expression Plasmid Vector	PHLAP92528827	Plasmid vector containing HLA-DPA1*01:03:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:39 protein. This plasmid can be used for constructing HLA-DPA1*01:03:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:40 Protein Expression Plasmid Vector	PHLAP92528828	Plasmid vector containing HLA-DPA1*01:03:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:40 protein. This plasmid can be used for constructing HLA-DPA1*01:03:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:41 Protein Expression Plasmid Vector	PHLAP92528829	Plasmid vector containing HLA-DPA1*01:03:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:41 protein. This plasmid can be used for constructing HLA-DPA1*01:03:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:42 Protein Expression Plasmid Vector	PHLAP92528830	Plasmid vector containing HLA-DPA1*01:03:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:42 protein. This plasmid can be used for constructing HLA-DPA1*01:03:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:43 Protein Expression Plasmid Vector	PHLAP92528831	Plasmid vector containing HLA-DPA1*01:03:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:43 protein. This plasmid can be used for constructing HLA-DPA1*01:03:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:44 Protein Expression Plasmid Vector	PHLAP92528832	Plasmid vector containing HLA-DPA1*01:03:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:44 protein. This plasmid can be used for constructing HLA-DPA1*01:03:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:45 Protein Expression Plasmid Vector	PHLAP92528833	Plasmid vector containing HLA-DPA1*01:03:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:45 protein. This plasmid can be used for constructing HLA-DPA1*01:03:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:46 Protein Expression Plasmid Vector	PHLAP92528834	Plasmid vector containing HLA-DPA1*01:03:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:46 protein. This plasmid can be used for constructing HLA-DPA1*01:03:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:47 Protein Expression Plasmid Vector	PHLAP92528835	Plasmid vector containing HLA-DPA1*01:03:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:47 protein. This plasmid can be used for constructing HLA-DPA1*01:03:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:48 Protein Expression Plasmid Vector	PHLAP92528836	Plasmid vector containing HLA-DPA1*01:03:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:48 protein. This plasmid can be used for constructing HLA-DPA1*01:03:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:49 Protein Expression Plasmid Vector	PHLAP92528837	Plasmid vector containing HLA-DPA1*01:03:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:49 protein. This plasmid can be used for constructing HLA-DPA1*01:03:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:50 Protein Expression Plasmid Vector	PHLAP92528838	Plasmid vector containing HLA-DPA1*01:03:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:50 protein. This plasmid can be used for constructing HLA-DPA1*01:03:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:51 Protein Expression Plasmid Vector	PHLAP92528839	Plasmid vector containing HLA-DPA1*01:03:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:51 protein. This plasmid can be used for constructing HLA-DPA1*01:03:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:52 Protein Expression Plasmid Vector	PHLAP92528840	Plasmid vector containing HLA-DPA1*01:03:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:52 protein. This plasmid can be used for constructing HLA-DPA1*01:03:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:53 Protein Expression Plasmid Vector	PHLAP92528841	Plasmid vector containing HLA-DPA1*01:03:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:53 protein. This plasmid can be used for constructing HLA-DPA1*01:03:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:54 Protein Expression Plasmid Vector	PHLAP92528842	Plasmid vector containing HLA-DPA1*01:03:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:54 protein. This plasmid can be used for constructing HLA-DPA1*01:03:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:55 Protein Expression Plasmid Vector	PHLAP925288443	Plasmid vector containing HLA-DPA1*01:03:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:55 protein. This plasmid can be used for constructing HLA-DPA1*01:03:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:56 Protein Expression Plasmid Vector	PHLAP925288444	Plasmid vector containing HLA-DPA1*01:03:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:56 protein. This plasmid can be used for constructing HLA-DPA1*01:03:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:57 Protein Expression Plasmid Vector	PHLAP925288445	Plasmid vector containing HLA-DPA1*01:03:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:57 protein. This plasmid can be used for constructing HLA-DPA1*01:03:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:58 Protein Expression Plasmid Vector	PHLAP925288446	Plasmid vector containing HLA-DPA1*01:03:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:58 protein. This plasmid can be used for constructing HLA-DPA1*01:03:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:59 Protein Expression Plasmid Vector	PHLAP925288447	Plasmid vector containing HLA-DPA1*01:03:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:59 protein. This plasmid can be used for constructing HLA-DPA1*01:03:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:60 Protein Expression Plasmid Vector	PHLAP925288448	Plasmid vector containing HLA-DPA1*01:03:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:60 protein. This plasmid can be used for constructing HLA-DPA1*01:03:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:03:61 Protein Expression Plasmid Vector	PHLAP925288449	Plasmid vector containing HLA-DPA1*01:03:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:61 protein. This plasmid can be used for constructing HLA-DPA1*01:03:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:03:62 Protein Expression Plasmid Vector	PHLAP92528850	Plasmid vector containing HLA-DPA1*01:03:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:03:62 protein. This plasmid can be used for constructing HLA-DPA1*01:03:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:03:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:04:01:01 Protein Expression Plasmid Vector	PHLAP92528851	Plasmid vector containing HLA-DPA1*01:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:04:01:01 protein. This plasmid can be used for constructing HLA-DPA1*01:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:04:01:02 Protein Expression Plasmid Vector	PHLAP92528852	Plasmid vector containing HLA-DPA1*01:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:04:01:02 