HLA-A*11:01:01:51 Protein Expression Plasmid Vector	PHLAP9253630	Plasmid vector containing HLA-A*11:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:51 protein. This plasmid can be used for constructing HLA-A*11:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:52 Protein Expression Plasmid Vector	PHLAP9253631	Plasmid vector containing HLA-A*11:01:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:52 protein. This plasmid can be used for constructing HLA-A*11:01:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:53 Protein Expression Plasmid Vector	PHLAP9253632	Plasmid vector containing HLA-A*11:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:53 protein. This plasmid can be used for constructing HLA-A*11:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:54 Protein Expression Plasmid Vector	PHLAP9253633	Plasmid vector containing HLA-A*11:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:54 protein. This plasmid can be used for constructing HLA-A*11:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:55 Protein Expression Plasmid Vector	PHLAP9253634	Plasmid vector containing HLA-A*11:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:55 protein. This plasmid can be used for constructing HLA-A*11:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:56 Protein Expression Plasmid Vector	PHLAP9253635	Plasmid vector containing HLA-A*11:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:56 protein. This plasmid can be used for constructing HLA-A*11:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:57 Protein Expression Plasmid Vector	PHLAP9253636	Plasmid vector containing HLA-A*11:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:57 protein. This plasmid can be used for constructing HLA-A*11:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:58 Protein Expression Plasmid Vector	PHLAP9253637	Plasmid vector containing HLA-A*11:01:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:58 protein. This plasmid can be used for constructing HLA-A*11:01:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:59 Protein Expression Plasmid Vector	PHLAP9253638	Plasmid vector containing HLA-A*11:01:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:59 protein. This plasmid can be used for constructing HLA-A*11:01:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:60 Protein Expression Plasmid Vector	PHLAP9253639	Plasmid vector containing HLA-A*11:01:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:60 protein. This plasmid can be used for constructing HLA-A*11:01:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:61 Protein Expression Plasmid Vector	PHLAP9253640	Plasmid vector containing HLA-A*11:01:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:61 protein. This plasmid can be used for constructing HLA-A*11:01:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:62 Protein Expression Plasmid Vector	PHLAP9253641	Plasmid vector containing HLA-A*11:01:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:62 protein. This plasmid can be used for constructing HLA-A*11:01:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:63 Protein Expression Plasmid Vector	PHLAP9253642	Plasmid vector containing HLA-A*11:01:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:63 protein. This plasmid can be used for constructing HLA-A*11:01:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:64 Protein Expression Plasmid Vector	PHLAP9253643	Plasmid vector containing HLA-A*11:01:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:64 protein. This plasmid can be used for constructing HLA-A*11:01:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:65 Protein Expression Plasmid Vector	PHLAP9253644	Plasmid vector containing HLA-A*11:01:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:65 protein. This plasmid can be used for constructing HLA-A*11:01:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:66 Protein Expression Plasmid Vector	PHLAP9253645	Plasmid vector containing HLA-A*11:01:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:66 protein. This plasmid can be used for constructing HLA-A*11:01:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:67 Protein Expression Plasmid Vector	PHLAP9253646	Plasmid vector containing HLA-A*11:01:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:67 protein. This plasmid can be used for constructing HLA-A*11:01:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:68 Protein Expression Plasmid Vector	PHLAP9253647	Plasmid vector containing HLA-A*11:01:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:68 protein. This plasmid can be used for constructing HLA-A*11:01:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:69 Protein Expression Plasmid Vector	PHLAP9253648	Plasmid vector containing HLA-A*11:01:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:69 protein. This plasmid can be used for constructing HLA-A*11:01:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:70 Protein Expression Plasmid Vector	PHLAP9253649	Plasmid vector containing HLA-A*11:01:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:70 protein. This plasmid can be used for constructing HLA-A*11:01:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:71 Protein Expression Plasmid Vector	PHLAP9253650	Plasmid vector containing HLA-A*11:01:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:71 protein. This plasmid can be used for constructing HLA-A*11:01:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:72 Protein Expression Plasmid Vector	PHLAP9253651	Plasmid vector containing HLA-A*11:01:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:72 protein. This plasmid can be used for constructing HLA-A*11:01:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:73 Protein Expression Plasmid Vector	PHLAP9253652	Plasmid vector containing HLA-A*11:01:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:73 protein. This plasmid can be used for constructing HLA-A*11:01:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:74 Protein Expression Plasmid Vector	PHLAP9253653	Plasmid vector containing HLA-A*11:01:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:74 protein. This plasmid can be used for constructing HLA-A*11:01:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:75 Protein Expression Plasmid Vector	PHLAP9253654	Plasmid vector containing HLA-A*11:01:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:75 protein. This plasmid can be used for constructing HLA-A*11:01:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:76 Protein Expression Plasmid Vector	PHLAP9253655	Plasmid vector containing HLA-A*11:01:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:76 protein. This plasmid can be used for constructing HLA-A*11:01:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:77 Protein Expression Plasmid Vector	PHLAP9253656	Plasmid vector containing HLA-A*11:01:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:77 protein. This plasmid can be used for constructing HLA-A*11:01:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:78 Protein Expression Plasmid Vector	PHLAP9253657	Plasmid vector containing HLA-A*11:01:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:78 protein. This plasmid can be used for constructing HLA-A*11:01:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:79 Protein Expression Plasmid Vector	PHLAP9253658	Plasmid vector containing HLA-A*11:01:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:79 protein. This plasmid can be used for constructing HLA-A*11:01:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:80 Protein Expression Plasmid Vector	PHLAP9253659	Plasmid vector containing HLA-A*11:01:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:80 protein. This plasmid can be used for constructing HLA-A*11:01:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:81 Protein Expression Plasmid Vector	PHLAP9253660	Plasmid vector containing HLA-A*11:01:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:81 protein. This plasmid can be used for constructing HLA-A*11:01:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:82 Protein Expression Plasmid Vector	PHLAP9253661	Plasmid vector containing HLA-A*11:01:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:82 protein. This plasmid can be used for constructing HLA-A*11:01:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:83 Protein Expression Plasmid Vector	PHLAP9253662	Plasmid vector containing HLA-A*11:01:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:83 protein. This plasmid can be used for constructing HLA-A*11:01:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:84 Protein Expression Plasmid Vector	PHLAP9253663	Plasmid vector containing HLA-A*11:01:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:84 protein. This plasmid can be used for constructing HLA-A*11:01:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:85 Protein Expression Plasmid Vector	PHLAP9253664	Plasmid vector containing HLA-A*11:01:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:85 protein. This plasmid can be used for constructing HLA-A*11:01:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:86 Protein Expression Plasmid Vector	PHLAP9253665	Plasmid vector containing HLA-A*11:01:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:86 protein. This plasmid can be used for constructing HLA-A*11:01:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:87 Protein Expression Plasmid Vector	PHLAP9253666	Plasmid vector containing HLA-A*11:01:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:87 protein. This plasmid can be used for constructing HLA-A*11:01:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:89 Protein Expression Plasmid Vector	PHLAP9253667	Plasmid vector containing HLA-A*11:01:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:89 protein. This plasmid can be used for constructing HLA-A*11:01:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:90 Protein Expression Plasmid Vector	PHLAP9253668	Plasmid vector containing HLA-A*11:01:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:90 protein. This plasmid can be used for constructing HLA-A*11:01:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:91 Protein Expression Plasmid Vector	PHLAP9253669	Plasmid vector containing HLA-A*11:01:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:91 protein. This plasmid can be used for constructing HLA-A*11:01:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:92 Protein Expression Plasmid Vector	PHLAP9253670	Plasmid vector containing HLA-A*11:01:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:92 protein. This plasmid can be used for constructing HLA-A*11:01:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:01:93 Protein Expression Plasmid Vector	PHLAP9253671	Plasmid vector containing HLA-A*11:01:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:93 protein. This plasmid can be used for constructing HLA-A*11:01:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:01:94 Protein Expression Plasmid Vector	PHLAP9253672	Plasmid vector containing HLA-A*11:01:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:01:94 protein. This plasmid can be used for constructing HLA-A*11:01:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:02 Protein Expression Plasmid Vector	PHLAP9253673	Plasmid vector containing HLA-A*11:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:02 protein. This plasmid can be used for constructing HLA-A*11:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:03 Protein Expression Plasmid Vector	PHLAP9253674	Plasmid vector containing HLA-A*11:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:03 protein. This plasmid can be used for constructing HLA-A*11:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:04 Protein Expression Plasmid Vector	PHLAP9253675	Plasmid vector containing HLA-A*11:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:04 protein. This plasmid can be used for constructing HLA-A*11:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:05 Protein Expression Plasmid Vector	PHLAP9253676	Plasmid vector containing HLA-A*11:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:05 protein. This plasmid can be used for constructing HLA-A*11:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:06 Protein Expression Plasmid Vector	PHLAP9253677	Plasmid vector containing HLA-A*11:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:06 protein. This plasmid can be used for constructing HLA-A*11:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:07 Protein Expression Plasmid Vector	PHLAP9253678	Plasmid vector containing HLA-A*11:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:07 protein. This plasmid can be used for constructing HLA-A*11:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:08 Protein Expression Plasmid Vector	PHLAP9253679	Plasmid vector containing HLA-A*11:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:08 protein. This plasmid can be used for constructing HLA-A*11:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:09 Protein Expression Plasmid Vector	PHLAP9253680	Plasmid vector containing HLA-A*11:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:09 protein. This plasmid can be used for constructing HLA-A*11:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:10 Protein Expression Plasmid Vector	PHLAP9253681	Plasmid vector containing HLA-A*11:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:10 protein. This plasmid can be used for constructing HLA-A*11:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:100 Protein Expression Plasmid Vector	PHLAP9253682	Plasmid vector containing HLA-A*11:01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:100 protein. This plasmid can be used for constructing HLA-A*11:01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:101 Protein Expression Plasmid Vector	PHLAP9253683	Plasmid vector containing HLA-A*11:01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:101 protein. This plasmid can be used for constructing HLA-A*11:01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:102 Protein Expression Plasmid Vector	PHLAP9253684	Plasmid vector containing HLA-A*11:01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:102 protein. This plasmid can be used for constructing HLA-A*11:01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:103 Protein Expression Plasmid Vector	PHLAP9253685	Plasmid vector containing HLA-A*11:01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:103 protein. This plasmid can be used for constructing HLA-A*11:01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:104 Protein Expression Plasmid Vector	PHLAP9253686	Plasmid vector containing HLA-A*11:01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:104 protein. This plasmid can be used for constructing HLA-A*11:01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:105 Protein Expression Plasmid Vector	PHLAP9253687	Plasmid vector containing HLA-A*11:01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:105 protein. This plasmid can be used for constructing HLA-A*11:01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:106 Protein Expression Plasmid Vector	PHLAP9253688	Plasmid vector containing HLA-A*11:01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:106 protein. This plasmid can be used for constructing HLA-A*11:01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:107 Protein Expression Plasmid Vector	PHLAP9253689	Plasmid vector containing HLA-A*11:01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:107 protein. This plasmid can be used for constructing HLA-A*11:01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:108 Protein Expression Plasmid Vector	PHLAP9253690	Plasmid vector containing HLA-A*11:01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:108 protein. This plasmid can be used for constructing HLA-A*11:01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:109:01 Protein Expression Plasmid Vector	PHLAP9253691	Plasmid vector containing HLA-A*11:01:109:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:109:01 protein. This plasmid can be used for constructing HLA-A*11:01:109:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:109:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:109:02 Protein Expression Plasmid Vector	PHLAP9253692	Plasmid vector containing HLA-A*11:01:109:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:109:02 protein. This plasmid can be used for constructing HLA-A*11:01:109:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:109:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:11 Protein Expression Plasmid Vector	PHLAP9253693	Plasmid vector containing HLA-A*11:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:11 protein. This plasmid can be used for constructing HLA-A*11:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:110 Protein Expression Plasmid Vector	PHLAP9253694	Plasmid vector containing HLA-A*11:01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:110 protein. This plasmid can be used for constructing HLA-A*11:01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:111 Protein Expression Plasmid Vector	PHLAP9253695	Plasmid vector containing HLA-A*11:01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:111 protein. This plasmid can be used for constructing HLA-A*11:01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:112 Protein Expression Plasmid Vector	PHLAP9253696	Plasmid vector containing HLA-A*11:01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:112 protein. This plasmid can be used for constructing HLA-A*11:01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:113 Protein Expression Plasmid Vector	PHLAP9253697	Plasmid vector containing HLA-A*11:01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:113 protein. This plasmid can be used for constructing HLA-A*11:01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:114 Protein Expression Plasmid Vector	PHLAP9253698	Plasmid vector containing HLA-A*11:01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:114 protein. This plasmid can be used for constructing HLA-A*11:01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:115 Protein Expression Plasmid Vector	PHLAP9253699	Plasmid vector containing HLA-A*11:01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:115 protein. This plasmid can be used for constructing HLA-A*11:01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:116 Protein Expression Plasmid Vector	PHLAP9253700	Plasmid vector containing HLA-A*11:01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:116 protein. This plasmid can be used for constructing HLA-A*11:01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:117 Protein Expression Plasmid Vector	PHLAP9253701	Plasmid vector containing HLA-A*11:01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:117 protein. This plasmid can be used for constructing HLA-A*11:01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:118 Protein Expression Plasmid Vector	PHLAP9253702	Plasmid vector containing HLA-A*11:01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:118 protein. This plasmid can be used for constructing HLA-A*11:01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:119 Protein Expression Plasmid Vector	PHLAP9253703	Plasmid vector containing HLA-A*11:01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:119 protein. This plasmid can be used for constructing HLA-A*11:01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:12 Protein Expression Plasmid Vector	PHLAP9253704	Plasmid vector containing HLA-A*11:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:12 protein. This plasmid can be used for constructing HLA-A*11:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:120 Protein Expression Plasmid Vector	PHLAP9253705	Plasmid vector containing HLA-A*11:01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:120 protein. This plasmid can be used for constructing HLA-A*11:01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:121 Protein Expression Plasmid Vector	PHLAP9253706	Plasmid vector containing HLA-A*11:01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:121 protein. This plasmid can be used for constructing HLA-A*11:01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:122 Protein Expression Plasmid Vector	PHLAP9253707	Plasmid vector containing HLA-A*11:01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:122 protein. This plasmid can be used for constructing HLA-A*11:01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:123 Protein Expression Plasmid Vector	PHLAP9253708	Plasmid vector containing HLA-A*11:01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:123 protein. This plasmid can be used for constructing HLA-A*11:01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:124 Protein Expression Plasmid Vector	PHLAP9253709	Plasmid vector containing HLA-A*11:01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:124 protein. This plasmid can be used for constructing HLA-A*11:01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:125 Protein Expression Plasmid Vector	PHLAP9253710	Plasmid vector containing HLA-A*11:01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:125 protein. This plasmid can be used for constructing HLA-A*11:01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:126 Protein Expression Plasmid Vector	PHLAP9253711	Plasmid vector containing HLA-A*11:01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:126 protein. This plasmid can be used for constructing HLA-A*11:01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:127 Protein Expression Plasmid Vector	PHLAP9253712	Plasmid vector containing HLA-A*11:01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:127 protein. This plasmid can be used for constructing HLA-A*11:01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:128 Protein Expression Plasmid Vector	PHLAP9253713	Plasmid vector containing HLA-A*11:01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:128 protein. This plasmid can be used for constructing HLA-A*11:01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:129 Protein Expression Plasmid Vector	PHLAP9253714	Plasmid vector containing HLA-A*11:01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:129 protein. This plasmid can be used for constructing HLA-A*11:01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:13 Protein Expression Plasmid Vector	PHLAP9253715	Plasmid vector containing HLA-A*11:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:13 protein. This plasmid can be used for constructing HLA-A*11:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:130 Protein Expression Plasmid Vector	PHLAP9253716	Plasmid vector containing HLA-A*11:01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:130 protein. This plasmid can be used for constructing HLA-A*11:01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:131 Protein Expression Plasmid Vector	PHLAP9253717	Plasmid vector containing HLA-A*11:01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:131 protein. This plasmid can be used for constructing HLA-A*11:01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:132 Protein Expression Plasmid Vector	PHLAP9253718	Plasmid vector containing HLA-A*11:01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:132 protein. This plasmid can be used for constructing HLA-A*11:01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:133 Protein Expression Plasmid Vector	PHLAP9253719	Plasmid vector containing HLA-A*11:01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:133 protein. This plasmid can be used for constructing HLA-A*11:01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:134 Protein Expression Plasmid Vector	PHLAP9253720	Plasmid vector containing HLA-A*11:01:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:134 protein. This plasmid can be used for constructing HLA-A*11:01:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:135 Protein Expression Plasmid Vector	PHLAP9253721	Plasmid vector containing HLA-A*11:01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:135 protein. This plasmid can be used for constructing HLA-A*11:01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:136 Protein Expression Plasmid Vector	PHLAP9253722	Plasmid vector containing HLA-A*11:01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:136 protein. This plasmid can be used for constructing HLA-A*11:01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:14 Protein Expression Plasmid Vector	PHLAP9253723	Plasmid vector containing HLA-A*11:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:14 protein. This plasmid can be used for constructing HLA-A*11:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:15 Protein Expression Plasmid Vector	PHLAP9253724	Plasmid vector containing HLA-A*11:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:15 protein. This plasmid can be used for constructing HLA-A*11:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:16 Protein Expression Plasmid Vector	PHLAP9253725	Plasmid vector containing HLA-A*11:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:16 protein. This plasmid can be used for constructing HLA-A*11:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:17 Protein Expression Plasmid Vector	PHLAP9253726	Plasmid vector containing HLA-A*11:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:17 protein. This plasmid can be used for constructing HLA-A*11:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:18 Protein Expression Plasmid Vector	PHLAP9253727	Plasmid vector containing HLA-A*11:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:18 protein. This plasmid can be used for constructing HLA-A*11:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:19 Protein Expression Plasmid Vector	PHLAP9253728	Plasmid vector containing HLA-A*11:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:19 protein. This plasmid can be used for constructing HLA-A*11:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:20 Protein Expression Plasmid Vector	PHLAP9253729	Plasmid vector containing HLA-A*11:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:20 protein. This plasmid can be used for constructing HLA-A*11:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:21 Protein Expression Plasmid Vector	PHLAP9253730	Plasmid vector containing HLA-A*11:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:21 protein. This plasmid can be used for constructing HLA-A*11:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:22 Protein Expression Plasmid Vector	PHLAP9253731	Plasmid vector containing HLA-A*11:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:22 protein. This plasmid can be used for constructing HLA-A*11:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:23 Protein Expression Plasmid Vector	PHLAP9253732	Plasmid vector containing HLA-A*11:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:23 protein. This plasmid can be used for constructing HLA-A*11:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:24 Protein Expression Plasmid Vector	PHLAP9253733	Plasmid vector containing HLA-A*11:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:24 protein. This plasmid can be used for constructing HLA-A*11:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:25 Protein Expression Plasmid Vector	PHLAP9253734	Plasmid vector containing HLA-A*11:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:25 protein. This plasmid can be used for constructing HLA-A*11:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:26 Protein Expression Plasmid Vector	PHLAP9253735	Plasmid vector containing HLA-A*11:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:26 protein. This plasmid can be used for constructing HLA-A*11:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:27 Protein Expression Plasmid Vector	PHLAP9253736	Plasmid vector containing HLA-A*11:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:27 protein. This plasmid can be used for constructing HLA-A*11:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:28 Protein Expression Plasmid Vector	PHLAP9253737	Plasmid vector containing HLA-A*11:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:28 protein. This plasmid can be used for constructing HLA-A*11:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:29 Protein Expression Plasmid Vector	PHLAP9253738	Plasmid vector containing HLA-A*11:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:29 protein. This plasmid can be used for constructing HLA-A*11:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:30 Protein Expression Plasmid Vector	PHLAP9253739	Plasmid vector containing HLA-A*11:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:30 protein. This plasmid can be used for constructing HLA-A*11:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:31 Protein Expression Plasmid Vector	PHLAP9253740	Plasmid vector containing HLA-A*11:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:31 protein. This plasmid can be used for constructing HLA-A*11:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:32 Protein Expression Plasmid Vector	PHLAP9253741	Plasmid vector containing HLA-A*11:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:32 protein. This plasmid can be used for constructing HLA-A*11:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:33 Protein Expression Plasmid Vector	PHLAP9253742	Plasmid vector containing HLA-A*11:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:33 protein. This plasmid can be used for constructing HLA-A*11:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:34 Protein Expression Plasmid Vector	PHLAP9253743	Plasmid vector containing HLA-A*11:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:34 protein. This plasmid can be used for constructing HLA-A*11:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:35 Protein Expression Plasmid Vector	PHLAP9253744	Plasmid vector containing HLA-A*11:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:35 protein. This plasmid can be used for constructing HLA-A*11:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:36 Protein Expression Plasmid Vector	PHLAP9253745	Plasmid vector containing HLA-A*11:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:36 protein. This plasmid can be used for constructing HLA-A*11:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:37 Protein Expression Plasmid Vector	PHLAP9253746	Plasmid vector containing HLA-A*11:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:37 protein. This plasmid can be used for constructing HLA-A*11:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:38 Protein Expression Plasmid Vector	PHLAP9253747	Plasmid vector containing HLA-A*11:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:38 protein. This plasmid can be used for constructing HLA-A*11:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:39 Protein Expression Plasmid Vector	PHLAP9253748	Plasmid vector containing HLA-A*11:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:39 protein. This plasmid can be used for constructing HLA-A*11:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:40 Protein Expression Plasmid Vector	PHLAP9253749	Plasmid vector containing HLA-A*11:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:40 protein. This plasmid can be used for constructing HLA-A*11:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:41 Protein Expression Plasmid Vector	PHLAP9253750	Plasmid vector containing HLA-A*11:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:41 protein. This plasmid can be used for constructing HLA-A*11:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:42 Protein Expression Plasmid Vector	PHLAP9253751	Plasmid vector containing HLA-A*11:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:42 protein. This plasmid can be used for constructing HLA-A*11:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:43 Protein Expression Plasmid Vector	PHLAP9253752	Plasmid vector containing HLA-A*11:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:43 protein. This plasmid can be used for constructing HLA-A*11:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:44 Protein Expression Plasmid Vector	PHLAP9253753	Plasmid vector containing HLA-A*11:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:44 protein. This plasmid can be used for constructing HLA-A*11:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:45 Protein Expression Plasmid Vector	PHLAP9253754	Plasmid vector containing HLA-A*11:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:45 protein. This plasmid can be used for constructing HLA-A*11:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:46 Protein Expression Plasmid Vector	PHLAP9253755	Plasmid vector containing HLA-A*11:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:46 protein. This plasmid can be used for constructing HLA-A*11:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:47 Protein Expression Plasmid Vector	PHLAP9253756	Plasmid vector containing HLA-A*11:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:47 protein. This plasmid can be used for constructing HLA-A*11:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:48 Protein Expression Plasmid Vector	PHLAP9253757	Plasmid vector containing HLA-A*11:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:48 protein. This plasmid can be used for constructing HLA-A*11:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:49 Protein Expression Plasmid Vector	PHLAP9253758	Plasmid vector containing HLA-A*11:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:49 protein. This plasmid can be used for constructing HLA-A*11:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:50 Protein Expression Plasmid Vector	PHLAP9253759	Plasmid vector containing HLA-A*11:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:50 protein. This plasmid can be used for constructing HLA-A*11:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:51 Protein Expression Plasmid Vector	PHLAP9253760	Plasmid vector containing HLA-A*11:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:51 protein. This plasmid can be used for constructing HLA-A*11:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:52 Protein Expression Plasmid Vector	PHLAP9253761	Plasmid vector containing HLA-A*11:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:52 protein. This plasmid can be used for constructing HLA-A*11:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:53 Protein Expression Plasmid Vector	PHLAP9253762	Plasmid vector containing HLA-A*11:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:53 protein. This plasmid can be used for constructing HLA-A*11:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:54 Protein Expression Plasmid Vector	PHLAP9253763	Plasmid vector containing HLA-A*11:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:54 protein. This plasmid can be used for constructing HLA-A*11:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:55 Protein Expression Plasmid Vector	PHLAP9253764	Plasmid vector containing HLA-A*11:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:55 protein. This plasmid can be used for constructing HLA-A*11:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:56 Protein Expression Plasmid Vector	PHLAP9253765	Plasmid vector containing HLA-A*11:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:56 protein. This plasmid can be used for constructing HLA-A*11:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:57 Protein Expression Plasmid Vector	PHLAP9253766	Plasmid vector containing HLA-A*11:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:57 protein. This plasmid can be used for constructing HLA-A*11:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:58 Protein Expression Plasmid Vector	PHLAP9253767	Plasmid vector containing HLA-A*11:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:58 protein. This plasmid can be used for constructing HLA-A*11:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:59 Protein Expression Plasmid Vector	PHLAP9253768	Plasmid vector containing HLA-A*11:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:59 protein. This plasmid can be used for constructing HLA-A*11:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:60 Protein Expression Plasmid Vector	PHLAP9253769	Plasmid vector containing HLA-A*11:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:60 protein. This plasmid can be used for constructing HLA-A*11:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:61 Protein Expression Plasmid Vector	PHLAP9253770	Plasmid vector containing HLA-A*11:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:61 protein. This plasmid can be used for constructing HLA-A*11:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:62 Protein Expression Plasmid Vector	PHLAP9253771	Plasmid vector containing HLA-A*11:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:62 protein. This plasmid can be used for constructing HLA-A*11:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:63 Protein Expression Plasmid Vector	PHLAP9253772	Plasmid vector containing HLA-A*11:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:63 protein. This plasmid can be used for constructing HLA-A*11:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:64 Protein Expression Plasmid Vector	PHLAP9253773	Plasmid vector containing HLA-A*11:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:64 protein. This plasmid can be used for constructing HLA-A*11:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:65 Protein Expression Plasmid Vector	PHLAP9253774	Plasmid vector containing HLA-A*11:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:65 protein. This plasmid can be used for constructing HLA-A*11:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:66 Protein Expression Plasmid Vector	PHLAP9253775	Plasmid vector containing HLA-A*11:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:66 protein. This plasmid can be used for constructing HLA-A*11:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:67 Protein Expression Plasmid Vector	PHLAP9253776	Plasmid vector containing HLA-A*11:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:67 protein. This plasmid can be used for constructing HLA-A*11:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:68 Protein Expression Plasmid Vector	PHLAP9253777	Plasmid vector containing HLA-A*11:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:68 protein. This plasmid can be used for constructing HLA-A*11:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:69 Protein Expression Plasmid Vector	PHLAP9253778	Plasmid vector containing HLA-A*11:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:69 protein. This plasmid can be used for constructing HLA-A*11:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:70 Protein Expression Plasmid Vector	PHLAP9253779	Plasmid vector containing HLA-A*11:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:70 protein. This plasmid can be used for constructing HLA-A*11:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:71 Protein Expression Plasmid Vector	PHLAP9253780	Plasmid vector containing HLA-A*11:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:71 protein. This plasmid can be used for constructing HLA-A*11:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:72 Protein Expression Plasmid Vector	PHLAP9253781	Plasmid vector containing HLA-A*11:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:72 protein. This plasmid can be used for constructing HLA-A*11:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:73 Protein Expression Plasmid Vector	PHLAP9253782	Plasmid vector containing HLA-A*11:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:73 protein. This plasmid can be used for constructing HLA-A*11:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:74 Protein Expression Plasmid Vector	PHLAP9253783	Plasmid vector containing HLA-A*11:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:74 protein. This plasmid can be used for constructing HLA-A*11:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:75 Protein Expression Plasmid Vector	PHLAP9253784	Plasmid vector containing HLA-A*11:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:75 protein. This plasmid can be used for constructing HLA-A*11:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:76 Protein Expression Plasmid Vector	PHLAP9253785	Plasmid vector containing HLA-A*11:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:76 protein. This plasmid can be used for constructing HLA-A*11:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:77 Protein Expression Plasmid Vector	PHLAP9253786	Plasmid vector containing HLA-A*11:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:77 protein. This plasmid can be used for constructing HLA-A*11:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:78 Protein Expression Plasmid Vector	PHLAP9253787	Plasmid vector containing HLA-A*11:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:78 protein. This plasmid can be used for constructing HLA-A*11:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:79 Protein Expression Plasmid Vector	PHLAP9253788	Plasmid vector containing HLA-A*11:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:79 protein. This plasmid can be used for constructing HLA-A*11:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:80 Protein Expression Plasmid Vector	PHLAP9253789	Plasmid vector containing HLA-A*11:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:80 protein. This plasmid can be used for constructing HLA-A*11:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:81 Protein Expression Plasmid Vector	PHLAP9253790	Plasmid vector containing HLA-A*11:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:81 protein. This plasmid can be used for constructing HLA-A*11:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:82 Protein Expression Plasmid Vector	PHLAP9253791	Plasmid vector containing HLA-A*11:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:82 protein. This plasmid can be used for constructing HLA-A*11:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:83 Protein Expression Plasmid Vector	PHLAP9253792	Plasmid vector containing HLA-A*11:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:83 protein. This plasmid can be used for constructing HLA-A*11:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:84 Protein Expression Plasmid Vector	PHLAP9253793	Plasmid vector containing HLA-A*11:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:84 protein. This plasmid can be used for constructing HLA-A*11:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:85 Protein Expression Plasmid Vector	PHLAP9253794	Plasmid vector containing HLA-A*11:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:85 protein. This plasmid can be used for constructing HLA-A*11:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:86 Protein Expression Plasmid Vector	PHLAP9253795	Plasmid vector containing HLA-A*11:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:86 protein. This plasmid can be used for constructing HLA-A*11:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:87 Protein Expression Plasmid Vector	PHLAP9253796	Plasmid vector containing HLA-A*11:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:87 protein. This plasmid can be used for constructing HLA-A*11:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:88 Protein Expression Plasmid Vector	PHLAP9253797	Plasmid vector containing HLA-A*11:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:88 protein. This plasmid can be used for constructing HLA-A*11:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:89 Protein Expression Plasmid Vector	PHLAP9253798	Plasmid vector containing HLA-A*11:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:89 protein. This plasmid can be used for constructing HLA-A*11:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:90 Protein Expression Plasmid Vector	PHLAP9253799	Plasmid vector containing HLA-A*11:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:90 protein. This plasmid can be used for constructing HLA-A*11:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:91 Protein Expression Plasmid Vector	PHLAP9253800	Plasmid vector containing HLA-A*11:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:91 protein. This plasmid can be used for constructing HLA-A*11:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:92 Protein Expression Plasmid Vector	PHLAP9253801	Plasmid vector containing HLA-A*11:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:92 protein. This plasmid can be used for constructing HLA-A*11:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:01:93 Protein Expression Plasmid Vector	PHLAP9253802	Plasmid vector containing HLA-A*11:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:93 protein. This plasmid can be used for constructing HLA-A*11:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:94 Protein Expression Plasmid Vector	PHLAP9253803	Plasmid vector containing HLA-A*11:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:94 protein. This plasmid can be used for constructing HLA-A*11:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:95 Protein Expression Plasmid Vector	PHLAP9253804	Plasmid vector containing HLA-A*11:01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:95 protein. This plasmid can be used for constructing HLA-A*11:01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:96 Protein Expression Plasmid Vector	PHLAP9253805	Plasmid vector containing HLA-A*11:01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:96 protein. This plasmid can be used for constructing HLA-A*11:01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:97 Protein Expression Plasmid Vector	PHLAP9253806	Plasmid vector containing HLA-A*11:01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:97 protein. This plasmid can be used for constructing HLA-A*11:01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:98Q Protein Expression Plasmid Vector	PHLAP9253807	Plasmid vector containing HLA-A*11:01:98Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:98Q protein. This plasmid can be used for constructing HLA-A*11:01:98Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:98Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:01:99 Protein Expression Plasmid Vector	PHLAP9253808	Plasmid vector containing HLA-A*11:01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:01:99 protein. This plasmid can be used for constructing HLA-A*11:01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:02:01:01 Protein Expression Plasmid Vector	PHLAP9253809	Plasmid vector containing HLA-A*11:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:02:01:01 protein. This plasmid can be used for constructing HLA-A*11:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:02:01:02 Protein Expression Plasmid Vector	PHLAP9253810	Plasmid vector containing HLA-A*11:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:02:01:02 protein. This plasmid can be used for constructing HLA-A*11:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:02:02 Protein Expression Plasmid Vector	PHLAP9253811	Plasmid vector containing HLA-A*11:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:02:02 protein. This plasmid can be used for constructing HLA-A*11:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:02:03 Protein Expression Plasmid Vector	PHLAP9253812	Plasmid vector containing HLA-A*11:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:02:03 protein. This plasmid can be used for constructing HLA-A*11:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:02:04 Protein Expression Plasmid Vector	PHLAP9253813	Plasmid vector containing HLA-A*11:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:02:04 protein. This plasmid can be used for constructing HLA-A*11:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:02:05 Protein Expression Plasmid Vector	PHLAP9253814	Plasmid vector containing HLA-A*11:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:02:05 protein. This plasmid can be used for constructing HLA-A*11:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:02:06 Protein Expression Plasmid Vector	PHLAP9253815	Plasmid vector containing HLA-A*11:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:02:06 protein. This plasmid can be used for constructing HLA-A*11:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:02:07 Protein Expression Plasmid Vector	PHLAP9253816	Plasmid vector containing HLA-A*11:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:02:07 protein. This plasmid can be used for constructing HLA-A*11:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:02:08 Protein Expression Plasmid Vector	PHLAP9253817	Plasmid vector containing HLA-A*11:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:02:08 protein. This plasmid can be used for constructing HLA-A*11:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:02:09 Protein Expression Plasmid Vector	PHLAP9253818	Plasmid vector containing HLA-A*11:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:02:09 protein. This plasmid can be used for constructing HLA-A*11:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:03:01:01 Protein Expression Plasmid Vector	PHLAP9253819	Plasmid vector containing HLA-A*11:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:03:01:01 protein. This plasmid can be used for constructing HLA-A*11:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:03:01:02 Protein Expression Plasmid Vector	PHLAP9253820	Plasmid vector containing HLA-A*11:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:03:01:02 protein. This plasmid can be used for constructing HLA-A*11:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:04 Protein Expression Plasmid Vector	PHLAP9253821	Plasmid vector containing HLA-A*11:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:04 protein. This plasmid can be used for constructing HLA-A*11:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:05 Protein Expression Plasmid Vector	PHLAP9253822	Plasmid vector containing HLA-A*11:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:05 protein. This plasmid can be used for constructing HLA-A*11:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:06 Protein Expression Plasmid Vector	PHLAP9253823	Plasmid vector containing HLA-A*11:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:06 protein. This plasmid can be used for constructing HLA-A*11:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:07:01 Protein Expression Plasmid Vector	PHLAP9253824	Plasmid vector containing HLA-A*11:07:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:07:01 protein. This plasmid can be used for constructing HLA-A*11:07:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:07:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:07:02 Protein Expression Plasmid Vector	PHLAP9253825	Plasmid vector containing HLA-A*11:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:07:02 protein. This plasmid can be used for constructing HLA-A*11:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:08 Protein Expression Plasmid Vector	PHLAP9253826	Plasmid vector containing HLA-A*11:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:08 protein. This plasmid can be used for constructing HLA-A*11:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:09 Protein Expression Plasmid Vector	PHLAP9253827	Plasmid vector containing HLA-A*11:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:09 protein. This plasmid can be used for constructing HLA-A*11:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:10 Protein Expression Plasmid Vector	PHLAP9253828	Plasmid vector containing HLA-A*11:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:10 protein. This plasmid can be used for constructing HLA-A*11:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:100 Protein Expression Plasmid Vector	PHLAP9253829	Plasmid vector containing HLA-A*11:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:100 protein. This plasmid can be used for constructing HLA-A*11:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:101 Protein Expression Plasmid Vector	PHLAP9253830	Plasmid vector containing HLA-A*11:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:101 protein. This plasmid can be used for constructing HLA-A*11:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:102 Protein Expression Plasmid Vector	PHLAP9253831	Plasmid vector containing HLA-A*11:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:102 protein. This plasmid can be used for constructing HLA-A*11:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:103 Protein Expression Plasmid Vector	PHLAP9253832	Plasmid vector containing HLA-A*11:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:103 protein. This plasmid can be used for constructing HLA-A*11:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:104 Protein Expression Plasmid Vector	PHLAP9253833	Plasmid vector containing HLA-A*11:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:104 protein. This plasmid can be used for constructing HLA-A*11:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:105 Protein Expression Plasmid Vector	PHLAP9253834	Plasmid vector containing HLA-A*11:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:105 protein. This plasmid can be used for constructing HLA-A*11:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:106 Protein Expression Plasmid Vector	PHLAP9253835	Plasmid vector containing HLA-A*11:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:106 protein. This plasmid can be used for constructing HLA-A*11:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:107 Protein Expression Plasmid Vector	PHLAP9253836	Plasmid vector containing HLA-A*11:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:107 protein. This plasmid can be used for constructing HLA-A*11:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:108 Protein Expression Plasmid Vector	PHLAP9253837	Plasmid vector containing HLA-A*11:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:108 protein. This plasmid can be used for constructing HLA-A*11:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:109N Protein Expression Plasmid Vector	PHLAP9253838	Plasmid vector containing HLA-A*11:109N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:109N protein. This plasmid can be used for constructing HLA-A*11:109N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:109N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:11 Protein Expression Plasmid Vector	PHLAP9253839	Plasmid vector containing HLA-A*11:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:11 protein. This plasmid can be used for constructing HLA-A*11:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:110 Protein Expression Plasmid Vector	PHLAP9253840	Plasmid vector containing HLA-A*11:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:110 protein. This plasmid can be used for constructing HLA-A*11:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:111 Protein Expression Plasmid Vector	PHLAP9253841	Plasmid vector containing HLA-A*11:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:111 protein. This plasmid can be used for constructing HLA-A*11:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:112 Protein Expression Plasmid Vector	PHLAP9253842	Plasmid vector containing HLA-A*11:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:112 protein. This plasmid can be used for constructing HLA-A*11:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:113 Protein Expression Plasmid Vector	PHLAP9253843	Plasmid vector containing HLA-A*11:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:113 protein. This plasmid can be used for constructing HLA-A*11:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:114 Protein Expression Plasmid Vector	PHLAP9253844	Plasmid vector containing HLA-A*11:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:114 protein. This plasmid can be used for constructing HLA-A*11:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:115N Protein Expression Plasmid Vector	PHLAP9253845	Plasmid vector containing HLA-A*11:115N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:115N protein. This plasmid can be used for constructing HLA-A*11:115N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:115N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:116 Protein Expression Plasmid Vector	PHLAP9253846	Plasmid vector containing HLA-A*11:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:116 protein. This plasmid can be used for constructing HLA-A*11:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:117 Protein Expression Plasmid Vector	PHLAP9253847	Plasmid vector containing HLA-A*11:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:117 protein. This plasmid can be used for constructing HLA-A*11:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:118 Protein Expression Plasmid Vector	PHLAP9253848	Plasmid vector containing HLA-A*11:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:118 protein. This plasmid can be used for constructing HLA-A*11:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:119:01 Protein Expression Plasmid Vector	PHLAP9253849	Plasmid vector containing HLA-A*11:119:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:119:01 protein. This plasmid can be used for constructing HLA-A*11:119:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:119:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:119:02 Protein Expression Plasmid Vector	PHLAP9253850	Plasmid vector containing HLA-A*11:119:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:119:02 protein. This plasmid can be used for constructing HLA-A*11:119:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:119:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:119:03 Protein Expression Plasmid Vector	PHLAP9253851	Plasmid vector containing HLA-A*11:119:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:119:03 protein. This plasmid can be used for constructing HLA-A*11:119:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:119:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:12:01 Protein Expression Plasmid Vector	PHLAP9253852	Plasmid vector containing HLA-A*11:12:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:12:01 protein. This plasmid can be used for constructing HLA-A*11:12:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:12:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:12:02 Protein Expression Plasmid Vector	PHLAP9253853	Plasmid vector containing HLA-A*11:12:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:12:02 protein. This plasmid can be used for constructing HLA-A*11:12:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:12:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:120 Protein Expression Plasmid Vector	PHLAP9253854	Plasmid vector containing HLA-A*11:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:120 protein. This plasmid can be used for constructing HLA-A*11:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:121 Protein Expression Plasmid Vector	PHLAP9253855	Plasmid vector containing HLA-A*11:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:121 protein. This plasmid can be used for constructing HLA-A*11:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:122 Protein Expression Plasmid Vector	PHLAP9253856	Plasmid vector containing HLA-A*11:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:122 protein. This plasmid can be used for constructing HLA-A*11:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:123 Protein Expression Plasmid Vector	PHLAP9253857	Plasmid vector containing HLA-A*11:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:123 protein. This plasmid can be used for constructing HLA-A*11:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:124 Protein Expression Plasmid Vector	PHLAP9253858	Plasmid vector containing HLA-A*11:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:124 protein. This plasmid can be used for constructing HLA-A*11:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:125 Protein Expression Plasmid Vector	PHLAP9253859	Plasmid vector containing HLA-A*11:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:125 protein. This plasmid can be used for constructing HLA-A*11:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:126:01:01 Protein Expression Plasmid Vector	PHLAP9253860	Plasmid vector containing HLA-A*11:126:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:126:01:01 protein. This plasmid can be used for constructing HLA-A*11:126:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:126:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:126:01:02 Protein Expression Plasmid Vector	PHLAP9253861	Plasmid vector containing HLA-A*11:126:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:126:01:02 protein. This plasmid can be used for constructing HLA-A*11:126:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:126:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:127N Protein Expression Plasmid Vector	PHLAP9253862	Plasmid vector containing HLA-A*11:127N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:127N protein. This plasmid can be used for constructing HLA-A*11:127N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:127N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:128 Protein Expression Plasmid Vector	PHLAP9253863	Plasmid vector containing HLA-A*11:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:128 protein. This plasmid can be used for constructing HLA-A*11:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:129 Protein Expression Plasmid Vector	PHLAP9253864	Plasmid vector containing HLA-A*11:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:129 protein. This plasmid can be used for constructing HLA-A*11:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:13 Protein Expression Plasmid Vector	PHLAP9253865	Plasmid vector containing HLA-A*11:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:13 protein. This plasmid can be used for constructing HLA-A*11:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:130 Protein Expression Plasmid Vector	PHLAP9253866	Plasmid vector containing HLA-A*11:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:130 protein. This plasmid can be used for constructing HLA-A*11:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:131 Protein Expression Plasmid Vector	PHLAP9253867	Plasmid vector containing HLA-A*11:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:131 protein. This plasmid can be used for constructing HLA-A*11:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:132 Protein Expression Plasmid Vector	PHLAP9253868	Plasmid vector containing HLA-A*11:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:132 protein. This plasmid can be used for constructing HLA-A*11:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:133 Protein Expression Plasmid Vector	PHLAP9253869	Plasmid vector containing HLA-A*11:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:133 protein. This plasmid can be used for constructing HLA-A*11:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:134 Protein Expression Plasmid Vector	PHLAP9253870	Plasmid vector containing HLA-A*11:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:134 protein. This plasmid can be used for constructing HLA-A*11:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:135 Protein Expression Plasmid Vector	PHLAP9253871	Plasmid vector containing HLA-A*11:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:135 protein. This plasmid can be used for constructing HLA-A*11:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:136 Protein Expression Plasmid Vector	PHLAP9253872	Plasmid vector containing HLA-A*11:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:136 protein. This plasmid can be used for constructing HLA-A*11:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:137:01N Protein Expression Plasmid Vector	PHLAP9253873	Plasmid vector containing HLA-A*11:137:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:137:01N protein. This plasmid can be used for constructing HLA-A*11:137:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:137:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:137:02N Protein Expression Plasmid Vector	PHLAP9253874	Plasmid vector containing HLA-A*11:137:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:137:02N protein. This plasmid can be used for constructing HLA-A*11:137:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:137:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:138 Protein Expression Plasmid Vector	PHLAP9253875	Plasmid vector containing HLA-A*11:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:138 protein. This plasmid can be used for constructing HLA-A*11:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:139 Protein Expression Plasmid Vector	PHLAP9253876	Plasmid vector containing HLA-A*11:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:139 protein. This plasmid can be used for constructing HLA-A*11:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:14 Protein Expression Plasmid Vector	PHLAP9253877	Plasmid vector containing HLA-A*11:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:14 protein. This plasmid can be used for constructing HLA-A*11:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:140 Protein Expression Plasmid Vector	PHLAP9253878	Plasmid vector containing HLA-A*11:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:140 protein. This plasmid can be used for constructing HLA-A*11:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:141 Protein Expression Plasmid Vector	PHLAP9253879	Plasmid vector containing HLA-A*11:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:141 protein. This plasmid can be used for constructing HLA-A*11:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:142 Protein Expression Plasmid Vector	PHLAP9253880	Plasmid vector containing HLA-A*11:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:142 protein. This plasmid can be used for constructing HLA-A*11:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:143 Protein Expression Plasmid Vector	PHLAP9253881	Plasmid vector containing HLA-A*11:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:143 protein. This plasmid can be used for constructing HLA-A*11:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:144 Protein Expression Plasmid Vector	PHLAP9253882	Plasmid vector containing HLA-A*11:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:144 protein. This plasmid can be used for constructing HLA-A*11:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:145 Protein Expression Plasmid Vector	PHLAP9253883	Plasmid vector containing HLA-A*11:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:145 protein. This plasmid can be used for constructing HLA-A*11:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:146 Protein Expression Plasmid Vector	PHLAP9253884	Plasmid vector containing HLA-A*11:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:146 protein. This plasmid can be used for constructing HLA-A*11:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:147 Protein Expression Plasmid Vector	PHLAP9253885	Plasmid vector containing HLA-A*11:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:147 protein. This plasmid can be used for constructing HLA-A*11:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:148:01 Protein Expression Plasmid Vector	PHLAP9253886	Plasmid vector containing HLA-A*11:148:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:148:01 protein. This plasmid can be used for constructing HLA-A*11:148:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:148:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:148:02 Protein Expression Plasmid Vector	PHLAP9253887	Plasmid vector containing HLA-A*11:148:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:148:02 protein. This plasmid can be used for constructing HLA-A*11:148:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:148:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:149 Protein Expression Plasmid Vector	PHLAP9253888	Plasmid vector containing HLA-A*11:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:149 protein. This plasmid can be used for constructing HLA-A*11:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:15:01 Protein Expression Plasmid Vector	PHLAP9253889	Plasmid vector containing HLA-A*11:15:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:15:01 protein. This plasmid can be used for constructing HLA-A*11:15:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:15:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:15:02 Protein Expression Plasmid Vector	PHLAP9253890	Plasmid vector containing HLA-A*11:15:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:15:02 protein. This plasmid can be used for constructing HLA-A*11:15:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:15:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:150 Protein Expression Plasmid Vector	PHLAP9253891	Plasmid vector containing HLA-A*11:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:150 protein. This plasmid can be used for constructing HLA-A*11:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:151 Protein Expression Plasmid Vector	PHLAP9253892	Plasmid vector containing HLA-A*11:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:151 protein. This plasmid can be used for constructing HLA-A*11:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:152 Protein Expression Plasmid Vector	PHLAP9253893	Plasmid vector containing HLA-A*11:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:152 protein. This plasmid can be used for constructing HLA-A*11:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:153:01 Protein Expression Plasmid Vector	PHLAP9253894	Plasmid vector containing HLA-A*11:153:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:153:01 protein. This plasmid can be used for constructing HLA-A*11:153:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:153:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:153:02 Protein Expression Plasmid Vector	PHLAP9253895	Plasmid vector containing HLA-A*11:153:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:153:02 protein. This plasmid can be used for constructing HLA-A*11:153:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:153:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:154 Protein Expression Plasmid Vector	PHLAP9253896	Plasmid vector containing HLA-A*11:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:154 protein. This plasmid can be used for constructing HLA-A*11:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:155 Protein Expression Plasmid Vector	PHLAP9253897	Plasmid vector containing HLA-A*11:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:155 protein. This plasmid can be used for constructing HLA-A*11:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:156 Protein Expression Plasmid Vector	PHLAP9253898	Plasmid vector containing HLA-A*11:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:156 protein. This plasmid can be used for constructing HLA-A*11:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:157 Protein Expression Plasmid Vector	PHLAP9253899	Plasmid vector containing HLA-A*11:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:157 protein. This plasmid can be used for constructing HLA-A*11:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:158 Protein Expression Plasmid Vector	PHLAP9253900	Plasmid vector containing HLA-A*11:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:158 protein. This plasmid can be used for constructing HLA-A*11:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:159 Protein Expression Plasmid Vector	PHLAP9253901	Plasmid vector containing HLA-A*11:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:159 protein. This plasmid can be used for constructing HLA-A*11:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:16 Protein Expression Plasmid Vector	PHLAP9253902	Plasmid vector containing HLA-A*11:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:16 protein. This plasmid can be used for constructing HLA-A*11:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:160 Protein Expression Plasmid Vector	PHLAP9253903	Plasmid vector containing HLA-A*11:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:160 protein. This plasmid can be used for constructing HLA-A*11:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:161 Protein Expression Plasmid Vector	PHLAP9253904	Plasmid vector containing HLA-A*11:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:161 protein. This plasmid can be used for constructing HLA-A*11:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:162 Protein Expression Plasmid Vector	PHLAP9253905	Plasmid vector containing HLA-A*11:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:162 protein. This plasmid can be used for constructing HLA-A*11:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:163 Protein Expression Plasmid Vector	PHLAP9253906	Plasmid vector containing HLA-A*11:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:163 protein. This plasmid can be used for constructing HLA-A*11:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:164 Protein Expression Plasmid Vector	PHLAP9253907	Plasmid vector containing HLA-A*11:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:164 protein. This plasmid can be used for constructing HLA-A*11:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:165 Protein Expression Plasmid Vector	PHLAP9253908	Plasmid vector containing HLA-A*11:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:165 protein. This plasmid can be used for constructing HLA-A*11:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:166 Protein Expression Plasmid Vector	PHLAP9253909	Plasmid vector containing HLA-A*11:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:166 protein. This plasmid can be used for constructing HLA-A*11:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:167 Protein Expression Plasmid Vector	PHLAP9253910	Plasmid vector containing HLA-A*11:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:167 protein. This plasmid can be used for constructing HLA-A*11:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:168 Protein Expression Plasmid Vector	PHLAP9253911	Plasmid vector containing HLA-A*11:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:168 protein. This plasmid can be used for constructing HLA-A*11:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:169 Protein Expression Plasmid Vector	PHLAP9253912	Plasmid vector containing HLA-A*11:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:169 protein. This plasmid can be used for constructing HLA-A*11:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:17 Protein Expression Plasmid Vector	PHLAP9253913	Plasmid vector containing HLA-A*11:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:17 protein. This plasmid can be used for constructing HLA-A*11:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:170Q Protein Expression Plasmid Vector	PHLAP9253914	Plasmid vector containing HLA-A*11:170Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:170Q protein. This plasmid can be used for constructing HLA-A*11:170Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:170Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:171 Protein Expression Plasmid Vector	PHLAP9253915	Plasmid vector containing HLA-A*11:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:171 protein. This plasmid can be used for constructing HLA-A*11:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:172 Protein Expression Plasmid Vector	PHLAP9253916	Plasmid vector containing HLA-A*11:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:172 protein. This plasmid can be used for constructing HLA-A*11:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:173 Protein Expression Plasmid Vector	PHLAP9253917	Plasmid vector containing HLA-A*11:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:173 protein. This plasmid can be used for constructing HLA-A*11:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:174 Protein Expression Plasmid Vector	PHLAP9253918	Plasmid vector containing HLA-A*11:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:174 protein. This plasmid can be used for constructing HLA-A*11:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:175 Protein Expression Plasmid Vector	PHLAP9253919	Plasmid vector containing HLA-A*11:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:175 protein. This plasmid can be used for constructing HLA-A*11:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:176 Protein Expression Plasmid Vector	PHLAP9253920	Plasmid vector containing HLA-A*11:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:176 protein. This plasmid can be used for constructing HLA-A*11:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:177 Protein Expression Plasmid Vector	PHLAP9253921	Plasmid vector containing HLA-A*11:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:177 protein. This plasmid can be used for constructing HLA-A*11:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:178 Protein Expression Plasmid Vector	PHLAP9253922	Plasmid vector containing HLA-A*11:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:178 protein. This plasmid can be used for constructing HLA-A*11:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:179 Protein Expression Plasmid Vector	PHLAP9253923	Plasmid vector containing HLA-A*11:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:179 protein. This plasmid can be used for constructing HLA-A*11:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:18 Protein Expression Plasmid Vector	PHLAP9253924	Plasmid vector containing HLA-A*11:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:18 protein. This plasmid can be used for constructing HLA-A*11:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:180N Protein Expression Plasmid Vector	PHLAP9253925	Plasmid vector containing HLA-A*11:180N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:180N protein. This plasmid can be used for constructing HLA-A*11:180N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:180N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:181 Protein Expression Plasmid Vector	PHLAP9253926	Plasmid vector containing HLA-A*11:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:181 protein. This plasmid can be used for constructing HLA-A*11:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:182Q Protein Expression Plasmid Vector	PHLAP9253927	Plasmid vector containing HLA-A*11:182Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:182Q protein. This plasmid can be used for constructing HLA-A*11:182Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:182Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:183 Protein Expression Plasmid Vector	PHLAP9253928	Plasmid vector containing HLA-A*11:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:183 protein. This plasmid can be used for constructing HLA-A*11:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:184 Protein Expression Plasmid Vector	PHLAP9253929	Plasmid vector containing HLA-A*11:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:184 protein. This plasmid can be used for constructing HLA-A*11:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:185 Protein Expression Plasmid Vector	PHLAP9253930	Plasmid vector containing HLA-A*11:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:185 protein. This plasmid can be used for constructing HLA-A*11:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:186 Protein Expression Plasmid Vector	PHLAP9253931	Plasmid vector containing HLA-A*11:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:186 protein. This plasmid can be used for constructing HLA-A*11:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:187 Protein Expression Plasmid Vector	PHLAP9253932	Plasmid vector containing HLA-A*11:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:187 protein. This plasmid can be used for constructing HLA-A*11:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:188 Protein Expression Plasmid Vector	PHLAP9253933	Plasmid vector containing HLA-A*11:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:188 protein. This plasmid can be used for constructing HLA-A*11:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:189 Protein Expression Plasmid Vector	PHLAP9253934	Plasmid vector containing HLA-A*11:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:189 protein. This plasmid can be used for constructing HLA-A*11:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:19 Protein Expression Plasmid Vector	PHLAP9253935	Plasmid vector containing HLA-A*11:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:19 protein. This plasmid can be used for constructing HLA-A*11:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:190 Protein Expression Plasmid Vector	PHLAP9253936	Plasmid vector containing HLA-A*11:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:190 protein. This plasmid can be used for constructing HLA-A*11:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:191 Protein Expression Plasmid Vector	PHLAP9253937	Plasmid vector containing HLA-A*11:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:191 protein. This plasmid can be used for constructing HLA-A*11:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:192 Protein Expression Plasmid Vector	PHLAP9253938	Plasmid vector containing HLA-A*11:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:192 protein. This plasmid can be used for constructing HLA-A*11:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:193 Protein Expression Plasmid Vector	PHLAP9253939	Plasmid vector containing HLA-A*11:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:193 protein. This plasmid can be used for constructing HLA-A*11:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:194 Protein Expression Plasmid Vector	PHLAP9253940	Plasmid vector containing HLA-A*11:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:194 protein. This plasmid can be used for constructing HLA-A*11:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:195 Protein Expression Plasmid Vector	PHLAP9253941	Plasmid vector containing HLA-A*11:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:195 protein. This plasmid can be used for constructing HLA-A*11:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:196 Protein Expression Plasmid Vector	PHLAP9253942	Plasmid vector containing HLA-A*11:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:196 protein. This plasmid can be used for constructing HLA-A*11:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:197 Protein Expression Plasmid Vector	PHLAP9253943	Plasmid vector containing HLA-A*11:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:197 protein. This plasmid can be used for constructing HLA-A*11:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:198 Protein Expression Plasmid Vector	PHLAP9253944	Plasmid vector containing HLA-A*11:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:198 protein. This plasmid can be used for constructing HLA-A*11:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:199:01 Protein Expression Plasmid Vector	PHLAP9253945	Plasmid vector containing HLA-A*11:199:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:199:01 protein. This plasmid can be used for constructing HLA-A*11:199:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:199:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:199:02 Protein Expression Plasmid Vector	PHLAP9253946	Plasmid vector containing HLA-A*11:199:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:199:02 protein. This plasmid can be used for constructing HLA-A*11:199:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:199:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:199:03 Protein Expression Plasmid Vector	PHLAP9253947	Plasmid vector containing HLA-A*11:199:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:199:03 protein. This plasmid can be used for constructing HLA-A*11:199:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:199:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:20 Protein Expression Plasmid Vector	PHLAP9253948	Plasmid vector containing HLA-A*11:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:20 protein. This plasmid can be used for constructing HLA-A*11:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:200 Protein Expression Plasmid Vector	PHLAP9253949	Plasmid vector containing HLA-A*11:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:200 protein. This plasmid can be used for constructing HLA-A*11:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:201 Protein Expression Plasmid Vector	PHLAP9253950	Plasmid vector containing HLA-A*11:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:201 protein. This plasmid can be used for constructing HLA-A*11:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:202 Protein Expression Plasmid Vector	PHLAP9253951	Plasmid vector containing HLA-A*11:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:202 protein. This plasmid can be used for constructing HLA-A*11:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:203 Protein Expression Plasmid Vector	PHLAP9253952	Plasmid vector containing HLA-A*11:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:203 protein. This plasmid can be used for constructing HLA-A*11:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:204 Protein Expression Plasmid Vector	PHLAP9253953	Plasmid vector containing HLA-A*11:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:204 protein. This plasmid can be used for constructing HLA-A*11:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:205 Protein Expression Plasmid Vector	PHLAP9253954	Plasmid vector containing HLA-A*11:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:205 protein. This plasmid can be used for constructing HLA-A*11:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:206 Protein Expression Plasmid Vector	PHLAP9253955	Plasmid vector containing HLA-A*11:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:206 protein. This plasmid can be used for constructing HLA-A*11:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:207 Protein Expression Plasmid Vector	PHLAP9253956	Plasmid vector containing HLA-A*11:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:207 protein. This plasmid can be used for constructing HLA-A*11:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:208:01N Protein Expression Plasmid Vector	PHLAP9253957	Plasmid vector containing HLA-A*11:208:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:208:01N protein. This plasmid can be used for constructing HLA-A*11:208:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:208:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:208:02N Protein Expression Plasmid Vector	PHLAP9253958	Plasmid vector containing HLA-A*11:208:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:208:02N protein. This plasmid can be used for constructing HLA-A*11:208:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:208:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:209 Protein Expression Plasmid Vector	PHLAP9253959	Plasmid vector containing HLA-A*11:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:209 protein. This plasmid can be used for constructing HLA-A*11:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:210N Protein Expression Plasmid Vector	PHLAP9253960	Plasmid vector containing HLA-A*11:210N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:210N protein. This plasmid can be used for constructing HLA-A*11:210N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:210N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:211 Protein Expression Plasmid Vector	PHLAP9253961	Plasmid vector containing HLA-A*11:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:211 protein. This plasmid can be used for constructing HLA-A*11:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:212 Protein Expression Plasmid Vector	PHLAP9253962	Plasmid vector containing HLA-A*11:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:212 protein. This plasmid can be used for constructing HLA-A*11:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:213 Protein Expression Plasmid Vector	PHLAP9253963	Plasmid vector containing HLA-A*11:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:213 protein. This plasmid can be used for constructing HLA-A*11:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:214 Protein Expression Plasmid Vector	PHLAP9253964	Plasmid vector containing HLA-A*11:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:214 protein. This plasmid can be used for constructing HLA-A*11:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:215N Protein Expression Plasmid Vector	PHLAP9253965	Plasmid vector containing HLA-A*11:215N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:215N protein. This plasmid can be used for constructing HLA-A*11:215N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:215N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:216 Protein Expression Plasmid Vector	PHLAP9253966	Plasmid vector containing HLA-A*11:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:216 protein. This plasmid can be used for constructing HLA-A*11:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:217 Protein Expression Plasmid Vector	PHLAP9253967	Plasmid vector containing HLA-A*11:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:217 protein. This plasmid can be used for constructing HLA-A*11:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:218 Protein Expression Plasmid Vector	PHLAP9253968	Plasmid vector containing HLA-A*11:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:218 protein. This plasmid can be used for constructing HLA-A*11:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:219 Protein Expression Plasmid Vector	PHLAP9253969	Plasmid vector containing HLA-A*11:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:219 protein. This plasmid can be used for constructing HLA-A*11:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:21N Protein Expression Plasmid Vector	PHLAP9253970	Plasmid vector containing HLA-A*11:21N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:21N protein. This plasmid can be used for constructing HLA-A*11:21N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:21N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:22 Protein Expression Plasmid Vector	PHLAP9253971	Plasmid vector containing HLA-A*11:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:22 protein. This plasmid can be used for constructing HLA-A*11:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:220 Protein Expression Plasmid Vector	PHLAP9253972	Plasmid vector containing HLA-A*11:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:220 protein. This plasmid can be used for constructing HLA-A*11:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:221 Protein Expression Plasmid Vector	PHLAP9253973	Plasmid vector containing HLA-A*11:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:221 protein. This plasmid can be used for constructing HLA-A*11:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:222 Protein Expression Plasmid Vector	PHLAP9253974	Plasmid vector containing HLA-A*11:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:222 protein. This plasmid can be used for constructing HLA-A*11:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:223 Protein Expression Plasmid Vector	PHLAP9253975	Plasmid vector containing HLA-A*11:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:223 protein. This plasmid can be used for constructing HLA-A*11:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:224 Protein Expression Plasmid Vector	PHLAP9253976	Plasmid vector containing HLA-A*11:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:224 protein. This plasmid can be used for constructing HLA-A*11:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:225 Protein Expression Plasmid Vector	PHLAP9253977	Plasmid vector containing HLA-A*11:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:225 protein. This plasmid can be used for constructing HLA-A*11:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:226 Protein Expression Plasmid Vector	PHLAP9253978	Plasmid vector containing HLA-A*11:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:226 protein. This plasmid can be used for constructing HLA-A*11:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:227 Protein Expression Plasmid Vector	PHLAP9253979	Plasmid vector containing HLA-A*11:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:227 protein. This plasmid can be used for constructing HLA-A*11:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:228 Protein Expression Plasmid Vector	PHLAP9253980	Plasmid vector containing HLA-A*11:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:228 protein. This plasmid can be used for constructing HLA-A*11:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:229 Protein Expression Plasmid Vector	PHLAP9253981	Plasmid vector containing HLA-A*11:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:229 protein. This plasmid can be used for constructing HLA-A*11:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:23 Protein Expression Plasmid Vector	PHLAP9253982	Plasmid vector containing HLA-A*11:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:23 protein. This plasmid can be used for constructing HLA-A*11:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:230 Protein Expression Plasmid Vector	PHLAP9253983	Plasmid vector containing HLA-A*11:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:230 protein. This plasmid can be used for constructing HLA-A*11:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:231 Protein Expression Plasmid Vector	PHLAP9253984	Plasmid vector containing HLA-A*11:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:231 protein. This plasmid can be used for constructing HLA-A*11:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:232 Protein Expression Plasmid Vector	PHLAP9253985	Plasmid vector containing HLA-A*11:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:232 protein. This plasmid can be used for constructing HLA-A*11:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:233 Protein Expression Plasmid Vector	PHLAP9253986	Plasmid vector containing HLA-A*11:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:233 protein. This plasmid can be used for constructing HLA-A*11:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:234 Protein Expression Plasmid Vector	PHLAP9253987	Plasmid vector containing HLA-A*11:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:234 protein. This plasmid can be used for constructing HLA-A*11:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:235Q Protein Expression Plasmid Vector	PHLAP9253988	Plasmid vector containing HLA-A*11:235Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:235Q protein. This plasmid can be used for constructing HLA-A*11:235Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:235Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:236 Protein Expression Plasmid Vector	PHLAP9253989	Plasmid vector containing HLA-A*11:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:236 protein. This plasmid can be used for constructing HLA-A*11:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:237 Protein Expression Plasmid Vector	PHLAP9253990	Plasmid vector containing HLA-A*11:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:237 protein. This plasmid can be used for constructing HLA-A*11:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:238N Protein Expression Plasmid Vector	PHLAP9253991	Plasmid vector containing HLA-A*11:238N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:238N protein. This plasmid can be used for constructing HLA-A*11:238N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:238N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:239 Protein Expression Plasmid Vector	PHLAP9253992	Plasmid vector containing HLA-A*11:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:239 protein. This plasmid can be used for constructing HLA-A*11:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:24:01 Protein Expression Plasmid Vector	PHLAP9253993	Plasmid vector containing HLA-A*11:24:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:24:01 protein. This plasmid can be used for constructing HLA-A*11:24:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:24:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:24:02 Protein Expression Plasmid Vector	PHLAP9253994	Plasmid vector containing HLA-A*11:24:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:24:02 protein. This plasmid can be used for constructing HLA-A*11:24:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:24:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:240 Protein Expression Plasmid Vector	PHLAP9253995	Plasmid vector containing HLA-A*11:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:240 protein. This plasmid can be used for constructing HLA-A*11:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:241 Protein Expression Plasmid Vector	PHLAP9253996	Plasmid vector containing HLA-A*11:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:241 protein. This plasmid can be used for constructing HLA-A*11:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:242 Protein Expression Plasmid Vector	PHLAP9253997	Plasmid vector containing HLA-A*11:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:242 protein. This plasmid can be used for constructing HLA-A*11:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:243 Protein Expression Plasmid Vector	PHLAP9253998	Plasmid vector containing HLA-A*11:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:243 protein. This plasmid can be used for constructing HLA-A*11:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:244 Protein Expression Plasmid Vector	PHLAP9253999	Plasmid vector containing HLA-A*11:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:244 protein. This plasmid can be used for constructing HLA-A*11:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:245 Protein Expression Plasmid Vector	PHLAP9254000	Plasmid vector containing HLA-A*11:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:245 protein. This plasmid can be used for constructing HLA-A*11:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:246 Protein Expression Plasmid Vector	PHLAP9254001	Plasmid vector containing HLA-A*11:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:246 protein. This plasmid can be used for constructing HLA-A*11:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:247 Protein Expression Plasmid Vector	PHLAP9254002	Plasmid vector containing HLA-A*11:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:247 protein. This plasmid can be used for constructing HLA-A*11:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:248 Protein Expression Plasmid Vector	PHLAP9254003	Plasmid vector containing HLA-A*11:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:248 protein. This plasmid can be used for constructing HLA-A*11:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:249 Protein Expression Plasmid Vector	PHLAP9254004	Plasmid vector containing HLA-A*11:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:249 protein. This plasmid can be used for constructing HLA-A*11:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:25:01 Protein Expression Plasmid Vector	PHLAP9254005	Plasmid vector containing HLA-A*11:25:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:25:01 protein. This plasmid can be used for constructing HLA-A*11:25:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:25:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:25:02 Protein Expression Plasmid Vector	PHLAP9254006	Plasmid vector containing HLA-A*11:25:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:25:02 protein. This plasmid can be used for constructing HLA-A*11:25:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:25:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:25:03 Protein Expression Plasmid Vector	PHLAP9254007	Plasmid vector containing HLA-A*11:25:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:25:03 protein. This plasmid can be used for constructing HLA-A*11:25:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:25:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:250 Protein Expression Plasmid Vector	PHLAP9254008	Plasmid vector containing HLA-A*11:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:250 protein. This plasmid can be used for constructing HLA-A*11:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:251N Protein Expression Plasmid Vector	PHLAP9254009	Plasmid vector containing HLA-A*11:251N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:251N protein. This plasmid can be used for constructing HLA-A*11:251N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:251N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:252 Protein Expression Plasmid Vector	PHLAP9254010	Plasmid vector containing HLA-A*11:252 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:252 protein. This plasmid can be used for constructing HLA-A*11:252 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:252 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:253 Protein Expression Plasmid Vector	PHLAP9254011	Plasmid vector containing HLA-A*11:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:253 protein. This plasmid can be used for constructing HLA-A*11:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:254 Protein Expression Plasmid Vector	PHLAP9254012	Plasmid vector containing HLA-A*11:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:254 protein. This plasmid can be used for constructing HLA-A*11:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:255 Protein Expression Plasmid Vector	PHLAP9254013	Plasmid vector containing HLA-A*11:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:255 protein. This plasmid can be used for constructing HLA-A*11:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:256Q Protein Expression Plasmid Vector	PHLAP9254014	Plasmid vector containing HLA-A*11:256Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:256Q protein. This plasmid can be used for constructing HLA-A*11:256Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:256Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:257 Protein Expression Plasmid Vector	PHLAP9254015	Plasmid vector containing HLA-A*11:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:257 protein. This plasmid can be used for constructing HLA-A*11:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:258 Protein Expression Plasmid Vector	PHLAP9254016	Plasmid vector containing HLA-A*11:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:258 protein. This plasmid can be used for constructing HLA-A*11:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:259 Protein Expression Plasmid Vector	PHLAP9254017	Plasmid vector containing HLA-A*11:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:259 protein. This plasmid can be used for constructing HLA-A*11:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:26 Protein Expression Plasmid Vector	PHLAP9254018	Plasmid vector containing HLA-A*11:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:26 protein. This plasmid can be used for constructing HLA-A*11:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:260 Protein Expression Plasmid Vector	PHLAP9254019	Plasmid vector containing HLA-A*11:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:260 protein. This plasmid can be used for constructing HLA-A*11:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:261 Protein Expression Plasmid Vector	PHLAP9254020	Plasmid vector containing HLA-A*11:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:261 protein. This plasmid can be used for constructing HLA-A*11:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:262 Protein Expression Plasmid Vector	PHLAP9254021	Plasmid vector containing HLA-A*11:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:262 protein. This plasmid can be used for constructing HLA-A*11:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:263 Protein Expression Plasmid Vector	PHLAP9254022	Plasmid vector containing HLA-A*11:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:263 protein. This plasmid can be used for constructing HLA-A*11:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:264 Protein Expression Plasmid Vector	PHLAP9254023	Plasmid vector containing HLA-A*11:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:264 protein. This plasmid can be used for constructing HLA-A*11:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:265 Protein Expression Plasmid Vector	PHLAP9254024	Plasmid vector containing HLA-A*11:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:265 protein. This plasmid can be used for constructing HLA-A*11:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:266 Protein Expression Plasmid Vector	PHLAP9254025	Plasmid vector containing HLA-A*11:266 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:266 protein. This plasmid can be used for constructing HLA-A*11:266 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:266 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:267 Protein Expression Plasmid Vector	PHLAP9254026	Plasmid vector containing HLA-A*11:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:267 protein. This plasmid can be used for constructing HLA-A*11:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:268 Protein Expression Plasmid Vector	PHLAP9254027	Plasmid vector containing HLA-A*11:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:268 protein. This plasmid can be used for constructing HLA-A*11:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:269 Protein Expression Plasmid Vector	PHLAP9254028	Plasmid vector containing HLA-A*11:269 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:269 protein. This plasmid can be used for constructing HLA-A*11:269 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:269 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:27 Protein Expression Plasmid Vector	PHLAP9254029	Plasmid vector containing HLA-A*11:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:27 protein. This plasmid can be used for constructing HLA-A*11:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:270 Protein Expression Plasmid Vector	PHLAP9254030	Plasmid vector containing HLA-A*11:270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:270 protein. This plasmid can be used for constructing HLA-A*11:270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:271 Protein Expression Plasmid Vector	PHLAP9254031	Plasmid vector containing HLA-A*11:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:271 protein. This plasmid can be used for constructing HLA-A*11:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:272Q Protein Expression Plasmid Vector	PHLAP9254032	Plasmid vector containing HLA-A*11:272Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:272Q protein. This plasmid can be used for constructing HLA-A*11:272Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:272Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:273 Protein Expression Plasmid Vector	PHLAP9254033	Plasmid vector containing HLA-A*11:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:273 protein. This plasmid can be used for constructing HLA-A*11:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:274 Protein Expression Plasmid Vector	PHLAP9254034	Plasmid vector containing HLA-A*11:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:274 protein. This plasmid can be used for constructing HLA-A*11:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:275 Protein Expression Plasmid Vector	PHLAP9254035	Plasmid vector containing HLA-A*11:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:275 protein. This plasmid can be used for constructing HLA-A*11:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:276 Protein Expression Plasmid Vector	PHLAP9254036	Plasmid vector containing HLA-A*11:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:276 protein. This plasmid can be used for constructing HLA-A*11:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:277 Protein Expression Plasmid Vector	PHLAP9254037	Plasmid vector containing HLA-A*11:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:277 protein. This plasmid can be used for constructing HLA-A*11:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:278 Protein Expression Plasmid Vector	PHLAP9254038	Plasmid vector containing HLA-A*11:278 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:278 protein. This plasmid can be used for constructing HLA-A*11:278 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:278 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:279 Protein Expression Plasmid Vector	PHLAP9254039	Plasmid vector containing HLA-A*11:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:279 protein. This plasmid can be used for constructing HLA-A*11:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:280 Protein Expression Plasmid Vector	PHLAP9254040	Plasmid vector containing HLA-A*11:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:280 protein. This plasmid can be used for constructing HLA-A*11:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:281 Protein Expression Plasmid Vector	PHLAP9254041	Plasmid vector containing HLA-A*11:281 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:281 protein. This plasmid can be used for constructing HLA-A*11:281 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:281 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:282 Protein Expression Plasmid Vector	PHLAP9254042	Plasmid vector containing HLA-A*11:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:282 protein. This plasmid can be used for constructing HLA-A*11:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:283 Protein Expression Plasmid Vector	PHLAP9254043	Plasmid vector containing HLA-A*11:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:283 protein. This plasmid can be used for constructing HLA-A*11:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:284 Protein Expression Plasmid Vector	PHLAP9254044	Plasmid vector containing HLA-A*11:284 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:284 protein. This plasmid can be used for constructing HLA-A*11:284 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:284 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:285 Protein Expression Plasmid Vector	PHLAP9254045	Plasmid vector containing HLA-A*11:285 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:285 protein. This plasmid can be used for constructing HLA-A*11:285 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:285 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:286 Protein Expression Plasmid Vector	PHLAP9254046	Plasmid vector containing HLA-A*11:286 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:286 protein. This plasmid can be used for constructing HLA-A*11:286 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:286 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:287N Protein Expression Plasmid Vector	PHLAP9254047	Plasmid vector containing HLA-A*11:287N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:287N protein. This plasmid can be used for constructing HLA-A*11:287N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:287N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:288 Protein Expression Plasmid Vector	PHLAP9254048	Plasmid vector containing HLA-A*11:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:288 protein. This plasmid can be used for constructing HLA-A*11:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:289 Protein Expression Plasmid Vector	PHLAP9254049	Plasmid vector containing HLA-A*11:289 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:289 protein. This plasmid can be used for constructing HLA-A*11:289 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:289 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:29 Protein Expression Plasmid Vector	PHLAP9254050	Plasmid vector containing HLA-A*11:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:29 protein. This plasmid can be used for constructing HLA-A*11:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:290 Protein Expression Plasmid Vector	PHLAP9254051	Plasmid vector containing HLA-A*11:290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:290 protein. This plasmid can be used for constructing HLA-A*11:290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:291 Protein Expression Plasmid Vector	PHLAP9254052	Plasmid vector containing HLA-A*11:291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:291 protein. This plasmid can be used for constructing HLA-A*11:291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:292 Protein Expression Plasmid Vector	PHLAP9254053	Plasmid vector containing HLA-A*11:292 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:292 protein. This plasmid can be used for constructing HLA-A*11:292 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:292 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:293 Protein Expression Plasmid Vector	PHLAP9254054	Plasmid vector containing HLA-A*11:293 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:293 protein. This plasmid can be used for constructing HLA-A*11:293 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:293 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:294 Protein Expression Plasmid Vector	PHLAP9254055	Plasmid vector containing HLA-A*11:294 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:294 protein. This plasmid can be used for constructing HLA-A*11:294 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:294 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:295 Protein Expression Plasmid Vector	PHLAP9254056	Plasmid vector containing HLA-A*11:295 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:295 protein. This plasmid can be used for constructing HLA-A*11:295 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:295 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:296 Protein Expression Plasmid Vector	PHLAP9254057	Plasmid vector containing HLA-A*11:296 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:296 protein. This plasmid can be used for constructing HLA-A*11:296 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:296 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:297 Protein Expression Plasmid Vector	PHLAP9254058	Plasmid vector containing HLA-A*11:297 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:297 protein. This plasmid can be used for constructing HLA-A*11:297 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:297 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:298 Protein Expression Plasmid Vector	PHLAP9254059	Plasmid vector containing HLA-A*11:298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:298 protein. This plasmid can be used for constructing HLA-A*11:298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:299 Protein Expression Plasmid Vector	PHLAP9254060	Plasmid vector containing HLA-A*11:299 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:299 protein. This plasmid can be used for constructing HLA-A*11:299 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:299 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:30 Protein Expression Plasmid Vector	PHLAP9254061	Plasmid vector containing HLA-A*11:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:30 protein. This plasmid can be used for constructing HLA-A*11:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:300 Protein Expression Plasmid Vector	PHLAP9254062	Plasmid vector containing HLA-A*11:300 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:300 protein. This plasmid can be used for constructing HLA-A*11:300 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:300 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:301 Protein Expression Plasmid Vector	PHLAP9254063	Plasmid vector containing HLA-A*11:301 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:301 protein. This plasmid can be used for constructing HLA-A*11:301 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:301 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:302:01 Protein Expression Plasmid Vector	PHLAP9254064	Plasmid vector containing HLA-A*11:302:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:302:01 protein. This plasmid can be used for constructing HLA-A*11:302:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:302:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:302:02 Protein Expression Plasmid Vector	PHLAP9254065	Plasmid vector containing HLA-A*11:302:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:302:02 protein. This plasmid can be used for constructing HLA-A*11:302:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:302:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:303 Protein Expression Plasmid Vector	PHLAP9254066	Plasmid vector containing HLA-A*11:303 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:303 protein. This plasmid can be used for constructing HLA-A*11:303 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:303 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:304 Protein Expression Plasmid Vector	PHLAP9254067	Plasmid vector containing HLA-A*11:304 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:304 protein. This plasmid can be used for constructing HLA-A*11:304 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:304 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:305 Protein Expression Plasmid Vector	PHLAP9254068	Plasmid vector containing HLA-A*11:305 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:305 protein. This plasmid can be used for constructing HLA-A*11:305 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:305 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:306 Protein Expression Plasmid Vector	PHLAP9254069	Plasmid vector containing HLA-A*11:306 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:306 protein. This plasmid can be used for constructing HLA-A*11:306 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:306 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:307 Protein Expression Plasmid Vector	PHLAP9254070	Plasmid vector containing HLA-A*11:307 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:307 protein. This plasmid can be used for constructing HLA-A*11:307 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:307 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:308 Protein Expression Plasmid Vector	PHLAP9254071	Plasmid vector containing HLA-A*11:308 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:308 protein. This plasmid can be used for constructing HLA-A*11:308 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:308 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:309 Protein Expression Plasmid Vector	PHLAP9254072	Plasmid vector containing HLA-A*11:309 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:309 protein. This plasmid can be used for constructing HLA-A*11:309 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:309 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:31 Protein Expression Plasmid Vector	PHLAP9254073	Plasmid vector containing HLA-A*11:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:31 protein. This plasmid can be used for constructing HLA-A*11:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:310N Protein Expression Plasmid Vector	PHLAP9254074	Plasmid vector containing HLA-A*11:310N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:310N protein. This plasmid can be used for constructing HLA-A*11:310N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:310N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:311 Protein Expression Plasmid Vector	PHLAP9254075	Plasmid vector containing HLA-A*11:311 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:311 protein. This plasmid can be used for constructing HLA-A*11:311 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:311 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:312 Protein Expression Plasmid Vector	PHLAP9254076	Plasmid vector containing HLA-A*11:312 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:312 protein. This plasmid can be used for constructing HLA-A*11:312 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:312 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:313Q Protein Expression Plasmid Vector	PHLAP9254077	Plasmid vector containing HLA-A*11:313Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:313Q protein. This plasmid can be used for constructing HLA-A*11:313Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:313Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:314 Protein Expression Plasmid Vector	PHLAP9254078	Plasmid vector containing HLA-A*11:314 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:314 protein. This plasmid can be used for constructing HLA-A*11:314 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:314 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:315 Protein Expression Plasmid Vector	PHLAP9254079	Plasmid vector containing HLA-A*11:315 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:315 protein. This plasmid can be used for constructing HLA-A*11:315 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:315 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:316 Protein Expression Plasmid Vector	PHLAP9254080	Plasmid vector containing HLA-A*11:316 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:316 protein. This plasmid can be used for constructing HLA-A*11:316 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:316 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:317 Protein Expression Plasmid Vector	PHLAP9254081	Plasmid vector containing HLA-A*11:317 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:317 protein. This plasmid can be used for constructing HLA-A*11:317 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:317 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:318 Protein Expression Plasmid Vector	PHLAP9254082	Plasmid vector containing HLA-A*11:318 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:318 protein. This plasmid can be used for constructing HLA-A*11:318 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:318 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:319 Protein Expression Plasmid Vector	PHLAP9254083	Plasmid vector containing HLA-A*11:319 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:319 protein. This plasmid can be used for constructing HLA-A*11:319 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:319 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:32:01 Protein Expression Plasmid Vector	PHLAP9254084	Plasmid vector containing HLA-A*11:32:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:32:01 protein. This plasmid can be used for constructing HLA-A*11:32:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:32:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:32:02 Protein Expression Plasmid Vector	PHLAP9254085	Plasmid vector containing HLA-A*11:32:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:32:02 protein. This plasmid can be used for constructing HLA-A*11:32:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:32:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:320 Protein Expression Plasmid Vector	PHLAP9254086	Plasmid vector containing HLA-A*11:320 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:320 protein. This plasmid can be used for constructing HLA-A*11:320 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:320 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:321 Protein Expression Plasmid Vector	PHLAP9254087	Plasmid vector containing HLA-A*11:321 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:321 protein. This plasmid can be used for constructing HLA-A*11:321 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:321 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:322 Protein Expression Plasmid Vector	PHLAP9254088	Plasmid vector containing HLA-A*11:322 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:322 protein. This plasmid can be used for constructing HLA-A*11:322 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:322 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:323 Protein Expression Plasmid Vector	PHLAP9254089	Plasmid vector containing HLA-A*11:323 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:323 protein. This plasmid can be used for constructing HLA-A*11:323 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:323 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:324 Protein Expression Plasmid Vector	PHLAP9254090	Plasmid vector containing HLA-A*11:324 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:324 protein. This plasmid can be used for constructing HLA-A*11:324 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:324 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:325 Protein Expression Plasmid Vector	PHLAP9254091	Plasmid vector containing HLA-A*11:325 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:325 protein. This plasmid can be used for constructing HLA-A*11:325 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:325 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:326 Protein Expression Plasmid Vector	PHLAP9254092	Plasmid vector containing HLA-A*11:326 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:326 protein. This plasmid can be used for constructing HLA-A*11:326 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:326 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:327 Protein Expression Plasmid Vector	PHLAP9254093	Plasmid vector containing HLA-A*11:327 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:327 protein. This plasmid can be used for constructing HLA-A*11:327 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:327 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:328 Protein Expression Plasmid Vector	PHLAP9254094	Plasmid vector containing HLA-A*11:328 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:328 protein. This plasmid can be used for constructing HLA-A*11:328 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:328 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:329 Protein Expression Plasmid Vector	PHLAP9254095	Plasmid vector containing HLA-A*11:329 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:329 protein. This plasmid can be used for constructing HLA-A*11:329 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:329 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:33:01 Protein Expression Plasmid Vector	PHLAP9254096	Plasmid vector containing HLA-A*11:33:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:33:01 protein. This plasmid can be used for