protein. This plasmid can be used for constructing HLA-DPA1*01:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:04:01:03 Protein Expression Plasmid Vector	PHLAP92528853	Plasmid vector containing HLA-DPA1*01:04:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:04:01:03 protein. This plasmid can be used for constructing HLA-DPA1*01:04:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:04:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:04:02 Protein Expression Plasmid Vector	PHLAP92528854	Plasmid vector containing HLA-DPA1*01:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:04:02 protein. This plasmid can be used for constructing HLA-DPA1*01:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:04:03 Protein Expression Plasmid Vector	PHLAP92528855	Plasmid vector containing HLA-DPA1*01:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:04:03 protein. This plasmid can be used for constructing HLA-DPA1*01:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:04:04 Protein Expression Plasmid Vector	PHLAP92528856	Plasmid vector containing HLA-DPA1*01:04:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:04:04 protein. This plasmid can be used for constructing HLA-DPA1*01:04:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:04:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:05 Protein Expression Plasmid Vector	PHLAP92528857	Plasmid vector containing HLA-DPA1*01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:05 protein. This plasmid can be used for constructing HLA-DPA1*01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:06:01 Protein Expression Plasmid Vector	PHLAP92528858	Plasmid vector containing HLA-DPA1*01:06:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:06:01 protein. This plasmid can be used for constructing HLA-DPA1*01:06:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:06:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:06:02 Protein Expression Plasmid Vector	PHLAP92528859	Plasmid vector containing HLA-DPA1*01:06:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:06:02 protein. This plasmid can be used for constructing HLA-DPA1*01:06:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:06:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:06:03 Protein Expression Plasmid Vector	PHLAP92528860	Plasmid vector containing HLA-DPA1*01:06:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:06:03 protein. This plasmid can be used for constructing HLA-DPA1*01:06:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:06:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:06:04 Protein Expression Plasmid Vector	PHLAP92528861	Plasmid vector containing HLA-DPA1*01:06:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:06:04 protein. This plasmid can be used for constructing HLA-DPA1*01:06:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:06:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:06:05 Protein Expression Plasmid Vector	PHLAP92528862	Plasmid vector containing HLA-DPA1*01:06:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:06:05 protein. This plasmid can be used for constructing HLA-DPA1*01:06:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:06:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:07 Protein Expression Plasmid Vector	PHLAP92528863	Plasmid vector containing HLA-DPA1*01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:07 protein. This plasmid can be used for constructing HLA-DPA1*01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:08 Protein Expression Plasmid Vector	PHLAP925288664	Plasmid vector containing HLA-DPA1*01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:08 protein. This plasmid can be used for constructing HLA-DPA1*01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:09 Protein Expression Plasmid Vector	PHLAP925288665	Plasmid vector containing HLA-DPA1*01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:09 protein. This plasmid can be used for constructing HLA-DPA1*01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:10 Protein Expression Plasmid Vector	PHLAP925288666	Plasmid vector containing HLA-DPA1*01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:10 protein. This plasmid can be used for constructing HLA-DPA1*01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:100 Protein Expression Plasmid Vector	PHLAP925288667	Plasmid vector containing HLA-DPA1*01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:100 protein. This plasmid can be used for constructing HLA-DPA1*01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:101 Protein Expression Plasmid Vector	PHLAP925288668	Plasmid vector containing HLA-DPA1*01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:101 protein. This plasmid can be used for constructing HLA-DPA1*01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:102 Protein Expression Plasmid Vector	PHLAP925288669	Plasmid vector containing HLA-DPA1*01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:102 protein. This plasmid can be used for constructing HLA-DPA1*01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:103 Protein Expression Plasmid Vector	PHLAP925288670	Plasmid vector containing HLA-DPA1*01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:103 protein. This plasmid can be used for constructing HLA-DPA1*01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:104 Protein Expression Plasmid Vector	PHLAP92528871	Plasmid vector containing HLA-DPA1*01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:104 protein. This plasmid can be used for constructing HLA-DPA1*01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:105 Protein Expression Plasmid Vector	PHLAP92528872	Plasmid vector containing HLA-DPA1*01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:105 protein. This plasmid can be used for constructing HLA-DPA1*01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:106 Protein Expression Plasmid Vector	PHLAP92528873	Plasmid vector containing HLA-DPA1*01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:106 protein. This plasmid can be used for constructing HLA-DPA1*01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:107:01:01 Protein Expression Plasmid Vector	PHLAP92528874	Plasmid vector containing HLA-DPA1*01:107:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:107:01:01 protein. This plasmid can be used for constructing HLA-DPA1*01:107:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:107:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:107:01:02 Protein Expression Plasmid Vector	PHLAP92528875	Plasmid vector containing HLA-DPA1*01:107:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:107:01:02 protein. This plasmid can be used for constructing HLA-DPA1*01:107:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:107:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:108 Protein Expression Plasmid Vector	PHLAP92528876	Plasmid vector containing HLA-DPA1*01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:108 