constructing HLA-A*11:33:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:33:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:33:02 Protein Expression Plasmid Vector	PHLAP9254097	Plasmid vector containing HLA-A*11:33:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:33:02 protein. This plasmid can be used for constructing HLA-A*11:33:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:33:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:330 Protein Expression Plasmid Vector	PHLAP9254098	Plasmid vector containing HLA-A*11:330 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:330 protein. This plasmid can be used for constructing HLA-A*11:330 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:330 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:331 Protein Expression Plasmid Vector	PHLAP9254099	Plasmid vector containing HLA-A*11:331 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:331 protein. This plasmid can be used for constructing HLA-A*11:331 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:331 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:332 Protein Expression Plasmid Vector	PHLAP9254100	Plasmid vector containing HLA-A*11:332 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:332 protein. This plasmid can be used for constructing HLA-A*11:332 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:332 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:333 Protein Expression Plasmid Vector	PHLAP9254101	Plasmid vector containing HLA-A*11:333 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:333 protein. This plasmid can be used for constructing HLA-A*11:333 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:333 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:334 Protein Expression Plasmid Vector	PHLAP9254102	Plasmid vector containing HLA-A*11:334 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:334 protein. This plasmid can be used for constructing HLA-A*11:334 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:334 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:335:01 Protein Expression Plasmid Vector	PHLAP9254103	Plasmid vector containing HLA-A*11:335:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:335:01 protein. This plasmid can be used for constructing HLA-A*11:335:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:335:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:335:02 Protein Expression Plasmid Vector	PHLAP9254104	Plasmid vector containing HLA-A*11:335:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:335:02 protein. This plasmid can be used for constructing HLA-A*11:335:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:335:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:336 Protein Expression Plasmid Vector	PHLAP9254105	Plasmid vector containing HLA-A*11:336 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:336 protein. This plasmid can be used for constructing HLA-A*11:336 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:336 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:337 Protein Expression Plasmid Vector	PHLAP9254106	Plasmid vector containing HLA-A*11:337 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:337 protein. This plasmid can be used for constructing HLA-A*11:337 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:337 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:338 Protein Expression Plasmid Vector	PHLAP9254107	Plasmid vector containing HLA-A*11:338 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:338 protein. This plasmid can be used for constructing HLA-A*11:338 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:338 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:339 Protein Expression Plasmid Vector	PHLAP9254108	Plasmid vector containing HLA-A*11:339 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:339 protein. This plasmid can be used for constructing HLA-A*11:339 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:339 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:34 Protein Expression Plasmid Vector	PHLAP9254109	Plasmid vector containing HLA-A*11:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:34 protein. This plasmid can be used for constructing HLA-A*11:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:340N Protein Expression Plasmid Vector	PHLAP9254110	Plasmid vector containing HLA-A*11:340N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:340N protein. This plasmid can be used for constructing HLA-A*11:340N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:340N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:341 Protein Expression Plasmid Vector	PHLAP9254111	Plasmid vector containing HLA-A*11:341 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:341 protein. This plasmid can be used for constructing HLA-A*11:341 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:341 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:342 Protein Expression Plasmid Vector	PHLAP9254112	Plasmid vector containing HLA-A*11:342 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:342 protein. This plasmid can be used for constructing HLA-A*11:342 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:342 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:343 Protein Expression Plasmid Vector	PHLAP9254113	Plasmid vector containing HLA-A*11:343 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:343 protein. This plasmid can be used for constructing HLA-A*11:343 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:343 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:344 Protein Expression Plasmid Vector	PHLAP9254114	Plasmid vector containing HLA-A*11:344 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:344 protein. This plasmid can be used for constructing HLA-A*11:344 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:344 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:345 Protein Expression Plasmid Vector	PHLAP9254115	Plasmid vector containing HLA-A*11:345 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:345 protein. This plasmid can be used for constructing HLA-A*11:345 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:345 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:346 Protein Expression Plasmid Vector	PHLAP9254116	Plasmid vector containing HLA-A*11:346 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:346 protein. This plasmid can be used for constructing HLA-A*11:346 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:346 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:347N Protein Expression Plasmid Vector	PHLAP9254117	Plasmid vector containing HLA-A*11:347N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:347N protein. This plasmid can be used for constructing HLA-A*11:347N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:347N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:348 Protein Expression Plasmid Vector	PHLAP9254118	Plasmid vector containing HLA-A*11:348 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:348 protein. This plasmid can be used for constructing HLA-A*11:348 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:348 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:349 Protein Expression Plasmid Vector	PHLAP9254119	Plasmid vector containing HLA-A*11:349 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:349 protein. This plasmid can be used for constructing HLA-A*11:349 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:349 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:35 Protein Expression Plasmid Vector	PHLAP9254120	Plasmid vector containing HLA-A*11:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:35 protein. This plasmid can be used for constructing HLA-A*11:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:350 Protein Expression Plasmid Vector	PHLAP9254121	Plasmid vector containing HLA-A*11:350 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:350 protein. This plasmid can be used for constructing HLA-A*11:350 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:350 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:351Q Protein Expression Plasmid Vector	PHLAP9254122	Plasmid vector containing HLA-A*11:351Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:351Q protein. This plasmid can be used for constructing HLA-A*11:351Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:351Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:352 Protein Expression Plasmid Vector	PHLAP9254123	Plasmid vector containing HLA-A*11:352 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:352 protein. This plasmid can be used for constructing HLA-A*11:352 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:352 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:353 Protein Expression Plasmid Vector	PHLAP9254124	Plasmid vector containing HLA-A*11:353 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:353 protein. This plasmid can be used for constructing HLA-A*11:353 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:353 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:354 Protein Expression Plasmid Vector	PHLAP9254125	Plasmid vector containing HLA-A*11:354 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:354 protein. This plasmid can be used for constructing HLA-A*11:354 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:354 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:355:01 Protein Expression Plasmid Vector	PHLAP9254126	Plasmid vector containing HLA-A*11:355:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:355:01 protein. This plasmid can be used for constructing HLA-A*11:355:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:355:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:355:02 Protein Expression Plasmid Vector	PHLAP9254127	Plasmid vector containing HLA-A*11:355:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:355:02 protein. This plasmid can be used for constructing HLA-A*11:355:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:355:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:356 Protein Expression Plasmid Vector	PHLAP9254128	Plasmid vector containing HLA-A*11:356 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:356 protein. This plasmid can be used for constructing HLA-A*11:356 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:356 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:357 Protein Expression Plasmid Vector	PHLAP9254129	Plasmid vector containing HLA-A*11:357 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:357 protein. This plasmid can be used for constructing HLA-A*11:357 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:357 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:358 Protein Expression Plasmid Vector	PHLAP9254130	Plasmid vector containing HLA-A*11:358 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:358 protein. This plasmid can be used for constructing HLA-A*11:358 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:358 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:359 Protein Expression Plasmid Vector	PHLAP9254131	Plasmid vector containing HLA-A*11:359 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:359 protein. This plasmid can be used for constructing HLA-A*11:359 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:359 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:36 Protein Expression Plasmid Vector	PHLAP9254132	Plasmid vector containing HLA-A*11:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:36 protein. This plasmid can be used for constructing HLA-A*11:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:360 Protein Expression Plasmid Vector	PHLAP9254133	Plasmid vector containing HLA-A*11:360 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:360 protein. This plasmid can be used for constructing HLA-A*11:360 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:360 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:361:01 Protein Expression Plasmid Vector	PHLAP9254134	Plasmid vector containing HLA-A*11:361:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:361:01 protein. This plasmid can be used for constructing HLA-A*11:361:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:361:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:361:02 Protein Expression Plasmid Vector	PHLAP9254135	Plasmid vector containing HLA-A*11:361:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:361:02 protein. This plasmid can be used for constructing HLA-A*11:361:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:361:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:362 Protein Expression Plasmid Vector	PHLAP9254136	Plasmid vector containing HLA-A*11:362 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:362 protein. This plasmid can be used for constructing HLA-A*11:362 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:362 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:363 Protein Expression Plasmid Vector	PHLAP9254137	Plasmid vector containing HLA-A*11:363 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:363 protein. This plasmid can be used for constructing HLA-A*11:363 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:363 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:364 Protein Expression Plasmid Vector	PHLAP9254138	Plasmid vector containing HLA-A*11:364 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:364 protein. This plasmid can be used for constructing HLA-A*11:364 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:364 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:365N Protein Expression Plasmid Vector	PHLAP9254139	Plasmid vector containing HLA-A*11:365N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:365N protein. This plasmid can be used for constructing HLA-A*11:365N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:365N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:366:01 Protein Expression Plasmid Vector	PHLAP9254140	Plasmid vector containing HLA-A*11:366:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:366:01 protein. This plasmid can be used for constructing HLA-A*11:366:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:366:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:366:02 Protein Expression Plasmid Vector	PHLAP9254141	Plasmid vector containing HLA-A*11:366:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:366:02 protein. This plasmid can be used for constructing HLA-A*11:366:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:366:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:367 Protein Expression Plasmid Vector	PHLAP9254142	Plasmid vector containing HLA-A*11:367 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:367 protein. This plasmid can be used for constructing HLA-A*11:367 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:367 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:368 Protein Expression Plasmid Vector	PHLAP9254143	Plasmid vector containing HLA-A*11:368 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:368 protein. This plasmid can be used for constructing HLA-A*11:368 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:368 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:369 Protein Expression Plasmid Vector	PHLAP9254144	Plasmid vector containing HLA-A*11:369 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:369 protein. This plasmid can be used for constructing HLA-A*11:369 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:369 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:37 Protein Expression Plasmid Vector	PHLAP9254145	Plasmid vector containing HLA-A*11:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:37 protein. This plasmid can be used for constructing HLA-A*11:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:370 Protein Expression Plasmid Vector	PHLAP9254146	Plasmid vector containing HLA-A*11:370 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:370 protein. This plasmid can be used for constructing HLA-A*11:370 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:370 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:371 Protein Expression Plasmid Vector	PHLAP9254147	Plasmid vector containing HLA-A*11:371 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:371 protein. This plasmid can be used for constructing HLA-A*11:371 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:371 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:372 Protein Expression Plasmid Vector	PHLAP9254148	Plasmid vector containing HLA-A*11:372 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:372 protein. This plasmid can be used for constructing HLA-A*11:372 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:372 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:373 Protein Expression Plasmid Vector	PHLAP9254149	Plasmid vector containing HLA-A*11:373 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:373 protein. This plasmid can be used for constructing HLA-A*11:373 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:373 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:374 Protein Expression Plasmid Vector	PHLAP9254150	Plasmid vector containing HLA-A*11:374 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:374 protein. This plasmid can be used for constructing HLA-A*11:374 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:374 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:375Q Protein Expression Plasmid Vector	PHLAP9254151	Plasmid vector containing HLA-A*11:375Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:375Q protein. This plasmid can be used for constructing HLA-A*11:375Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:375Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:376 Protein Expression Plasmid Vector	PHLAP9254152	Plasmid vector containing HLA-A*11:376 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:376 protein. This plasmid can be used for constructing HLA-A*11:376 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:376 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:377 Protein Expression Plasmid Vector	PHLAP9254153	Plasmid vector containing HLA-A*11:377 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:377 protein. This plasmid can be used for constructing HLA-A*11:377 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:377 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:378 Protein Expression Plasmid Vector	PHLAP9254154	Plasmid vector containing HLA-A*11:378 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:378 protein. This plasmid can be used for constructing HLA-A*11:378 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:378 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:379 Protein Expression Plasmid Vector	PHLAP9254155	Plasmid vector containing HLA-A*11:379 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:379 protein. This plasmid can be used for constructing HLA-A*11:379 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:379 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:38 Protein Expression Plasmid Vector	PHLAP9254156	Plasmid vector containing HLA-A*11:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:38 protein. This plasmid can be used for constructing HLA-A*11:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:380 Protein Expression Plasmid Vector	PHLAP9254157	Plasmid vector containing HLA-A*11:380 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:380 protein. This plasmid can be used for constructing HLA-A*11:380 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:380 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:381 Protein Expression Plasmid Vector	PHLAP9254158	Plasmid vector containing HLA-A*11:381 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:381 protein. This plasmid can be used for constructing HLA-A*11:381 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:381 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:382N Protein Expression Plasmid Vector	PHLAP9254159	Plasmid vector containing HLA-A*11:382N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:382N protein. This plasmid can be used for constructing HLA-A*11:382N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:382N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:383N Protein Expression Plasmid Vector	PHLAP9254160	Plasmid vector containing HLA-A*11:383N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:383N protein. This plasmid can be used for constructing HLA-A*11:383N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:383N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:384 Protein Expression Plasmid Vector	PHLAP9254161	Plasmid vector containing HLA-A*11:384 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:384 protein. This plasmid can be used for constructing HLA-A*11:384 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:384 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:385 Protein Expression Plasmid Vector	PHLAP9254162	Plasmid vector containing HLA-A*11:385 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:385 protein. This plasmid can be used for constructing HLA-A*11:385 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:385 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:386 Protein Expression Plasmid Vector	PHLAP9254163	Plasmid vector containing HLA-A*11:386 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:386 protein. This plasmid can be used for constructing HLA-A*11:386 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:386 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:387 Protein Expression Plasmid Vector	PHLAP9254164	Plasmid vector containing HLA-A*11:387 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:387 protein. This plasmid can be used for constructing HLA-A*11:387 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:387 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:388N Protein Expression Plasmid Vector	PHLAP9254165	Plasmid vector containing HLA-A*11:388N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:388N protein. This plasmid can be used for constructing HLA-A*11:388N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:388N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:389 Protein Expression Plasmid Vector	PHLAP9254166	Plasmid vector containing HLA-A*11:389 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:389 protein. This plasmid can be used for constructing HLA-A*11:389 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:389 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:39 Protein Expression Plasmid Vector	PHLAP9254167	Plasmid vector containing HLA-A*11:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:39 protein. This plasmid can be used for constructing HLA-A*11:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:390 Protein Expression Plasmid Vector	PHLAP9254168	Plasmid vector containing HLA-A*11:390 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:390 protein. This plasmid can be used for constructing HLA-A*11:390 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:390 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:391 Protein Expression Plasmid Vector	PHLAP9254169	Plasmid vector containing HLA-A*11:391 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:391 protein. This plasmid can be used for constructing HLA-A*11:391 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:391 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:392 Protein Expression Plasmid Vector	PHLAP9254170	Plasmid vector containing HLA-A*11:392 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:392 protein. This plasmid can be used for constructing HLA-A*11:392 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:392 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:393 Protein Expression Plasmid Vector	PHLAP9254171	Plasmid vector containing HLA-A*11:393 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:393 protein. This plasmid can be used for constructing HLA-A*11:393 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:393 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:394 Protein Expression Plasmid Vector	PHLAP9254172	Plasmid vector containing HLA-A*11:394 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:394 protein. This plasmid can be used for constructing HLA-A*11:394 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:394 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:395 Protein Expression Plasmid Vector	PHLAP9254173	Plasmid vector containing HLA-A*11:395 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:395 protein. This plasmid can be used for constructing HLA-A*11:395 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:395 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:396 Protein Expression Plasmid Vector	PHLAP9254174	Plasmid vector containing HLA-A*11:396 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:396 protein. This plasmid can be used for constructing HLA-A*11:396 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:396 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:397N Protein Expression Plasmid Vector	PHLAP9254175	Plasmid vector containing HLA-A*11:397N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:397N protein. This plasmid can be used for constructing HLA-A*11:397N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:397N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:398 Protein Expression Plasmid Vector	PHLAP9254176	Plasmid vector containing HLA-A*11:398 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:398 protein. This plasmid can be used for constructing HLA-A*11:398 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:398 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:399 Protein Expression Plasmid Vector	PHLAP9254177	Plasmid vector containing HLA-A*11:399 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:399 protein. This plasmid can be used for constructing HLA-A*11:399 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:399 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:40 Protein Expression Plasmid Vector	PHLAP9254178	Plasmid vector containing HLA-A*11:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:40 protein. This plasmid can be used for constructing HLA-A*11:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:400N Protein Expression Plasmid Vector	PHLAP9254179	Plasmid vector containing HLA-A*11:400N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:400N protein. This plasmid can be used for constructing HLA-A*11:400N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:400N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:401 Protein Expression Plasmid Vector	PHLAP9254180	Plasmid vector containing HLA-A*11:401 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:401 protein. This plasmid can be used for constructing HLA-A*11:401 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:401 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:402 Protein Expression Plasmid Vector	PHLAP9254181	Plasmid vector containing HLA-A*11:402 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:402 protein. This plasmid can be used for constructing HLA-A*11:402 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:402 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:403N Protein Expression Plasmid Vector	PHLAP9254182	Plasmid vector containing HLA-A*11:403N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:403N protein. This plasmid can be used for constructing HLA-A*11:403N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:403N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:404 Protein Expression Plasmid Vector	PHLAP9254183	Plasmid vector containing HLA-A*11:404 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:404 protein. This plasmid can be used for constructing HLA-A*11:404 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:404 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:405 Protein Expression Plasmid Vector	PHLAP9254184	Plasmid vector containing HLA-A*11:405 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:405 protein. This plasmid can be used for constructing HLA-A*11:405 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:405 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:406 Protein Expression Plasmid Vector	PHLAP9254185	Plasmid vector containing HLA-A*11:406 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:406 protein. This plasmid can be used for constructing HLA-A*11:406 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:406 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:407N Protein Expression Plasmid Vector	PHLAP9254186	Plasmid vector containing HLA-A*11:407N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:407N protein. This plasmid can be used for constructing HLA-A*11:407N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:407N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:408 Protein Expression Plasmid Vector	PHLAP9254187	Plasmid vector containing HLA-A*11:408 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:408 protein. This plasmid can be used for constructing HLA-A*11:408 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:408 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:409 Protein Expression Plasmid Vector	PHLAP9254188	Plasmid vector containing HLA-A*11:409 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:409 protein. This plasmid can be used for constructing HLA-A*11:409 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:409 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:41 Protein Expression Plasmid Vector	PHLAP9254189	Plasmid vector containing HLA-A*11:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:41 protein. This plasmid can be used for constructing HLA-A*11:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:410 Protein Expression Plasmid Vector	PHLAP9254190	Plasmid vector containing HLA-A*11:410 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:410 protein. This plasmid can be used for constructing HLA-A*11:410 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:410 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:411 Protein Expression Plasmid Vector	PHLAP9254191	Plasmid vector containing HLA-A*11:411 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:411 protein. This plasmid can be used for constructing HLA-A*11:411 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:411 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:412 Protein Expression Plasmid Vector	PHLAP9254192	Plasmid vector containing HLA-A*11:412 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:412 protein. This plasmid can be used for constructing HLA-A*11:412 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:412 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:413N Protein Expression Plasmid Vector	PHLAP9254193	Plasmid vector containing HLA-A*11:413N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:413N protein. This plasmid can be used for constructing HLA-A*11:413N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:413N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:414 Protein Expression Plasmid Vector	PHLAP9254194	Plasmid vector containing HLA-A*11:414 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:414 protein. This plasmid can be used for constructing HLA-A*11:414 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:414 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:415 Protein Expression Plasmid Vector	PHLAP9254195	Plasmid vector containing HLA-A*11:415 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:415 protein. This plasmid can be used for constructing HLA-A*11:415 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:415 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:416 Protein Expression Plasmid Vector	PHLAP9254196	Plasmid vector containing HLA-A*11:416 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:416 protein. This plasmid can be used for constructing HLA-A*11:416 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:416 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:417N Protein Expression Plasmid Vector	PHLAP9254197	Plasmid vector containing HLA-A*11:417N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:417N protein. This plasmid can be used for constructing HLA-A*11:417N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:417N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:418 Protein Expression Plasmid Vector	PHLAP9254198	Plasmid vector containing HLA-A*11:418 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:418 protein. This plasmid can be used for constructing HLA-A*11:418 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:418 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:419 Protein Expression Plasmid Vector	PHLAP9254199	Plasmid vector containing HLA-A*11:419 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:419 protein. This plasmid can be used for constructing HLA-A*11:419 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:419 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:42 Protein Expression Plasmid Vector	PHLAP9254200	Plasmid vector containing HLA-A*11:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:42 protein. This plasmid can be used for constructing HLA-A*11:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:420 Protein Expression Plasmid Vector	PHLAP9254201	Plasmid vector containing HLA-A*11:420 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:420 protein. This plasmid can be used for constructing HLA-A*11:420 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:420 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:421 Protein Expression Plasmid Vector	PHLAP9254202	Plasmid vector containing HLA-A*11:421 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:421 protein. This plasmid can be used for constructing HLA-A*11:421 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:421 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:422 Protein Expression Plasmid Vector	PHLAP9254203	Plasmid vector containing HLA-A*11:422 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:422 protein. This plasmid can be used for constructing HLA-A*11:422 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:422 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:423 Protein Expression Plasmid Vector	PHLAP9254204	Plasmid vector containing HLA-A*11:423 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:423 protein. This plasmid can be used for constructing HLA-A*11:423 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:423 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:424 Protein Expression Plasmid Vector	PHLAP9254205	Plasmid vector containing HLA-A*11:424 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:424 protein. This plasmid can be used for constructing HLA-A*11:424 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:424 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:425 Protein Expression Plasmid Vector	PHLAP9254206	Plasmid vector containing HLA-A*11:425 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:425 protein. This plasmid can be used for constructing HLA-A*11:425 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:425 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:426 Protein Expression Plasmid Vector	PHLAP9254207	Plasmid vector containing HLA-A*11:426 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:426 protein. This plasmid can be used for constructing HLA-A*11:426 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:426 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:427 Protein Expression Plasmid Vector	PHLAP9254208	Plasmid vector containing HLA-A*11:427 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:427 protein. This plasmid can be used for constructing HLA-A*11:427 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:427 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:428 Protein Expression Plasmid Vector	PHLAP9254209	Plasmid vector containing HLA-A*11:428 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:428 protein. This plasmid can be used for constructing HLA-A*11:428 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:428 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:429 Protein Expression Plasmid Vector	PHLAP9254210	Plasmid vector containing HLA-A*11:429 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:429 protein. This plasmid can be used for constructing HLA-A*11:429 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:429 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:43 Protein Expression Plasmid Vector	PHLAP9254211	Plasmid vector containing HLA-A*11:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:43 protein. This plasmid can be used for constructing HLA-A*11:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:430 Protein Expression Plasmid Vector	PHLAP9254212	Plasmid vector containing HLA-A*11:430 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:430 protein. This plasmid can be used for constructing HLA-A*11:430 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:430 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:431 Protein Expression Plasmid Vector	PHLAP9254213	Plasmid vector containing HLA-A*11:431 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:431 protein. This plasmid can be used for constructing HLA-A*11:431 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:431 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:432N Protein Expression Plasmid Vector	PHLAP9254214	Plasmid vector containing HLA-A*11:432N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:432N protein. This plasmid can be used for constructing HLA-A*11:432N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:432N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:433N Protein Expression Plasmid Vector	PHLAP9254215	Plasmid vector containing HLA-A*11:433N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:433N protein. This plasmid can be used for constructing HLA-A*11:433N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:433N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:434 Protein Expression Plasmid Vector	PHLAP9254216	Plasmid vector containing HLA-A*11:434 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:434 protein. This plasmid can be used for constructing HLA-A*11:434 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:434 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:435 Protein Expression Plasmid Vector	PHLAP9254217	Plasmid vector containing HLA-A*11:435 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:435 protein. This plasmid can be used for constructing HLA-A*11:435 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:435 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:436N Protein Expression Plasmid Vector	PHLAP9254218	Plasmid vector containing HLA-A*11:436N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:436N protein. This plasmid can be used for constructing HLA-A*11:436N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:436N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:437 Protein Expression Plasmid Vector	PHLAP9254219	Plasmid vector containing HLA-A*11:437 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:437 protein. This plasmid can be used for constructing HLA-A*11:437 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:437 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:438 Protein Expression Plasmid Vector	PHLAP9254220	Plasmid vector containing HLA-A*11:438 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:438 protein. This plasmid can be used for constructing HLA-A*11:438 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:438 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:439 Protein Expression Plasmid Vector	PHLAP9254221	Plasmid vector containing HLA-A*11:439 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:439 protein. This plasmid can be used for constructing HLA-A*11:439 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:439 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:44 Protein Expression Plasmid Vector	PHLAP9254222	Plasmid vector containing HLA-A*11:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:44 protein. This plasmid can be used for constructing HLA-A*11:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:440 Protein Expression Plasmid Vector	PHLAP9254223	Plasmid vector containing HLA-A*11:440 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:440 protein. This plasmid can be used for constructing HLA-A*11:440 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:440 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:441 Protein Expression Plasmid Vector	PHLAP9254224	Plasmid vector containing HLA-A*11:441 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:441 protein. This plasmid can be used for constructing HLA-A*11:441 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:441 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:442 Protein Expression Plasmid Vector	PHLAP9254225	Plasmid vector containing HLA-A*11:442 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:442 protein. This plasmid can be used for constructing HLA-A*11:442 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:442 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:443 Protein Expression Plasmid Vector	PHLAP9254226	Plasmid vector containing HLA-A*11:443 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:443 protein. This plasmid can be used for constructing HLA-A*11:443 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:443 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:444 Protein Expression Plasmid Vector	PHLAP9254227	Plasmid vector containing HLA-A*11:444 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:444 protein. This plasmid can be used for constructing HLA-A*11:444 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:444 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:445 Protein Expression Plasmid Vector	PHLAP9254228	Plasmid vector containing HLA-A*11:445 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:445 protein. This plasmid can be used for constructing HLA-A*11:445 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:445 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:446 Protein Expression Plasmid Vector	PHLAP9254229	Plasmid vector containing HLA-A*11:446 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:446 protein. This plasmid can be used for constructing HLA-A*11:446 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:446 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:447Q Protein Expression Plasmid Vector	PHLAP9254230	Plasmid vector containing HLA-A*11:447Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:447Q protein. This plasmid can be used for constructing HLA-A*11:447Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:447Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:448 Protein Expression Plasmid Vector	PHLAP9254231	Plasmid vector containing HLA-A*11:448 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:448 protein. This plasmid can be used for constructing HLA-A*11:448 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:448 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:449 Protein Expression Plasmid Vector	PHLAP9254232	Plasmid vector containing HLA-A*11:449 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:449 protein. This plasmid can be used for constructing HLA-A*11:449 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:449 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:45 Protein Expression Plasmid Vector	PHLAP9254233	Plasmid vector containing HLA-A*11:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:45 protein. This plasmid can be used for constructing HLA-A*11:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:450 Protein Expression Plasmid Vector	PHLAP9254234	Plasmid vector containing HLA-A*11:450 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:450 protein. This plasmid can be used for constructing HLA-A*11:450 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:450 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:451 Protein Expression Plasmid Vector	PHLAP9254235	Plasmid vector containing HLA-A*11:451 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:451 protein. This plasmid can be used for constructing HLA-A*11:451 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:451 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:452N Protein Expression Plasmid Vector	PHLAP9254236	Plasmid vector containing HLA-A*11:452N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:452N protein. This plasmid can be used for constructing HLA-A*11:452N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:452N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:453 Protein Expression Plasmid Vector	PHLAP9254237	Plasmid vector containing HLA-A*11:453 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:453 protein. This plasmid can be used for constructing HLA-A*11:453 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:453 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:454 Protein Expression Plasmid Vector	PHLAP9254238	Plasmid vector containing HLA-A*11:454 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:454 protein. This plasmid can be used for constructing HLA-A*11:454 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:454 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:455 Protein Expression Plasmid Vector	PHLAP9254239	Plasmid vector containing HLA-A*11:455 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:455 protein. This plasmid can be used for constructing HLA-A*11:455 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:455 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:456 Protein Expression Plasmid Vector	PHLAP9254240	Plasmid vector containing HLA-A*11:456 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:456 protein. This plasmid can be used for constructing HLA-A*11:456 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:456 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:457 Protein Expression Plasmid Vector	PHLAP9254241	Plasmid vector containing HLA-A*11:457 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:457 protein. This plasmid can be used for constructing HLA-A*11:457 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:457 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:458 Protein Expression Plasmid Vector	PHLAP9254242	Plasmid vector containing HLA-A*11:458 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:458 protein. This plasmid can be used for constructing HLA-A*11:458 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:458 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:459 Protein Expression Plasmid Vector	PHLAP9254243	Plasmid vector containing HLA-A*11:459 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:459 protein. This plasmid can be used for constructing HLA-A*11:459 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:459 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:46 Protein Expression Plasmid Vector	PHLAP9254244	Plasmid vector containing HLA-A*11:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:46 protein. This plasmid can be used for constructing HLA-A*11:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:460 Protein Expression Plasmid Vector	PHLAP9254245	Plasmid vector containing HLA-A*11:460 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:460 protein. This plasmid can be used for constructing HLA-A*11:460 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:460 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:461N Protein Expression Plasmid Vector	PHLAP9254246	Plasmid vector containing HLA-A*11:461N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:461N protein. This plasmid can be used for constructing HLA-A*11:461N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:461N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:462 Protein Expression Plasmid Vector	PHLAP9254247	Plasmid vector containing HLA-A*11:462 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:462 protein. This plasmid can be used for constructing HLA-A*11:462 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:462 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:463 Protein Expression Plasmid Vector	PHLAP9254248	Plasmid vector containing HLA-A*11:463 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:463 protein. This plasmid can be used for constructing HLA-A*11:463 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:463 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:464 Protein Expression Plasmid Vector	PHLAP9254249	Plasmid vector containing HLA-A*11:464 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:464 protein. This plasmid can be used for constructing HLA-A*11:464 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:464 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:465 Protein Expression Plasmid Vector	PHLAP9254250	Plasmid vector containing HLA-A*11:465 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:465 protein. This plasmid can be used for constructing HLA-A*11:465 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:465 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:466N Protein Expression Plasmid Vector	PHLAP9254251	Plasmid vector containing HLA-A*11:466N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:466N protein. This plasmid can be used for constructing HLA-A*11:466N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:466N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:467 Protein Expression Plasmid Vector	PHLAP9254252	Plasmid vector containing HLA-A*11:467 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:467 protein. This plasmid can be used for constructing HLA-A*11:467 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:467 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:468 Protein Expression Plasmid Vector	PHLAP9254253	Plasmid vector containing HLA-A*11:468 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:468 protein. This plasmid can be used for constructing HLA-A*11:468 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:468 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:469 Protein Expression Plasmid Vector	PHLAP9254254	Plasmid vector containing HLA-A*11:469 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:469 protein. This plasmid can be used for constructing HLA-A*11:469 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:469 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:47 Protein Expression Plasmid Vector	PHLAP9254255	Plasmid vector containing HLA-A*11:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:47 protein. This plasmid can be used for constructing HLA-A*11:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:470 Protein Expression Plasmid Vector	PHLAP9254256	Plasmid vector containing HLA-A*11:470 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:470 protein. This plasmid can be used for constructing HLA-A*11:470 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:470 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:471 Protein Expression Plasmid Vector	PHLAP9254257	Plasmid vector containing HLA-A*11:471 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:471 protein. This plasmid can be used for constructing HLA-A*11:471 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:471 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:472 Protein Expression Plasmid Vector	PHLAP9254258	Plasmid vector containing HLA-A*11:472 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:472 protein. This plasmid can be used for constructing HLA-A*11:472 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:472 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:473 Protein Expression Plasmid Vector	PHLAP9254259	Plasmid vector containing HLA-A*11:473 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:473 protein. This plasmid can be used for constructing HLA-A*11:473 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:473 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:474 Protein Expression Plasmid Vector	PHLAP9254260	Plasmid vector containing HLA-A*11:474 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:474 protein. This plasmid can be used for constructing HLA-A*11:474 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:474 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:475 Protein Expression Plasmid Vector	PHLAP9254261	Plasmid vector containing HLA-A*11:475 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:475 protein. This plasmid can be used for constructing HLA-A*11:475 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:475 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:476 Protein Expression Plasmid Vector	PHLAP9254262	Plasmid vector containing HLA-A*11:476 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:476 protein. This plasmid can be used for constructing HLA-A*11:476 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:476 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:477 Protein Expression Plasmid Vector	PHLAP9254263	Plasmid vector containing HLA-A*11:477 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:477 protein. This plasmid can be used for constructing HLA-A*11:477 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:477 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:478 Protein Expression Plasmid Vector	PHLAP9254264	Plasmid vector containing HLA-A*11:478 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:478 protein. This plasmid can be used for constructing HLA-A*11:478 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:478 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:479N Protein Expression Plasmid Vector	PHLAP9254265	Plasmid vector containing HLA-A*11:479N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:479N protein. This plasmid can be used for constructing HLA-A*11:479N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:479N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:48 Protein Expression Plasmid Vector	PHLAP9254266	Plasmid vector containing HLA-A*11:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:48 protein. This plasmid can be used for constructing HLA-A*11:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:480 Protein Expression Plasmid Vector	PHLAP9254267	Plasmid vector containing HLA-A*11:480 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:480 protein. This plasmid can be used for constructing HLA-A*11:480 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:480 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:481 Protein Expression Plasmid Vector	PHLAP9254268	Plasmid vector containing HLA-A*11:481 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:481 protein. This plasmid can be used for constructing HLA-A*11:481 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:481 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:482 Protein Expression Plasmid Vector	PHLAP9254269	Plasmid vector containing HLA-A*11:482 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:482 protein. This plasmid can be used for constructing HLA-A*11:482 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:482 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:483 Protein Expression Plasmid Vector	PHLAP9254270	Plasmid vector containing HLA-A*11:483 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:483 protein. This plasmid can be used for constructing HLA-A*11:483 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:483 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:484 Protein Expression Plasmid Vector	PHLAP9254271	Plasmid vector containing HLA-A*11:484 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:484 protein. This plasmid can be used for constructing HLA-A*11:484 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:484 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:485 Protein Expression Plasmid Vector	PHLAP9254272	Plasmid vector containing HLA-A*11:485 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:485 protein. This plasmid can be used for constructing HLA-A*11:485 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:485 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:486 Protein Expression Plasmid Vector	PHLAP9254273	Plasmid vector containing HLA-A*11:486 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:486 protein. This plasmid can be used for constructing HLA-A*11:486 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:486 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:487 Protein Expression Plasmid Vector	PHLAP9254274	Plasmid vector containing HLA-A*11:487 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:487 protein. This plasmid can be used for constructing HLA-A*11:487 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:487 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:488 Protein Expression Plasmid Vector	PHLAP9254275	Plasmid vector containing HLA-A*11:488 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:488 protein. This plasmid can be used for constructing HLA-A*11:488 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:488 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:489 Protein Expression Plasmid Vector	PHLAP9254276	Plasmid vector containing HLA-A*11:489 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:489 protein. This plasmid can be used for constructing HLA-A*11:489 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:489 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:49 Protein Expression Plasmid Vector	PHLAP9254277	Plasmid vector containing HLA-A*11:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:49 protein. This plasmid can be used for constructing HLA-A*11:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:490 Protein Expression Plasmid Vector	PHLAP9254278	Plasmid vector containing HLA-A*11:490 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:490 protein. This plasmid can be used for constructing HLA-A*11:490 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:490 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:491N Protein Expression Plasmid Vector	PHLAP9254279	Plasmid vector containing HLA-A*11:491N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:491N protein. This plasmid can be used for constructing HLA-A*11:491N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:491N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:492N Protein Expression Plasmid Vector	PHLAP9254280	Plasmid vector containing HLA-A*11:492N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:492N protein. This plasmid can be used for constructing HLA-A*11:492N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:492N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:493 Protein Expression Plasmid Vector	PHLAP9254281	Plasmid vector containing HLA-A*11:493 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:493 protein. This plasmid can be used for constructing HLA-A*11:493 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:493 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:494 Protein Expression Plasmid Vector	PHLAP9254282	Plasmid vector containing HLA-A*11:494 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:494 protein. This plasmid can be used for constructing HLA-A*11:494 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:494 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:495 Protein Expression Plasmid Vector	PHLAP9254283	Plasmid vector containing HLA-A*11:495 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:495 protein. This plasmid can be used for constructing HLA-A*11:495 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:495 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:50Q Protein Expression Plasmid Vector	PHLAP9254284	Plasmid vector containing HLA-A*11:50Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:50Q protein. This plasmid can be used for constructing HLA-A*11:50Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:50Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:51 Protein Expression Plasmid Vector	PHLAP9254285	Plasmid vector containing HLA-A*11:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:51 protein. This plasmid can be used for constructing HLA-A*11:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:52Q Protein Expression Plasmid Vector	PHLAP9254286	Plasmid vector containing HLA-A*11:52Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:52Q protein. This plasmid can be used for constructing HLA-A*11:52Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:52Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:53 Protein Expression Plasmid Vector	PHLAP9254287	Plasmid vector containing HLA-A*11:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:53 protein. This plasmid can be used for constructing HLA-A*11:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:54:01 Protein Expression Plasmid Vector	PHLAP9254288	Plasmid vector containing HLA-A*11:54:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:54:01 protein. This plasmid can be used for constructing HLA-A*11:54:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:54:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:54:02 Protein Expression Plasmid Vector	PHLAP9254289	Plasmid vector containing HLA-A*11:54:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:54:02 protein. This plasmid can be used for constructing HLA-A*11:54:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:54:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:55 Protein Expression Plasmid Vector	PHLAP9254290	Plasmid vector containing HLA-A*11:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:55 protein. This plasmid can be used for constructing HLA-A*11:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:56 Protein Expression Plasmid Vector	PHLAP9254291	Plasmid vector containing HLA-A*11:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:56 protein. This plasmid can be used for constructing HLA-A*11:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:57 Protein Expression Plasmid Vector	PHLAP9254292	Plasmid vector containing HLA-A*11:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:57 protein. This plasmid can be used for constructing HLA-A*11:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:58 Protein Expression Plasmid Vector	PHLAP9254293	Plasmid vector containing HLA-A*11:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:58 protein. This plasmid can be used for constructing HLA-A*11:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:59 Protein Expression Plasmid Vector	PHLAP9254294	Plasmid vector containing HLA-A*11:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:59 protein. This plasmid can be used for constructing HLA-A*11:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:60 Protein Expression Plasmid Vector	PHLAP9254295	Plasmid vector containing HLA-A*11:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:60 protein. This plasmid can be used for constructing HLA-A*11:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:61 Protein Expression Plasmid Vector	PHLAP9254296	Plasmid vector containing HLA-A*11:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:61 protein. This plasmid can be used for constructing HLA-A*11:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:62 Protein Expression Plasmid Vector	PHLAP9254297	Plasmid vector containing HLA-A*11:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:62 protein. This plasmid can be used for constructing HLA-A*11:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:63 Protein Expression Plasmid Vector	PHLAP9254298	Plasmid vector containing HLA-A*11:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:63 protein. This plasmid can be used for constructing HLA-A*11:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:64 Protein Expression Plasmid Vector	PHLAP9254299	Plasmid vector containing HLA-A*11:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:64 protein. This plasmid can be used for constructing HLA-A*11:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:65:01 Protein Expression Plasmid Vector	PHLAP9254300	Plasmid vector containing HLA-A*11:65:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:65:01 protein. This plasmid can be used for constructing HLA-A*11:65:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:65:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:65:02 Protein Expression Plasmid Vector	PHLAP9254301	Plasmid vector containing HLA-A*11:65:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:65:02 protein. This plasmid can be used for constructing HLA-A*11:65:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:65:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:66 Protein Expression Plasmid Vector	PHLAP9254302	Plasmid vector containing HLA-A*11:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:66 protein. This plasmid can be used for constructing HLA-A*11:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:67 Protein Expression Plasmid Vector	PHLAP9254303	Plasmid vector containing HLA-A*11:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:67 protein. This plasmid can be used for constructing HLA-A*11:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:68 Protein Expression Plasmid Vector	PHLAP9254304	Plasmid vector containing HLA-A*11:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:68 protein. This plasmid can be used for constructing HLA-A*11:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:69N Protein Expression Plasmid Vector	PHLAP9254305	Plasmid vector containing HLA-A*11:69N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:69N protein. This plasmid can be used for constructing HLA-A*11:69N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:69N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:70:01 Protein Expression Plasmid Vector	PHLAP9254306	Plasmid vector containing HLA-A*11:70:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:70:01 protein. This plasmid can be used for constructing HLA-A*11:70:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:70:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:70:02 Protein Expression Plasmid Vector	PHLAP9254307	Plasmid vector containing HLA-A*11:70:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:70:02 protein. This plasmid can be used for constructing HLA-A*11:70:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:70:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:71 Protein Expression Plasmid Vector	PHLAP9254308	Plasmid vector containing HLA-A*11:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:71 protein. This plasmid can be used for constructing HLA-A*11:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:72 Protein Expression Plasmid Vector	PHLAP9254309	Plasmid vector containing HLA-A*11:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:72 protein. This plasmid can be used for constructing HLA-A*11:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:73 Protein Expression Plasmid Vector	PHLAP9254310	Plasmid vector containing HLA-A*11:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:73 protein. This plasmid can be used for constructing HLA-A*11:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:74 Protein Expression Plasmid Vector	PHLAP9254311	Plasmid vector containing HLA-A*11:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:74 protein. This plasmid can be used for constructing HLA-A*11:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:75 Protein Expression Plasmid Vector	PHLAP9254312	Plasmid vector containing HLA-A*11:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:75 protein. This plasmid can be used for constructing HLA-A*11:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:76 Protein Expression Plasmid Vector	PHLAP9254313	Plasmid vector containing HLA-A*11:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:76 protein. This plasmid can be used for constructing HLA-A*11:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:77 Protein Expression Plasmid Vector	PHLAP9254314	Plasmid vector containing HLA-A*11:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:77 protein. This plasmid can be used for constructing HLA-A*11:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:78N Protein Expression Plasmid Vector	PHLAP9254315	Plasmid vector containing HLA-A*11:78N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:78N protein. This plasmid can be used for constructing HLA-A*11:78N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:78N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:79 Protein Expression Plasmid Vector	PHLAP9254316	Plasmid vector containing HLA-A*11:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:79 protein. This plasmid can be used for constructing HLA-A*11:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:80 Protein Expression Plasmid Vector	PHLAP9254317	Plasmid vector containing HLA-A*11:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:80 protein. This plasmid can be used for constructing HLA-A*11:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:81 Protein Expression Plasmid Vector	PHLAP9254318	Plasmid vector containing HLA-A*11:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:81 protein. This plasmid can be used for constructing HLA-A*11:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:82 Protein Expression Plasmid Vector	PHLAP9254319	Plasmid vector containing HLA-A*11:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:82 protein. This plasmid can be used for constructing HLA-A*11:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:83 Protein Expression Plasmid Vector	PHLAP9254320	Plasmid vector containing HLA-A*11:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:83 protein. This plasmid can be used for constructing HLA-A*11:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:84 Protein Expression Plasmid Vector	PHLAP9254321	Plasmid vector containing HLA-A*11:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:84 protein. This plasmid can be used for constructing HLA-A*11:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:85 Protein Expression Plasmid Vector	PHLAP9254322	Plasmid vector containing HLA-A*11:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:85 protein. This plasmid can be used for constructing HLA-A*11:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:86 Protein Expression Plasmid Vector	PHLAP9254323	Plasmid vector containing HLA-A*11:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:86 protein. This plasmid can be used for constructing HLA-A*11:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:87 Protein Expression Plasmid Vector	PHLAP9254324	Plasmid vector containing HLA-A*11:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:87 protein. This plasmid can be used for constructing HLA-A*11:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:88 Protein Expression Plasmid Vector	PHLAP9254325	Plasmid vector containing HLA-A*11:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:88 protein. This plasmid can be used for constructing HLA-A*11:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:89 Protein Expression Plasmid Vector	PHLAP9254326	Plasmid vector containing HLA-A*11:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:89 protein. This plasmid can be used for constructing HLA-A*11:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:90 Protein Expression Plasmid Vector	PHLAP9254327	Plasmid vector containing HLA-A*11:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:90 protein. This plasmid can be used for constructing HLA-A*11:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:91:01 Protein Expression Plasmid Vector	PHLAP9254328	Plasmid vector containing HLA-A*11:91:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:91:01 protein. This plasmid can be used for constructing HLA-A*11:91:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:91:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:91:02 Protein Expression Plasmid Vector	PHLAP9254329	Plasmid vector containing HLA-A*11:91:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:91:02 protein. This plasmid can be used for constructing HLA-A*11:91:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:91:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*11:92 Protein Expression Plasmid Vector	PHLAP9254330	Plasmid vector containing HLA-A*11:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:92 protein. This plasmid can be used for constructing HLA-A*11:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:93 Protein Expression Plasmid Vector	PHLAP9254331	Plasmid vector containing HLA-A*11:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:93 protein. This plasmid can be used for constructing HLA-A*11:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:94 Protein Expression Plasmid Vector	PHLAP9254332	Plasmid vector containing HLA-A*11:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:94 protein. This plasmid can be used for constructing HLA-A*11:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:95 Protein Expression Plasmid Vector	PHLAP9254333	Plasmid vector containing HLA-A*11:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:95 protein. This plasmid can be used for constructing HLA-A*11:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:96 Protein Expression Plasmid Vector	PHLAP9254334	Plasmid vector containing HLA-A*11:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:96 protein. This plasmid can be used for constructing HLA-A*11:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:97 Protein Expression Plasmid Vector	PHLAP9254335	Plasmid vector containing HLA-A*11:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:97 protein. This plasmid can be used for constructing HLA-A*11:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:98 Protein Expression Plasmid Vector	PHLAP9254336	Plasmid vector containing HLA-A*11:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:98 protein. This plasmid can be used for constructing HLA-A*11:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*11:99N Protein Expression Plasmid Vector	PHLAP9254337	Plasmid vector containing HLA-A*11:99N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*11:99N protein. This plasmid can be used for constructing HLA-A*11:99N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*11:99N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*1128 Protein Expression Plasmid Vector	PHLAP9254338	Plasmid vector containing HLA-A*1128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*1128 protein. This plasmid can be used for constructing HLA-A*1128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*1128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:01 Protein Expression Plasmid Vector	PHLAP9254339	Plasmid vector containing HLA-A*23:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:01 protein. This plasmid can be used for constructing HLA-A*23:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:02 Protein Expression Plasmid Vector	PHLAP9254340	Plasmid vector containing HLA-A*23:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:02 protein. This plasmid can be used for constructing HLA-A*23:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:03 Protein Expression Plasmid Vector	PHLAP9254341	Plasmid vector containing HLA-A*23:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:03 protein. This plasmid can be used for constructing HLA-A*23:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:04 Protein Expression Plasmid Vector	PHLAP9254342	Plasmid vector containing HLA-A*23:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:04 protein. This plasmid can be used for constructing HLA-A*23:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:06 Protein Expression Plasmid Vector	PHLAP9254343	Plasmid vector containing HLA-A*23:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:06 protein. This plasmid can be used for constructing HLA-A*23:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:07 Protein Expression Plasmid Vector	PHLAP9254344	Plasmid vector containing HLA-A*23:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:07 protein. This plasmid can be used for constructing HLA-A*23:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:01:01:08 Protein Expression Plasmid Vector	PHLAP9254345	Plasmid vector containing HLA-A*23:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:08 protein. This plasmid can be used for constructing HLA-A*23:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:09 Protein Expression Plasmid Vector	PHLAP9254346	Plasmid vector containing HLA-A*23:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:09 protein. This plasmid can be used for constructing HLA-A*23:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:10 Protein Expression Plasmid Vector	PHLAP9254347	Plasmid vector containing HLA-A*23:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:10 protein. This plasmid can be used for constructing HLA-A*23:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:11 Protein Expression Plasmid Vector	PHLAP9254348	Plasmid vector containing HLA-A*23:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:11 protein. This plasmid can be used for constructing HLA-A*23:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:12 Protein Expression Plasmid Vector	PHLAP9254349	Plasmid vector containing HLA-A*23:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:12 protein. This plasmid can be used for constructing HLA-A*23:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:13 Protein Expression Plasmid Vector	PHLAP9254350	Plasmid vector containing HLA-A*23:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:13 protein. This plasmid can be used for constructing HLA-A*23:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:14 Protein Expression Plasmid Vector	PHLAP9254351	Plasmid vector containing HLA-A*23:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:14 protein. This plasmid can be used for constructing HLA-A*23:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:01:01:15 Protein Expression Plasmid Vector	PHLAP9254352	Plasmid vector containing HLA-A*23:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:15 protein. This plasmid can be used for constructing HLA-A*23:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:16 Protein Expression Plasmid Vector	PHLAP9254353	Plasmid vector containing HLA-A*23:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:16 protein. This plasmid can be used for constructing HLA-A*23:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:17 Protein Expression Plasmid Vector	PHLAP9254354	Plasmid vector containing HLA-A*23:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:17 protein. This plasmid can be used for constructing HLA-A*23:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:18 Protein Expression Plasmid Vector	PHLAP9254355	Plasmid vector containing HLA-A*23:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:18 protein. This plasmid can be used for constructing HLA-A*23:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:19 Protein Expression Plasmid Vector	PHLAP9254356	Plasmid vector containing HLA-A*23:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:19 protein. This plasmid can be used for constructing HLA-A*23:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:20 Protein Expression Plasmid Vector	PHLAP9254357	Plasmid vector containing HLA-A*23:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:20 protein. This plasmid can be used for constructing HLA-A*23:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:21 Protein Expression Plasmid Vector	PHLAP9254358	Plasmid vector containing HLA-A*23:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:21 protein. This plasmid can be used for constructing HLA-A*23:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:01:01:22 Protein Expression Plasmid Vector	PHLAP9254359	Plasmid vector containing HLA-A*23:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:22 protein. This plasmid can be used for constructing HLA-A*23:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:23 Protein Expression Plasmid Vector	PHLAP9254360	Plasmid vector containing HLA-A*23:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:23 protein. This plasmid can be used for constructing HLA-A*23:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:24 Protein Expression Plasmid Vector	PHLAP9254361	Plasmid vector containing HLA-A*23:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:24 protein. This plasmid can be used for constructing HLA-A*23:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:25 Protein Expression Plasmid Vector	PHLAP9254362	Plasmid vector containing HLA-A*23:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:25 protein. This plasmid can be used for constructing HLA-A*23:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:26 Protein Expression Plasmid Vector	PHLAP9254363	Plasmid vector containing HLA-A*23:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:26 protein. This plasmid can be used for constructing HLA-A*23:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:27 Protein Expression Plasmid Vector	PHLAP9254364	Plasmid vector containing HLA-A*23:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:27 protein. This plasmid can be used for constructing HLA-A*23:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:28 Protein Expression Plasmid Vector	PHLAP9254365	Plasmid vector containing HLA-A*23:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:28 protein. This plasmid can be used for constructing HLA-A*23:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:01:01:29 Protein Expression Plasmid Vector	PHLAP9254366	Plasmid vector containing HLA-A*23:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:29 protein. This plasmid can be used for constructing HLA-A*23:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:30 Protein Expression Plasmid Vector	PHLAP9254367	Plasmid vector containing HLA-A*23:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:30 protein. This plasmid can be used for constructing HLA-A*23:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:31 Protein Expression Plasmid Vector	PHLAP9254368	Plasmid vector containing HLA-A*23:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:31 protein. This plasmid can be used for constructing HLA-A*23:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:32 Protein Expression Plasmid Vector	PHLAP9254369	Plasmid vector containing HLA-A*23:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:32 protein. This plasmid can be used for constructing HLA-A*23:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:33 Protein Expression Plasmid Vector	PHLAP9254370	Plasmid vector containing HLA-A*23:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:33 protein. This plasmid can be used for constructing HLA-A*23:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:34 Protein Expression Plasmid Vector	PHLAP9254371	Plasmid vector containing HLA-A*23:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:34 protein. This plasmid can be used for constructing HLA-A*23:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:01:35 Protein Expression Plasmid Vector	PHLAP9254372	Plasmid vector containing HLA-A*23:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:01:35 protein. This plasmid can be used for constructing HLA-A*23:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:01:02 Protein Expression Plasmid Vector	PHLAP9254373	Plasmid vector containing HLA-A*23:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:02 protein. This plasmid can be used for constructing HLA-A*23:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:03 Protein Expression Plasmid Vector	PHLAP9254374	Plasmid vector containing HLA-A*23:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:03 protein. This plasmid can be used for constructing HLA-A*23:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:04 Protein Expression Plasmid Vector	PHLAP9254375	Plasmid vector containing HLA-A*23:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:04 protein. This plasmid can be used for constructing HLA-A*23:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:05 Protein Expression Plasmid Vector	PHLAP9254376	Plasmid vector containing HLA-A*23:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:05 protein. This plasmid can be used for constructing HLA-A*23:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:06 Protein Expression Plasmid Vector	PHLAP9254377	Plasmid vector containing HLA-A*23:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:06 protein. This plasmid can be used for constructing HLA-A*23:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:07 Protein Expression Plasmid Vector	PHLAP9254378	Plasmid vector containing HLA-A*23:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:07 protein. This plasmid can be used for constructing HLA-A*23:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:08 Protein Expression Plasmid Vector	PHLAP9254379	Plasmid vector containing HLA-A*23:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:08 protein. This plasmid can be used for constructing HLA-A*23:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:09 Protein Expression Plasmid Vector	PHLAP9254380	Plasmid vector containing HLA-A*23:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:09 protein. This plasmid can be used for constructing HLA-A*23:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:01:10 Protein Expression Plasmid Vector	PHLAP9254381	Plasmid vector containing HLA-A*23:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:10 protein. This plasmid can be used for constructing HLA-A*23:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:11 Protein Expression Plasmid Vector	PHLAP9254382	Plasmid vector containing HLA-A*23:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:11 protein. This plasmid can be used for constructing HLA-A*23:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:12 Protein Expression Plasmid Vector	PHLAP9254383	Plasmid vector containing HLA-A*23:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:12 protein. This plasmid can be used for constructing HLA-A*23:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:13 Protein Expression Plasmid Vector	PHLAP9254384	Plasmid vector containing HLA-A*23:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:13 protein. This plasmid can be used for constructing HLA-A*23:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:14 Protein Expression Plasmid Vector	PHLAP9254385	Plasmid vector containing HLA-A*23:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:14 protein. This plasmid can be used for constructing HLA-A*23:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:15 Protein Expression Plasmid Vector	PHLAP9254386	Plasmid vector containing HLA-A*23:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:15 protein. This plasmid can be used for constructing HLA-A*23:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:16 Protein Expression Plasmid Vector	PHLAP9254387	Plasmid vector containing HLA-A*23:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:16 protein. This plasmid can be used for constructing HLA-A*23:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:17 Protein Expression Plasmid Vector	PHLAP9254388	Plasmid vector containing HLA-A*23:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:17 protein. This plasmid can be used for constructing HLA-A*23:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:01:18 Protein Expression Plasmid Vector	PHLAP9254389	Plasmid vector containing HLA-A*23:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:18 protein. This plasmid can be used for constructing HLA-A*23:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:19 Protein Expression Plasmid Vector	PHLAP9254390	Plasmid vector containing HLA-A*23:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:19 protein. This plasmid can be used for constructing HLA-A*23:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:20 Protein Expression Plasmid Vector	PHLAP9254391	Plasmid vector containing HLA-A*23:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:20 protein. This plasmid can be used for constructing HLA-A*23:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:21 Protein Expression Plasmid Vector	PHLAP9254392	Plasmid vector containing HLA-A*23:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:21 protein. This plasmid can be used for constructing HLA-A*23:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:22 Protein Expression Plasmid Vector	PHLAP9254393	Plasmid vector containing HLA-A*23:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:22 protein. This plasmid can be used for constructing HLA-A*23:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:23 Protein Expression Plasmid Vector	PHLAP9254394	Plasmid vector containing HLA-A*23:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:23 protein. This plasmid can be used for constructing HLA-A*23:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:24 Protein Expression Plasmid Vector	PHLAP9254395	Plasmid vector containing HLA-A*23:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:24 protein. This plasmid can be used for constructing HLA-A*23:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:25 Protein Expression Plasmid Vector	PHLAP9254396	Plasmid vector containing HLA-A*23:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:25 protein. This plasmid can be used for constructing HLA-A*23:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:01:26 Protein Expression Plasmid Vector	PHLAP9254397	Plasmid vector containing HLA-A*23:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:26 protein. This plasmid can be used for constructing HLA-A*23:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:27 Protein Expression Plasmid Vector	PHLAP9254398	Plasmid vector containing HLA-A*23:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:27 protein. This plasmid can be used for constructing HLA-A*23:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:28 Protein Expression Plasmid Vector	PHLAP9254399	Plasmid vector containing HLA-A*23:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:28 protein. This plasmid can be used for constructing HLA-A*23:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:29 Protein Expression Plasmid Vector	PHLAP9254400	Plasmid vector containing HLA-A*23:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:29 protein. This plasmid can be used for constructing HLA-A*23:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:30 Protein Expression Plasmid Vector	PHLAP9254401	Plasmid vector containing HLA-A*23:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:30 protein. This plasmid can be used for constructing HLA-A*23:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:31 Protein Expression Plasmid Vector	PHLAP9254402	Plasmid vector containing HLA-A*23:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:31 protein. This plasmid can be used for constructing HLA-A*23:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:32 Protein Expression Plasmid Vector	PHLAP9254403	Plasmid vector containing HLA-A*23:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:32 protein. This plasmid can be used for constructing HLA-A*23:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:33 Protein Expression Plasmid Vector	PHLAP9254404	Plasmid vector containing HLA-A*23:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:33 protein. This plasmid can be used for constructing HLA-A*23:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:01:34 Protein Expression Plasmid Vector	PHLAP9254405	Plasmid vector containing HLA-A*23:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:34 protein. This plasmid can be used for constructing HLA-A*23:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:35 Protein Expression Plasmid Vector	PHLAP9254406	Plasmid vector containing HLA-A*23:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:35 protein. This plasmid can be used for constructing HLA-A*23:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:36 Protein Expression Plasmid Vector	PHLAP9254407	Plasmid vector containing HLA-A*23:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:36 protein. This plasmid can be used for constructing HLA-A*23:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:37 Protein Expression Plasmid Vector	PHLAP9254408	Plasmid vector containing HLA-A*23:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:37 protein. This plasmid can be used for constructing HLA-A*23:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:38 Protein Expression Plasmid Vector	PHLAP9254409	Plasmid vector containing HLA-A*23:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:38 protein. This plasmid can be used for constructing HLA-A*23:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:39 Protein Expression Plasmid Vector	PHLAP9254410	Plasmid vector containing HLA-A*23:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:39 protein. This plasmid can be used for constructing HLA-A*23:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:40 Protein Expression Plasmid Vector	PHLAP9254411	Plasmid vector containing HLA-A*23:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:40 protein. This plasmid can be used for constructing HLA-A*23:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:01:41 Protein Expression Plasmid Vector	PHLAP9254412	Plasmid vector containing HLA-A*23:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:41 protein. This plasmid can be used for constructing HLA-A*23:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:01:42 Protein Expression Plasmid Vector	PHLAP9254413	Plasmid vector containing HLA-A*23:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:01:42 protein. This plasmid can be used for constructing HLA-A*23:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:02 Protein Expression Plasmid Vector	PHLAP9254414	Plasmid vector containing HLA-A*23:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:02 protein. This plasmid can be used for constructing HLA-A*23:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:03:01 Protein Expression Plasmid Vector	PHLAP9254415	Plasmid vector containing HLA-A*23:03:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:03:01 protein. This plasmid can be used for constructing HLA-A*23:03:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:03:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:03:02:01 Protein Expression Plasmid Vector	PHLAP9254416	Plasmid vector containing HLA-A*23:03:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:03:02:01 protein. This plasmid can be used for constructing HLA-A*23:03:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:03:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:03:02:02 Protein Expression Plasmid Vector	PHLAP9254417	Plasmid vector containing HLA-A*23:03:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:03:02:02 protein. This plasmid can be used for constructing HLA-A*23:03:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:03:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:04 Protein Expression Plasmid Vector	PHLAP9254418	Plasmid vector containing HLA-A*23:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:04 protein. This plasmid can be used for constructing HLA-A*23:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:05 Protein Expression Plasmid Vector	PHLAP9254419	Plasmid vector containing HLA-A*23:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:05 protein. This plasmid can be used for constructing HLA-A*23:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:06 Protein Expression Plasmid Vector	PHLAP9254420	Plasmid vector containing HLA-A*23:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:06 protein. This plasmid can be used for constructing HLA-A*23:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:07N Protein Expression Plasmid Vector	PHLAP9254421	Plasmid vector containing HLA-A*23:07N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:07N protein. This plasmid can be used for constructing HLA-A*23:07N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:07N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:08N Protein Expression Plasmid Vector	PHLAP9254422	Plasmid vector containing HLA-A*23:08N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:08N protein. This plasmid can be used for constructing HLA-A*23:08N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:08N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:09 Protein Expression Plasmid Vector	PHLAP9254423	Plasmid vector containing HLA-A*23:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:09 protein. This plasmid can be used for constructing HLA-A*23:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:10:01 Protein Expression Plasmid Vector	PHLAP9254424	Plasmid vector containing HLA-A*23:10:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:10:01 protein. This plasmid can be used for constructing HLA-A*23:10:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:10:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:10:02 Protein Expression Plasmid Vector	PHLAP9254425	Plasmid vector containing HLA-A*23:10:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:10:02 protein. This plasmid can be used for constructing HLA-A*23:10:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:10:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:100 Protein Expression Plasmid Vector	PHLAP9254426	Plasmid vector containing HLA-A*23:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:100 protein. This plasmid can be used for constructing HLA-A*23:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:101 Protein Expression Plasmid Vector	PHLAP9254427	Plasmid vector containing HLA-A*23:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:101 protein. This plasmid can be used for constructing HLA-A*23:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:102 Protein Expression Plasmid Vector	PHLAP9254428	Plasmid vector containing HLA-A*23:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:102 protein. This plasmid can be used for constructing HLA-A*23:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:103N Protein Expression Plasmid Vector	PHLAP9254429	Plasmid vector containing HLA-A*23:103N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:103N protein. This plasmid can be used for constructing HLA-A*23:103N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:103N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:104 Protein Expression Plasmid Vector	PHLAP9254430	Plasmid vector containing HLA-A*23:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:104 protein. This plasmid can be used for constructing HLA-A*23:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:105 Protein Expression Plasmid Vector	PHLAP9254431	Plasmid vector containing HLA-A*23:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:105 protein. This plasmid can be used for constructing HLA-A*23:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:106N Protein Expression Plasmid Vector	PHLAP9254432	Plasmid vector containing HLA-A*23:106N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:106N protein. This plasmid can be used for constructing HLA-A*23:106N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:106N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:107Q Protein Expression Plasmid Vector	PHLAP9254433	Plasmid vector containing HLA-A*23:107Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:107Q protein. This plasmid can be used for constructing HLA-A*23:107Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:107Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:108N Protein Expression Plasmid Vector	PHLAP9254434	Plasmid vector containing HLA-A*23:108N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:108N protein. This plasmid can be used for constructing HLA-A*23:108N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:108N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:109 Protein Expression Plasmid Vector	PHLAP9254435	Plasmid vector containing HLA-A*23:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:109 protein. This plasmid can be used for constructing HLA-A*23:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:110 Protein Expression Plasmid Vector	PHLAP9254436	Plasmid vector containing HLA-A*23:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:110 protein. This plasmid can be used for constructing HLA-A*23:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:111 Protein Expression Plasmid Vector	PHLAP9254437	Plasmid vector containing HLA-A*23:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:111 protein. This plasmid can be used for constructing HLA-A*23:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:112 Protein Expression Plasmid Vector	PHLAP9254438	Plasmid vector containing HLA-A*23:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:112 protein. This plasmid can be used for constructing HLA-A*23:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:113N Protein Expression Plasmid Vector	PHLAP9254439	Plasmid vector containing HLA-A*23:113N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:113N protein. This plasmid can be used for constructing HLA-A*23:113N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:113N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:114 Protein Expression Plasmid Vector	PHLAP9254440	Plasmid vector containing HLA-A*23:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:114 protein. This plasmid can be used for constructing HLA-A*23:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:115 Protein Expression Plasmid Vector	PHLAP9254441	Plasmid vector containing HLA-A*23:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:115 protein. This plasmid can be used for constructing HLA-A*23:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:116 Protein Expression Plasmid Vector	PHLAP9254442	Plasmid vector containing HLA-A*23:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:116 protein. This plasmid can be used for constructing HLA-A*23:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:117 Protein Expression Plasmid Vector	PHLAP9254443	Plasmid vector containing HLA-A*23:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:117 protein. This plasmid can be used for constructing HLA-A*23:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:118 Protein Expression Plasmid Vector	PHLAP9254444	Plasmid vector containing HLA-A*23:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:118 protein. This plasmid can be used for constructing HLA-A*23:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:119 Protein Expression Plasmid Vector	PHLAP9254445	Plasmid vector containing HLA-A*23:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:119 protein. This plasmid can be used for constructing HLA-A*23:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:11N Protein Expression Plasmid Vector	PHLAP9254446	Plasmid vector containing HLA-A*23:11N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:11N protein. This plasmid can be used for constructing HLA-A*23:11N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:11N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:12 Protein Expression Plasmid Vector	PHLAP9254447	Plasmid vector containing HLA-A*23:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:12 protein. This plasmid can be used for constructing HLA-A*23:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:120 Protein Expression Plasmid Vector	PHLAP9254448	Plasmid vector containing HLA-A*23:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:120 protein. This plasmid can be used for constructing HLA-A*23:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:121 Protein Expression Plasmid Vector	PHLAP9254449	Plasmid vector containing HLA-A*23:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:121 protein. This plasmid can be used for constructing HLA-A*23:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:122 Protein Expression Plasmid Vector	PHLAP9254450	Plasmid vector containing HLA-A*23:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:122 protein. This plasmid can be used for constructing HLA-A*23:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:123 Protein Expression Plasmid Vector	PHLAP9254451	Plasmid vector containing HLA-A*23:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:123 protein. This plasmid can be used for constructing HLA-A*23:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:124 Protein Expression Plasmid Vector	PHLAP9254452	Plasmid vector containing HLA-A*23:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:124 protein. This plasmid can be used for constructing HLA-A*23:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:125 Protein Expression Plasmid Vector	PHLAP9254453	Plasmid vector containing HLA-A*23:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:125 protein. This plasmid can be used for constructing HLA-A*23:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:126 Protein Expression Plasmid Vector	PHLAP9254454	Plasmid vector containing HLA-A*23:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:126 protein. This plasmid can be used for constructing HLA-A*23:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:127 Protein Expression Plasmid Vector	PHLAP9254455	Plasmid vector containing HLA-A*23:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:127 protein. This plasmid can be used for constructing HLA-A*23:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:128 Protein Expression Plasmid Vector	PHLAP9254456	Plasmid vector containing HLA-A*23:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:128 protein. This plasmid can be used for constructing HLA-A*23:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:129 Protein Expression Plasmid Vector	PHLAP9254457	Plasmid vector containing HLA-A*23:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:129 protein. This plasmid can be used for constructing HLA-A*23:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:13 Protein Expression Plasmid Vector	PHLAP9254458	Plasmid vector containing HLA-A*23:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:13 protein. This plasmid can be used for constructing HLA-A*23:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:130 Protein Expression Plasmid Vector	PHLAP9254459	Plasmid vector containing HLA-A*23:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:130 protein. This plasmid can be used for constructing HLA-A*23:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:131 Protein Expression Plasmid Vector	PHLAP9254460	Plasmid vector containing HLA-A*23:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:131 protein. This plasmid can be used for constructing HLA-A*23:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:132 Protein Expression Plasmid Vector	PHLAP9254461	Plasmid vector containing HLA-A*23:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:132 protein. This plasmid can be used for constructing HLA-A*23:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:133 Protein Expression Plasmid Vector	PHLAP9254462	Plasmid vector containing HLA-A*23:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:133 protein. This plasmid can be used for constructing HLA-A*23:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:134 Protein Expression Plasmid Vector	PHLAP9254463	Plasmid vector containing HLA-A*23:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:134 protein. This plasmid can be used for constructing HLA-A*23:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:135 Protein Expression Plasmid Vector	PHLAP9254464	Plasmid vector containing HLA-A*23:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:135 protein. This plasmid can be used for constructing HLA-A*23:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:136 Protein Expression Plasmid Vector	PHLAP9254465	Plasmid vector containing HLA-A*23:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:136 protein. This plasmid can be used for constructing HLA-A*23:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:137 Protein Expression Plasmid Vector	PHLAP9254466	Plasmid vector containing HLA-A*23:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:137 protein. This plasmid can be used for constructing HLA-A*23:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:138 Protein Expression Plasmid Vector	PHLAP9254467	Plasmid vector containing HLA-A*23:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:138 protein. This plasmid can be used for constructing HLA-A*23:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:139 Protein Expression Plasmid Vector	PHLAP9254468	Plasmid vector containing HLA-A*23:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:139 protein. This plasmid can be used for constructing HLA-A*23:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:14:01 Protein Expression Plasmid Vector	PHLAP9254469	Plasmid vector containing HLA-A*23:14:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:14:01 protein. This plasmid can be used for constructing HLA-A*23:14:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:14:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:14:02 Protein Expression Plasmid Vector	PHLAP9254470	Plasmid vector containing HLA-A*23:14:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:14:02 protein. This plasmid can be used for constructing HLA-A*23:14:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:14:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:140 Protein Expression Plasmid Vector	PHLAP9254471	Plasmid vector containing HLA-A*23:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:140 protein. This plasmid can be used for constructing HLA-A*23:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:141 Protein Expression Plasmid Vector	PHLAP9254472	Plasmid vector containing HLA-A*23:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:141 protein. This plasmid can be used for constructing HLA-A*23:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:142N Protein Expression Plasmid Vector	PHLAP9254473	Plasmid vector containing HLA-A*23:142N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:142N protein. This plasmid can be used for constructing HLA-A*23:142N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:142N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:143 Protein Expression Plasmid Vector	PHLAP9254474	Plasmid vector containing HLA-A*23:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:143 protein. This plasmid can be used for constructing HLA-A*23:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:144 Protein Expression Plasmid Vector	PHLAP9254475	Plasmid vector containing HLA-A*23:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:144 protein. This plasmid can be used for constructing HLA-A*23:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:145 Protein Expression Plasmid Vector	PHLAP9254476	Plasmid vector containing HLA-A*23:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:145 protein. This plasmid can be used for constructing HLA-A*23:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:146 Protein Expression Plasmid Vector	PHLAP9254477	Plasmid vector containing HLA-A*23:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:146 protein. This plasmid can be used for constructing HLA-A*23:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:147 Protein Expression Plasmid Vector	PHLAP9254478	Plasmid vector containing HLA-A*23:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:147 protein. This plasmid can be used for constructing HLA-A*23:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:148 Protein Expression Plasmid Vector	PHLAP9254479	Plasmid vector containing HLA-A*23:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:148 protein. This plasmid can be used for constructing HLA-A*23:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:149 Protein Expression Plasmid Vector	PHLAP9254480	Plasmid vector containing HLA-A*23:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:149 protein. This plasmid can be used for constructing HLA-A*23:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:15 Protein Expression Plasmid Vector	PHLAP9254481	Plasmid vector containing HLA-A*23:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:15 protein. This plasmid can be used for constructing HLA-A*23:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:150 Protein Expression Plasmid Vector	PHLAP9254482	Plasmid vector containing HLA-A*23:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:150 protein. This plasmid can be used for constructing HLA-A*23:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:151 Protein Expression Plasmid Vector	PHLAP9254483	Plasmid vector containing HLA-A*23:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:151 protein. This plasmid can be used for constructing HLA-A*23:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:152 Protein Expression Plasmid Vector	PHLAP9254484	Plasmid vector containing HLA-A*23:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:152 protein. This plasmid can be used for constructing HLA-A*23:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:16 Protein Expression Plasmid Vector	PHLAP9254485	Plasmid vector containing HLA-A*23:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:16 protein. This plasmid can be used for constructing HLA-A*23:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:17:01:01 Protein Expression Plasmid Vector	PHLAP9254486	Plasmid vector containing HLA-A*23:17:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:17:01:01 protein. This plasmid can be used for constructing HLA-A*23:17:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:17:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:17:01:02 Protein Expression Plasmid Vector	PHLAP9254487	Plasmid vector containing HLA-A*23:17:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:17:01:02 protein. This plasmid can be used for constructing HLA-A*23:17:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:17:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:17:01:03 Protein Expression Plasmid Vector	PHLAP9254488	Plasmid vector containing HLA-A*23:17:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:17:01:03 protein. This plasmid can be used for constructing HLA-A*23:17:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:17:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:17:01:04 Protein Expression Plasmid Vector	PHLAP9254489	Plasmid vector containing HLA-A*23:17:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:17:01:04 protein. This plasmid can be used for constructing HLA-A*23:17:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:17:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:17:01:05 Protein Expression Plasmid Vector	PHLAP9254490	Plasmid vector containing HLA-A*23:17:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:17:01:05 protein. This plasmid can be used for constructing HLA-A*23:17:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:17:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:17:01:06 Protein Expression Plasmid Vector	PHLAP9254491	Plasmid vector containing HLA-A*23:17:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:17:01:06 protein. This plasmid can be used for constructing HLA-A*23:17:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:17:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:17:02 Protein Expression Plasmid Vector	PHLAP9254492	Plasmid vector containing HLA-A*23:17:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:17:02 protein. This plasmid can be used for constructing HLA-A*23:17:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:17:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:17:03 Protein Expression Plasmid Vector	PHLAP9254493	Plasmid vector containing HLA-A*23:17:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:17:03 protein. This plasmid can be used for constructing HLA-A*23:17:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:17:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:18 Protein Expression Plasmid Vector	PHLAP9254494	Plasmid vector containing HLA-A*23:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:18 protein. This plasmid can be used for constructing HLA-A*23:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:19N Protein Expression Plasmid Vector	PHLAP9254495	Plasmid vector containing HLA-A*23:19N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:19N protein. This plasmid can be used for constructing HLA-A*23:19N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:19N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:20 Protein Expression Plasmid Vector	PHLAP9254496	Plasmid vector containing HLA-A*23:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:20 protein. This plasmid can be used for constructing HLA-A*23:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:21 Protein Expression Plasmid Vector	PHLAP9254497	Plasmid vector containing HLA-A*23:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:21 protein. This plasmid can be used for constructing HLA-A*23:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:22 Protein Expression Plasmid Vector	PHLAP9254498	Plasmid vector containing HLA-A*23:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:22 protein. This plasmid can be used for constructing HLA-A*23:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:23:01 Protein Expression Plasmid Vector	PHLAP9254499	Plasmid vector containing HLA-A*23:23:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:23:01 protein. This plasmid can be used for constructing HLA-A*23:23:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:23:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:23:02 Protein Expression Plasmid Vector	PHLAP9254500	Plasmid vector containing HLA-A*23:23:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:23:02 protein. This plasmid can be used for constructing HLA-A*23:23:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:23:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:24 Protein Expression Plasmid Vector	PHLAP9254501	Plasmid vector containing HLA-A*23:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:24 protein. This plasmid can be used for constructing HLA-A*23:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:25 Protein Expression Plasmid Vector	PHLAP9254502	Plasmid vector containing HLA-A*23:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:25 protein. This plasmid can be used for constructing HLA-A*23:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:26 Protein Expression Plasmid Vector	PHLAP9254503	Plasmid vector containing HLA-A*23:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:26 protein. This plasmid can be used for constructing HLA-A*23:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:27 Protein Expression Plasmid Vector	PHLAP9254504	Plasmid vector containing HLA-A*23:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:27 protein. This plasmid can be used for constructing HLA-A*23:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:28 Protein Expression Plasmid Vector	PHLAP9254505	Plasmid vector containing HLA-A*23:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:28 protein. This plasmid can be used for constructing HLA-A*23:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:29 Protein Expression Plasmid Vector	PHLAP9254506	Plasmid vector containing HLA-A*23:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:29 protein. This plasmid can be used for constructing HLA-A*23:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:30 Protein Expression Plasmid Vector	PHLAP9254507	Plasmid vector containing HLA-A*23:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:30 protein. This plasmid can be used for constructing HLA-A*23:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:31 Protein Expression Plasmid Vector	PHLAP9254508	Plasmid vector containing HLA-A*23:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:31 protein. This plasmid can be used for constructing HLA-A*23:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:32 Protein Expression Plasmid Vector	PHLAP9254509	Plasmid vector containing HLA-A*23:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:32 protein. This plasmid can be used for constructing HLA-A*23:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:33 Protein Expression Plasmid Vector	PHLAP9254510	Plasmid vector containing HLA-A*23:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:33 protein. This plasmid can be used for constructing HLA-A*23:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:34 Protein Expression Plasmid Vector	PHLAP9254511	Plasmid vector containing HLA-A*23:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:34 protein. This plasmid can be used for constructing HLA-A*23:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:35 Protein Expression Plasmid Vector	PHLAP9254512	Plasmid vector containing HLA-A*23:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:35 protein. This plasmid can be used for constructing HLA-A*23:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:36 Protein Expression Plasmid Vector	PHLAP9254513	Plasmid vector containing HLA-A*23:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:36 protein. This plasmid can be used for constructing HLA-A*23:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:37:01 Protein Expression Plasmid Vector	PHLAP9254514	Plasmid vector containing HLA-A*23:37:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:37:01 protein. This plasmid can be used for constructing HLA-A*23:37:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:37:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:37:02 Protein Expression Plasmid Vector	PHLAP9254515	Plasmid vector containing HLA-A*23:37:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:37:02 protein. This plasmid can be used for constructing HLA-A*23:37:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:37:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:38N Protein Expression Plasmid Vector	PHLAP9254516	Plasmid vector containing HLA-A*23:38N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:38N protein. This plasmid can be used for constructing HLA-A*23:38N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:38N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:39 Protein Expression Plasmid Vector	PHLAP9254517	Plasmid vector containing HLA-A*23:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:39 protein. This plasmid can be used for constructing HLA-A*23:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:40 Protein Expression Plasmid Vector	PHLAP9254518	Plasmid vector containing HLA-A*23:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:40 protein. This plasmid can be used for constructing HLA-A*23:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:41 Protein Expression Plasmid Vector	PHLAP9254519	Plasmid vector containing HLA-A*23:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:41 protein. This plasmid can be used for constructing HLA-A*23:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:42 Protein Expression Plasmid Vector	PHLAP9254520	Plasmid vector containing HLA-A*23:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:42 protein. This plasmid can be used for constructing HLA-A*23:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:43 Protein Expression Plasmid Vector	PHLAP9254521	Plasmid vector containing HLA-A*23:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:43 protein. This plasmid can be used for constructing HLA-A*23:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:44 Protein Expression Plasmid Vector	PHLAP9254522	Plasmid vector containing HLA-A*23:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:44 protein. This plasmid can be used for constructing HLA-A*23:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:45 Protein Expression Plasmid Vector	PHLAP9254523	Plasmid vector containing HLA-A*23:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:45 protein. This plasmid can be used for constructing HLA-A*23:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:46 Protein Expression Plasmid Vector	PHLAP9254524	Plasmid vector containing HLA-A*23:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:46 protein. This plasmid can be used for constructing HLA-A*23:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:47 Protein Expression Plasmid Vector	PHLAP9254525	Plasmid vector containing HLA-A*23:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:47 protein. This plasmid can be used for constructing HLA-A*23:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:48 Protein Expression Plasmid Vector	PHLAP9254526	Plasmid vector containing HLA-A*23:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:48 protein. This plasmid can be used for constructing HLA-A*23:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:49 Protein Expression Plasmid Vector	PHLAP9254527	Plasmid vector containing HLA-A*23:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:49 protein. This plasmid can be used for constructing HLA-A*23:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:50 Protein Expression Plasmid Vector	PHLAP9254528	Plasmid vector containing HLA-A*23:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:50 protein. This plasmid can be used for constructing HLA-A*23:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:51 Protein Expression Plasmid Vector	PHLAP9254529	Plasmid vector containing HLA-A*23:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:51 protein. This plasmid can be used for constructing HLA-A*23:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:52 Protein Expression Plasmid Vector	PHLAP9254530	Plasmid vector containing HLA-A*23:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:52 protein. This plasmid can be used for constructing HLA-A*23:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:53 Protein Expression Plasmid Vector	PHLAP9254531	Plasmid vector containing HLA-A*23:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:53 protein. This plasmid can be used for constructing HLA-A*23:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:54 Protein Expression Plasmid Vector	PHLAP9254532	Plasmid vector containing HLA-A*23:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:54 protein. This plasmid can be used for constructing HLA-A*23:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:55 Protein Expression Plasmid Vector	PHLAP9254533	Plasmid vector containing HLA-A*23:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:55 protein. This plasmid can be used for constructing HLA-A*23:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:56 Protein