protein. This plasmid can be used for constructing HLA-DPA1*01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:109 Protein Expression Plasmid Vector	PHLAP92528877	Plasmid vector containing HLA-DPA1*01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:109 protein. This plasmid can be used for constructing HLA-DPA1*01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:11:01 Protein Expression Plasmid Vector	PHLAP92528878	Plasmid vector containing HLA-DPA1*01:11:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:11:01 protein. This plasmid can be used for constructing HLA-DPA1*01:11:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:11:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:11:02 Protein Expression Plasmid Vector	PHLAP92528879	Plasmid vector containing HLA-DPA1*01:11:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:11:02 protein. This plasmid can be used for constructing HLA-DPA1*01:11:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:11:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:11:03 Protein Expression Plasmid Vector	PHLAP92528880	Plasmid vector containing HLA-DPA1*01:11:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:11:03 protein. This plasmid can be used for constructing HLA-DPA1*01:11:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:11:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:110 Protein Expression Plasmid Vector	PHLAP92528881	Plasmid vector containing HLA-DPA1*01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:110 protein. This plasmid can be used for constructing HLA-DPA1*01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:111 Protein Expression Plasmid Vector	PHLAP92528882	Plasmid vector containing HLA-DPA1*01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:111 protein. This plasmid can be used for constructing HLA-DPA1*01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:112 Protein Expression Plasmid Vector	PHLAP92528883	Plasmid vector containing HLA-DPA1*01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:112 protein. This plasmid can be used for constructing HLA-DPA1*01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:113 Protein Expression Plasmid Vector	PHLAP92528884	Plasmid vector containing HLA-DPA1*01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:113 protein. This plasmid can be used for constructing HLA-DPA1*01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:114N Protein Expression Plasmid Vector	PHLAP92528885	Plasmid vector containing HLA-DPA1*01:114N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:114N protein. This plasmid can be used for constructing HLA-DPA1*01:114N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:114N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:115 Protein Expression Plasmid Vector	PHLAP92528886	Plasmid vector containing HLA-DPA1*01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:115 protein. This plasmid can be used for constructing HLA-DPA1*01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:116 Protein Expression Plasmid Vector	PHLAP92528887	Plasmid vector containing HLA-DPA1*01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:116 protein. This plasmid can be used for constructing HLA-DPA1*01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:117 Protein Expression Plasmid Vector	PHLAP92528888	Plasmid vector containing HLA-DPA1*01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:117 protein. This plasmid can be used for constructing HLA-DPA1*01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:118 Protein Expression Plasmid Vector	PHLAP92528889	Plasmid vector containing HLA-DPA1*01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:118 protein. This plasmid can be used for constructing HLA-DPA1*01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:119N Protein Expression Plasmid Vector	PHLAP92528890	Plasmid vector containing HLA-DPA1*01:119N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:119N protein. This plasmid can be used for constructing HLA-DPA1*01:119N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:119N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:12:01 Protein Expression Plasmid Vector	PHLAP92528891	Plasmid vector containing HLA-DPA1*01:12:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:12:01 protein. This plasmid can be used for constructing HLA-DPA1*01:12:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:12:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:12:02 Protein Expression Plasmid Vector	PHLAP92528892	Plasmid vector containing HLA-DPA1*01:12:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:12:02 protein. This plasmid can be used for constructing HLA-DPA1*01:12:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:12:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:12:03 Protein Expression Plasmid Vector	PHLAP92528893	Plasmid vector containing HLA-DPA1*01:12:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:12:03 protein. This plasmid can be used for constructing HLA-DPA1*01:12:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:12:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:120N Protein Expression Plasmid Vector	PHLAP92528894	Plasmid vector containing HLA-DPA1*01:120N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:120N protein. This plasmid can be used for constructing HLA-DPA1*01:120N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:120N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:121 Protein Expression Plasmid Vector	PHLAP92528895	Plasmid vector containing HLA-DPA1*01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:121 protein. This plasmid can be used for constructing HLA-DPA1*01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:122 Protein Expression Plasmid Vector	PHLAP92528896	Plasmid vector containing HLA-DPA1*01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:122 protein. This plasmid can be used for constructing HLA-DPA1*01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:123N Protein Expression Plasmid Vector	PHLAP92528897	Plasmid vector containing HLA-DPA1*01:123N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:123N protein. This plasmid can be used for constructing HLA-DPA1*01:123N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:123N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:124 Protein Expression Plasmid Vector	PHLAP92528898	Plasmid vector containing HLA-DPA1*01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:124 protein. This plasmid can be used for constructing HLA-DPA1*01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:125 Protein Expression Plasmid Vector	PHLAP92528899	Plasmid vector containing HLA-DPA1*01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:125 protein. This plasmid can be used for constructing HLA-DPA1*01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:126 Protein Expression Plasmid Vector	PHLAP92528900	Plasmid vector containing