Expression Plasmid Vector	PHLAP9254534	Plasmid vector containing HLA-A*23:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:56 protein. This plasmid can be used for constructing HLA-A*23:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:57 Protein Expression Plasmid Vector	PHLAP9254535	Plasmid vector containing HLA-A*23:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:57 protein. This plasmid can be used for constructing HLA-A*23:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:58 Protein Expression Plasmid Vector	PHLAP9254536	Plasmid vector containing HLA-A*23:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:58 protein. This plasmid can be used for constructing HLA-A*23:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:59 Protein Expression Plasmid Vector	PHLAP9254537	Plasmid vector containing HLA-A*23:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:59 protein. This plasmid can be used for constructing HLA-A*23:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:60 Protein Expression Plasmid Vector	PHLAP9254538	Plasmid vector containing HLA-A*23:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:60 protein. This plasmid can be used for constructing HLA-A*23:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:61 Protein Expression Plasmid Vector	PHLAP9254539	Plasmid vector containing HLA-A*23:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:61 protein. This plasmid can be used for constructing HLA-A*23:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:62 Protein Expression Plasmid Vector	PHLAP9254540	Plasmid vector containing HLA-A*23:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:62 protein. This plasmid can be used for constructing HLA-A*23:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:63 Protein Expression Plasmid Vector	PHLAP9254541	Plasmid vector containing HLA-A*23:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:63 protein. This plasmid can be used for constructing HLA-A*23:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:64 Protein Expression Plasmid Vector	PHLAP9254542	Plasmid vector containing HLA-A*23:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:64 protein. This plasmid can be used for constructing HLA-A*23:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:65 Protein Expression Plasmid Vector	PHLAP9254543	Plasmid vector containing HLA-A*23:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:65 protein. This plasmid can be used for constructing HLA-A*23:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:66 Protein Expression Plasmid Vector	PHLAP9254544	Plasmid vector containing HLA-A*23:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:66 protein. This plasmid can be used for constructing HLA-A*23:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:67 Protein Expression Plasmid Vector	PHLAP9254545	Plasmid vector containing HLA-A*23:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:67 protein. This plasmid can be used for constructing HLA-A*23:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:68 Protein Expression Plasmid Vector	PHLAP9254546	Plasmid vector containing HLA-A*23:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:68 protein. This plasmid can be used for constructing HLA-A*23:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:69 Protein Expression Plasmid Vector	PHLAP9254547	Plasmid vector containing HLA-A*23:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:69 protein. This plasmid can be used for constructing HLA-A*23:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:70 Protein Expression Plasmid Vector	PHLAP9254548	Plasmid vector containing HLA-A*23:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:70 protein. This plasmid can be used for constructing HLA-A*23:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:71 Protein Expression Plasmid Vector	PHLAP9254549	Plasmid vector containing HLA-A*23:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:71 protein. This plasmid can be used for constructing HLA-A*23:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:72 Protein Expression Plasmid Vector	PHLAP9254550	Plasmid vector containing HLA-A*23:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:72 protein. This plasmid can be used for constructing HLA-A*23:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:73 Protein Expression Plasmid Vector	PHLAP9254551	Plasmid vector containing HLA-A*23:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:73 protein. This plasmid can be used for constructing HLA-A*23:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:74 Protein Expression Plasmid Vector	PHLAP9254552	Plasmid vector containing HLA-A*23:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:74 protein. This plasmid can be used for constructing HLA-A*23:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:75 Protein Expression Plasmid Vector	PHLAP9254553	Plasmid vector containing HLA-A*23:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:75 protein. This plasmid can be used for constructing HLA-A*23:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:76 Protein Expression Plasmid Vector	PHLAP9254554	Plasmid vector containing HLA-A*23:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:76 protein. This plasmid can be used for constructing HLA-A*23:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:77 Protein Expression Plasmid Vector	PHLAP9254555	Plasmid vector containing HLA-A*23:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:77 protein. This plasmid can be used for constructing HLA-A*23:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:78 Protein Expression Plasmid Vector	PHLAP9254556	Plasmid vector containing HLA-A*23:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:78 protein. This plasmid can be used for constructing HLA-A*23:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:79 Protein Expression Plasmid Vector	PHLAP9254557	Plasmid vector containing HLA-A*23:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:79 protein. This plasmid can be used for constructing HLA-A*23:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:80 Protein Expression Plasmid Vector	PHLAP9254558	Plasmid vector containing HLA-A*23:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:80 protein. This plasmid can be used for constructing HLA-A*23:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:81 Protein Expression Plasmid Vector	PHLAP9254559	Plasmid vector containing HLA-A*23:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:81 protein. This plasmid can be used for constructing HLA-A*23:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:82 Protein Expression Plasmid Vector	PHLAP9254560	Plasmid vector containing HLA-A*23:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:82 protein. This plasmid can be used for constructing HLA-A*23:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:83 Protein Expression Plasmid Vector	PHLAP9254561	Plasmid vector containing HLA-A*23:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:83 protein. This plasmid can be used for constructing HLA-A*23:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:84N Protein Expression Plasmid Vector	PHLAP9254562	Plasmid vector containing HLA-A*23:84N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:84N protein. This plasmid can be used for constructing HLA-A*23:84N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:84N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:85 Protein Expression Plasmid Vector	PHLAP9254563	Plasmid vector containing HLA-A*23:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:85 protein. This plasmid can be used for constructing HLA-A*23:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:86 Protein Expression Plasmid Vector	PHLAP9254564	Plasmid vector containing HLA-A*23:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:86 protein. This plasmid can be used for constructing HLA-A*23:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:87 Protein Expression Plasmid Vector	PHLAP9254565	Plasmid vector containing HLA-A*23:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:87 protein. This plasmid can be used for constructing HLA-A*23:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:88 Protein Expression Plasmid Vector	PHLAP9254566	Plasmid vector containing HLA-A*23:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:88 protein. This plasmid can be used for constructing HLA-A*23:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:89 Protein Expression Plasmid Vector	PHLAP9254567	Plasmid vector containing HLA-A*23:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:89 protein. This plasmid can be used for constructing HLA-A*23:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:90 Protein Expression Plasmid Vector	PHLAP9254568	Plasmid vector containing HLA-A*23:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:90 protein. This plasmid can be used for constructing HLA-A*23:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:91N Protein Expression Plasmid Vector	PHLAP9254569	Plasmid vector containing HLA-A*23:91N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:91N protein. This plasmid can be used for constructing HLA-A*23:91N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:91N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:92 Protein Expression Plasmid Vector	PHLAP9254570	Plasmid vector containing HLA-A*23:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:92 protein. This plasmid can be used for constructing HLA-A*23:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:93 Protein Expression Plasmid Vector	PHLAP9254571	Plasmid vector containing HLA-A*23:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:93 protein. This plasmid can be used for constructing HLA-A*23:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*23:94 Protein Expression Plasmid Vector	PHLAP9254572	Plasmid vector containing HLA-A*23:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:94 protein. This plasmid can be used for constructing HLA-A*23:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:95 Protein Expression Plasmid Vector	PHLAP9254573	Plasmid vector containing HLA-A*23:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:95 protein. This plasmid can be used for constructing HLA-A*23:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:96 Protein Expression Plasmid Vector	PHLAP9254574	Plasmid vector containing HLA-A*23:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:96 protein. This plasmid can be used for constructing HLA-A*23:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:97 Protein Expression Plasmid Vector	PHLAP9254575	Plasmid vector containing HLA-A*23:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:97 protein. This plasmid can be used for constructing HLA-A*23:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:98 Protein Expression Plasmid Vector	PHLAP9254576	Plasmid vector containing HLA-A*23:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:98 protein. This plasmid can be used for constructing HLA-A*23:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*23:99 Protein Expression Plasmid Vector	PHLAP9254577	Plasmid vector containing HLA-A*23:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*23:99 protein. This plasmid can be used for constructing HLA-A*23:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*23:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:01 Protein Expression Plasmid Vector	PHLAP9254578	Plasmid vector containing HLA-A*24:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:01 protein. This plasmid can be used for constructing HLA-A*24:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:02L Protein Expression Plasmid Vector	PHLAP9254579	Plasmid vector containing HLA-A*24:02:01:02L protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:02L protein. This plasmid can be used for constructing HLA-A*24:02:01:02L overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:02L protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:03 Protein Expression Plasmid Vector	PHLAP9254580	Plasmid vector containing HLA-A*24:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:03 protein. This plasmid can be used for constructing HLA-A*24:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:04 Protein Expression Plasmid Vector	PHLAP9254581	Plasmid vector containing HLA-A*24:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:04 protein. This plasmid can be used for constructing HLA-A*24:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:05 Protein Expression Plasmid Vector	PHLAP9254582	Plasmid vector containing HLA-A*24:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:05 protein. This plasmid can be used for constructing HLA-A*24:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:06 Protein Expression Plasmid Vector	PHLAP9254583	Plasmid vector containing HLA-A*24:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:06 protein. This plasmid can be used for constructing HLA-A*24:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:07 Protein Expression Plasmid Vector	PHLAP9254584	Plasmid vector containing HLA-A*24:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:07 protein. This plasmid can be used for constructing HLA-A*24:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:08 Protein Expression Plasmid Vector	PHLAP9254585	Plasmid vector containing HLA-A*24:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:08 protein. This plasmid can be used for constructing HLA-A*24:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:09 Protein Expression Plasmid Vector	PHLAP9254586	Plasmid vector containing HLA-A*24:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:09 protein. This plasmid can be used for constructing HLA-A*24:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:10 Protein Expression Plasmid Vector	PHLAP9254587	Plasmid vector containing HLA-A*24:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:10 protein. This plasmid can be used for constructing HLA-A*24:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:100 Protein Expression Plasmid Vector	PHLAP9254588	Plasmid vector containing HLA-A*24:02:01:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:100 protein. This plasmid can be used for constructing HLA-A*24:02:01:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:101 Protein Expression Plasmid Vector	PHLAP9254589	Plasmid vector containing HLA-A*24:02:01:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:101 protein. This plasmid can be used for constructing HLA-A*24:02:01:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:102 Protein Expression Plasmid Vector	PHLAP9254590	Plasmid vector containing HLA-A*24:02:01:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:102 protein. This plasmid can be used for constructing HLA-A*24:02:01:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:103 Protein Expression Plasmid Vector	PHLAP9254591	Plasmid vector containing HLA-A*24:02:01:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:103 protein. This plasmid can be used for constructing HLA-A*24:02:01:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:104 Protein Expression Plasmid Vector	PHLAP9254592	Plasmid vector containing HLA-A*24:02:01:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:104 protein. This plasmid can be used for constructing HLA-A*24:02:01:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:105 Protein Expression Plasmid Vector	PHLAP9254593	Plasmid vector containing HLA-A*24:02:01:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:105 protein. This plasmid can be used for constructing HLA-A*24:02:01:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:106 Protein Expression Plasmid Vector	PHLAP9254594	Plasmid vector containing HLA-A*24:02:01:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:106 protein. This plasmid can be used for constructing HLA-A*24:02:01:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:107 Protein Expression Plasmid Vector	PHLAP9254595	Plasmid vector containing HLA-A*24:02:01:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:107 protein. This plasmid can be used for constructing HLA-A*24:02:01:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:108 Protein Expression Plasmid Vector	PHLAP9254596	Plasmid vector containing HLA-A*24:02:01:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:108 protein. This plasmid can be used for constructing HLA-A*24:02:01:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:109 Protein Expression Plasmid Vector	PHLAP9254597	Plasmid vector containing HLA-A*24:02:01:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:109 protein. This plasmid can be used for constructing HLA-A*24:02:01:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:11 Protein Expression Plasmid Vector	PHLAP9254598	Plasmid vector containing HLA-A*24:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:11 protein. This plasmid can be used for constructing HLA-A*24:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:110 Protein Expression Plasmid Vector	PHLAP9254599	Plasmid vector containing HLA-A*24:02:01:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:110 protein. This plasmid can be used for constructing HLA-A*24:02:01:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:111 Protein Expression Plasmid Vector	PHLAP9254600	Plasmid vector containing HLA-A*24:02:01:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:111 protein. This plasmid can be used for constructing HLA-A*24:02:01:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:112 Protein Expression Plasmid Vector	PHLAP9254601	Plasmid vector containing HLA-A*24:02:01:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:112 protein. This plasmid can be used for constructing HLA-A*24:02:01:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:113 Protein Expression Plasmid Vector	PHLAP9254602	Plasmid vector containing HLA-A*24:02:01:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:113 protein. This plasmid can be used for constructing HLA-A*24:02:01:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:114 Protein Expression Plasmid Vector	PHLAP9254603	Plasmid vector containing HLA-A*24:02:01:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:114 protein. This plasmid can be used for constructing HLA-A*24:02:01:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:115 Protein Expression Plasmid Vector	PHLAP9254604	Plasmid vector containing HLA-A*24:02:01:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:115 protein. This plasmid can be used for constructing HLA-A*24:02:01:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:116 Protein Expression Plasmid Vector	PHLAP9254605	Plasmid vector containing HLA-A*24:02:01:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:116 protein. This plasmid can be used for constructing HLA-A*24:02:01:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:117 Protein Expression Plasmid Vector	PHLAP9254606	Plasmid vector containing HLA-A*24:02:01:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:117 protein. This plasmid can be used for constructing HLA-A*24:02:01:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:118 Protein Expression Plasmid Vector	PHLAP9254607	Plasmid vector containing HLA-A*24:02:01:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:118 protein. This plasmid can be used for constructing HLA-A*24:02:01:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:119 Protein Expression Plasmid Vector	PHLAP9254608	Plasmid vector containing HLA-A*24:02:01:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:119 protein. This plasmid can be used for constructing HLA-A*24:02:01:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:12 Protein Expression Plasmid Vector	PHLAP9254609	Plasmid vector containing HLA-A*24:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:12 protein. This plasmid can be used for constructing HLA-A*24:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:120 Protein Expression Plasmid Vector	PHLAP9254610	Plasmid vector containing HLA-A*24:02:01:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:120 protein. This plasmid can be used for constructing HLA-A*24:02:01:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:121 Protein Expression Plasmid Vector	PHLAP9254611	Plasmid vector containing HLA-A*24:02:01:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:121 protein. This plasmid can be used for constructing HLA-A*24:02:01:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:122 Protein Expression Plasmid Vector	PHLAP9254612	Plasmid vector containing HLA-A*24:02:01:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:122 protein. This plasmid can be used for constructing HLA-A*24:02:01:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:123 Protein Expression Plasmid Vector	PHLAP9254613	Plasmid vector containing HLA-A*24:02:01:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:123 protein. This plasmid can be used for constructing HLA-A*24:02:01:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:124 Protein Expression Plasmid Vector	PHLAP9254614	Plasmid vector containing HLA-A*24:02:01:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:124 protein. This plasmid can be used for constructing HLA-A*24:02:01:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:125 Protein Expression Plasmid Vector	PHLAP9254615	Plasmid vector containing HLA-A*24:02:01:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:125 protein. This plasmid can be used for constructing HLA-A*24:02:01:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:126 Protein Expression Plasmid Vector	PHLAP9254616	Plasmid vector containing HLA-A*24:02:01:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:126 protein. This plasmid can be used for constructing HLA-A*24:02:01:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:127 Protein Expression Plasmid Vector	PHLAP9254617	Plasmid vector containing HLA-A*24:02:01:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:127 protein. This plasmid can be used for constructing HLA-A*24:02:01:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:128 Protein Expression Plasmid Vector	PHLAP9254618	Plasmid vector containing HLA-A*24:02:01:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:128 protein. This plasmid can be used for constructing HLA-A*24:02:01:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:129 Protein Expression Plasmid Vector	PHLAP9254619	Plasmid vector containing HLA-A*24:02:01:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:129 protein. This plasmid can be used for constructing HLA-A*24:02:01:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:13 Protein Expression Plasmid Vector	PHLAP9254620	Plasmid vector containing HLA-A*24:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:13 protein. This plasmid can be used for constructing HLA-A*24:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:130 Protein Expression Plasmid Vector	PHLAP9254621	Plasmid vector containing HLA-A*24:02:01:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:130 protein. This plasmid can be used for constructing HLA-A*24:02:01:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:131 Protein Expression Plasmid Vector	PHLAP9254622	Plasmid vector containing HLA-A*24:02:01:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:131 protein. This plasmid can be used for constructing HLA-A*24:02:01:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:132 Protein Expression Plasmid Vector	PHLAP9254623	Plasmid vector containing HLA-A*24:02:01:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:132 protein. This plasmid can be used for constructing HLA-A*24:02:01:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:133 Protein Expression Plasmid Vector	PHLAP9254624	Plasmid vector containing HLA-A*24:02:01:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:133 protein. This plasmid can be used for constructing HLA-A*24:02:01:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:134 Protein Expression Plasmid Vector	PHLAP9254625	Plasmid vector containing HLA-A*24:02:01:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:134 protein. This plasmid can be used for constructing HLA-A*24:02:01:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:135 Protein Expression Plasmid Vector	PHLAP9254626	Plasmid vector containing HLA-A*24:02:01:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:135 protein. This plasmid can be used for constructing HLA-A*24:02:01:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:136 Protein Expression Plasmid Vector	PHLAP9254627	Plasmid vector containing HLA-A*24:02:01:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:136 protein. This plasmid can be used for constructing HLA-A*24:02:01:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:137 Protein Expression Plasmid Vector	PHLAP9254628	Plasmid vector containing HLA-A*24:02:01:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:137 protein. This plasmid can be used for constructing HLA-A*24:02:01:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:138 Protein Expression Plasmid Vector	PHLAP9254629	Plasmid vector containing HLA-A*24:02:01:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:138 protein. This plasmid can be used for constructing HLA-A*24:02:01:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:139 Protein Expression Plasmid Vector	PHLAP9254630	Plasmid vector containing HLA-A*24:02:01:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:139 protein. This plasmid can be used for constructing HLA-A*24:02:01:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:14 Protein Expression Plasmid Vector	PHLAP9254631	Plasmid vector containing HLA-A*24:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:14 protein. This plasmid can be used for constructing HLA-A*24:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:140 Protein Expression Plasmid Vector	PHLAP9254632	Plasmid vector containing HLA-A*24:02:01:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:140 protein. This plasmid can be used for constructing HLA-A*24:02:01:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:141 Protein Expression Plasmid Vector	PHLAP9254633	Plasmid vector containing HLA-A*24:02:01:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:141 protein. This plasmid can be used for constructing HLA-A*24:02:01:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:142 Protein Expression Plasmid Vector	PHLAP9254634	Plasmid vector containing HLA-A*24:02:01:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:142 protein. This plasmid can be used for constructing HLA-A*24:02:01:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:143 Protein Expression Plasmid Vector	PHLAP9254635	Plasmid vector containing HLA-A*24:02:01:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:143 protein. This plasmid can be used for constructing HLA-A*24:02:01:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:144Q Protein Expression Plasmid Vector	PHLAP9254636	Plasmid vector containing HLA-A*24:02:01:144Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:144Q protein. This plasmid can be used for constructing HLA-A*24:02:01:144Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:144Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:145 Protein Expression Plasmid Vector	PHLAP9254637	Plasmid vector containing HLA-A*24:02:01:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:145 protein. This plasmid can be used for constructing HLA-A*24:02:01:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:15 Protein Expression Plasmid Vector	PHLAP9254638	Plasmid vector containing HLA-A*24:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:15 protein. This plasmid can be used for constructing HLA-A*24:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:16 Protein Expression Plasmid Vector	PHLAP9254639	Plasmid vector containing HLA-A*24:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:16 protein. This plasmid can be used for constructing HLA-A*24:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:17Q Protein Expression Plasmid Vector	PHLAP9254640	Plasmid vector containing HLA-A*24:02:01:17Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:17Q protein. This plasmid can be used for constructing HLA-A*24:02:01:17Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:17Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:18 Protein Expression Plasmid Vector	PHLAP9254641	Plasmid vector containing HLA-A*24:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:18 protein. This plasmid can be used for constructing HLA-A*24:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:19 Protein Expression Plasmid Vector	PHLAP9254642	Plasmid vector containing HLA-A*24:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:19 protein. This plasmid can be used for constructing HLA-A*24:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:20 Protein Expression Plasmid Vector	PHLAP9254643	Plasmid vector containing HLA-A*24:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:20 protein. This plasmid can be used for constructing HLA-A*24:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:21 Protein Expression Plasmid Vector	PHLAP9254644	Plasmid vector containing HLA-A*24:02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:21 protein. This plasmid can be used for constructing HLA-A*24:02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:22 Protein Expression Plasmid Vector	PHLAP9254645	Plasmid vector containing HLA-A*24:02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:22 protein. This plasmid can be used for constructing HLA-A*24:02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:23 Protein Expression Plasmid Vector	PHLAP9254646	Plasmid vector containing HLA-A*24:02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:23 protein. This plasmid can be used for constructing HLA-A*24:02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:24 Protein Expression Plasmid Vector	PHLAP9254647	Plasmid vector containing HLA-A*24:02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:24 protein. This plasmid can be used for constructing HLA-A*24:02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:25 Protein Expression Plasmid Vector	PHLAP9254648	Plasmid vector containing HLA-A*24:02:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:25 protein. This plasmid can be used for constructing HLA-A*24:02:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:26 Protein Expression Plasmid Vector	PHLAP9254649	Plasmid vector containing HLA-A*24:02:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:26 protein. This plasmid can be used for constructing HLA-A*24:02:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:27 Protein Expression Plasmid Vector	PHLAP9254650	Plasmid vector containing HLA-A*24:02:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:27 protein. This plasmid can be used for constructing HLA-A*24:02:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:28 Protein Expression Plasmid Vector	PHLAP9254651	Plasmid vector containing HLA-A*24:02:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:28 protein. This plasmid can be used for constructing HLA-A*24:02:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:29 Protein Expression Plasmid Vector	PHLAP9254652	Plasmid vector containing HLA-A*24:02:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:29 protein. This plasmid can be used for constructing HLA-A*24:02:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:30 Protein Expression Plasmid Vector	PHLAP9254653	Plasmid vector containing HLA-A*24:02:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:30 protein. This plasmid can be used for constructing HLA-A*24:02:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:31 Protein Expression Plasmid Vector	PHLAP9254654	Plasmid vector containing HLA-A*24:02:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:31 protein. This plasmid can be used for constructing HLA-A*24:02:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:32 Protein Expression Plasmid Vector	PHLAP9254655	Plasmid vector containing HLA-A*24:02:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:32 protein. This plasmid can be used for constructing HLA-A*24:02:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:33 Protein Expression Plasmid Vector	PHLAP9254656	Plasmid vector containing HLA-A*24:02:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:33 protein. This plasmid can be used for constructing HLA-A*24:02:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:34 Protein Expression Plasmid Vector	PHLAP9254657	Plasmid vector containing HLA-A*24:02:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:34 protein. This plasmid can be used for constructing HLA-A*24:02:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:35 Protein Expression Plasmid Vector	PHLAP9254658	Plasmid vector containing HLA-A*24:02:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:35 protein. This plasmid can be used for constructing HLA-A*24:02:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:36 Protein Expression Plasmid Vector	PHLAP9254659	Plasmid vector containing HLA-A*24:02:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:36 protein. This plasmid can be used for constructing HLA-A*24:02:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:37 Protein Expression Plasmid Vector	PHLAP9254660	Plasmid vector containing HLA-A*24:02:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:37 protein. This plasmid can be used for constructing HLA-A*24:02:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:38 Protein Expression Plasmid Vector	PHLAP9254661	Plasmid vector containing HLA-A*24:02:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:38 protein. This plasmid can be used for constructing HLA-A*24:02:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:39 Protein Expression Plasmid Vector	PHLAP9254662	Plasmid vector containing HLA-A*24:02:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:39 protein. This plasmid can be used for constructing HLA-A*24:02:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:40 Protein Expression Plasmid Vector	PHLAP9254663	Plasmid vector containing HLA-A*24:02:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:40 protein. This plasmid can be used for constructing HLA-A*24:02:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:41 Protein Expression Plasmid Vector	PHLAP9254664	Plasmid vector containing HLA-A*24:02:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:41 protein. This plasmid can be used for constructing HLA-A*24:02:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:42 Protein Expression Plasmid Vector	PHLAP9254665	Plasmid vector containing HLA-A*24:02:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:42 protein. This plasmid can be used for constructing HLA-A*24:02:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:43 Protein Expression Plasmid Vector	PHLAP9254666	Plasmid vector containing HLA-A*24:02:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:43 protein. This plasmid can be used for constructing HLA-A*24:02:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:44 Protein Expression Plasmid Vector	PHLAP9254667	Plasmid vector containing HLA-A*24:02:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:44 protein. This plasmid can be used for constructing HLA-A*24:02:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:45 Protein Expression Plasmid Vector	PHLAP9254668	Plasmid vector containing HLA-A*24:02:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:45 protein. This plasmid can be used for constructing HLA-A*24:02:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:46 Protein Expression Plasmid Vector	PHLAP9254669	Plasmid vector containing HLA-A*24:02:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:46 protein. This plasmid can be used for constructing HLA-A*24:02:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:47 Protein Expression Plasmid Vector	PHLAP9254670	Plasmid vector containing HLA-A*24:02:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:47 protein. This plasmid can be used for constructing HLA-A*24:02:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:48 Protein Expression Plasmid Vector	PHLAP9254671	Plasmid vector containing HLA-A*24:02:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:48 protein. This plasmid can be used for constructing HLA-A*24:02:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:49 Protein Expression Plasmid Vector	PHLAP9254672	Plasmid vector containing HLA-A*24:02:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:49 protein. This plasmid can be used for constructing HLA-A*24:02:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:50 Protein Expression Plasmid Vector	PHLAP9254673	Plasmid vector containing HLA-A*24:02:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:50 protein. This plasmid can be used for constructing HLA-A*24:02:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:51 Protein Expression Plasmid Vector	PHLAP9254674	Plasmid vector containing HLA-A*24:02:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:51 protein. This plasmid can be used for constructing HLA-A*24:02:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:52 Protein Expression Plasmid Vector	PHLAP9254675	Plasmid vector containing HLA-A*24:02:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:52 protein. This plasmid can be used for constructing HLA-A*24:02:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:53 Protein Expression Plasmid Vector	PHLAP9254676	Plasmid vector containing HLA-A*24:02:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:53 protein. This plasmid can be used for constructing HLA-A*24:02:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:54 Protein Expression Plasmid Vector	PHLAP9254677	Plasmid vector containing HLA-A*24:02:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:54 protein. This plasmid can be used for constructing HLA-A*24:02:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:55 Protein Expression Plasmid Vector	PHLAP9254678	Plasmid vector containing HLA-A*24:02:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:55 protein. This plasmid can be used for constructing HLA-A*24:02:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:56 Protein Expression Plasmid Vector	PHLAP9254679	Plasmid vector containing HLA-A*24:02:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:56 protein. This plasmid can be used for constructing HLA-A*24:02:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:57 Protein Expression Plasmid Vector	PHLAP9254680	Plasmid vector containing HLA-A*24:02:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:57 protein. This plasmid can be used for constructing HLA-A*24:02:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:58 Protein Expression Plasmid Vector	PHLAP9254681	Plasmid vector containing HLA-A*24:02:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:58 protein. This plasmid can be used for constructing HLA-A*24:02:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:59 Protein Expression Plasmid Vector	PHLAP9254682	Plasmid vector containing HLA-A*24:02:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:59 protein. This plasmid can be used for constructing HLA-A*24:02:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:60 Protein Expression Plasmid Vector	PHLAP9254683	Plasmid vector containing HLA-A*24:02:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:60 protein. This plasmid can be used for constructing HLA-A*24:02:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:61 Protein Expression Plasmid Vector	PHLAP9254684	Plasmid vector containing HLA-A*24:02:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:61 protein. This plasmid can be used for constructing HLA-A*24:02:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:62 Protein Expression Plasmid Vector	PHLAP9254685	Plasmid vector containing HLA-A*24:02:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:62 protein. This plasmid can be used for constructing HLA-A*24:02:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:63 Protein Expression Plasmid Vector	PHLAP9254686	Plasmid vector containing HLA-A*24:02:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:63 protein. This plasmid can be used for constructing HLA-A*24:02:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:64 Protein Expression Plasmid Vector	PHLAP9254687	Plasmid vector containing HLA-A*24:02:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:64 protein. This plasmid can be used for constructing HLA-A*24:02:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:65 Protein Expression Plasmid Vector	PHLAP9254688	Plasmid vector containing HLA-A*24:02:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:65 protein. This plasmid can be used for constructing HLA-A*24:02:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:66 Protein Expression Plasmid Vector	PHLAP9254689	Plasmid vector containing HLA-A*24:02:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:66 protein. This plasmid can be used for constructing HLA-A*24:02:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:67 Protein Expression Plasmid Vector	PHLAP9254690	Plasmid vector containing HLA-A*24:02:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:67 protein. This plasmid can be used for constructing HLA-A*24:02:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:68 Protein Expression Plasmid Vector	PHLAP9254691	Plasmid vector containing HLA-A*24:02:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:68 protein. This plasmid can be used for constructing HLA-A*24:02:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:69 Protein Expression Plasmid Vector	PHLAP9254692	Plasmid vector containing HLA-A*24:02:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:69 protein. This plasmid can be used for constructing HLA-A*24:02:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:70 Protein Expression Plasmid Vector	PHLAP9254693	Plasmid vector containing HLA-A*24:02:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:70 protein. This plasmid can be used for constructing HLA-A*24:02:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:71 Protein Expression Plasmid Vector	PHLAP9254694	Plasmid vector containing HLA-A*24:02:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:71 protein. This plasmid can be used for constructing HLA-A*24:02:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:72 Protein Expression Plasmid Vector	PHLAP9254695	Plasmid vector containing HLA-A*24:02:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:72 protein. This plasmid can be used for constructing HLA-A*24:02:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:73 Protein Expression Plasmid Vector	PHLAP9254696	Plasmid vector containing HLA-A*24:02:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:73 protein. This plasmid can be used for constructing HLA-A*24:02:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:74 Protein Expression Plasmid Vector	PHLAP9254697	Plasmid vector containing HLA-A*24:02:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:74 protein. This plasmid can be used for constructing HLA-A*24:02:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:75 Protein Expression Plasmid Vector	PHLAP9254698	Plasmid vector containing HLA-A*24:02:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:75 protein. This plasmid can be used for constructing HLA-A*24:02:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:76 Protein Expression Plasmid Vector	PHLAP9254699	Plasmid vector containing HLA-A*24:02:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:76 protein. This plasmid can be used for constructing HLA-A*24:02:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:77 Protein Expression Plasmid Vector	PHLAP9254700	Plasmid vector containing HLA-A*24:02:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:77 protein. This plasmid can be used for constructing HLA-A*24:02:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:78 Protein Expression Plasmid Vector	PHLAP9254701	Plasmid vector containing HLA-A*24:02:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:78 protein. This plasmid can be used for constructing HLA-A*24:02:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:79 Protein Expression Plasmid Vector	PHLAP9254702	Plasmid vector containing HLA-A*24:02:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:79 protein. This plasmid can be used for constructing HLA-A*24:02:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:80 Protein Expression Plasmid Vector	PHLAP9254703	Plasmid vector containing HLA-A*24:02:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:80 protein. This plasmid can be used for constructing HLA-A*24:02:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:81 Protein Expression Plasmid Vector	PHLAP9254704	Plasmid vector containing HLA-A*24:02:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:81 protein. This plasmid can be used for constructing HLA-A*24:02:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:82 Protein Expression Plasmid Vector	PHLAP9254705	Plasmid vector containing HLA-A*24:02:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:82 protein. This plasmid can be used for constructing HLA-A*24:02:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:83 Protein Expression Plasmid Vector	PHLAP9254706	Plasmid vector containing HLA-A*24:02:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:83 protein. This plasmid can be used for constructing HLA-A*24:02:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:84 Protein Expression Plasmid Vector	PHLAP9254707	Plasmid vector containing HLA-A*24:02:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:84 protein. This plasmid can be used for constructing HLA-A*24:02:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:85 Protein Expression Plasmid Vector	PHLAP9254708	Plasmid vector containing HLA-A*24:02:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:85 protein. This plasmid can be used for constructing HLA-A*24:02:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:86 Protein Expression Plasmid Vector	PHLAP9254709	Plasmid vector containing HLA-A*24:02:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:86 protein. This plasmid can be used for constructing HLA-A*24:02:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:87 Protein Expression Plasmid Vector	PHLAP9254710	Plasmid vector containing HLA-A*24:02:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:87 protein. This plasmid can be used for constructing HLA-A*24:02:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:88 Protein Expression Plasmid Vector	PHLAP9254711	Plasmid vector containing HLA-A*24:02:01:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:88 protein. This plasmid can be used for constructing HLA-A*24:02:01:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:89 Protein Expression Plasmid Vector	PHLAP9254712	Plasmid vector containing HLA-A*24:02:01:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:89 protein. This plasmid can be used for constructing HLA-A*24:02:01:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:90 Protein Expression Plasmid Vector	PHLAP9254713	Plasmid vector containing HLA-A*24:02:01:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:90 protein. This plasmid can be used for constructing HLA-A*24:02:01:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:91 Protein Expression Plasmid Vector	PHLAP9254714	Plasmid vector containing HLA-A*24:02:01:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:91 protein. This plasmid can be used for constructing HLA-A*24:02:01:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:92 Protein Expression Plasmid Vector	PHLAP9254715	Plasmid vector containing HLA-A*24:02:01:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:92 protein. This plasmid can be used for constructing HLA-A*24:02:01:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:93 Protein Expression Plasmid Vector	PHLAP9254716	Plasmid vector containing HLA-A*24:02:01:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:93 protein. This plasmid can be used for constructing HLA-A*24:02:01:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:94 Protein Expression Plasmid Vector	PHLAP9254717	Plasmid vector containing HLA-A*24:02:01:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:94 protein. This plasmid can be used for constructing HLA-A*24:02:01:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:95 Protein Expression Plasmid Vector	PHLAP9254718	Plasmid vector containing HLA-A*24:02:01:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:95 protein. This plasmid can be used for constructing HLA-A*24:02:01:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:96 Protein Expression Plasmid Vector	PHLAP9254719	Plasmid vector containing HLA-A*24:02:01:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:96 protein. This plasmid can be used for constructing HLA-A*24:02:01:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:01:97 Protein Expression Plasmid Vector	PHLAP9254720	Plasmid vector containing HLA-A*24:02:01:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:97 protein. This plasmid can be used for constructing HLA-A*24:02:01:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:98 Protein Expression Plasmid Vector	PHLAP9254721	Plasmid vector containing HLA-A*24:02:01:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:98 protein. This plasmid can be used for constructing HLA-A*24:02:01:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:01:99 Protein Expression Plasmid Vector	PHLAP9254722	Plasmid vector containing HLA-A*24:02:01:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:01:99 protein. This plasmid can be used for constructing HLA-A*24:02:01:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:01:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:02 Protein Expression Plasmid Vector	PHLAP9254723	Plasmid vector containing HLA-A*24:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:02 protein. This plasmid can be used for constructing HLA-A*24:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:03Q Protein Expression Plasmid Vector	PHLAP9254724	Plasmid vector containing HLA-A*24:02:03Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:03Q protein. This plasmid can be used for constructing HLA-A*24:02:03Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:03Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:04 Protein Expression Plasmid Vector	PHLAP9254725	Plasmid vector containing HLA-A*24:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:04 protein. This plasmid can be used for constructing HLA-A*24:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:05 Protein Expression Plasmid Vector	PHLAP9254726	Plasmid vector containing HLA-A*24:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:05 protein. This plasmid can be used for constructing HLA-A*24:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:06 Protein Expression Plasmid Vector	PHLAP9254727	Plasmid vector containing HLA-A*24:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:06 protein. This plasmid can be used for constructing HLA-A*24:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:07 Protein Expression Plasmid Vector	PHLAP9254728	Plasmid vector containing HLA-A*24:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:07 protein. This plasmid can be used for constructing HLA-A*24:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:08 Protein Expression Plasmid Vector	PHLAP9254729	Plasmid vector containing HLA-A*24:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:08 protein. This plasmid can be used for constructing HLA-A*24:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:09 Protein Expression Plasmid Vector	PHLAP9254730	Plasmid vector containing HLA-A*24:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:09 protein. This plasmid can be used for constructing HLA-A*24:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:10 Protein Expression Plasmid Vector	PHLAP9254731	Plasmid vector containing HLA-A*24:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:10 protein. This plasmid can be used for constructing HLA-A*24:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:100 Protein Expression Plasmid Vector	PHLAP9254732	Plasmid vector containing HLA-A*24:02:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:100 protein. This plasmid can be used for constructing HLA-A*24:02:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:101 Protein Expression Plasmid Vector	PHLAP9254733	Plasmid vector containing HLA-A*24:02:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:101 protein. This plasmid can be used for constructing HLA-A*24:02:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:102:01 Protein Expression Plasmid Vector	PHLAP9254734	Plasmid vector containing HLA-A*24:02:102:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:102:01 protein. This plasmid can be used for constructing HLA-A*24:02:102:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:102:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:102:02 Protein Expression Plasmid Vector	PHLAP9254735	Plasmid vector containing HLA-A*24:02:102:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:102:02 protein. This plasmid can be used for constructing HLA-A*24:02:102:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:102:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:103 Protein Expression Plasmid Vector	PHLAP9254736	Plasmid vector containing HLA-A*24:02:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:103 protein. This plasmid can be used for constructing HLA-A*24:02:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:104 Protein Expression Plasmid Vector	PHLAP9254737	Plasmid vector containing HLA-A*24:02:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:104 protein. This plasmid can be used for constructing HLA-A*24:02:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:105 Protein Expression Plasmid Vector	PHLAP9254738	Plasmid vector containing HLA-A*24:02:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:105 protein. This plasmid can be used for constructing HLA-A*24:02:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:106 Protein Expression Plasmid Vector	PHLAP9254739	Plasmid vector containing HLA-A*24:02:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:106 protein. This plasmid can be used for constructing HLA-A*24:02:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:107 Protein Expression Plasmid Vector	PHLAP9254740	Plasmid vector containing HLA-A*24:02:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:107 protein. This plasmid can be used for constructing HLA-A*24:02:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:108 Protein Expression Plasmid Vector	PHLAP9254741	Plasmid vector containing HLA-A*24:02:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:108 protein. This plasmid can be used for constructing HLA-A*24:02:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:109 Protein Expression Plasmid Vector	PHLAP9254742	Plasmid vector containing HLA-A*24:02:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:109 protein. This plasmid can be used for constructing HLA-A*24:02:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:11 Protein Expression Plasmid Vector	PHLAP9254743	Plasmid vector containing HLA-A*24:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:11 protein. This plasmid can be used for constructing HLA-A*24:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:110 Protein Expression Plasmid Vector	PHLAP9254744	Plasmid vector containing HLA-A*24:02:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:110 protein. This plasmid can be used for constructing HLA-A*24:02:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:111 Protein Expression Plasmid Vector	PHLAP9254745	Plasmid vector containing HLA-A*24:02:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:111 protein. This plasmid can be used for constructing HLA-A*24:02:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:112 Protein Expression Plasmid Vector	PHLAP9254746	Plasmid vector containing HLA-A*24:02:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:112 protein. This plasmid can be used for constructing HLA-A*24:02:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:113 Protein Expression Plasmid Vector	PHLAP9254747	Plasmid vector containing HLA-A*24:02:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:113 protein. This plasmid can be used for constructing HLA-A*24:02:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:114 Protein Expression Plasmid Vector	PHLAP9254748	Plasmid vector containing HLA-A*24:02:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:114 protein. This plasmid can be used for constructing HLA-A*24:02:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:115:01 Protein Expression Plasmid Vector	PHLAP9254749	Plasmid vector containing HLA-A*24:02:115:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:115:01 protein. This plasmid can be used for constructing HLA-A*24:02:115:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:115:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:115:02 Protein Expression Plasmid Vector	PHLAP9254750	Plasmid vector containing HLA-A*24:02:115:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:115:02 protein. This plasmid can be used for constructing HLA-A*24:02:115:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:115:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:116 Protein Expression Plasmid Vector	PHLAP9254751	Plasmid vector containing HLA-A*24:02:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:116 protein. This plasmid can be used for constructing HLA-A*24:02:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:117 Protein Expression Plasmid Vector	PHLAP9254752	Plasmid vector containing HLA-A*24:02:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:117 protein. This plasmid can be used for constructing HLA-A*24:02:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:118 Protein Expression Plasmid Vector	PHLAP9254753	Plasmid vector containing HLA-A*24:02:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:118 protein. This plasmid can be used for constructing HLA-A*24:02:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:119 Protein Expression Plasmid Vector	PHLAP9254754	Plasmid vector containing HLA-A*24:02:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:119 protein. This plasmid can be used for constructing HLA-A*24:02:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:12 Protein Expression Plasmid Vector	PHLAP9254755	Plasmid vector containing HLA-A*24:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:12 protein. This plasmid can be used for constructing HLA-A*24:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:120 Protein Expression Plasmid Vector	PHLAP9254756	Plasmid vector containing HLA-A*24:02:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:120 protein. This plasmid can be used for constructing HLA-A*24:02:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:121 Protein Expression Plasmid Vector	PHLAP9254757	Plasmid vector containing HLA-A*24:02:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:121 protein. This plasmid can be used for constructing HLA-A*24:02:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:122 Protein Expression Plasmid Vector	PHLAP9254758	Plasmid vector containing HLA-A*24:02:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:122 protein. This plasmid can be used for constructing HLA-A*24:02:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:123 Protein Expression Plasmid Vector	PHLAP9254759	Plasmid vector containing HLA-A*24:02:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:123 protein. This plasmid can be used for constructing HLA-A*24:02:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:124 Protein Expression Plasmid Vector	PHLAP9254760	Plasmid vector containing HLA-A*24:02:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:124 protein. This plasmid can be used for constructing HLA-A*24:02:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:125 Protein Expression Plasmid Vector	PHLAP9254761	Plasmid vector containing HLA-A*24:02:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:125 protein. This plasmid can be used for constructing HLA-A*24:02:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:126 Protein Expression Plasmid Vector	PHLAP9254762	Plasmid vector containing HLA-A*24:02:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:126 protein. This plasmid can be used for constructing HLA-A*24:02:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:127 Protein Expression Plasmid Vector	PHLAP9254763	Plasmid vector containing HLA-A*24:02:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:127 protein. This plasmid can be used for constructing HLA-A*24:02:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:128 Protein Expression Plasmid Vector	PHLAP9254764	Plasmid vector containing HLA-A*24:02:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:128 protein. This plasmid can be used for constructing HLA-A*24:02:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:129 Protein Expression Plasmid Vector	PHLAP9254765	Plasmid vector containing HLA-A*24:02:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:129 protein. This plasmid can be used for constructing HLA-A*24:02:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:13 Protein Expression Plasmid Vector	PHLAP9254766	Plasmid vector containing HLA-A*24:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:13 protein. This plasmid can be used for constructing HLA-A*24:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:130 Protein Expression Plasmid Vector	PHLAP9254767	Plasmid vector containing HLA-A*24:02:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:130 protein. This plasmid can be used for constructing HLA-A*24:02:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:131 Protein Expression Plasmid Vector	PHLAP9254768	Plasmid vector containing HLA-A*24:02:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:131 protein. This plasmid can be used for constructing HLA-A*24:02:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:132 Protein Expression Plasmid Vector	PHLAP9254769	Plasmid vector containing HLA-A*24:02:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:132 protein. This plasmid can be used for constructing HLA-A*24:02:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:133 Protein Expression Plasmid Vector	PHLAP9254770	Plasmid vector containing HLA-A*24:02:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:133 protein. This plasmid can be used for constructing HLA-A*24:02:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:134 Protein Expression Plasmid Vector	PHLAP9254771	Plasmid vector containing HLA-A*24:02:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:134 protein. This plasmid can be used for constructing HLA-A*24:02:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:135 Protein Expression Plasmid Vector	PHLAP9254772	Plasmid vector containing HLA-A*24:02:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:135 protein. This plasmid can be used for constructing HLA-A*24:02:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:136 Protein Expression Plasmid Vector	PHLAP9254773	Plasmid vector containing HLA-A*24:02:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:136 protein. This plasmid can be used for constructing HLA-A*24:02:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:137 Protein Expression Plasmid Vector	PHLAP9254774	Plasmid vector containing HLA-A*24:02:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:137 protein. This plasmid can be used for constructing HLA-A*24:02:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:138 Protein Expression Plasmid Vector	PHLAP9254775	Plasmid vector containing HLA-A*24:02:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:138 protein. This plasmid can be used for constructing HLA-A*24:02:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:139 Protein Expression Plasmid Vector	PHLAP9254776	Plasmid vector containing HLA-A*24:02:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:139 protein. This plasmid can be used for constructing HLA-A*24:02:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:14 Protein Expression Plasmid Vector	PHLAP9254777	Plasmid vector containing HLA-A*24:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:14 protein. This plasmid can be used for constructing HLA-A*24:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:140 Protein Expression Plasmid Vector	PHLAP9254778	Plasmid vector containing HLA-A*24:02:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:140 protein. This plasmid can be used for constructing HLA-A*24:02:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:141 Protein Expression Plasmid Vector	PHLAP9254779	Plasmid vector containing HLA-A*24:02:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:141 protein. This plasmid can be used for constructing HLA-A*24:02:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:142 Protein Expression Plasmid Vector	PHLAP9254780	Plasmid vector containing HLA-A*24:02:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:142 protein. This plasmid can be used for constructing HLA-A*24:02:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:143 Protein Expression Plasmid Vector	PHLAP9254781	Plasmid vector containing HLA-A*24:02:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:143 protein. This plasmid can be used for constructing HLA-A*24:02:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:144 Protein Expression Plasmid Vector	PHLAP9254782	Plasmid vector containing HLA-A*24:02:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:144 protein. This plasmid can be used for constructing HLA-A*24:02:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:145 Protein Expression Plasmid Vector	PHLAP9254783	Plasmid vector containing HLA-A*24:02:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:145 protein. This plasmid can be used for constructing HLA-A*24:02:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:146 Protein Expression Plasmid Vector	PHLAP9254784	Plasmid vector containing HLA-A*24:02:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:146 protein. This plasmid can be used for constructing HLA-A*24:02:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:147 Protein Expression Plasmid Vector	PHLAP9254785	Plasmid vector containing HLA-A*24:02:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:147 protein. This plasmid can be used for constructing HLA-A*24:02:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:148 Protein Expression Plasmid Vector	PHLAP9254786	Plasmid vector containing HLA-A*24:02:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:148 protein. This plasmid can be used for constructing HLA-A*24:02:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:149 Protein Expression Plasmid Vector	PHLAP9254787	Plasmid vector containing HLA-A*24:02:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:149 protein. This plasmid can be used for constructing HLA-A*24:02:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:15 Protein Expression Plasmid Vector	PHLAP9254788	Plasmid vector containing HLA-A*24:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:15 protein. This plasmid can be used for constructing HLA-A*24:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:150 Protein Expression Plasmid Vector	PHLAP9254789	Plasmid vector containing HLA-A*24:02:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:150 protein. This plasmid can be used for constructing HLA-A*24:02:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:151 Protein Expression Plasmid Vector	PHLAP9254790	Plasmid vector containing HLA-A*24:02:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:151 protein. This plasmid can be used for constructing HLA-A*24:02:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:152 Protein Expression Plasmid Vector	PHLAP9254791	Plasmid vector containing HLA-A*24:02:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:152 protein. This plasmid can be used for constructing HLA-A*24:02:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:153 Protein Expression Plasmid Vector	PHLAP9254792	Plasmid vector containing HLA-A*24:02:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:153 protein. This plasmid can be used for constructing HLA-A*24:02:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:154 Protein Expression Plasmid Vector	PHLAP9254793	Plasmid vector containing HLA-A*24:02:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:154 protein. This plasmid can be used for constructing HLA-A*24:02:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:155 Protein Expression Plasmid Vector	PHLAP9254794	Plasmid vector containing HLA-A*24:02:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:155 protein. This plasmid can be used for constructing HLA-A*24:02:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:156 Protein Expression Plasmid Vector	PHLAP9254795	Plasmid vector containing HLA-A*24:02:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:156 protein. This plasmid can be used for constructing HLA-A*24:02:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:157 Protein Expression Plasmid Vector	PHLAP9254796	Plasmid vector containing HLA-A*24:02:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:157 protein. This plasmid can be used for constructing HLA-A*24:02:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:158Q Protein Expression Plasmid Vector	PHLAP9254797	Plasmid vector containing HLA-A*24:02:158Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:158Q protein. This plasmid can be used for constructing HLA-A*24:02:158Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:158Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:159 Protein Expression Plasmid Vector	PHLAP9254798	Plasmid vector containing HLA-A*24:02:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:159 protein. This plasmid can be used for constructing HLA-A*24:02:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:16 Protein Expression Plasmid Vector	PHLAP9254799	Plasmid vector containing HLA-A*24:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:16 protein. This plasmid can be used for constructing HLA-A*24:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:160 Protein Expression Plasmid Vector	PHLAP9254800	Plasmid vector containing HLA-A*24:02:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:160 protein. This plasmid can be used for constructing HLA-A*24:02:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:161 Protein Expression Plasmid Vector	PHLAP9254801	Plasmid vector containing HLA-A*24:02:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:161 protein. This plasmid can be used for constructing HLA-A*24:02:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:162 Protein Expression Plasmid Vector	PHLAP9254802	Plasmid vector containing HLA-A*24:02:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:162 protein. This plasmid can be used for constructing HLA-A*24:02:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:163 Protein Expression Plasmid Vector	PHLAP9254803	Plasmid vector containing HLA-A*24:02:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:163 protein. This plasmid can be used for constructing HLA-A*24:02:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:164 Protein Expression Plasmid Vector	PHLAP9254804	Plasmid vector containing HLA-A*24:02:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:164 protein. This plasmid can be used for constructing HLA-A*24:02:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:165 Protein Expression Plasmid Vector	PHLAP9254805	Plasmid vector containing HLA-A*24:02:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:165 protein. This plasmid can be used for constructing HLA-A*24:02:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:166 Protein Expression Plasmid Vector	PHLAP9254806	Plasmid vector containing HLA-A*24:02:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:166 protein. This plasmid can be used for constructing HLA-A*24:02:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:167 Protein Expression Plasmid Vector	PHLAP9254807	Plasmid vector containing HLA-A*24:02:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:167 protein. This plasmid can be used for constructing HLA-A*24:02:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:168 Protein Expression Plasmid Vector	PHLAP9254808	Plasmid vector containing HLA-A*24:02:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:168 protein. This plasmid can be used for constructing HLA-A*24:02:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:169 Protein Expression Plasmid Vector	PHLAP9254809	Plasmid vector containing HLA-A*24:02:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:169 protein. This plasmid can be used for constructing HLA-A*24:02:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:17 Protein Expression Plasmid Vector	PHLAP9254810	Plasmid vector containing HLA-A*24:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:17 protein. This plasmid can be used for constructing HLA-A*24:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:170 Protein Expression Plasmid Vector	PHLAP9254811	Plasmid vector containing HLA-A*24:02:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:170 protein. This plasmid can be used for constructing HLA-A*24:02:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:171 Protein Expression Plasmid Vector	PHLAP9254812	Plasmid vector containing HLA-A*24:02:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:171 protein. This plasmid can be used for constructing HLA-A*24:02:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:172 Protein Expression Plasmid Vector	PHLAP9254813	Plasmid vector containing HLA-A*24:02:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:172 protein. This plasmid can be used for constructing HLA-A*24:02:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:173 Protein Expression Plasmid Vector	PHLAP9254814	Plasmid vector containing HLA-A*24:02:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:173 protein. This plasmid can be used for constructing HLA-A*24:02:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:174 Protein Expression Plasmid Vector	PHLAP9254815	Plasmid vector containing HLA-A*24:02:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:174 protein. This plasmid can be used for constructing HLA-A*24:02:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:175 Protein Expression Plasmid Vector	PHLAP9254816	Plasmid vector containing HLA-A*24:02:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:175 protein. This plasmid can be used for constructing HLA-A*24:02:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:176 Protein Expression Plasmid Vector	PHLAP9254817	Plasmid vector containing HLA-A*24:02:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:176 protein. This plasmid can be used for constructing HLA-A*24:02:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:177 Protein Expression Plasmid Vector	PHLAP9254818	Plasmid vector containing HLA-A*24:02:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:177 protein. This plasmid can be used for constructing HLA-A*24:02:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:178 Protein Expression Plasmid Vector	PHLAP9254819	Plasmid vector containing HLA-A*24:02:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:178 protein. This plasmid can be used for constructing HLA-A*24:02:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:179 Protein Expression Plasmid Vector	PHLAP9254820	Plasmid vector containing HLA-A*24:02:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:179 protein. This plasmid can be used for constructing HLA-A*24:02:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:18 Protein Expression Plasmid Vector	PHLAP9254821	Plasmid vector containing HLA-A*24:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:18 protein. This plasmid can be used for constructing HLA-A*24:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:180 Protein Expression Plasmid Vector	PHLAP9254822	Plasmid vector containing HLA-A*24:02:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:180 protein. This plasmid can be used for constructing HLA-A*24:02:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:181 Protein Expression Plasmid Vector	PHLAP9254823	Plasmid vector containing HLA-A*24:02:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:181 protein. This plasmid can be used for constructing HLA-A*24:02:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:182 Protein Expression Plasmid Vector	PHLAP9254824	Plasmid vector containing HLA-A*24:02:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:182 protein. This plasmid can be used for constructing HLA-A*24:02:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:19 Protein Expression Plasmid Vector	PHLAP9254825	Plasmid vector containing HLA-A*24:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:19 protein. This plasmid can be used for constructing HLA-A*24:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:20 Protein Expression Plasmid Vector	PHLAP9254826	Plasmid vector containing HLA-A*24:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:20 protein. This plasmid can be used for constructing HLA-A*24:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:21 Protein Expression Plasmid Vector	PHLAP9254827	Plasmid vector containing HLA-A*24:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:21 protein. This plasmid can be used for constructing HLA-A*24:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:22 Protein Expression Plasmid Vector	PHLAP9254828	Plasmid vector containing HLA-A*24:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:22 protein. This plasmid can be used for constructing HLA-A*24:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:23 Protein Expression Plasmid Vector	PHLAP9254829	Plasmid vector containing HLA-A*24:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:23 protein. This plasmid can be used for constructing HLA-A*24:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:24 Protein Expression Plasmid Vector	PHLAP9254830	Plasmid vector containing HLA-A*24:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:24 protein. This plasmid can be used for constructing HLA-A*24:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:25 Protein Expression Plasmid Vector	PHLAP9254831	Plasmid vector containing HLA-A*24:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:25 protein. This plasmid can be used for constructing HLA-A*24:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:26 Protein Expression Plasmid Vector	PHLAP9254832	Plasmid vector containing HLA-A*24:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:26 protein. This plasmid can be used for constructing HLA-A*24:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:27 Protein Expression Plasmid Vector	PHLAP9254833	Plasmid vector containing HLA-A*24:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:27 protein. This plasmid can be used for constructing HLA-A*24:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:28 Protein Expression Plasmid Vector	PHLAP9254834	Plasmid vector containing HLA-A*24:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:28 protein. This plasmid can be used for constructing HLA-A*24:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:29 Protein Expression Plasmid Vector	PHLAP9254835	Plasmid vector containing HLA-A*24:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:29 protein. This plasmid can be used for constructing HLA-A*24:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:30 Protein Expression Plasmid Vector	PHLAP9254836	Plasmid vector containing HLA-A*24:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:30 protein. This plasmid can be used for constructing HLA-A*24:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:31 Protein Expression Plasmid Vector	PHLAP9254837	Plasmid vector containing HLA-A*24:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:31 protein. This plasmid can be used for constructing HLA-A*24:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:32 Protein Expression Plasmid Vector	PHLAP9254838	Plasmid vector containing HLA-A*24:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:32 protein. This plasmid can be used for constructing HLA-A*24:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:33 Protein Expression Plasmid Vector	PHLAP9254839	Plasmid vector containing HLA-A*24:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:33 protein. This plasmid can be used for constructing HLA-A*24:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:34 Protein Expression Plasmid Vector	PHLAP9254840	Plasmid vector containing HLA-A*24:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:34 protein. This plasmid can be used for constructing HLA-A*24:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:35 Protein Expression Plasmid Vector	PHLAP9254841	Plasmid vector containing HLA-A*24:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:35 protein. This plasmid can be used for constructing HLA-A*24:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:36 Protein Expression Plasmid Vector	PHLAP9254842	Plasmid vector containing HLA-A*24:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:36 protein. This plasmid can be used for constructing HLA-A*24:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:37 Protein Expression Plasmid Vector	PHLAP9254843	Plasmid vector containing HLA-A*24:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:37 protein. This plasmid can be used for constructing HLA-A*24:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:38 Protein Expression Plasmid Vector	PHLAP9254844	Plasmid vector containing HLA-A*24:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:38 protein. This plasmid can be used for constructing HLA-A*24:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:39 Protein Expression Plasmid Vector	PHLAP9254845	Plasmid vector containing HLA-A*24:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:39 protein. This plasmid can be used for constructing HLA-A*24:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:40:01 Protein Expression Plasmid Vector	PHLAP9254846	Plasmid vector containing HLA-A*24:02:40:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:40:01 protein. This plasmid can be used for constructing HLA-A*24:02:40:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:40:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:40:02 Protein Expression Plasmid Vector	PHLAP9254847	Plasmid vector containing HLA-A*24:02:40:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:40:02 protein. This plasmid can be used for constructing HLA-A*24:02:40:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:40:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:41 Protein Expression Plasmid Vector	PHLAP9254848	Plasmid vector containing HLA-A*24:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:41 protein. This plasmid can be used for constructing HLA-A*24:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:42 Protein Expression Plasmid Vector	PHLAP9254849	Plasmid vector containing HLA-A*24:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:42 protein. This plasmid can be used for constructing HLA-A*24:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:43 Protein Expression Plasmid Vector	PHLAP9254850	Plasmid vector containing HLA-A*24:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:43 protein. This plasmid can be used for constructing HLA-A*24:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:44 Protein Expression Plasmid Vector	PHLAP9254851	Plasmid vector containing HLA-A*24:02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:44 protein. This plasmid can be used for constructing HLA-A*24:02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:45 Protein Expression Plasmid Vector	PHLAP9254852	Plasmid vector containing HLA-A*24:02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:45 protein. This plasmid can be used for constructing HLA-A*24:02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:46 Protein Expression Plasmid Vector	PHLAP9254853	Plasmid vector containing HLA-A*24:02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:46 protein. This plasmid can be used for constructing HLA-A*24:02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:47 Protein Expression Plasmid Vector	PHLAP9254854	Plasmid vector containing HLA-A*24:02:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:47 protein. This plasmid can be used for constructing HLA-A*24:02:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:48 Protein Expression Plasmid Vector	PHLAP9254855	Plasmid vector containing HLA-A*24:02:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:48 protein. This plasmid can be used for constructing HLA-A*24:02:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:49 Protein Expression Plasmid Vector	PHLAP9254856	Plasmid vector containing HLA-A*24:02:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:49 protein. This plasmid can be used for constructing HLA-A*24:02:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:50 Protein Expression Plasmid Vector	PHLAP9254857	Plasmid vector containing HLA-A*24:02:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:50 protein. This plasmid can be used for constructing HLA-A*24:02:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:51 Protein Expression Plasmid Vector	PHLAP9254858	Plasmid vector containing HLA-A*24:02:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:51 protein. This plasmid can be used for constructing HLA-A*24:02:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:52 Protein Expression Plasmid Vector	PHLAP9254859	Plasmid vector containing HLA-A*24:02:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:52 protein. This plasmid can be used for constructing HLA-A*24:02:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:53 Protein Expression Plasmid Vector	PHLAP9254860	Plasmid vector containing HLA-A*24:02:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:53 protein. This plasmid can be used for constructing HLA-A*24:02:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:54 Protein Expression Plasmid Vector	PHLAP9254861	Plasmid vector containing HLA-A*24:02:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:54 protein. This plasmid can be used for constructing HLA-A*24:02:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:55 Protein Expression Plasmid Vector	PHLAP9254862	Plasmid vector containing HLA-A*24:02:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:55 protein. This plasmid can be used for constructing HLA-A*24:02:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:56 Protein Expression Plasmid Vector	PHLAP9254863	Plasmid vector containing HLA-A*24:02:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:56 protein. This plasmid can be used for constructing HLA-A*24:02:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:57 Protein Expression Plasmid Vector	PHLAP9254864	Plasmid vector containing HLA-A*24:02:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:57 protein. This plasmid can be used for constructing HLA-A*24:02:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:58 Protein Expression Plasmid Vector	PHLAP9254865	Plasmid vector containing HLA-A*24:02:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:58 protein. This plasmid can be used for constructing HLA-A*24:02:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:59 Protein Expression Plasmid Vector	PHLAP9254866	Plasmid vector containing HLA-A*24:02:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:59 protein. This plasmid can be used for constructing HLA-A*24:02:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:60 Protein Expression Plasmid Vector	PHLAP9254867	Plasmid vector containing HLA-A*24:02:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:60 protein. This plasmid can be used for constructing HLA-A*24:02:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:61 Protein Expression Plasmid Vector	PHLAP9254868	Plasmid vector containing HLA-A*24:02:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:61 protein. This plasmid can be used for constructing HLA-A*24:02:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:62 Protein Expression Plasmid Vector	PHLAP9254869	Plasmid vector containing HLA-A*24:02:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:62 protein. This plasmid can be used for constructing HLA-A*24:02:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:63 Protein Expression Plasmid Vector	PHLAP9254870	Plasmid vector containing HLA-A*24:02:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:63 protein. This plasmid can be used for constructing HLA-A*24:02:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:64 Protein Expression Plasmid Vector	PHLAP9254871	Plasmid vector containing HLA-A*24:02:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:64 protein. This plasmid can be used for constructing HLA-A*24:02:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:65 Protein Expression Plasmid Vector	PHLAP9254872	Plasmid vector containing HLA-A*24:02:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:65 protein. This plasmid can be used for constructing HLA-A*24:02:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:66 Protein Expression Plasmid Vector	PHLAP9254873	Plasmid vector containing HLA-A*24:02:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:66 protein. This plasmid can be used for constructing HLA-A*24:02:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:67 Protein Expression Plasmid Vector	PHLAP9254874	Plasmid vector containing HLA-A*24:02:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:67 protein. This plasmid can be used for constructing HLA-A*24:02:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:68 Protein Expression Plasmid Vector	PHLAP9254875	Plasmid vector containing HLA-A*24:02:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:68 protein. This plasmid can be used for constructing HLA-A*24:02:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:69 Protein Expression Plasmid Vector	PHLAP9254876	Plasmid vector containing HLA-A*24:02:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:69 protein. This plasmid can be used for constructing HLA-A*24:02:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:70 Protein Expression Plasmid Vector	PHLAP9254877	Plasmid vector containing HLA-A*24:02:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:70 protein. This plasmid can be used for constructing HLA-A*24:02:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:71 Protein Expression Plasmid Vector	PHLAP9254878	Plasmid vector containing HLA-A*24:02:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:71 protein. This plasmid can be used for constructing HLA-A*24:02:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:72 Protein Expression Plasmid Vector	PHLAP9254879	Plasmid vector containing HLA-A*24:02:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:72 protein. This plasmid can be used for constructing HLA-A*24:02:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:73 Protein Expression Plasmid Vector	PHLAP9254880	Plasmid vector containing HLA-A*24:02:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:73 protein. This plasmid can be used for constructing HLA-A*24:02:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:74 Protein Expression Plasmid Vector	PHLAP9254881	Plasmid vector containing HLA-A*24:02:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:74 protein. This plasmid can be used for constructing HLA-A*24:02:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:75 Protein Expression Plasmid Vector	PHLAP9254882	Plasmid vector containing HLA-A*24:02:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:75 protein. This plasmid can be used for constructing HLA-A*24:02:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:76 Protein Expression Plasmid Vector	PHLAP9254883	Plasmid vector containing HLA-A*24:02:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:76 protein. This plasmid can be used for constructing HLA-A*24:02:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:77 Protein Expression Plasmid Vector	PHLAP9254884	Plasmid vector containing HLA-A*24:02:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:77 protein. This plasmid can be used for constructing HLA-A*24:02:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:78 Protein Expression Plasmid Vector	PHLAP9254885	Plasmid vector containing HLA-A*24:02:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:78 protein. This plasmid can be used for constructing HLA-A*24:02:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:79 Protein Expression Plasmid Vector	PHLAP9254886	Plasmid vector containing HLA-A*24:02:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:79 protein. This plasmid can be used for constructing HLA-A*24:02:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:80 Protein Expression Plasmid Vector	PHLAP9254887	Plasmid vector containing HLA-A*24:02:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:80 protein. This plasmid can be used for constructing HLA-A*24:02:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:81 Protein Expression Plasmid Vector	PHLAP9254888	Plasmid vector containing HLA-A*24:02:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:81 protein. This plasmid can be used for constructing HLA-A*24:02:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:82 Protein Expression Plasmid Vector	PHLAP9254889	Plasmid vector containing HLA-A*24:02:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:82 protein. This plasmid can be used for constructing HLA-A*24:02:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:83 Protein Expression Plasmid Vector	PHLAP9254890	Plasmid vector containing HLA-A*24:02:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:83 protein. This plasmid can be used for constructing HLA-A*24:02:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:84 Protein Expression Plasmid Vector	PHLAP9254891	Plasmid vector containing HLA-A*24:02:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:84 protein. This plasmid can be used for constructing HLA-A*24:02:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:85 Protein Expression Plasmid Vector	PHLAP9254892	Plasmid vector containing HLA-A*24:02:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:85 protein. This plasmid can be used for constructing HLA-A*24:02:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:86 Protein Expression Plasmid Vector	PHLAP9254893	Plasmid vector containing HLA-A*24:02:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:86 protein. This plasmid can be used for constructing HLA-A*24:02:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:87 Protein Expression Plasmid Vector	PHLAP9254894	Plasmid vector containing HLA-A*24:02:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:87 protein. This plasmid can be used for constructing HLA-A*24:02:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:88 Protein Expression Plasmid Vector	PHLAP9254895	Plasmid vector containing HLA-A*24:02:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:88 protein. This plasmid can be used for constructing HLA-A*24:02:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:89 Protein Expression Plasmid Vector	PHLAP9254896	Plasmid vector containing HLA-A*24:02:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:89 protein. This plasmid can be used for constructing HLA-A*24:02:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:90 Protein Expression Plasmid Vector	PHLAP9254897	Plasmid vector containing HLA-A*24:02:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:90 protein. This plasmid can be used for constructing HLA-A*24:02:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:91 Protein Expression Plasmid Vector	PHLAP9254898	Plasmid vector containing HLA-A*24:02:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:91 protein. This plasmid can be used for constructing HLA-A*24:02:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:92 Protein Expression Plasmid Vector	PHLAP9254899	Plasmid vector containing HLA-A*24:02:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:92 protein. This plasmid can be used for constructing HLA-A*24:02:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:93 Protein Expression Plasmid Vector	PHLAP9254900	Plasmid vector containing HLA-A*24:02:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:93 protein. This plasmid can be used for constructing HLA-A*24:02:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:94 Protein Expression Plasmid Vector	PHLAP9254901	Plasmid vector containing HLA-A*24:02:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:94 protein. This plasmid can be used for constructing HLA-A*24:02:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:95 Protein Expression Plasmid Vector	PHLAP9254902	Plasmid vector containing HLA-A*24:02:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:95 protein. This plasmid can be used for constructing HLA-A*24:02:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:96 Protein Expression Plasmid Vector	PHLAP9254903	Plasmid vector containing HLA-A*24:02:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:96 protein. This plasmid can be used for constructing HLA-A*24:02:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:97 Protein Expression Plasmid Vector	PHLAP9254904	Plasmid vector containing HLA-A*24:02:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:97 protein. This plasmid can be used for constructing HLA-A*24:02:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:02:98 Protein Expression Plasmid Vector	PHLAP9254905	Plasmid vector containing HLA-A*24:02:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:98 protein. This plasmid can be used for constructing HLA-A*24:02:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:02:99 Protein Expression Plasmid Vector	PHLAP9254906	Plasmid vector containing HLA-A*24:02:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:02:99 protein. This plasmid can be used for constructing HLA-A*24:02:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:02:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:03:01:01 Protein Expression Plasmid Vector	PHLAP9254907	Plasmid vector containing HLA-A*24:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:03:01:01 protein. This plasmid can be used for constructing HLA-A*24:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:03:01:02 Protein Expression Plasmid Vector	PHLAP9254908	Plasmid vector containing HLA-A*24:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:03:01:02 protein. This plasmid can be used for constructing HLA-A*24:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:03:01:03 Protein Expression Plasmid Vector	PHLAP9254909	Plasmid vector containing HLA-A*24:03:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:03:01:03 protein. This plasmid can be used for constructing HLA-A*24:03:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:03:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:03:02 Protein Expression Plasmid Vector	PHLAP9254910	Plasmid vector containing HLA-A*24:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:03:02 protein. This plasmid can be used for constructing HLA-A*24:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:03:03 Protein Expression Plasmid Vector	PHLAP9254911	Plasmid vector containing HLA-A*24:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:03:03 protein. This plasmid can be used for constructing HLA-A*24:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:03:04 Protein Expression Plasmid Vector	PHLAP9254912	Plasmid vector containing HLA-A*24:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:03:04 protein. This plasmid can be used for constructing HLA-A*24:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:03:05 Protein Expression Plasmid Vector	PHLAP9254913	Plasmid vector containing HLA-A*24:03:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:03:05 protein. This plasmid can be used for constructing HLA-A*24:03:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:03:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:03:06 Protein Expression Plasmid Vector	PHLAP9254914	Plasmid vector containing HLA-A*24:03:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:03:06 protein. This plasmid can be used for constructing HLA-A*24:03:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:03:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:04 Protein Expression Plasmid Vector	PHLAP9254915	Plasmid vector containing HLA-A*24:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:04 protein. This plasmid can be used for constructing HLA-A*24:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:05:01 Protein Expression Plasmid Vector	PHLAP9254916	Plasmid vector containing HLA-A*24:05:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:05:01 protein. This plasmid can be used for constructing HLA-A*24:05:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:05:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:05:02 Protein Expression Plasmid Vector	PHLAP9254917	Plasmid vector containing HLA-A*24:05:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:05:02 protein. This plasmid can be used for constructing HLA-A*24:05:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:05:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:06 Protein Expression Plasmid Vector	PHLAP9254918	Plasmid vector containing HLA-A*24:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:06 protein. This plasmid can be used for constructing HLA-A*24:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:07:01:01 Protein Expression Plasmid Vector	PHLAP9254919	Plasmid vector containing HLA-A*24:07:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:07:01:01 protein. This plasmid can be used for constructing HLA-A*24:07:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:07:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:07:01:02 Protein Expression Plasmid Vector	PHLAP9254920	Plasmid vector containing HLA-A*24:07:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:07:01:02 protein. This plasmid can be used for constructing HLA-A*24:07:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:07:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:07:01:03 Protein Expression Plasmid Vector	PHLAP9254921	Plasmid vector containing HLA-A*24:07:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:07:01:03 protein. This plasmid can be used for constructing HLA-A*24:07:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:07:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:07:02 Protein Expression Plasmid Vector	PHLAP9254922	Plasmid vector containing HLA-A*24:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:07:02 protein. This plasmid can be used for constructing HLA-A*24:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:07:03 Protein Expression Plasmid Vector	PHLAP9254923	Plasmid vector containing HLA-A*24:07:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:07:03 protein. This plasmid can be used for constructing HLA-A*24:07:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:07:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:07:04 Protein Expression Plasmid Vector	PHLAP9254924	Plasmid vector containing HLA-A*24:07:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:07:04 protein. This plasmid can be used for constructing HLA-A*24:07:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:07:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:07:05 Protein Expression Plasmid Vector	PHLAP9254925	Plasmid vector containing HLA-A*24:07:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:07:05 protein. This plasmid can be used for constructing HLA-A*24:07:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:07:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:08 Protein Expression Plasmid Vector	PHLAP9254926	Plasmid vector containing HLA-A*24:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:08 protein. This plasmid can be used for constructing HLA-A*24:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:09N Protein Expression Plasmid Vector	PHLAP9254927	Plasmid vector containing HLA-A*24:09N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:09N protein. This plasmid can be used for constructing HLA-A*24:09N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:09N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:10:01:01 Protein Expression Plasmid Vector	PHLAP9254928	Plasmid vector containing HLA-A*24:10:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:10:01:01 protein. This plasmid can be used for constructing HLA-A*24:10:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:10:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:10:01:02 Protein Expression Plasmid Vector	PHLAP9254929	Plasmid vector containing HLA-A*24:10:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:10:01:02 protein. This plasmid can be used for constructing HLA-A*24:10:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:10:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:10:02 Protein Expression Plasmid Vector	PHLAP9254930	Plasmid vector containing HLA-A*24:10:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:10:02 protein. This plasmid can be used for constructing HLA-A*24:10:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:10:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:100 Protein Expression Plasmid Vector	PHLAP9254931	Plasmid vector containing HLA-A*24:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:100 protein. This plasmid can be used for constructing HLA-A*24:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:101 Protein Expression Plasmid Vector	PHLAP9254932	Plasmid vector containing HLA-A*24:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:101 protein. This plasmid can be used for constructing HLA-A*24:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:102 Protein Expression Plasmid Vector	PHLAP9254933	Plasmid vector containing HLA-A*24:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:102 protein. This plasmid can be used for constructing HLA-A*24:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:103 Protein Expression Plasmid Vector	PHLAP9254934	Plasmid vector containing HLA-A*24:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:103 protein. This plasmid can be used for constructing HLA-A*24:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:104 Protein Expression Plasmid Vector	PHLAP9254935	Plasmid vector containing HLA-A*24:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:104 protein. This plasmid can be used for constructing HLA-A*24:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:105 Protein Expression Plasmid Vector	PHLAP9254936	Plasmid vector containing HLA-A*24:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:105 protein. This plasmid can be used for constructing HLA-A*24:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:106 Protein Expression Plasmid Vector	PHLAP9254937	Plasmid vector containing HLA-A*24:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:106 protein. This plasmid can be used for constructing HLA-A*24:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:107 Protein Expression Plasmid Vector	PHLAP9254938	Plasmid vector containing HLA-A*24:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:107 protein. This plasmid can be used for constructing HLA-A*24:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:108 Protein Expression Plasmid Vector	PHLAP9254939	Plasmid vector containing HLA-A*24:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:108 protein. This plasmid can be used for constructing HLA-A*24:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:109 Protein Expression Plasmid Vector	PHLAP9254940	Plasmid vector containing HLA-A*24:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:109 protein. This plasmid can be used for constructing HLA-A*24:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:110 Protein Expression Plasmid Vector	PHLAP9254941	Plasmid vector containing HLA-A*24:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:110 protein. This plasmid can be used for constructing HLA-A*24:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:111 Protein Expression Plasmid Vector	PHLAP9254942	Plasmid vector containing HLA-A*24:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:111 protein. This plasmid can be used for constructing HLA-A*24:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:112 Protein Expression Plasmid Vector	PHLAP9254943	Plasmid vector containing HLA-A*24:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:112 protein. This plasmid can be used for constructing HLA-A*24:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:113 Protein Expression Plasmid Vector	PHLAP9254944	Plasmid vector containing HLA-A*24:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:113 protein. This plasmid can be used for constructing HLA-A*24:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:114 Protein Expression Plasmid Vector	PHLAP9254945	Plasmid vector containing HLA-A*24:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:114 protein. This plasmid can be used for constructing HLA-A*24:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:115 Protein Expression Plasmid Vector	PHLAP9254946	Plasmid vector containing HLA-A*24:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:115 protein. This plasmid can be used for constructing HLA-A*24:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:116 Protein Expression Plasmid Vector	PHLAP9254947	Plasmid vector containing HLA-A*24:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:116 protein. This plasmid can be used for constructing HLA-A*24:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:117 Protein Expression Plasmid Vector	PHLAP9254948	Plasmid vector containing HLA-A*24:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:117 protein. This plasmid can be used for constructing HLA-A*24:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:118 Protein Expression Plasmid Vector	PHLAP9254949	Plasmid vector containing HLA-A*24:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:118 protein. This plasmid can be used for constructing HLA-A*24:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:119 Protein Expression Plasmid Vector	PHLAP9254950	Plasmid vector containing HLA-A*24:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:119 protein. This plasmid can be used for constructing HLA-A*24:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:11N Protein Expression Plasmid Vector	PHLAP9254951	Plasmid vector containing HLA-A*24:11N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:11N protein. This plasmid can be used for constructing HLA-A*24:11N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:11N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:120 Protein Expression Plasmid Vector	PHLAP9254952	Plasmid vector containing HLA-A*24:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:120 protein. This plasmid can be used for constructing HLA-A*24:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:121:01:01 Protein Expression Plasmid Vector	PHLAP9254953	Plasmid vector containing HLA-A*24:121:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:121:01:01 protein. This plasmid can be used for constructing HLA-A*24:121:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:121:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:121:01:02 Protein Expression Plasmid Vector	PHLAP9254954	Plasmid vector containing HLA-A*24:121:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:121:01:02 protein. This plasmid can be used for constructing HLA-A*24:121:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:121:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:122 Protein Expression Plasmid Vector	PHLAP9254955	Plasmid vector containing HLA-A*24:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:122 protein. This plasmid can be used for constructing HLA-A*24:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:123 Protein Expression Plasmid Vector	PHLAP9254956	Plasmid vector containing HLA-A*24:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:123 protein. This plasmid can be used for constructing HLA-A*24:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:124:01 Protein Expression Plasmid Vector	PHLAP9254957	Plasmid vector containing HLA-A*24:124:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:124:01 protein. This plasmid can be used for constructing HLA-A*24:124:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:124:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:124:02 Protein Expression Plasmid Vector	PHLAP9254958	Plasmid vector containing HLA-A*24:124:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:124:02 protein. This plasmid can be used for constructing HLA-A*24:124:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:124:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:125 Protein Expression Plasmid Vector	PHLAP9254959	Plasmid vector containing HLA-A*24:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:125 protein. This plasmid can be used for constructing HLA-A*24:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:126 Protein Expression Plasmid Vector	PHLAP9254960	Plasmid vector containing HLA-A*24:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:126 protein. This plasmid can be used for constructing HLA-A*24:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:127 Protein Expression Plasmid Vector	PHLAP9254961	Plasmid vector containing HLA-A*24:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:127 protein. This plasmid can be used for constructing HLA-A*24:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:128 Protein Expression Plasmid Vector	PHLAP9254962	Plasmid vector containing HLA-A*24:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:128 protein. This plasmid can be used for constructing HLA-A*24:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:129 Protein Expression Plasmid Vector	PHLAP9254963	Plasmid vector containing HLA-A*24:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:129 protein. This plasmid can be used for constructing HLA-A*24:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:13:01 Protein Expression Plasmid Vector	PHLAP9254964	Plasmid vector containing HLA-A*24:13:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:13:01 protein. This plasmid can be used for constructing HLA-A*24:13:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:13:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:13:02 Protein Expression Plasmid Vector	PHLAP9254965	Plasmid vector containing HLA-A*24:13:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:13:02 protein. This plasmid can be used for constructing HLA-A*24:13:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:13:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:13:03 Protein Expression Plasmid Vector	PHLAP9254966	Plasmid vector containing HLA-A*24:13:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:13:03 protein. This plasmid can be used for constructing HLA-A*24:13:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:13:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:130 Protein Expression Plasmid Vector	PHLAP9254967	Plasmid vector containing HLA-A*24:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:130 protein. This plasmid can be used for constructing HLA-A*24:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:131 Protein Expression Plasmid Vector	PHLAP9254968	Plasmid vector containing HLA-A*24:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:131 protein. This plasmid can be used for constructing HLA-A*24:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:132N Protein Expression Plasmid Vector	PHLAP9254969	Plasmid vector containing HLA-A*24:132N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:132N protein. This plasmid can be used for constructing HLA-A*24:132N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:132N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:133 Protein Expression Plasmid Vector	PHLAP9254970	Plasmid vector containing HLA-A*24:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:133 protein. This plasmid can be used for constructing HLA-A*24:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:134 Protein Expression Plasmid Vector	PHLAP9254971	Plasmid vector containing HLA-A*24:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:134 protein. This plasmid can be used for constructing HLA-A*24:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:135:01 Protein Expression Plasmid Vector	PHLAP9254972	Plasmid vector containing HLA-A*24:135:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:135:01 protein. This plasmid can be used for constructing HLA-A*24:135:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:135:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:135:02 Protein Expression Plasmid Vector	PHLAP9254973	Plasmid vector containing HLA-A*24:135:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:135:02 protein. This plasmid can be used for constructing HLA-A*24:135:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:135:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:136 Protein Expression Plasmid Vector	PHLAP9254974	Plasmid vector containing HLA-A*24:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:136 protein. This plasmid can be used for constructing HLA-A*24:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:137 Protein Expression Plasmid Vector	PHLAP9254975	Plasmid vector containing HLA-A*24:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:137 protein. This plasmid can be used for constructing HLA-A*24:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:138 Protein Expression Plasmid Vector	PHLAP9254976	Plasmid vector containing HLA-A*24:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:138 protein. This plasmid can be used for constructing HLA-A*24:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:139 Protein Expression Plasmid Vector	PHLAP9254977	Plasmid vector containing HLA-A*24:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:139 protein. This plasmid can be used for constructing HLA-A*24:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:14:01:01 Protein Expression Plasmid Vector	PHLAP9254978	Plasmid vector containing HLA-A*24:14:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:14:01:01 protein. This plasmid can be used for constructing HLA-A*24:14:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:14:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:14:01:02 Protein Expression Plasmid Vector	PHLAP9254979	Plasmid vector containing HLA-A*24:14:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:14:01:02 protein. This plasmid can be used for constructing HLA-A*24:14:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:14:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:14:01:03 Protein Expression Plasmid Vector	PHLAP9254980	Plasmid vector containing HLA-A*24:14:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:14:01:03 protein. This plasmid can be used for constructing HLA-A*24:14:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:14:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:14:01:04 Protein Expression Plasmid Vector	PHLAP9254981	Plasmid vector containing HLA-A*24:14:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:14:01:04 protein. This plasmid can be used for constructing HLA-A*24:14:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:14:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:140 Protein Expression Plasmid Vector	PHLAP9254982	Plasmid vector containing HLA-A*24:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:140 protein. This plasmid can be used for constructing HLA-A*24:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:141 Protein Expression Plasmid Vector	PHLAP9254983	Plasmid vector containing HLA-A*24:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:141 protein. This plasmid can be used for constructing HLA-A*24:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:142:01 Protein Expression Plasmid Vector	PHLAP9254984	Plasmid vector containing HLA-A*24:142:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:142:01 protein. This plasmid can be used for constructing HLA-A*24:142:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:142:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:142:02 Protein Expression Plasmid Vector	PHLAP9254985	Plasmid vector containing HLA-A*24:142:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:142:02 protein. This plasmid can be used for constructing HLA-A*24:142:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:142:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:143 Protein Expression Plasmid Vector	PHLAP9254986	Plasmid vector containing HLA-A*24:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:143 protein. This plasmid can be used for constructing HLA-A*24:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:144 Protein Expression Plasmid Vector	PHLAP9254987	Plasmid vector containing HLA-A*24:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:144 protein. This plasmid can be used for constructing HLA-A*24:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:145 Protein Expression Plasmid Vector	PHLAP9254988	Plasmid vector containing HLA-A*24:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:145 protein. This plasmid can be used for constructing HLA-A*24:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:146 Protein Expression Plasmid Vector	PHLAP9254989	Plasmid vector containing HLA-A*24:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:146 protein. This plasmid can be used for constructing HLA-A*24:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:147 Protein Expression Plasmid Vector	PHLAP9254990	Plasmid vector containing HLA-A*24:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:147 protein. This plasmid can be used for constructing HLA-A*24:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:148 Protein Expression Plasmid Vector	PHLAP9254991	Plasmid vector containing HLA-A*24:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:148 protein. This plasmid can be used for constructing HLA-A*24:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:149 Protein Expression Plasmid Vector	PHLAP9254992	Plasmid vector containing HLA-A*24:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:149 protein. This plasmid can be used for constructing HLA-A*24:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:15 Protein Expression Plasmid Vector	PHLAP9254993	Plasmid vector containing HLA-A*24:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:15 protein. This plasmid can be used for constructing HLA-A*24:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:150 Protein Expression Plasmid Vector	PHLAP9254994	Plasmid vector containing HLA-A*24:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:150 protein. This plasmid can be used for constructing HLA-A*24:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:151 Protein Expression Plasmid Vector	PHLAP9254995	Plasmid vector containing HLA-A*24:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:151 protein. This plasmid can be used for constructing HLA-A*24:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:152 Protein Expression Plasmid Vector	PHLAP9254996	Plasmid vector containing HLA-A*24:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:152 protein. This plasmid can be used for constructing HLA-A*24:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:153 Protein Expression Plasmid Vector	PHLAP9254997	Plasmid vector containing HLA-A*24:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:153 protein. This plasmid can be used for constructing HLA-A*24:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:154 Protein Expression Plasmid Vector	PHLAP9254998	Plasmid vector containing HLA-A*24:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:154 protein. This plasmid can be used for constructing HLA-A*24:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:155N Protein Expression Plasmid Vector	PHLAP9254999	Plasmid vector containing HLA-A*24:155N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:155N protein. This plasmid can be used for constructing HLA-A*24:155N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:155N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:156 Protein Expression Plasmid Vector	PHLAP9255000	Plasmid vector containing HLA-A*24:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:156 protein. This plasmid can be used for constructing HLA-A*24:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:157 Protein Expression Plasmid Vector	PHLAP9255001	Plasmid vector containing HLA-A*24:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:157 protein. This plasmid can be used for constructing HLA-A*24:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:158N Protein Expression Plasmid Vector	PHLAP9255002	Plasmid vector containing HLA-A*24:158N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:158N protein. This plasmid can be used for constructing HLA-A*24:158N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:158N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:159 Protein Expression Plasmid Vector	PHLAP9255003	Plasmid vector containing HLA-A*24:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:159 protein. This plasmid can be used for constructing HLA-A*24:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:160 Protein Expression Plasmid Vector	PHLAP9255004	Plasmid vector containing HLA-A*24:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:160 protein. This plasmid can be used for constructing HLA-A*24:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:161 Protein Expression Plasmid Vector	PHLAP9255005	Plasmid vector containing HLA-A*24:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:161 protein. This plasmid can be used for constructing HLA-A*24:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:162 Protein Expression Plasmid Vector	PHLAP9255006	Plasmid vector containing HLA-A*24:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:162 protein. This plasmid can be used