HLA-DPA1*01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:126 protein. This plasmid can be used for constructing HLA-DPA1*01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:127 Protein Expression Plasmid Vector	PHLAP92528901	Plasmid vector containing HLA-DPA1*01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:127 protein. This plasmid can be used for constructing HLA-DPA1*01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:128:01:01 Protein Expression Plasmid Vector	PHLAP92528902	Plasmid vector containing HLA-DPA1*01:128:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:128:01:01 protein. This plasmid can be used for constructing HLA-DPA1*01:128:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:128:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:128:01:02 Protein Expression Plasmid Vector	PHLAP92528903	Plasmid vector containing HLA-DPA1*01:128:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:128:01:02 protein. This plasmid can be used for constructing HLA-DPA1*01:128:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:128:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:129 Protein Expression Plasmid Vector	PHLAP92528904	Plasmid vector containing HLA-DPA1*01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:129 protein. This plasmid can be used for constructing HLA-DPA1*01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:13 Protein Expression Plasmid Vector	PHLAP92528905	Plasmid vector containing HLA-DPA1*01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:13 protein. This plasmid can be used for constructing HLA-DPA1*01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:130 Protein Expression Plasmid Vector	PHLAP92528906	Plasmid vector containing HLA-DPA1*01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:130 protein. This plasmid can be used for constructing HLA-DPA1*01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:131 Protein Expression Plasmid Vector	PHLAP92528907	Plasmid vector containing HLA-DPA1*01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:131 protein. This plasmid can be used for constructing HLA-DPA1*01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:132 Protein Expression Plasmid Vector	PHLAP92528908	Plasmid vector containing HLA-DPA1*01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:132 protein. This plasmid can be used for constructing HLA-DPA1*01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:133 Protein Expression Plasmid Vector	PHLAP92528909	Plasmid vector containing HLA-DPA1*01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:133 protein. This plasmid can be used for constructing HLA-DPA1*01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:134 Protein Expression Plasmid Vector	PHLAP92528910	Plasmid vector containing HLA-DPA1*01:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:134 protein. This plasmid can be used for constructing HLA-DPA1*01:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:135 Protein Expression Plasmid Vector	PHLAP92528911	Plasmid vector containing HLA-DPA1*01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:135 protein. This plasmid can be used for constructing HLA-DPA1*01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:136 Protein Expression Plasmid Vector	PHLAP92528912	Plasmid vector containing HLA-DPA1*01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:136 protein. This plasmid can be used for constructing HLA-DPA1*01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:137N Protein Expression Plasmid Vector	PHLAP925289113	Plasmid vector containing HLA-DPA1*01:137N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:137N protein. This plasmid can be used for constructing HLA-DPA1*01:137N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:137N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:138 Protein Expression Plasmid Vector	PHLAP925289114	Plasmid vector containing HLA-DPA1*01:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:138 protein. This plasmid can be used for constructing HLA-DPA1*01:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:139 Protein Expression Plasmid Vector	PHLAP925289115	Plasmid vector containing HLA-DPA1*01:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:139 protein. This plasmid can be used for constructing HLA-DPA1*01:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:14 Protein Expression Plasmid Vector	PHLAP925289116	Plasmid vector containing HLA-DPA1*01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:14 protein. This plasmid can be used for constructing HLA-DPA1*01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:140 Protein Expression Plasmid Vector	PHLAP925289117	Plasmid vector containing HLA-DPA1*01:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:140 protein. This plasmid can be used for constructing HLA-DPA1*01:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:141 Protein Expression Plasmid Vector	PHLAP925289118	Plasmid vector containing HLA-DPA1*01:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:141 protein. This plasmid can be used for constructing HLA-DPA1*01:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:142 Protein Expression Plasmid Vector	PHLAP925289119	Plasmid vector containing HLA-DPA1*01:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:142 protein. This plasmid can be used for constructing HLA-DPA1*01:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:143 Protein Expression Plasmid Vector	PHLAP92528920	Plasmid vector containing HLA-DPA1*01:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:143 protein. This plasmid can be used for constructing HLA-DPA1*01:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:144 Protein Expression Plasmid Vector	PHLAP92528921	Plasmid vector containing HLA-DPA1*01:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:144 protein. This plasmid can be used for constructing HLA-DPA1*01:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:145 Protein Expression Plasmid Vector	PHLAP92528922	Plasmid vector containing HLA-DPA1*01:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:145 protein. This plasmid can be used for constructing HLA-DPA1*01:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:146 Protein Expression Plasmid Vector	PHLAP92528923	Plasmid vector containing HLA-DPA1*01:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:146 protein. This plasmid can be used for constructing HLA-DPA1*01:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:147N Protein Expression Plasmid Vector	PHLAP92528924	Plasmid vector containing HLA-DPA1*01:147N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:147N protein. This plasmid can be used for constructing HLA-DPA1*01:147N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:147N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:148 Protein Expression Plasmid Vector	PHLAP92528925	Plasmid vector containing HLA-DPA1*01:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:148 protein. This plasmid can be used for constructing HLA-DPA1*01:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:149 Protein Expression Plasmid Vector	PHLAP92528926	Plasmid vector containing HLA-DPA1*01:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:149 protein. This plasmid can be used for constructing HLA-DPA1*01:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:15 Protein Expression Plasmid Vector	PHLAP92528927	Plasmid vector containing HLA-DPA1*01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:15 protein. This plasmid can be used for constructing HLA-DPA1*01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:150 Protein Expression Plasmid Vector	PHLAP92528928	Plasmid vector containing HLA-DPA1*01:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:150 protein. This plasmid can be used for constructing HLA-DPA1*01:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:151 Protein Expression Plasmid Vector	PHLAP92528929	Plasmid vector containing HLA-DPA1*01:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:151 protein. This plasmid can be used for constructing HLA-DPA1*01:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:152 Protein Expression Plasmid Vector	PHLAP92528930	Plasmid vector containing HLA-DPA1*01:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:152 protein. This plasmid can be used for constructing HLA-DPA1*01:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:153 Protein Expression Plasmid Vector	PHLAP92528931	Plasmid vector containing HLA-DPA1*01:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:153 protein. This plasmid can be used for constructing HLA-DPA1*01:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:154N Protein Expression Plasmid Vector	PHLAP92528932	Plasmid vector containing HLA-DPA1*01:154N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:154N protein. This plasmid can be used for constructing HLA-DPA1*01:154N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:154N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:155:01:01 Protein Expression Plasmid Vector	PHLAP92528933	Plasmid vector containing HLA-DPA1*01:155:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:155:01:01 protein. This plasmid can be used for constructing HLA-DPA1*01:155:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:155:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:155:01:02 Protein Expression Plasmid Vector	PHLAP925289334	Plasmid vector containing HLA-DPA1*01:155:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:155:01:02 protein. This plasmid can be used for constructing HLA-DPA1*01:155:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:155:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:155:01:03 Protein Expression Plasmid Vector	PHLAP925289335	Plasmid vector containing HLA-DPA1*01:155:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:155:01:03 protein. This plasmid can be used for constructing HLA-DPA1*01:155:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:155:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:156 Protein Expression Plasmid Vector	PHLAP925289336	Plasmid vector containing HLA-DPA1*01:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:156 protein. This plasmid can be used for constructing HLA-DPA1*01:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:157 Protein Expression Plasmid Vector	PHLAP925289337	Plasmid vector containing HLA-DPA1*01:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:157 protein. This plasmid can be used for constructing HLA-DPA1*01:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:158 Protein Expression Plasmid Vector	PHLAP925289338	Plasmid vector containing HLA-DPA1*01:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:158 protein. This plasmid can be used for constructing HLA-DPA1*01:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:159 Protein Expression Plasmid Vector	PHLAP925289339	Plasmid vector containing HLA-DPA1*01:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:159 protein. This plasmid can be used for constructing HLA-DPA1*01:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:16 Protein Expression Plasmid Vector	PHLAP925289340	Plasmid vector containing HLA-DPA1*01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:16 protein. This plasmid can be used for constructing HLA-DPA1*01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:160 Protein Expression Plasmid Vector	PHLAP92528941	Plasmid vector containing HLA-DPA1*01:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:160 protein. This plasmid can be used for constructing HLA-DPA1*01:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:161 Protein Expression Plasmid Vector	PHLAP92528942	Plasmid vector containing HLA-DPA1*01:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:161 protein. This plasmid can be used for constructing HLA-DPA1*01:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:162 Protein Expression Plasmid Vector	PHLAP92528943	Plasmid vector containing HLA-DPA1*01:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:162 protein. This plasmid can be used for constructing HLA-DPA1*01:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:163Q Protein Expression Plasmid Vector	PHLAP92528944	Plasmid vector containing HLA-DPA1*01:163Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:163Q protein. This plasmid can be used for constructing HLA-DPA1*01:163Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:163Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:164 Protein Expression Plasmid Vector	PHLAP92528945	Plasmid vector containing HLA-DPA1*01:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:164 protein. This plasmid can be used for constructing HLA-DPA1*01:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:165 Protein Expression Plasmid Vector	PHLAP92528946	Plasmid vector containing HLA-DPA1*01:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:165 protein. This plasmid can be used for constructing HLA-DPA1*01:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:166 Protein Expression Plasmid Vector	PHLAP92528947	Plasmid vector containing HLA-DPA1*01:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:166 protein. This plasmid can be used for constructing HLA-DPA1*01:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:167 Protein Expression Plasmid Vector	PHLAP92528948	Plasmid vector containing HLA-DPA1*01:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:167 protein. This plasmid can be used for constructing HLA-DPA1*01:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:168N Protein Expression Plasmid Vector	PHLAP92528949	Plasmid vector containing HLA-DPA1*01:168N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:168N protein. This plasmid can be used for constructing HLA-DPA1*01:168N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:168N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:169 Protein Expression