for constructing HLA-A*24:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:163N Protein Expression Plasmid Vector	PHLAP9255007	Plasmid vector containing HLA-A*24:163N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:163N protein. This plasmid can be used for constructing HLA-A*24:163N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:163N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:164 Protein Expression Plasmid Vector	PHLAP9255008	Plasmid vector containing HLA-A*24:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:164 protein. This plasmid can be used for constructing HLA-A*24:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:165 Protein Expression Plasmid Vector	PHLAP9255009	Plasmid vector containing HLA-A*24:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:165 protein. This plasmid can be used for constructing HLA-A*24:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:166 Protein Expression Plasmid Vector	PHLAP9255010	Plasmid vector containing HLA-A*24:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:166 protein. This plasmid can be used for constructing HLA-A*24:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:167 Protein Expression Plasmid Vector	PHLAP9255011	Plasmid vector containing HLA-A*24:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:167 protein. This plasmid can be used for constructing HLA-A*24:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:168 Protein Expression Plasmid Vector	PHLAP9255012	Plasmid vector containing HLA-A*24:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:168 protein. This plasmid can be used for constructing HLA-A*24:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:169 Protein Expression Plasmid Vector	PHLAP9255013	Plasmid vector containing HLA-A*24:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:169 protein. This plasmid can be used for constructing HLA-A*24:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:17:01:01 Protein Expression Plasmid Vector	PHLAP9255014	Plasmid vector containing HLA-A*24:17:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:17:01:01 protein. This plasmid can be used for constructing HLA-A*24:17:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:17:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:17:01:02 Protein Expression Plasmid Vector	PHLAP9255015	Plasmid vector containing HLA-A*24:17:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:17:01:02 protein. This plasmid can be used for constructing HLA-A*24:17:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:17:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:17:02 Protein Expression Plasmid Vector	PHLAP9255016	Plasmid vector containing HLA-A*24:17:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:17:02 protein. This plasmid can be used for constructing HLA-A*24:17:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:17:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:170 Protein Expression Plasmid Vector	PHLAP9255017	Plasmid vector containing HLA-A*24:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:170 protein. This plasmid can be used for constructing HLA-A*24:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:171 Protein Expression Plasmid Vector	PHLAP9255018	Plasmid vector containing HLA-A*24:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:171 protein. This plasmid can be used for constructing HLA-A*24:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:172:01 Protein Expression Plasmid Vector	PHLAP9255019	Plasmid vector containing HLA-A*24:172:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:172:01 protein. This plasmid can be used for constructing HLA-A*24:172:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:172:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:172:02 Protein Expression Plasmid Vector	PHLAP9255020	Plasmid vector containing HLA-A*24:172:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:172:02 protein. This plasmid can be used for constructing HLA-A*24:172:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:172:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:172:03 Protein Expression Plasmid Vector	PHLAP9255021	Plasmid vector containing HLA-A*24:172:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:172:03 protein. This plasmid can be used for constructing HLA-A*24:172:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:172:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:173 Protein Expression Plasmid Vector	PHLAP9255022	Plasmid vector containing HLA-A*24:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:173 protein. This plasmid can be used for constructing HLA-A*24:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:174 Protein Expression Plasmid Vector	PHLAP9255023	Plasmid vector containing HLA-A*24:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:174 protein. This plasmid can be used for constructing HLA-A*24:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:175 Protein Expression Plasmid Vector	PHLAP9255024	Plasmid vector containing HLA-A*24:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:175 protein. This plasmid can be used for constructing HLA-A*24:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:176 Protein Expression Plasmid Vector	PHLAP9255025	Plasmid vector containing HLA-A*24:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:176 protein. This plasmid can be used for constructing HLA-A*24:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:177 Protein Expression Plasmid Vector	PHLAP9255026	Plasmid vector containing HLA-A*24:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:177 protein. This plasmid can be used for constructing HLA-A*24:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:178 Protein Expression Plasmid Vector	PHLAP9255027	Plasmid vector containing HLA-A*24:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:178 protein. This plasmid can be used for constructing HLA-A*24:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:179 Protein Expression Plasmid Vector	PHLAP9255028	Plasmid vector containing HLA-A*24:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:179 protein. This plasmid can be used for constructing HLA-A*24:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:18 Protein Expression Plasmid Vector	PHLAP9255029	Plasmid vector containing HLA-A*24:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:18 protein. This plasmid can be used for constructing HLA-A*24:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:180 Protein Expression Plasmid Vector	PHLAP9255030	Plasmid vector containing HLA-A*24:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:180 protein. This plasmid can be used for constructing HLA-A*24:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:181 Protein Expression Plasmid Vector	PHLAP9255031	Plasmid vector containing HLA-A*24:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:181 protein. This plasmid can be used for constructing HLA-A*24:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:182 Protein Expression Plasmid Vector	PHLAP9255032	Plasmid vector containing HLA-A*24:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:182 protein. This plasmid can be used for constructing HLA-A*24:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:183N Protein Expression Plasmid Vector	PHLAP9255033	Plasmid vector containing HLA-A*24:183N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:183N protein. This plasmid can be used for constructing HLA-A*24:183N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:183N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:184 Protein Expression Plasmid Vector	PHLAP9255034	Plasmid vector containing HLA-A*24:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:184 protein. This plasmid can be used for constructing HLA-A*24:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:185N Protein Expression Plasmid Vector	PHLAP9255035	Plasmid vector containing HLA-A*24:185N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:185N protein. This plasmid can be used for constructing HLA-A*24:185N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:185N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:186 Protein Expression Plasmid Vector	PHLAP9255036	Plasmid vector containing HLA-A*24:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:186 protein. This plasmid can be used for constructing HLA-A*24:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:187 Protein Expression Plasmid Vector	PHLAP9255037	Plasmid vector containing HLA-A*24:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:187 protein. This plasmid can be used for constructing HLA-A*24:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:188 Protein Expression Plasmid Vector	PHLAP9255038	Plasmid vector containing HLA-A*24:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:188 protein. This plasmid can be used for constructing HLA-A*24:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:189 Protein Expression Plasmid Vector	PHLAP9255039	Plasmid vector containing HLA-A*24:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:189 protein. This plasmid can be used for constructing HLA-A*24:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:19 Protein Expression Plasmid Vector	PHLAP9255040	Plasmid vector containing HLA-A*24:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:19 protein. This plasmid can be used for constructing HLA-A*24:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:190 Protein Expression Plasmid Vector	PHLAP9255041	Plasmid vector containing HLA-A*24:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:190 protein. This plasmid can be used for constructing HLA-A*24:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:191 Protein Expression Plasmid Vector	PHLAP9255042	Plasmid vector containing HLA-A*24:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:191 protein. This plasmid can be used for constructing HLA-A*24:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:192 Protein Expression Plasmid Vector	PHLAP9255043	Plasmid vector containing HLA-A*24:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:192 protein. This plasmid can be used for constructing HLA-A*24:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:193 Protein Expression Plasmid Vector	PHLAP9255044	Plasmid vector containing HLA-A*24:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:193 protein. This plasmid can be used for constructing HLA-A*24:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:194 Protein Expression Plasmid Vector	PHLAP9255045	Plasmid vector containing HLA-A*24:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:194 protein. This plasmid can be used for constructing HLA-A*24:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:195 Protein Expression Plasmid Vector	PHLAP9255046	Plasmid vector containing HLA-A*24:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:195 protein. This plasmid can be used for constructing HLA-A*24:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:196 Protein Expression Plasmid Vector	PHLAP9255047	Plasmid vector containing HLA-A*24:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:196 protein. This plasmid can be used for constructing HLA-A*24:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:197 Protein Expression Plasmid Vector	PHLAP9255048	Plasmid vector containing HLA-A*24:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:197 protein. This plasmid can be used for constructing HLA-A*24:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:198 Protein Expression Plasmid Vector	PHLAP9255049	Plasmid vector containing HLA-A*24:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:198 protein. This plasmid can be used for constructing HLA-A*24:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:199 Protein Expression Plasmid Vector	PHLAP9255050	Plasmid vector containing HLA-A*24:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:199 protein. This plasmid can be used for constructing HLA-A*24:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:20:01:01 Protein Expression Plasmid Vector	PHLAP9255051	Plasmid vector containing HLA-A*24:20:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:20:01:01 protein. This plasmid can be used for constructing HLA-A*24:20:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:20:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:20:01:02 Protein Expression Plasmid Vector	PHLAP9255052	Plasmid vector containing HLA-A*24:20:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:20:01:02 protein. This plasmid can be used for constructing HLA-A*24:20:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:20:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:20:02 Protein Expression Plasmid Vector	PHLAP9255053	Plasmid vector containing HLA-A*24:20:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:20:02 protein. This plasmid can be used for constructing HLA-A*24:20:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:20:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:200 Protein Expression Plasmid Vector	PHLAP9255054	Plasmid vector containing HLA-A*24:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:200 protein. This plasmid can be used for constructing HLA-A*24:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:201 Protein Expression Plasmid Vector	PHLAP9255055	Plasmid vector containing HLA-A*24:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:201 protein. This plasmid can be used for constructing HLA-A*24:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:202 Protein Expression Plasmid Vector	PHLAP9255056	Plasmid vector containing HLA-A*24:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:202 protein. This plasmid can be used for constructing HLA-A*24:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:203 Protein Expression Plasmid Vector	PHLAP9255057	Plasmid vector containing HLA-A*24:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:203 protein. This plasmid can be used for constructing HLA-A*24:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:204 Protein Expression Plasmid Vector	PHLAP9255058	Plasmid vector containing HLA-A*24:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:204 protein. This plasmid can be used for constructing HLA-A*24:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:205 Protein Expression Plasmid Vector	PHLAP9255059	Plasmid vector containing HLA-A*24:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:205 protein. This plasmid can be used for constructing HLA-A*24:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:206 Protein Expression Plasmid Vector	PHLAP9255060	Plasmid vector containing HLA-A*24:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:206 protein. This plasmid can be used for constructing HLA-A*24:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:207:01 Protein Expression Plasmid Vector	PHLAP9255061	Plasmid vector containing HLA-A*24:207:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:207:01 protein. This plasmid can be used for constructing HLA-A*24:207:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:207:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:207:02 Protein Expression Plasmid Vector	PHLAP9255062	Plasmid vector containing HLA-A*24:207:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:207:02 protein. This plasmid can be used for constructing HLA-A*24:207:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:207:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:208:01 Protein Expression Plasmid Vector	PHLAP9255063	Plasmid vector containing HLA-A*24:208:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:208:01 protein. This plasmid can be used for constructing HLA-A*24:208:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:208:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:208:02:01 Protein Expression Plasmid Vector	PHLAP9255064	Plasmid vector containing HLA-A*24:208:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:208:02:01 protein. This plasmid can be used for constructing HLA-A*24:208:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:208:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:208:02:02 Protein Expression Plasmid Vector	PHLAP9255065	Plasmid vector containing HLA-A*24:208:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:208:02:02 protein. This plasmid can be used for constructing HLA-A*24:208:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:208:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:209 Protein Expression Plasmid Vector	PHLAP9255066	Plasmid vector containing HLA-A*24:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:209 protein. This plasmid can be used for constructing HLA-A*24:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:21:01 Protein Expression Plasmid Vector	PHLAP9255067	Plasmid vector containing HLA-A*24:21:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:21:01 protein. This plasmid can be used for constructing HLA-A*24:21:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:21:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:21:02 Protein Expression Plasmid Vector	PHLAP9255068	Plasmid vector containing HLA-A*24:21:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:21:02 protein. This plasmid can be used for constructing HLA-A*24:21:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:21:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:21:03 Protein Expression Plasmid Vector	PHLAP9255069	Plasmid vector containing HLA-A*24:21:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:21:03 protein. This plasmid can be used for constructing HLA-A*24:21:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:21:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:21:04 Protein Expression Plasmid Vector	PHLAP9255070	Plasmid vector containing HLA-A*24:21:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:21:04 protein. This plasmid can be used for constructing HLA-A*24:21:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:21:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:210 Protein Expression Plasmid Vector	PHLAP9255071	Plasmid vector containing HLA-A*24:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:210 protein. This plasmid can be used for constructing HLA-A*24:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:211 Protein Expression Plasmid Vector	PHLAP9255072	Plasmid vector containing HLA-A*24:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:211 protein. This plasmid can be used for constructing HLA-A*24:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:212 Protein Expression Plasmid Vector	PHLAP9255073	Plasmid vector containing HLA-A*24:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:212 protein. This plasmid can be used for constructing HLA-A*24:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:213 Protein Expression Plasmid Vector	PHLAP9255074	Plasmid vector containing HLA-A*24:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:213 protein. This plasmid can be used for constructing HLA-A*24:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:214 Protein Expression Plasmid Vector	PHLAP9255075	Plasmid vector containing HLA-A*24:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:214 protein. This plasmid can be used for constructing HLA-A*24:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:215 Protein Expression Plasmid Vector	PHLAP9255076	Plasmid vector containing HLA-A*24:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:215 protein. This plasmid can be used for constructing HLA-A*24:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:216 Protein Expression Plasmid Vector	PHLAP9255077	Plasmid vector containing HLA-A*24:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:216 protein. This plasmid can be used for constructing HLA-A*24:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:217 Protein Expression Plasmid Vector	PHLAP9255078	Plasmid vector containing HLA-A*24:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:217 protein. This plasmid can be used for constructing HLA-A*24:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:218 Protein Expression Plasmid Vector	PHLAP9255079	Plasmid vector containing HLA-A*24:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:218 protein. This plasmid can be used for constructing HLA-A*24:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:219 Protein Expression Plasmid Vector	PHLAP9255080	Plasmid vector containing HLA-A*24:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:219 protein. This plasmid can be used for constructing HLA-A*24:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:22 Protein Expression Plasmid Vector	PHLAP9255081	Plasmid vector containing HLA-A*24:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:22 protein. This plasmid can be used for constructing HLA-A*24:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:220 Protein Expression Plasmid Vector	PHLAP9255082	Plasmid vector containing HLA-A*24:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:220 protein. This plasmid can be used for constructing HLA-A*24:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:221 Protein Expression Plasmid Vector	PHLAP9255083	Plasmid vector containing HLA-A*24:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:221 protein. This plasmid can be used for constructing HLA-A*24:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:222N Protein Expression Plasmid Vector	PHLAP9255084	Plasmid vector containing HLA-A*24:222N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:222N protein. This plasmid can be used for constructing HLA-A*24:222N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:222N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:223 Protein Expression Plasmid Vector	PHLAP9255085	Plasmid vector containing HLA-A*24:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:223 protein. This plasmid can be used for constructing HLA-A*24:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:224 Protein Expression Plasmid Vector	PHLAP9255086	Plasmid vector containing HLA-A*24:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:224 protein. This plasmid can be used for constructing HLA-A*24:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:225:01 Protein Expression Plasmid Vector	PHLAP9255087	Plasmid vector containing HLA-A*24:225:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:225:01 protein. This plasmid can be used for constructing HLA-A*24:225:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:225:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:225:02 Protein Expression Plasmid Vector	PHLAP9255088	Plasmid vector containing HLA-A*24:225:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:225:02 protein. This plasmid can be used for constructing HLA-A*24:225:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:225:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:226:01 Protein Expression Plasmid Vector	PHLAP9255089	Plasmid vector containing HLA-A*24:226:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:226:01 protein. This plasmid can be used for constructing HLA-A*24:226:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:226:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:226:02 Protein Expression Plasmid Vector	PHLAP9255090	Plasmid vector containing HLA-A*24:226:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:226:02 protein. This plasmid can be used for constructing HLA-A*24:226:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:226:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:227 Protein Expression Plasmid Vector	PHLAP9255091	Plasmid vector containing HLA-A*24:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:227 protein. This plasmid can be used for constructing HLA-A*24:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:228 Protein Expression Plasmid Vector	PHLAP9255092	Plasmid vector containing HLA-A*24:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:228 protein. This plasmid can be used for constructing HLA-A*24:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:229 Protein Expression Plasmid Vector	PHLAP9255093	Plasmid vector containing HLA-A*24:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:229 protein. This plasmid can be used for constructing HLA-A*24:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:23 Protein Expression Plasmid Vector	PHLAP9255094	Plasmid vector containing HLA-A*24:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:23 protein. This plasmid can be used for constructing HLA-A*24:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:230 Protein Expression Plasmid Vector	PHLAP9255095	Plasmid vector containing HLA-A*24:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:230 protein. This plasmid can be used for constructing HLA-A*24:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:231 Protein Expression Plasmid Vector	PHLAP9255096	Plasmid vector containing HLA-A*24:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:231 protein. This plasmid can be used for constructing HLA-A*24:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:232N Protein Expression Plasmid Vector	PHLAP9255097	Plasmid vector containing HLA-A*24:232N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:232N protein. This plasmid can be used for constructing HLA-A*24:232N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:232N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:233 Protein Expression Plasmid Vector	PHLAP9255098	Plasmid vector containing HLA-A*24:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:233 protein. This plasmid can be used for constructing HLA-A*24:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:234 Protein Expression Plasmid Vector	PHLAP9255099	Plasmid vector containing HLA-A*24:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:234 protein. This plasmid can be used for constructing HLA-A*24:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:235 Protein Expression Plasmid Vector	PHLAP9255100	Plasmid vector containing HLA-A*24:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:235 protein. This plasmid can be used for constructing HLA-A*24:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:236 Protein Expression Plasmid Vector	PHLAP9255101	Plasmid vector containing HLA-A*24:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:236 protein. This plasmid can be used for constructing HLA-A*24:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:237 Protein Expression Plasmid Vector	PHLAP9255102	Plasmid vector containing HLA-A*24:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:237 protein. This plasmid can be used for constructing HLA-A*24:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:238 Protein Expression Plasmid Vector	PHLAP9255103	Plasmid vector containing HLA-A*24:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:238 protein. This plasmid can be used for constructing HLA-A*24:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:239 Protein Expression Plasmid Vector	PHLAP9255104	Plasmid vector containing HLA-A*24:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:239 protein. This plasmid can be used for constructing HLA-A*24:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:24 Protein Expression Plasmid Vector	PHLAP9255105	Plasmid vector containing HLA-A*24:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:24 protein. This plasmid can be used for constructing HLA-A*24:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:240N Protein Expression Plasmid Vector	PHLAP9255106	Plasmid vector containing HLA-A*24:240N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:240N protein. This plasmid can be used for constructing HLA-A*24:240N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:240N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:241 Protein Expression Plasmid Vector	PHLAP9255107	Plasmid vector containing HLA-A*24:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:241 protein. This plasmid can be used for constructing HLA-A*24:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:242 Protein Expression Plasmid Vector	PHLAP9255108	Plasmid vector containing HLA-A*24:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:242 protein. This plasmid can be used for constructing HLA-A*24:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:243 Protein Expression Plasmid Vector	PHLAP9255109	Plasmid vector containing HLA-A*24:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:243 protein. This plasmid can be used for constructing HLA-A*24:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:244 Protein Expression Plasmid Vector	PHLAP9255110	Plasmid vector containing HLA-A*24:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:244 protein. This plasmid can be used for constructing HLA-A*24:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:245 Protein Expression Plasmid Vector	PHLAP9255111	Plasmid vector containing HLA-A*24:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:245 protein. This plasmid can be used for constructing HLA-A*24:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:246 Protein Expression Plasmid Vector	PHLAP9255112	Plasmid vector containing HLA-A*24:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:246 protein. This plasmid can be used for constructing HLA-A*24:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:247 Protein Expression Plasmid Vector	PHLAP9255113	Plasmid vector containing HLA-A*24:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:247 protein. This plasmid can be used for constructing HLA-A*24:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:248 Protein Expression Plasmid Vector	PHLAP9255114	Plasmid vector containing HLA-A*24:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:248 protein. This plasmid can be used for constructing HLA-A*24:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:249 Protein Expression Plasmid Vector	PHLAP9255115	Plasmid vector containing HLA-A*24:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:249 protein. This plasmid can be used for constructing HLA-A*24:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:25 Protein Expression Plasmid Vector	PHLAP9255116	Plasmid vector containing HLA-A*24:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:25 protein. This plasmid can be used for constructing HLA-A*24:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:250 Protein Expression Plasmid Vector	PHLAP9255117	Plasmid vector containing HLA-A*24:250 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:250 protein. This plasmid can be used for constructing HLA-A*24:250 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:250 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:251 Protein Expression Plasmid Vector	PHLAP9255118	Plasmid vector containing HLA-A*24:251 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:251 protein. This plasmid can be used for constructing HLA-A*24:251 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:251 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:252N Protein Expression Plasmid Vector	PHLAP9255119	Plasmid vector containing HLA-A*24:252N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:252N protein. This plasmid can be used for constructing HLA-A*24:252N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:252N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:253 Protein Expression Plasmid Vector	PHLAP9255120	Plasmid vector containing HLA-A*24:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:253 protein. This plasmid can be used for constructing HLA-A*24:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:254 Protein Expression Plasmid Vector	PHLAP9255121	Plasmid vector containing HLA-A*24:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:254 protein. This plasmid can be used for constructing HLA-A*24:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:255 Protein Expression Plasmid Vector	PHLAP9255122	Plasmid vector containing HLA-A*24:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:255 protein. This plasmid can be used for constructing HLA-A*24:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:256 Protein Expression Plasmid Vector	PHLAP9255123	Plasmid vector containing HLA-A*24:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:256 protein. This plasmid can be used for constructing HLA-A*24:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:257 Protein Expression Plasmid Vector	PHLAP9255124	Plasmid vector containing HLA-A*24:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:257 protein. This plasmid can be used for constructing HLA-A*24:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:258 Protein Expression Plasmid Vector	PHLAP9255125	Plasmid vector containing HLA-A*24:258 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:258 protein. This plasmid can be used for constructing HLA-A*24:258 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:258 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:259 Protein Expression Plasmid Vector	PHLAP9255126	Plasmid vector containing HLA-A*24:259 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:259 protein. This plasmid can be used for constructing HLA-A*24:259 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:259 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:26 Protein Expression Plasmid Vector	PHLAP9255127	Plasmid vector containing HLA-A*24:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:26 protein. This plasmid can be used for constructing HLA-A*24:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:260 Protein Expression Plasmid Vector	PHLAP9255128	Plasmid vector containing HLA-A*24:260 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:260 protein. This plasmid can be used for constructing HLA-A*24:260 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:260 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:261 Protein Expression Plasmid Vector	PHLAP9255129	Plasmid vector containing HLA-A*24:261 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:261 protein. This plasmid can be used for constructing HLA-A*24:261 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:261 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:262 Protein Expression Plasmid Vector	PHLAP9255130	Plasmid vector containing HLA-A*24:262 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:262 protein. This plasmid can be used for constructing HLA-A*24:262 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:262 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:263 Protein Expression Plasmid Vector	PHLAP9255131	Plasmid vector containing HLA-A*24:263 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:263 protein. This plasmid can be used for constructing HLA-A*24:263 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:263 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:264 Protein Expression Plasmid Vector	PHLAP9255132	Plasmid vector containing HLA-A*24:264 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:264 protein. This plasmid can be used for constructing HLA-A*24:264 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:264 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:265 Protein Expression Plasmid Vector	PHLAP9255133	Plasmid vector containing HLA-A*24:265 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:265 protein. This plasmid can be used for constructing HLA-A*24:265 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:265 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:266 Protein Expression Plasmid Vector	PHLAP9255134	Plasmid vector containing HLA-A*24:266 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:266 protein. This plasmid can be used for constructing HLA-A*24:266 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:266 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:267 Protein Expression Plasmid Vector	PHLAP9255135	Plasmid vector containing HLA-A*24:267 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:267 protein. This plasmid can be used for constructing HLA-A*24:267 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:267 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:268 Protein Expression Plasmid Vector	PHLAP9255136	Plasmid vector containing HLA-A*24:268 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:268 protein. This plasmid can be used for constructing HLA-A*24:268 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:268 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:269 Protein Expression Plasmid Vector	PHLAP9255137	Plasmid vector containing HLA-A*24:269 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:269 protein. This plasmid can be used for constructing HLA-A*24:269 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:269 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:27 Protein Expression Plasmid Vector	PHLAP9255138	Plasmid vector containing HLA-A*24:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:27 protein. This plasmid can be used for constructing HLA-A*24:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:270 Protein Expression Plasmid Vector	PHLAP9255139	Plasmid vector containing HLA-A*24:270 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:270 protein. This plasmid can be used for constructing HLA-A*24:270 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:270 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:271 Protein Expression Plasmid Vector	PHLAP9255140	Plasmid vector containing HLA-A*24:271 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:271 protein. This plasmid can be used for constructing HLA-A*24:271 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:271 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:272:01 Protein Expression Plasmid Vector	PHLAP9255141	Plasmid vector containing HLA-A*24:272:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:272:01 protein. This plasmid can be used for constructing HLA-A*24:272:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:272:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:272:02 Protein Expression Plasmid Vector	PHLAP9255142	Plasmid vector containing HLA-A*24:272:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:272:02 protein. This plasmid can be used for constructing HLA-A*24:272:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:272:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:273 Protein Expression Plasmid Vector	PHLAP9255143	Plasmid vector containing HLA-A*24:273 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:273 protein. This plasmid can be used for constructing HLA-A*24:273 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:273 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:274 Protein Expression Plasmid Vector	PHLAP9255144	Plasmid vector containing HLA-A*24:274 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:274 protein. This plasmid can be used for constructing HLA-A*24:274 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:274 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:275 Protein Expression Plasmid Vector	PHLAP9255145	Plasmid vector containing HLA-A*24:275 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:275 protein. This plasmid can be used for constructing HLA-A*24:275 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:275 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:276 Protein Expression Plasmid Vector	PHLAP9255146	Plasmid vector containing HLA-A*24:276 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:276 protein. This plasmid can be used for constructing HLA-A*24:276 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:276 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:277 Protein Expression Plasmid Vector	PHLAP9255147	Plasmid vector containing HLA-A*24:277 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:277 protein. This plasmid can be used for constructing HLA-A*24:277 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:277 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:278N Protein Expression Plasmid Vector	PHLAP9255148	Plasmid vector containing HLA-A*24:278N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:278N protein. This plasmid can be used for constructing HLA-A*24:278N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:278N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:279 Protein Expression Plasmid Vector	PHLAP9255149	Plasmid vector containing HLA-A*24:279 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:279 protein. This plasmid can be used for constructing HLA-A*24:279 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:279 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:28 Protein Expression Plasmid Vector	PHLAP9255150	Plasmid vector containing HLA-A*24:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:28 protein. This plasmid can be used for constructing HLA-A*24:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:280 Protein Expression Plasmid Vector	PHLAP9255151	Plasmid vector containing HLA-A*24:280 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:280 protein. This plasmid can be used for constructing HLA-A*24:280 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:280 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:281 Protein Expression Plasmid Vector	PHLAP9255152	Plasmid vector containing HLA-A*24:281 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:281 protein. This plasmid can be used for constructing HLA-A*24:281 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:281 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:282 Protein Expression Plasmid Vector	PHLAP9255153	Plasmid vector containing HLA-A*24:282 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:282 protein. This plasmid can be used for constructing HLA-A*24:282 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:282 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:283 Protein Expression Plasmid Vector	PHLAP9255154	Plasmid vector containing HLA-A*24:283 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:283 protein. This plasmid can be used for constructing HLA-A*24:283 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:283 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:284 Protein Expression Plasmid Vector	PHLAP9255155	Plasmid vector containing HLA-A*24:284 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:284 protein. This plasmid can be used for constructing HLA-A*24:284 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:284 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:285 Protein Expression Plasmid Vector	PHLAP9255156	Plasmid vector containing HLA-A*24:285 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:285 protein. This plasmid can be used for constructing HLA-A*24:285 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:285 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:286 Protein Expression Plasmid Vector	PHLAP9255157	Plasmid vector containing HLA-A*24:286 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:286 protein. This plasmid can be used for constructing HLA-A*24:286 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:286 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:287 Protein Expression Plasmid Vector	PHLAP9255158	Plasmid vector containing HLA-A*24:287 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:287 protein. This plasmid can be used for constructing HLA-A*24:287 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:287 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:288 Protein Expression Plasmid Vector	PHLAP9255159	Plasmid vector containing HLA-A*24:288 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:288 protein. This plasmid can be used for constructing HLA-A*24:288 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:288 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:289 Protein Expression Plasmid Vector	PHLAP9255160	Plasmid vector containing HLA-A*24:289 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:289 protein. This plasmid can be used for constructing HLA-A*24:289 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:289 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:29 Protein Expression Plasmid Vector	PHLAP9255161	Plasmid vector containing HLA-A*24:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:29 protein. This plasmid can be used for constructing HLA-A*24:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:290 Protein Expression Plasmid Vector	PHLAP9255162	Plasmid vector containing HLA-A*24:290 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:290 protein. This plasmid can be used for constructing HLA-A*24:290 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:290 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:291 Protein Expression Plasmid Vector	PHLAP9255163	Plasmid vector containing HLA-A*24:291 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:291 protein. This plasmid can be used for constructing HLA-A*24:291 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:291 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:292 Protein Expression Plasmid Vector	PHLAP9255164	Plasmid vector containing HLA-A*24:292 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:292 protein. This plasmid can be used for constructing HLA-A*24:292 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:292 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:293 Protein Expression Plasmid Vector	PHLAP9255165	Plasmid vector containing HLA-A*24:293 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:293 protein. This plasmid can be used for constructing HLA-A*24:293 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:293 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:294Q Protein Expression Plasmid Vector	PHLAP9255166	Plasmid vector containing HLA-A*24:294Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:294Q protein. This plasmid can be used for constructing HLA-A*24:294Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:294Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:295 Protein Expression Plasmid Vector	PHLAP9255167	Plasmid vector containing HLA-A*24:295 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:295 protein. This plasmid can be used for constructing HLA-A*24:295 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:295 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:296 Protein Expression Plasmid Vector	PHLAP9255168	Plasmid vector containing HLA-A*24:296 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:296 protein. This plasmid can be used for constructing HLA-A*24:296 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:296 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:297 Protein Expression Plasmid Vector	PHLAP9255169	Plasmid vector containing HLA-A*24:297 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:297 protein. This plasmid can be used for constructing HLA-A*24:297 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:297 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:298 Protein Expression Plasmid Vector	PHLAP9255170	Plasmid vector containing HLA-A*24:298 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:298 protein. This plasmid can be used for constructing HLA-A*24:298 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:298 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:299 Protein Expression Plasmid Vector	PHLAP9255171	Plasmid vector containing HLA-A*24:299 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:299 protein. This plasmid can be used for constructing HLA-A*24:299 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:299 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:30 Protein Expression Plasmid Vector	PHLAP9255172	Plasmid vector containing HLA-A*24:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:30 protein. This plasmid can be used for constructing HLA-A*24:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:300 Protein Expression Plasmid Vector	PHLAP9255173	Plasmid vector containing HLA-A*24:300 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:300 protein. This plasmid can be used for constructing HLA-A*24:300 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:300 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:301 Protein Expression Plasmid Vector	PHLAP9255174	Plasmid vector containing HLA-A*24:301 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:301 protein. This plasmid can be used for constructing HLA-A*24:301 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:301 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:302 Protein Expression Plasmid Vector	PHLAP9255175	Plasmid vector containing HLA-A*24:302 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:302 protein. This plasmid can be used for constructing HLA-A*24:302 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:302 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:303N Protein Expression Plasmid Vector	PHLAP9255176	Plasmid vector containing HLA-A*24:303N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:303N protein. This plasmid can be used for constructing HLA-A*24:303N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:303N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:304 Protein Expression Plasmid Vector	PHLAP9255177	Plasmid vector containing HLA-A*24:304 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:304 protein. This plasmid can be used for constructing HLA-A*24:304 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:304 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:305 Protein Expression Plasmid Vector	PHLAP9255178	Plasmid vector containing HLA-A*24:305 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:305 protein. This plasmid can be used for constructing HLA-A*24:305 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:305 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:306 Protein Expression Plasmid Vector	PHLAP9255179	Plasmid vector containing HLA-A*24:306 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:306 protein. This plasmid can be used for constructing HLA-A*24:306 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:306 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:307 Protein Expression Plasmid Vector	PHLAP9255180	Plasmid vector containing HLA-A*24:307 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:307 protein. This plasmid can be used for constructing HLA-A*24:307 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:307 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:308 Protein Expression Plasmid Vector	PHLAP9255181	Plasmid vector containing HLA-A*24:308 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:308 protein. This plasmid can be used for constructing HLA-A*24:308 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:308 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:309 Protein Expression Plasmid Vector	PHLAP9255182	Plasmid vector containing HLA-A*24:309 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:309 protein. This plasmid can be used for constructing HLA-A*24:309 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:309 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:31 Protein Expression Plasmid Vector	PHLAP9255183	Plasmid vector containing HLA-A*24:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:31 protein. This plasmid can be used for constructing HLA-A*24:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:310:01 Protein Expression Plasmid Vector	PHLAP9255184	Plasmid vector containing HLA-A*24:310:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:310:01 protein. This plasmid can be used for constructing HLA-A*24:310:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:310:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:310:02 Protein Expression Plasmid Vector	PHLAP9255185	Plasmid vector containing HLA-A*24:310:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:310:02 protein. This plasmid can be used for constructing HLA-A*24:310:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:310:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:311 Protein Expression Plasmid Vector	PHLAP9255186	Plasmid vector containing HLA-A*24:311 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:311 protein. This plasmid can be used for constructing HLA-A*24:311 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:311 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:312N Protein Expression Plasmid Vector	PHLAP9255187	Plasmid vector containing HLA-A*24:312N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:312N protein. This plasmid can be used for constructing HLA-A*24:312N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:312N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:313:01 Protein Expression Plasmid Vector	PHLAP9255188	Plasmid vector containing HLA-A*24:313:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:313:01 protein. This plasmid can be used for constructing HLA-A*24:313:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:313:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:313:02 Protein Expression Plasmid Vector	PHLAP9255189	Plasmid vector containing HLA-A*24:313:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:313:02 protein. This plasmid can be used for constructing HLA-A*24:313:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:313:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:314 Protein Expression Plasmid Vector	PHLAP9255190	Plasmid vector containing HLA-A*24:314 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:314 protein. This plasmid can be used for constructing HLA-A*24:314 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:314 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:315 Protein Expression Plasmid Vector	PHLAP9255191	Plasmid vector containing HLA-A*24:315 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:315 protein. This plasmid can be used for constructing HLA-A*24:315 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:315 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:316 Protein Expression Plasmid Vector	PHLAP9255192	Plasmid vector containing HLA-A*24:316 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:316 protein. This plasmid can be used for constructing HLA-A*24:316 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:316 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:317 Protein Expression Plasmid Vector	PHLAP9255193	Plasmid vector containing HLA-A*24:317 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:317 protein. This plasmid can be used for constructing HLA-A*24:317 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:317 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:318 Protein Expression Plasmid Vector	PHLAP9255194	Plasmid vector containing HLA-A*24:318 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:318 protein. This plasmid can be used for constructing HLA-A*24:318 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:318 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:319 Protein Expression Plasmid Vector	PHLAP9255195	Plasmid vector containing HLA-A*24:319 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:319 protein. This plasmid can be used for constructing HLA-A*24:319 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:319 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:32 Protein Expression Plasmid Vector	PHLAP9255196	Plasmid vector containing HLA-A*24:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:32 protein. This plasmid can be used for constructing HLA-A*24:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:320 Protein Expression Plasmid Vector	PHLAP9255197	Plasmid vector containing HLA-A*24:320 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:320 protein. This plasmid can be used for constructing HLA-A*24:320 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:320 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:321 Protein Expression Plasmid Vector	PHLAP9255198	Plasmid vector containing HLA-A*24:321 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:321 protein. This plasmid can be used for constructing HLA-A*24:321 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:321 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:322 Protein Expression Plasmid Vector	PHLAP9255199	Plasmid vector containing HLA-A*24:322 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:322 protein. This plasmid can be used for constructing HLA-A*24:322 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:322 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:323N Protein Expression Plasmid Vector	PHLAP9255200	Plasmid vector containing HLA-A*24:323N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:323N protein. This plasmid can be used for constructing HLA-A*24:323N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:323N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:324 Protein Expression Plasmid Vector	PHLAP9255201	Plasmid vector containing HLA-A*24:324 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:324 protein. This plasmid can be used for constructing HLA-A*24:324 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:324 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:325 Protein Expression Plasmid Vector	PHLAP9255202	Plasmid vector containing HLA-A*24:325 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:325 protein. This plasmid can be used for constructing HLA-A*24:325 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:325 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:326 Protein Expression Plasmid Vector	PHLAP9255203	Plasmid vector containing HLA-A*24:326 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:326 protein. This plasmid can be used for constructing HLA-A*24:326 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:326 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:327 Protein Expression Plasmid Vector	PHLAP9255204	Plasmid vector containing HLA-A*24:327 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:327 protein. This plasmid can be used for constructing HLA-A*24:327 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:327 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:328 Protein Expression Plasmid Vector	PHLAP9255205	Plasmid vector containing HLA-A*24:328 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:328 protein. This plasmid can be used for constructing HLA-A*24:328 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:328 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:329Q Protein Expression Plasmid Vector	PHLAP9255206	Plasmid vector containing HLA-A*24:329Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:329Q protein. This plasmid can be used for constructing HLA-A*24:329Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:329Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:33:01 Protein Expression Plasmid Vector	PHLAP9255207	Plasmid vector containing HLA-A*24:33:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:33:01 protein. This plasmid can be used for constructing HLA-A*24:33:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:33:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:33:02 Protein Expression Plasmid Vector	PHLAP9255208	Plasmid vector containing HLA-A*24:33:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:33:02 protein. This plasmid can be used for constructing HLA-A*24:33:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:33:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:330 Protein Expression Plasmid Vector	PHLAP9255209	Plasmid vector containing HLA-A*24:330 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:330 protein. This plasmid can be used for constructing HLA-A*24:330 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:330 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:331 Protein Expression Plasmid Vector	PHLAP9255210	Plasmid vector containing HLA-A*24:331 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:331 protein. This plasmid can be used for constructing HLA-A*24:331 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:331 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:332 Protein Expression Plasmid Vector	PHLAP9255211	Plasmid vector containing HLA-A*24:332 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:332 protein. This plasmid can be used for constructing HLA-A*24:332 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:332 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:333 Protein Expression Plasmid Vector	PHLAP9255212	Plasmid vector containing HLA-A*24:333 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:333 protein. This plasmid can be used for constructing HLA-A*24:333 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:333 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:334 Protein Expression Plasmid Vector	PHLAP9255213	Plasmid vector containing HLA-A*24:334 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:334 protein. This plasmid can be used for constructing HLA-A*24:334 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:334 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:335 Protein Expression Plasmid Vector	PHLAP9255214	Plasmid vector containing HLA-A*24:335 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:335 protein. This plasmid can be used for constructing HLA-A*24:335 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:335 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:336 Protein Expression Plasmid Vector	PHLAP9255215	Plasmid vector containing HLA-A*24:336 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:336 protein. This plasmid can be used for constructing HLA-A*24:336 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:336 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:337 Protein Expression Plasmid Vector	PHLAP9255216	Plasmid vector containing HLA-A*24:337 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:337 protein. This plasmid can be used for constructing HLA-A*24:337 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:337 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:338 Protein Expression Plasmid Vector	PHLAP9255217	Plasmid vector containing HLA-A*24:338 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:338 protein. This plasmid can be used for constructing HLA-A*24:338 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:338 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:339 Protein Expression Plasmid Vector	PHLAP9255218	Plasmid vector containing HLA-A*24:339 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:339 protein. This plasmid can be used for constructing HLA-A*24:339 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:339 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:34 Protein Expression Plasmid Vector	PHLAP9255219	Plasmid vector containing HLA-A*24:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:34 protein. This plasmid can be used for constructing HLA-A*24:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:340 Protein Expression Plasmid Vector	PHLAP9255220	Plasmid vector containing HLA-A*24:340 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:340 protein. This plasmid can be used for constructing HLA-A*24:340 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:340 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:341 Protein Expression Plasmid Vector	PHLAP9255221	Plasmid vector containing HLA-A*24:341 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:341 protein. This plasmid