Plasmid Vector	PHLAP92528950	Plasmid vector containing HLA-DPA1*01:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:169 protein. This plasmid can be used for constructing HLA-DPA1*01:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:17 Protein Expression Plasmid Vector	PHLAP92528951	Plasmid vector containing HLA-DPA1*01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:17 protein. This plasmid can be used for constructing HLA-DPA1*01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:170 Protein Expression Plasmid Vector	PHLAP92528952	Plasmid vector containing HLA-DPA1*01:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:170 protein. This plasmid can be used for constructing HLA-DPA1*01:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:171Q Protein Expression Plasmid Vector	PHLAP92528953	Plasmid vector containing HLA-DPA1*01:171Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:171Q protein. This plasmid can be used for constructing HLA-DPA1*01:171Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:171Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:172 Protein Expression Plasmid Vector	PHLAP92528954	Plasmid vector containing HLA-DPA1*01:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:172 protein. This plasmid can be used for constructing HLA-DPA1*01:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:173 Protein Expression Plasmid Vector	PHLAP92528955	Plasmid vector containing HLA-DPA1*01:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:173 protein. This plasmid can be used for constructing HLA-DPA1*01:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:174 Protein Expression Plasmid Vector	PHLAP92528956	Plasmid vector containing HLA-DPA1*01:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:174 protein. This plasmid can be used for constructing HLA-DPA1*01:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:175 Protein Expression Plasmid Vector	PHLAP92528957	Plasmid vector containing HLA-DPA1*01:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:175 protein. This plasmid can be used for constructing HLA-DPA1*01:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:176 Protein Expression Plasmid Vector	PHLAP92528958	Plasmid vector containing HLA-DPA1*01:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:176 protein. This plasmid can be used for constructing HLA-DPA1*01:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:177 Protein Expression Plasmid Vector	PHLAP92528959	Plasmid vector containing HLA-DPA1*01:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:177 protein. This plasmid can be used for constructing HLA-DPA1*01:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:178 Protein Expression Plasmid Vector	PHLAP92528960	Plasmid vector containing HLA-DPA1*01:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:178 protein. This plasmid can be used for constructing HLA-DPA1*01:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:179 Protein Expression Plasmid Vector	PHLAP92528961	Plasmid vector containing HLA-DPA1*01:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:179 protein. This plasmid can be used for constructing HLA-DPA1*01:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:18 Protein Expression Plasmid Vector	PHLAP92528962	Plasmid vector containing HLA-DPA1*01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:18 protein. This plasmid can be used for constructing HLA-DPA1*01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:180 Protein Expression Plasmid Vector	PHLAP92528963	Plasmid vector containing HLA-DPA1*01:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:180 protein. This plasmid can be used for constructing HLA-DPA1*01:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:181 Protein Expression Plasmid Vector	PHLAP92528964	Plasmid vector containing HLA-DPA1*01:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:181 protein. This plasmid can be used for constructing HLA-DPA1*01:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:182 Protein Expression Plasmid Vector	PHLAP92528965	Plasmid vector containing HLA-DPA1*01:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:182 protein. This plasmid can be used for constructing HLA-DPA1*01:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:183 Protein Expression Plasmid Vector	PHLAP92528966	Plasmid vector containing HLA-DPA1*01:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:183 protein. This plasmid can be used for constructing HLA-DPA1*01:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:184 Protein Expression Plasmid Vector	PHLAP92528967	Plasmid vector containing HLA-DPA1*01:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:184 protein. This plasmid can be used for constructing HLA-DPA1*01:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:185 Protein Expression Plasmid Vector	PHLAP92528968	Plasmid vector containing HLA-DPA1*01:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:185 protein. This plasmid can be used for constructing HLA-DPA1*01:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:186 Protein Expression Plasmid Vector	PHLAP92528969	Plasmid vector containing HLA-DPA1*01:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:186 protein. This plasmid can be used for constructing HLA-DPA1*01:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:187 Protein Expression Plasmid Vector	PHLAP92528970	Plasmid vector containing HLA-DPA1*01:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:187 protein. This plasmid can be used for constructing HLA-DPA1*01:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:188 Protein Expression Plasmid Vector	PHLAP92528971	Plasmid vector containing HLA-DPA1*01:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:188 protein. This plasmid can be used for constructing HLA-DPA1*01:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:189 Protein Expression Plasmid Vector	PHLAP92528972	Plasmid vector containing HLA-DPA1*01:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:189 protein. This plasmid can be used for constructing HLA-DPA1*01:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:19 Protein Expression Plasmid Vector	PHLAP92528973	Plasmid vector containing HLA-DPA1*01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:19 protein. This plasmid can be used for constructing HLA-DPA1*01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:190 Protein Expression Plasmid Vector	PHLAP92528974	Plasmid vector containing HLA-DPA1*01:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:190 protein. This plasmid can be used for constructing HLA-DPA1*01:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:191 Protein Expression Plasmid Vector	PHLAP92528975	Plasmid vector containing HLA-DPA1*01:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:191 protein. This plasmid can be used for constructing HLA-DPA1*01:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:192 Protein Expression Plasmid Vector	PHLAP92528976	Plasmid vector containing HLA-DPA1*01:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:192 protein. This plasmid can be used for constructing HLA-DPA1*01:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:193 Protein Expression Plasmid Vector	PHLAP92528977	Plasmid vector containing HLA-DPA1*01:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:193 protein. This plasmid can be used for constructing HLA-DPA1*01:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:194 Protein Expression Plasmid Vector	PHLAP92528978	Plasmid vector containing HLA-DPA1*01:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:194 protein. This plasmid can be used for constructing HLA-DPA1*01:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:195 Protein Expression Plasmid Vector	PHLAP92528979	Plasmid vector containing HLA-DPA1*01:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:195 protein. This plasmid can be used for constructing HLA-DPA1*01:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:196 Protein Expression Plasmid Vector	PHLAP92528980	Plasmid vector containing HLA-DPA1*01:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:196 protein. This plasmid can be used for constructing HLA-DPA1*01:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:197 Protein Expression Plasmid Vector	PHLAP92528981	Plasmid vector containing HLA-DPA1*01:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:197 protein. This plasmid can be used for constructing HLA-DPA1*01:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:198 Protein Expression Plasmid Vector	PHLAP92528982	Plasmid vector containing HLA-DPA1*01:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:198 protein. This plasmid can be used for constructing HLA-DPA1*01:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:199 Protein Expression Plasmid Vector	PHLAP92528983	Plasmid vector containing HLA-DPA1*01:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:199 protein. This plasmid can be used for constructing HLA-DPA1*01:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:20 Protein Expression Plasmid Vector	PHLAP92528984	Plasmid vector containing HLA-DPA1*01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:20 protein. This plasmid can be used for constructing HLA-DPA1*01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:200 Protein Expression Plasmid Vector	PHLAP92528985	Plasmid vector containing HLA-DPA1*01:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:200 protein. This plasmid can be used for constructing HLA-DPA1*01:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:201 Protein Expression Plasmid Vector	PHLAP92528986	Plasmid vector containing HLA-DPA1*01:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:201 protein. This plasmid can be used for constructing HLA-DPA1*01:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:202 Protein Expression Plasmid Vector	PHLAP92528987	Plasmid vector containing HLA-DPA1*01:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:202 protein. This plasmid can be used for constructing HLA-DPA1*01:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:203 Protein Expression Plasmid Vector	PHLAP92528988	Plasmid vector containing HLA-DPA1*01:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:203 protein. This plasmid can be used for constructing HLA-DPA1*01:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:204 Protein Expression Plasmid Vector	PHLAP92528989	Plasmid vector containing HLA-DPA1*01:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:204 protein. This plasmid can be used for constructing HLA-DPA1*01:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:205 Protein Expression Plasmid Vector	PHLAP92528990	Plasmid vector containing HLA-DPA1*01:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:205 protein. This plasmid can be used for constructing HLA-DPA1*01:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:206 Protein Expression Plasmid Vector	PHLAP92528991	Plasmid vector containing HLA-DPA1*01:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:206 protein. This plasmid can be used for constructing HLA-DPA1*01:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:207 Protein Expression Plasmid Vector	PHLAP92528992	Plasmid vector containing HLA-DPA1*01:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:207 protein. This plasmid can be used for constructing HLA-DPA1*01:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:208 Protein Expression Plasmid Vector	PHLAP92528993	Plasmid vector containing HLA-DPA1*01:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:208 protein. This plasmid can be used for constructing HLA-DPA1*01:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:209 Protein Expression Plasmid Vector	PHLAP92528994	Plasmid vector containing HLA-DPA1*01:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:209 protein. This plasmid can be used for constructing HLA-DPA1*01:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:210 Protein Expression Plasmid Vector	PHLAP92528995	Plasmid vector containing HLA-DPA1*01:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:210 protein. This plasmid can be used for constructing HLA-DPA1*01:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:211 Protein Expression Plasmid Vector	PHLAP92528996	Plasmid vector containing HLA-DPA1*01:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:211 protein. This plasmid can be used for constructing HLA-DPA1*01:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:212 Protein Expression Plasmid Vector	PHLAP92528997	Plasmid vector containing HLA-DPA1*01:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:212 protein. This plasmid can be used for constructing HLA-DPA1*01:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:213 Protein Expression Plasmid Vector	PHLAP92528998	Plasmid vector containing HLA-DPA1*01:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:213 protein. This plasmid can be used for constructing HLA-DPA1*01:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:214 Protein Expression Plasmid Vector	PHLAP92528999	Plasmid vector containing HLA-DPA1*01:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:214 protein. This plasmid can be used for constructing HLA-DPA1*01:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:215 Protein Expression Plasmid Vector	PHLAP925290000	Plasmid vector containing HLA-DPA1*01:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:215 protein. This plasmid can be used for constructing HLA-DPA1*01:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:216 Protein Expression Plasmid Vector	PHLAP925290001	Plasmid vector containing HLA-DPA1*01:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:216 protein. This plasmid can be used for constructing HLA-DPA1*01:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:217N Protein Expression Plasmid Vector	PHLAP925290002	Plasmid vector containing HLA-DPA1*01:217N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:217N protein. This plasmid can be used for constructing HLA-DPA1*01:217N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:217N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:218 Protein Expression Plasmid Vector	PHLAP925290003	Plasmid vector containing HLA-DPA1*01:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:218 protein. This plasmid can be used for constructing HLA-DPA1*01:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:219N Protein Expression Plasmid Vector	PHLAP92529004	Plasmid vector containing HLA-DPA1*01:219N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:219N protein. This plasmid can be used for constructing HLA-DPA1*01:219N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:219N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:21Q Protein Expression Plasmid Vector	PHLAP92529005	Plasmid vector containing HLA-DPA1*01:21Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:21Q protein. This plasmid can be used for constructing HLA-DPA1*01:21Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:21Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:22 Protein Expression Plasmid Vector	PHLAP92529006	Plasmid vector containing HLA-DPA1*01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:22 protein. This plasmid can be used for constructing HLA-DPA1*01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:220 Protein Expression Plasmid Vector	PHLAP92529007	Plasmid vector containing HLA-DPA1*01:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:220 protein. This plasmid can be used for constructing HLA-DPA1*01:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:221 Protein Expression Plasmid Vector	PHLAP92529008	Plasmid vector containing HLA-DPA1*01:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:221 protein. This plasmid can be used for constructing HLA-DPA1*01:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:222 Protein Expression Plasmid Vector	PHLAP92529009	Plasmid vector containing HLA-DPA1*01:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:222 protein. This plasmid can be used for constructing HLA-DPA1*01:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:223Q Protein Expression Plasmid Vector	PHLAP92529010	Plasmid vector containing HLA-DPA1*01:223Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:223Q protein. This plasmid can be used for constructing HLA-DPA1*01:223Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:223Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:224 Protein Expression Plasmid Vector	PHLAP92529011	Plasmid vector containing HLA-DPA1*01:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:224 protein. This plasmid can be used for constructing HLA-DPA1*01:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:225 Protein Expression Plasmid Vector	PHLAP92529012	Plasmid vector containing HLA-DPA1*01:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:225 protein. This plasmid can be used for constructing HLA-DPA1*01:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:226 Protein Expression Plasmid Vector	PHLAP92529013	Plasmid vector containing HLA-DPA1*01:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:226 protein. This plasmid can be used for constructing HLA-DPA1*01:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:227 Protein Expression Plasmid Vector	PHLAP92529014	Plasmid vector containing HLA-DPA1*01:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:227 protein. This plasmid can be used for constructing HLA-DPA1*01:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:228 Protein Expression Plasmid Vector	PHLAP92529015	Plasmid vector containing HLA-DPA1*01:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:228 protein. This plasmid can be used for constructing HLA-DPA1*01:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:229 Protein Expression Plasmid Vector	PHLAP92529016	Plasmid vector containing HLA-DPA1*01:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:229 protein. This plasmid can be used for constructing HLA-DPA1*01:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:23 Protein Expression Plasmid Vector	PHLAP92529017	Plasmid vector containing HLA-DPA1*01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:23 protein. This plasmid can be used for constructing HLA-DPA1*01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:230 Protein Expression Plasmid Vector	PHLAP92529018	Plasmid vector containing HLA-DPA1*01:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:230 protein. This plasmid can be used for constructing HLA-DPA1*01:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:231 Protein Expression Plasmid Vector	PHLAP92529019	Plasmid vector containing HLA-DPA1*01:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:231 protein. This plasmid can be used for constructing HLA-DPA1*01:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:232 Protein Expression Plasmid Vector	PHLAP92529020	Plasmid vector containing HLA-DPA1*01:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:232 protein. This plasmid can be used for constructing HLA-DPA1*01:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:233 Protein Expression Plasmid Vector	PHLAP92529021	Plasmid vector containing HLA-DPA1*01:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:233 protein. This plasmid can be used for constructing HLA-DPA1*01:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:234 Protein Expression Plasmid Vector	PHLAP92529022	Plasmid vector containing HLA-DPA1*01:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:234 protein. This plasmid can be used for constructing HLA-DPA1*01:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:235 Protein Expression Plasmid Vector	PHLAP92529023	Plasmid vector containing HLA-DPA1*01:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:235 protein. This plasmid can be used for constructing HLA-DPA1*01:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:236N Protein Expression Plasmid Vector	PHLAP92529024	Plasmid vector containing HLA-DPA1*01:236N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:236N protein. This plasmid can be used for constructing HLA-DPA1*01:236N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:236N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-DPA1*01:237 Protein Expression Plasmid Vector	PHLAP92529025	Plasmid vector containing HLA-DPA1*01:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:237 protein. This plasmid can be used for constructing HLA-DPA1*01:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-DPA1*01:238Q Protein Expression Plasmid Vector	PHLAP92529026	Plasmid vector containing HLA-DPA1*01:238Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-DPA1*01:238Q protein. This plasmid can be used for constructing HLA-DPA1*01:238Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-DPA1*01:238Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