can be used for constructing HLA-A*24:341 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:341 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:342 Protein Expression Plasmid Vector	PHLAP9255222	Plasmid vector containing HLA-A*24:342 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:342 protein. This plasmid can be used for constructing HLA-A*24:342 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:342 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:343 Protein Expression Plasmid Vector	PHLAP9255223	Plasmid vector containing HLA-A*24:343 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:343 protein. This plasmid can be used for constructing HLA-A*24:343 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:343 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:344 Protein Expression Plasmid Vector	PHLAP9255224	Plasmid vector containing HLA-A*24:344 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:344 protein. This plasmid can be used for constructing HLA-A*24:344 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:344 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:345 Protein Expression Plasmid Vector	PHLAP9255225	Plasmid vector containing HLA-A*24:345 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:345 protein. This plasmid can be used for constructing HLA-A*24:345 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:345 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:346 Protein Expression Plasmid Vector	PHLAP9255226	Plasmid vector containing HLA-A*24:346 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:346 protein. This plasmid can be used for constructing HLA-A*24:346 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:346 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:347:01 Protein Expression Plasmid Vector	PHLAP9255227	Plasmid vector containing HLA-A*24:347:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:347:01 protein. This plasmid can be used for constructing HLA-A*24:347:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:347:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:347:02 Protein Expression Plasmid Vector	PHLAP9255228	Plasmid vector containing HLA-A*24:347:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:347:02 protein. This plasmid can be used for constructing HLA-A*24:347:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:347:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:348 Protein Expression Plasmid Vector	PHLAP9255229	Plasmid vector containing HLA-A*24:348 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:348 protein. This plasmid can be used for constructing HLA-A*24:348 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:348 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:349 Protein Expression Plasmid Vector	PHLAP9255230	Plasmid vector containing HLA-A*24:349 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:349 protein. This plasmid can be used for constructing HLA-A*24:349 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:349 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:35 Protein Expression Plasmid Vector	PHLAP9255231	Plasmid vector containing HLA-A*24:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:35 protein. This plasmid can be used for constructing HLA-A*24:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:350 Protein Expression Plasmid Vector	PHLAP9255232	Plasmid vector containing HLA-A*24:350 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:350 protein. This plasmid can be used for constructing HLA-A*24:350 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:350 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:351 Protein Expression Plasmid Vector	PHLAP9255233	Plasmid vector containing HLA-A*24:351 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:351 protein. This plasmid can be used for constructing HLA-A*24:351 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:351 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:352 Protein Expression Plasmid Vector	PHLAP9255234	Plasmid vector containing HLA-A*24:352 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:352 protein. This plasmid can be used for constructing HLA-A*24:352 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:352 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:353 Protein Expression Plasmid Vector	PHLAP9255235	Plasmid vector containing HLA-A*24:353 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:353 protein. This plasmid can be used for constructing HLA-A*24:353 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:353 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:354 Protein Expression Plasmid Vector	PHLAP9255236	Plasmid vector containing HLA-A*24:354 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:354 protein. This plasmid can be used for constructing HLA-A*24:354 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:354 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:355 Protein Expression Plasmid Vector	PHLAP9255237	Plasmid vector containing HLA-A*24:355 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:355 protein. This plasmid can be used for constructing HLA-A*24:355 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:355 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:356 Protein Expression Plasmid Vector	PHLAP9255238	Plasmid vector containing HLA-A*24:356 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:356 protein. This plasmid can be used for constructing HLA-A*24:356 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:356 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:357N Protein Expression Plasmid Vector	PHLAP9255239	Plasmid vector containing HLA-A*24:357N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:357N protein. This plasmid can be used for constructing HLA-A*24:357N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:357N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:358 Protein Expression Plasmid Vector	PHLAP9255240	Plasmid vector containing HLA-A*24:358 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:358 protein. This plasmid can be used for constructing HLA-A*24:358 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:358 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:359N Protein Expression Plasmid Vector	PHLAP9255241	Plasmid vector containing HLA-A*24:359N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:359N protein. This plasmid can be used for constructing HLA-A*24:359N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:359N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:360 Protein Expression Plasmid Vector	PHLAP9255242	Plasmid vector containing HLA-A*24:360 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:360 protein. This plasmid can be used for constructing HLA-A*24:360 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:360 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:361 Protein Expression Plasmid Vector	PHLAP9255243	Plasmid vector containing HLA-A*24:361 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:361 protein. This plasmid can be used for constructing HLA-A*24:361 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:361 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:362 Protein Expression Plasmid Vector	PHLAP9255244	Plasmid vector containing HLA-A*24:362 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:362 protein. This plasmid can be used for constructing HLA-A*24:362 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:362 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:363 Protein Expression Plasmid Vector	PHLAP9255245	Plasmid vector containing HLA-A*24:363 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:363 protein. This plasmid can be used for constructing HLA-A*24:363 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:363 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:364 Protein Expression Plasmid Vector	PHLAP9255246	Plasmid vector containing HLA-A*24:364 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:364 protein. This plasmid can be used for constructing HLA-A*24:364 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:364 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:365 Protein Expression Plasmid Vector	PHLAP9255247	Plasmid vector containing HLA-A*24:365 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:365 protein. This plasmid can be used for constructing HLA-A*24:365 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:365 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:366 Protein Expression Plasmid Vector	PHLAP9255248	Plasmid vector containing HLA-A*24:366 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:366 protein. This plasmid can be used for constructing HLA-A*24:366 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:366 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:367 Protein Expression Plasmid Vector	PHLAP9255249	Plasmid vector containing HLA-A*24:367 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:367 protein. This plasmid can be used for constructing HLA-A*24:367 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:367 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:368 Protein Expression Plasmid Vector	PHLAP9255250	Plasmid vector containing HLA-A*24:368 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:368 protein. This plasmid can be used for constructing HLA-A*24:368 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:368 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:369 Protein Expression Plasmid Vector	PHLAP9255251	Plasmid vector containing HLA-A*24:369 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:369 protein. This plasmid can be used for constructing HLA-A*24:369 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:369 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:36N Protein Expression Plasmid Vector	PHLAP9255252	Plasmid vector containing HLA-A*24:36N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:36N protein. This plasmid can be used for constructing HLA-A*24:36N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:36N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:37 Protein Expression Plasmid Vector	PHLAP9255253	Plasmid vector containing HLA-A*24:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:37 protein. This plasmid can be used for constructing HLA-A*24:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:370N Protein Expression Plasmid Vector	PHLAP9255254	Plasmid vector containing HLA-A*24:370N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:370N protein. This plasmid can be used for constructing HLA-A*24:370N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:370N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:371 Protein Expression Plasmid Vector	PHLAP9255255	Plasmid vector containing HLA-A*24:371 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:371 protein. This plasmid can be used for constructing HLA-A*24:371 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:371 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:372 Protein Expression Plasmid Vector	PHLAP9255256	Plasmid vector containing HLA-A*24:372 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:372 protein. This plasmid can be used for constructing HLA-A*24:372 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:372 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:373 Protein Expression Plasmid Vector	PHLAP9255257	Plasmid vector containing HLA-A*24:373 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:373 protein. This plasmid can be used for constructing HLA-A*24:373 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:373 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:374 Protein Expression Plasmid Vector	PHLAP9255258	Plasmid vector containing HLA-A*24:374 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:374 protein. This plasmid can be used for constructing HLA-A*24:374 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:374 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:375 Protein Expression Plasmid Vector	PHLAP9255259	Plasmid vector containing HLA-A*24:375 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:375 protein. This plasmid can be used for constructing HLA-A*24:375 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:375 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:376 Protein Expression Plasmid Vector	PHLAP9255260	Plasmid vector containing HLA-A*24:376 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:376 protein. This plasmid can be used for constructing HLA-A*24:376 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:376 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:377 Protein Expression Plasmid Vector	PHLAP9255261	Plasmid vector containing HLA-A*24:377 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:377 protein. This plasmid can be used for constructing HLA-A*24:377 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:377 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:378Q Protein Expression Plasmid Vector	PHLAP9255262	Plasmid vector containing HLA-A*24:378Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:378Q protein. This plasmid can be used for constructing HLA-A*24:378Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:378Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:379 Protein Expression Plasmid Vector	PHLAP9255263	Plasmid vector containing HLA-A*24:379 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:379 protein. This plasmid can be used for constructing HLA-A*24:379 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:379 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:38 Protein Expression Plasmid Vector	PHLAP9255264	Plasmid vector containing HLA-A*24:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:38 protein. This plasmid can be used for constructing HLA-A*24:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:380 Protein Expression Plasmid Vector	PHLAP9255265	Plasmid vector containing HLA-A*24:380 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:380 protein. This plasmid can be used for constructing HLA-A*24:380 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:380 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:381 Protein Expression Plasmid Vector	PHLAP9255266	Plasmid vector containing HLA-A*24:381 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:381 protein. This plasmid can be used for constructing HLA-A*24:381 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:381 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:382 Protein Expression Plasmid Vector	PHLAP9255267	Plasmid vector containing HLA-A*24:382 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:382 protein. This plasmid can be used for constructing HLA-A*24:382 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:382 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:383 Protein Expression Plasmid Vector	PHLAP9255268	Plasmid vector containing HLA-A*24:383 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:383 protein. This plasmid can be used for constructing HLA-A*24:383 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:383 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:384 Protein Expression Plasmid Vector	PHLAP9255269	Plasmid vector containing HLA-A*24:384 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:384 protein. This plasmid can be used for constructing HLA-A*24:384 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:384 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:385 Protein Expression Plasmid Vector	PHLAP9255270	Plasmid vector containing HLA-A*24:385 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:385 protein. This plasmid can be used for constructing HLA-A*24:385 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:385 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:386 Protein Expression Plasmid Vector	PHLAP9255271	Plasmid vector containing HLA-A*24:386 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:386 protein. This plasmid can be used for constructing HLA-A*24:386 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:386 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:387 Protein Expression Plasmid Vector	PHLAP9255272	Plasmid vector containing HLA-A*24:387 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:387 protein. This plasmid can be used for constructing HLA-A*24:387 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:387 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:388N Protein Expression Plasmid Vector	PHLAP9255273	Plasmid vector containing HLA-A*24:388N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:388N protein. This plasmid can be used for constructing HLA-A*24:388N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:388N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:389N Protein Expression Plasmid Vector	PHLAP9255274	Plasmid vector containing HLA-A*24:389N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:389N protein. This plasmid can be used for constructing HLA-A*24:389N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:389N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:39 Protein Expression Plasmid Vector	PHLAP9255275	Plasmid vector containing HLA-A*24:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:39 protein. This plasmid can be used for constructing HLA-A*24:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:390 Protein Expression Plasmid Vector	PHLAP9255276	Plasmid vector containing HLA-A*24:390 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:390 protein. This plasmid can be used for constructing HLA-A*24:390 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:390 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:391 Protein Expression Plasmid Vector	PHLAP9255277	Plasmid vector containing HLA-A*24:391 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:391 protein. This plasmid can be used for constructing HLA-A*24:391 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:391 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:392 Protein Expression Plasmid Vector	PHLAP9255278	Plasmid vector containing HLA-A*24:392 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:392 protein. This plasmid can be used for constructing HLA-A*24:392 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:392 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:393 Protein Expression Plasmid Vector	PHLAP9255279	Plasmid vector containing HLA-A*24:393 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:393 protein. This plasmid can be used for constructing HLA-A*24:393 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:393 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:394 Protein Expression Plasmid Vector	PHLAP9255280	Plasmid vector containing HLA-A*24:394 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:394 protein. This plasmid can be used for constructing HLA-A*24:394 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:394 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:395 Protein Expression Plasmid Vector	PHLAP9255281	Plasmid vector containing HLA-A*24:395 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:395 protein. This plasmid can be used for constructing HLA-A*24:395 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:395 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:396N Protein Expression Plasmid Vector	PHLAP9255282	Plasmid vector containing HLA-A*24:396N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:396N protein. This plasmid can be used for constructing HLA-A*24:396N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:396N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:397 Protein Expression Plasmid Vector	PHLAP9255283	Plasmid vector containing HLA-A*24:397 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:397 protein. This plasmid can be used for constructing HLA-A*24:397 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:397 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:398 Protein Expression Plasmid Vector	PHLAP9255284	Plasmid vector containing HLA-A*24:398 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:398 protein. This plasmid can be used for constructing HLA-A*24:398 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:398 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:399 Protein Expression Plasmid Vector	PHLAP9255285	Plasmid vector containing HLA-A*24:399 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:399 protein. This plasmid can be used for constructing HLA-A*24:399 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:399 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:400 Protein Expression Plasmid Vector	PHLAP9255286	Plasmid vector containing HLA-A*24:400 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:400 protein. This plasmid can be used for constructing HLA-A*24:400 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:400 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:401 Protein Expression Plasmid Vector	PHLAP9255287	Plasmid vector containing HLA-A*24:401 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:401 protein. This plasmid can be used for constructing HLA-A*24:401 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:401 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:402 Protein Expression Plasmid Vector	PHLAP9255288	Plasmid vector containing HLA-A*24:402 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:402 protein. This plasmid can be used for constructing HLA-A*24:402 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:402 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:403 Protein Expression Plasmid Vector	PHLAP9255289	Plasmid vector containing HLA-A*24:403 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:403 protein. This plasmid can be used for constructing HLA-A*24:403 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:403 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:404 Protein Expression Plasmid Vector	PHLAP9255290	Plasmid vector containing HLA-A*24:404 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:404 protein. This plasmid can be used for constructing HLA-A*24:404 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:404 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:405 Protein Expression Plasmid Vector	PHLAP9255291	Plasmid vector containing HLA-A*24:405 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:405 protein. This plasmid can be used for constructing HLA-A*24:405 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:405 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:406 Protein Expression Plasmid Vector	PHLAP9255292	Plasmid vector containing HLA-A*24:406 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:406 protein. This plasmid can be used for constructing HLA-A*24:406 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:406 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:407 Protein Expression Plasmid Vector	PHLAP9255293	Plasmid vector containing HLA-A*24:407 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:407 protein. This plasmid can be used for constructing HLA-A*24:407 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:407 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:408N Protein Expression Plasmid Vector	PHLAP9255294	Plasmid vector containing HLA-A*24:408N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:408N protein. This plasmid can be used for constructing HLA-A*24:408N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:408N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:409 Protein Expression Plasmid Vector	PHLAP9255295	Plasmid vector containing HLA-A*24:409 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:409 protein. This plasmid can be used for constructing HLA-A*24:409 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:409 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:40N Protein Expression Plasmid Vector	PHLAP9255296	Plasmid vector containing HLA-A*24:40N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:40N protein. This plasmid can be used for constructing HLA-A*24:40N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:40N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:41 Protein Expression Plasmid Vector	PHLAP9255297	Plasmid vector containing HLA-A*24:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:41 protein. This plasmid can be used for constructing HLA-A*24:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:410 Protein Expression Plasmid Vector	PHLAP9255298	Plasmid vector containing HLA-A*24:410 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:410 protein. This plasmid can be used for constructing HLA-A*24:410 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:410 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:411 Protein Expression Plasmid Vector	PHLAP9255299	Plasmid vector containing HLA-A*24:411 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:411 protein. This plasmid can be used for constructing HLA-A*24:411 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:411 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:412 Protein Expression Plasmid Vector	PHLAP9255300	Plasmid vector containing HLA-A*24:412 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:412 protein. This plasmid can be used for constructing HLA-A*24:412 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:412 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:413 Protein Expression Plasmid Vector	PHLAP9255301	Plasmid vector containing HLA-A*24:413 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:413 protein. This plasmid can be used for constructing HLA-A*24:413 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:413 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:414 Protein Expression Plasmid Vector	PHLAP9255302	Plasmid vector containing HLA-A*24:414 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:414 protein. This plasmid can be used for constructing HLA-A*24:414 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:414 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:415 Protein Expression Plasmid Vector	PHLAP9255303	Plasmid vector containing HLA-A*24:415 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:415 protein. This plasmid can be used for constructing HLA-A*24:415 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:415 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:416 Protein Expression Plasmid Vector	PHLAP9255304	Plasmid vector containing HLA-A*24:416 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:416 protein. This plasmid can be used for constructing HLA-A*24:416 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:416 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:417 Protein Expression Plasmid Vector	PHLAP9255305	Plasmid vector containing HLA-A*24:417 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:417 protein. This plasmid can be used for constructing HLA-A*24:417 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:417 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:418 Protein Expression Plasmid Vector	PHLAP9255306	Plasmid vector containing HLA-A*24:418 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:418 protein. This plasmid can be used for constructing HLA-A*24:418 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:418 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:419 Protein Expression Plasmid Vector	PHLAP9255307	Plasmid vector containing HLA-A*24:419 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:419 protein. This plasmid can be used for constructing HLA-A*24:419 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:419 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:42 Protein Expression Plasmid Vector	PHLAP9255308	Plasmid vector containing HLA-A*24:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:42 protein. This plasmid can be used for constructing HLA-A*24:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:420 Protein Expression Plasmid Vector	PHLAP9255309	Plasmid vector containing HLA-A*24:420 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:420 protein. This plasmid can be used for constructing HLA-A*24:420 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:420 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:421 Protein Expression Plasmid Vector	PHLAP9255310	Plasmid vector containing HLA-A*24:421 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:421 protein. This plasmid can be used for constructing HLA-A*24:421 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:421 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:422 Protein Expression Plasmid Vector	PHLAP9255311	Plasmid vector containing HLA-A*24:422 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:422 protein. This plasmid can be used for constructing HLA-A*24:422 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:422 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:423 Protein Expression Plasmid Vector	PHLAP9255312	Plasmid vector containing HLA-A*24:423 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:423 protein. This plasmid can be used for constructing HLA-A*24:423 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:423 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:424 Protein Expression Plasmid Vector	PHLAP9255313	Plasmid vector containing HLA-A*24:424 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:424 protein. This plasmid can be used for constructing HLA-A*24:424 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:424 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:425N Protein Expression Plasmid Vector	PHLAP9255314	Plasmid vector containing HLA-A*24:425N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:425N protein. This plasmid can be used for constructing HLA-A*24:425N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:425N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:426N Protein Expression Plasmid Vector	PHLAP9255315	Plasmid vector containing HLA-A*24:426N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:426N protein. This plasmid can be used for constructing HLA-A*24:426N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:426N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:427N Protein Expression Plasmid Vector	PHLAP9255316	Plasmid vector containing HLA-A*24:427N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:427N protein. This plasmid can be used for constructing HLA-A*24:427N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:427N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:428N Protein Expression Plasmid Vector	PHLAP9255317	Plasmid vector containing HLA-A*24:428N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:428N protein. This plasmid can be used for constructing HLA-A*24:428N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:428N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:429N Protein Expression Plasmid Vector	PHLAP9255318	Plasmid vector containing HLA-A*24:429N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:429N protein. This plasmid can be used for constructing HLA-A*24:429N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:429N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:43 Protein Expression Plasmid Vector	PHLAP9255319	Plasmid vector containing HLA-A*24:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:43 protein. This plasmid can be used for constructing HLA-A*24:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:430N Protein Expression Plasmid Vector	PHLAP9255320	Plasmid vector containing HLA-A*24:430N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:430N protein. This plasmid can be used for constructing HLA-A*24:430N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:430N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:431:01 Protein Expression Plasmid Vector	PHLAP9255321	Plasmid vector containing HLA-A*24:431:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:431:01 protein. This plasmid can be used for constructing HLA-A*24:431:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:431:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:431:02 Protein Expression Plasmid Vector	PHLAP9255322	Plasmid vector containing HLA-A*24:431:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:431:02 protein. This plasmid can be used for constructing HLA-A*24:431:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:431:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:432 Protein Expression Plasmid Vector	PHLAP9255323	Plasmid vector containing HLA-A*24:432 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:432 protein. This plasmid can be used for constructing HLA-A*24:432 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:432 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:433N Protein Expression Plasmid Vector	PHLAP9255324	Plasmid vector containing HLA-A*24:433N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:433N protein. This plasmid can be used for constructing HLA-A*24:433N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:433N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:434N Protein Expression Plasmid Vector	PHLAP9255325	Plasmid vector containing HLA-A*24:434N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:434N protein. This plasmid can be used for constructing HLA-A*24:434N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:434N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:435N Protein Expression Plasmid Vector	PHLAP9255326	Plasmid vector containing HLA-A*24:435N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:435N protein. This plasmid can be used for constructing HLA-A*24:435N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:435N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:436 Protein Expression Plasmid Vector	PHLAP9255327	Plasmid vector containing HLA-A*24:436 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:436 protein. This plasmid can be used for constructing HLA-A*24:436 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:436 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:437 Protein Expression Plasmid Vector	PHLAP9255328	Plasmid vector containing HLA-A*24:437 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:437 protein. This plasmid can be used for constructing HLA-A*24:437 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:437 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:438 Protein Expression Plasmid Vector	PHLAP9255329	Plasmid vector containing HLA-A*24:438 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:438 protein. This plasmid can be used for constructing HLA-A*24:438 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:438 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:439 Protein Expression Plasmid Vector	PHLAP9255330	Plasmid vector containing HLA-A*24:439 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:439 protein. This plasmid can be used for constructing HLA-A*24:439 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:439 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:44 Protein Expression Plasmid Vector	PHLAP9255331	Plasmid vector containing HLA-A*24:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:44 protein. This plasmid can be used for constructing HLA-A*24:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:440 Protein Expression Plasmid Vector	PHLAP9255332	Plasmid vector containing HLA-A*24:440 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:440 protein. This plasmid can be used for constructing HLA-A*24:440 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:440 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:441 Protein Expression Plasmid Vector	PHLAP9255333	Plasmid vector containing HLA-A*24:441 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:441 protein. This plasmid can be used for constructing HLA-A*24:441 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:441 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:442 Protein Expression Plasmid Vector	PHLAP9255334	Plasmid vector containing HLA-A*24:442 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:442 protein. This plasmid can be used for constructing HLA-A*24:442 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:442 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:443 Protein Expression Plasmid Vector	PHLAP9255335	Plasmid vector containing HLA-A*24:443 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:443 protein. This plasmid can be used for constructing HLA-A*24:443 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:443 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:444 Protein Expression Plasmid Vector	PHLAP9255336	Plasmid vector containing HLA-A*24:444 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:444 protein. This plasmid can be used for constructing HLA-A*24:444 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:444 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:445N Protein Expression Plasmid Vector	PHLAP9255337	Plasmid vector containing HLA-A*24:445N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:445N protein. This plasmid can be used for constructing HLA-A*24:445N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:445N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:446 Protein Expression Plasmid Vector	PHLAP9255338	Plasmid vector containing HLA-A*24:446 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:446 protein. This plasmid can be used for constructing HLA-A*24:446 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:446 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:447Q Protein Expression Plasmid Vector	PHLAP9255339	Plasmid vector containing HLA-A*24:447Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:447Q protein. This plasmid can be used for constructing HLA-A*24:447Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:447Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:448N Protein Expression Plasmid Vector	PHLAP9255340	Plasmid vector containing HLA-A*24:448N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:448N protein. This plasmid can be used for constructing HLA-A*24:448N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:448N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:449 Protein Expression Plasmid Vector	PHLAP9255341	Plasmid vector containing HLA-A*24:449 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:449 protein. This plasmid can be used for constructing HLA-A*24:449 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:449 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:450Q Protein Expression Plasmid Vector	PHLAP9255342	Plasmid vector containing HLA-A*24:450Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:450Q protein. This plasmid can be used for constructing HLA-A*24:450Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:450Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:451 Protein Expression Plasmid Vector	PHLAP9255343	Plasmid vector containing HLA-A*24:451 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:451 protein. This plasmid can be used for constructing HLA-A*24:451 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:451 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:452:01 Protein Expression Plasmid Vector	PHLAP9255344	Plasmid vector containing HLA-A*24:452:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:452:01 protein. This plasmid can be used for constructing HLA-A*24:452:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:452:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:452:02 Protein Expression Plasmid Vector	PHLAP9255345	Plasmid vector containing HLA-A*24:452:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:452:02 protein. This plasmid can be used for constructing HLA-A*24:452:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:452:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:453 Protein Expression Plasmid Vector	PHLAP9255346	Plasmid vector containing HLA-A*24:453 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:453 protein. This plasmid can be used for constructing HLA-A*24:453 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:453 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:454 Protein Expression Plasmid Vector	PHLAP9255347	Plasmid vector containing HLA-A*24:454 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:454 protein. This plasmid can be used for constructing HLA-A*24:454 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:454 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:455 Protein Expression Plasmid Vector	PHLAP9255348	Plasmid vector containing HLA-A*24:455 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:455 protein. This plasmid can be used for constructing HLA-A*24:455 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:455 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:456N Protein Expression Plasmid Vector	PHLAP9255349	Plasmid vector containing HLA-A*24:456N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:456N protein. This plasmid can be used for constructing HLA-A*24:456N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:456N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:457 Protein Expression Plasmid Vector	PHLAP9255350	Plasmid vector containing HLA-A*24:457 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:457 protein. This plasmid can be used for constructing HLA-A*24:457 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:457 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:458 Protein Expression Plasmid Vector	PHLAP9255351	Plasmid vector containing HLA-A*24:458 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:458 protein. This plasmid can be used for constructing HLA-A*24:458 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:458 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:459:01 Protein Expression Plasmid Vector	PHLAP9255352	Plasmid vector containing HLA-A*24:459:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:459:01 protein. This plasmid can be used for constructing HLA-A*24:459:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:459:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:459:02 Protein Expression Plasmid Vector	PHLAP9255353	Plasmid vector containing HLA-A*24:459:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:459:02 protein. This plasmid can be used for constructing HLA-A*24:459:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:459:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:45N Protein Expression Plasmid Vector	PHLAP9255354	Plasmid vector containing HLA-A*24:45N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:45N protein. This plasmid can be used for constructing HLA-A*24:45N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:45N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:46 Protein Expression Plasmid Vector	PHLAP9255355	Plasmid vector containing HLA-A*24:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:46 protein. This plasmid can be used for constructing HLA-A*24:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:460:01:01 Protein Expression Plasmid Vector	PHLAP9255356	Plasmid vector containing HLA-A*24:460:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:460:01:01 protein. This plasmid can be used for constructing HLA-A*24:460:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:460:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:460:01:02 Protein Expression Plasmid Vector	PHLAP9255357	Plasmid vector containing HLA-A*24:460:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:460:01:02 protein. This plasmid can be used for constructing HLA-A*24:460:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:460:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:461 Protein Expression Plasmid Vector	PHLAP9255358	Plasmid vector containing HLA-A*24:461 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:461 protein. This plasmid can be used for constructing HLA-A*24:461 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:461 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:462 Protein Expression Plasmid Vector	PHLAP9255359	Plasmid vector containing HLA-A*24:462 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:462 protein. This plasmid can be used for constructing HLA-A*24:462 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:462 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:463 Protein Expression Plasmid Vector	PHLAP9255360	Plasmid vector containing HLA-A*24:463 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:463 protein. This plasmid can be used for constructing HLA-A*24:463 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:463 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:464 Protein Expression Plasmid Vector	PHLAP9255361	Plasmid vector containing HLA-A*24:464 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:464 protein. This plasmid can be used for constructing HLA-A*24:464 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:464 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:465 Protein Expression Plasmid Vector	PHLAP9255362	Plasmid vector containing HLA-A*24:465 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:465 protein. This plasmid can be used for constructing HLA-A*24:465 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:465 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:466 Protein Expression Plasmid Vector	PHLAP9255363	Plasmid vector containing HLA-A*24:466 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:466 protein. This plasmid can be used for constructing HLA-A*24:466 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:466 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:467N Protein Expression Plasmid Vector	PHLAP9255364	Plasmid vector containing HLA-A*24:467N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:467N protein. This plasmid can be used for constructing HLA-A*24:467N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:467N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:468 Protein Expression Plasmid Vector	PHLAP9255365	Plasmid vector containing HLA-A*24:468 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:468 protein. This plasmid can be used for constructing HLA-A*24:468 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:468 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:469 Protein Expression Plasmid Vector	PHLAP9255366	Plasmid vector containing HLA-A*24:469 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:469 protein. This plasmid can be used for constructing HLA-A*24:469 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:469 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:47 Protein Expression Plasmid Vector	PHLAP9255367	Plasmid vector containing HLA-A*24:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:47 protein. This plasmid can be used for constructing HLA-A*24:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:470 Protein Expression Plasmid Vector	PHLAP9255368	Plasmid vector containing HLA-A*24:470 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:470 protein. This plasmid can be used for constructing HLA-A*24:470 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:470 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:471 Protein Expression Plasmid Vector	PHLAP9255369	Plasmid vector containing HLA-A*24:471 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:471 protein. This plasmid can be used for constructing HLA-A*24:471 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:471 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:472 Protein Expression Plasmid Vector	PHLAP9255370	Plasmid vector containing HLA-A*24:472 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:472 protein. This plasmid can be used for constructing HLA-A*24:472 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:472 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:473Q Protein Expression Plasmid Vector	PHLAP9255371	Plasmid vector containing HLA-A*24:473Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:473Q protein. This plasmid can be used for constructing HLA-A*24:473Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:473Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:474 Protein Expression Plasmid Vector	PHLAP9255372	Plasmid vector containing HLA-A*24:474 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:474 protein. This plasmid can be used for constructing HLA-A*24:474 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:474 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:475 Protein Expression Plasmid Vector	PHLAP9255373	Plasmid vector containing HLA-A*24:475 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:475 protein. This plasmid can be used for constructing HLA-A*24:475 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:475 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:476 Protein Expression Plasmid Vector	PHLAP9255374	Plasmid vector containing HLA-A*24:476 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:476 protein. This plasmid can be used for constructing HLA-A*24:476 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:476 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:477 Protein Expression Plasmid Vector	PHLAP9255375	Plasmid vector containing HLA-A*24:477 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:477 protein. This plasmid can be used for constructing HLA-A*24:477 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:477 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:478 Protein Expression Plasmid Vector	PHLAP9255376	Plasmid vector containing HLA-A*24:478 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:478 protein. This plasmid can be used for constructing HLA-A*24:478 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:478 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:479Q Protein Expression Plasmid Vector	PHLAP9255377	Plasmid vector containing HLA-A*24:479Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:479Q protein. This plasmid can be used for constructing HLA-A*24:479Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:479Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:480 Protein Expression Plasmid Vector	PHLAP9255378	Plasmid vector containing HLA-A*24:480 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:480 protein. This plasmid can be used for constructing HLA-A*24:480 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:480 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:481 Protein Expression Plasmid Vector	PHLAP9255379	Plasmid vector containing HLA-A*24:481 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:481 protein. This plasmid can be used for constructing HLA-A*24:481 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:481 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:482 Protein Expression Plasmid Vector	PHLAP9255380	Plasmid vector containing HLA-A*24:482 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:482 protein. This plasmid can be used for constructing HLA-A*24:482 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:482 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:483 Protein Expression Plasmid Vector	PHLAP9255381	Plasmid vector containing HLA-A*24:483 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:483 protein. This plasmid can be used for constructing HLA-A*24:483 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:483 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:484 Protein Expression Plasmid Vector	PHLAP9255382	Plasmid vector containing HLA-A*24:484 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:484 protein. This plasmid can be used for constructing HLA-A*24:484 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:484 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:485 Protein Expression Plasmid Vector	PHLAP9255383	Plasmid vector containing HLA-A*24:485 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:485 protein. This plasmid can be used for constructing HLA-A*24:485 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:485 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:486 Protein Expression Plasmid Vector	PHLAP9255384	Plasmid vector containing HLA-A*24:486 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:486 protein. This plasmid can be used for constructing HLA-A*24:486 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:486 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:487 Protein Expression Plasmid Vector	PHLAP9255385	Plasmid vector containing HLA-A*24:487 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:487 protein. This plasmid can be used for constructing HLA-A*24:487 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:487 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:488 Protein Expression Plasmid Vector	PHLAP9255386	Plasmid vector containing HLA-A*24:488 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:488 protein. This plasmid can be used for constructing HLA-A*24:488 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:488 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:489 Protein Expression Plasmid Vector	PHLAP9255387	Plasmid vector containing HLA-A*24:489 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:489 protein. This plasmid can be used for constructing HLA-A*24:489 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:489 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:48N Protein Expression Plasmid Vector	PHLAP9255388	Plasmid vector containing HLA-A*24:48N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:48N protein. This plasmid can be used for constructing HLA-A*24:48N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:48N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:49:01 Protein Expression Plasmid Vector	PHLAP9255389	Plasmid vector containing HLA-A*24:49:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:49:01 protein. This plasmid can be used for constructing HLA-A*24:49:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:49:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:49:02 Protein Expression Plasmid Vector	PHLAP9255390	Plasmid vector containing HLA-A*24:49:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:49:02 protein. This plasmid can be used for constructing HLA-A*24:49:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:49:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:490 Protein Expression Plasmid Vector	PHLAP9255391	Plasmid vector containing HLA-A*24:490 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:490 protein. This plasmid can be used for constructing HLA-A*24:490 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:490 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:491 Protein Expression Plasmid Vector	PHLAP9255392	Plasmid vector containing HLA-A*24:491 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:491 protein. This plasmid can be used for constructing HLA-A*24:491 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:491 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:492 Protein Expression Plasmid Vector	PHLAP9255393	Plasmid vector containing HLA-A*24:492 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:492 protein. This plasmid can be used for constructing HLA-A*24:492 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:492 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:493 Protein Expression Plasmid Vector	PHLAP9255394	Plasmid vector containing HLA-A*24:493 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:493 protein. This plasmid can be used for constructing HLA-A*24:493 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:493 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:494 Protein Expression Plasmid Vector	PHLAP9255395	Plasmid vector containing HLA-A*24:494 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:494 protein. This plasmid can be used for constructing HLA-A*24:494 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:494 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:495 Protein Expression Plasmid Vector	PHLAP9255396	Plasmid vector containing HLA-A*24:495 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:495 protein. This plasmid can be used for constructing HLA-A*24:495 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:495 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:496 Protein Expression Plasmid Vector	PHLAP9255397	Plasmid vector containing HLA-A*24:496 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:496 protein. This plasmid can be used for constructing HLA-A*24:496 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:496 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:497 Protein Expression Plasmid Vector	PHLAP9255398	Plasmid vector containing HLA-A*24:497 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:497 protein. This plasmid can be used for constructing HLA-A*24:497 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:497 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:498 Protein Expression Plasmid Vector	PHLAP9255399	Plasmid vector containing HLA-A*24:498 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:498 protein. This plasmid can be used for constructing HLA-A*24:498 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:498 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:499 Protein Expression Plasmid Vector	PHLAP9255400	Plasmid vector containing HLA-A*24:499 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:499 protein. This plasmid can be used for constructing HLA-A*24:499 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:499 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:50 Protein Expression Plasmid Vector	PHLAP9255401	Plasmid vector containing HLA-A*24:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:50 protein. This plasmid can be used for constructing HLA-A*24:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:500 Protein Expression Plasmid Vector	PHLAP9255402	Plasmid vector containing HLA-A*24:500 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:500 protein. This plasmid can be used for constructing HLA-A*24:500 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:500 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:501 Protein Expression Plasmid Vector	PHLAP9255403	Plasmid vector containing HLA-A*24:501 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:501 protein. This plasmid can be used for constructing HLA-A*24:501 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:501 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:502 Protein Expression Plasmid Vector	PHLAP9255404	Plasmid vector containing HLA-A*24:502 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:502 protein. This plasmid can be used for constructing HLA-A*24:502 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:502 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:503 Protein Expression Plasmid Vector	PHLAP9255405	Plasmid vector containing HLA-A*24:503 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:503 protein. This plasmid can be used for constructing HLA-A*24:503 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:503 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:504 Protein Expression Plasmid Vector	PHLAP9255406	Plasmid vector containing HLA-A*24:504 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:504 protein. This plasmid can be used for constructing HLA-A*24:504 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:504 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:505 Protein Expression Plasmid Vector	PHLAP9255407	Plasmid vector containing HLA-A*24:505 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:505 protein. This plasmid can be used for constructing HLA-A*24:505 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:505 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:506 Protein Expression Plasmid Vector	PHLAP9255408	Plasmid vector containing HLA-A*24:506 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:506 protein. This plasmid can be used for constructing HLA-A*24:506 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:506 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:507 Protein Expression Plasmid Vector	PHLAP9255409	Plasmid vector containing HLA-A*24:507 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:507 protein. This plasmid can be used for constructing HLA-A*24:507 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:507 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:508 Protein Expression Plasmid Vector	PHLAP9255410	Plasmid vector containing HLA-A*24:508 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:508 protein. This plasmid can be used for constructing HLA-A*24:508 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:508 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:509 Protein Expression Plasmid Vector	PHLAP9255411	Plasmid vector containing HLA-A*24:509 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:509 protein. This plasmid can be used for constructing HLA-A*24:509 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:509 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:51 Protein Expression Plasmid Vector	PHLAP9255412	Plasmid vector containing HLA-A*24:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:51 protein. This plasmid can be used for constructing HLA-A*24:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:510 Protein Expression Plasmid Vector	PHLAP9255413	Plasmid vector containing HLA-A*24:510 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:510 protein. This plasmid can be used for constructing HLA-A*24:510 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:510 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:511 Protein Expression Plasmid Vector	PHLAP9255414	Plasmid vector containing HLA-A*24:511 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:511 protein. This plasmid can be used for constructing HLA-A*24:511 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:511 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:512 Protein Expression Plasmid Vector	PHLAP9255415	Plasmid vector containing HLA-A*24:512 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:512 protein. This plasmid can be used for constructing HLA-A*24:512 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:512 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:513Q Protein Expression Plasmid Vector	PHLAP9255416	Plasmid vector containing HLA-A*24:513Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:513Q protein. This plasmid can be used for constructing HLA-A*24:513Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:513Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:514N Protein Expression Plasmid Vector	PHLAP9255417	Plasmid vector containing HLA-A*24:514N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:514N protein. This plasmid can be used for constructing HLA-A*24:514N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:514N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:515 Protein Expression Plasmid Vector	PHLAP9255418	Plasmid vector containing HLA-A*24:515 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:515 protein. This plasmid can be used for constructing HLA-A*24:515 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:515 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:516 Protein Expression Plasmid Vector	PHLAP9255419	Plasmid vector containing HLA-A*24:516 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:516 protein. This plasmid can be used for constructing HLA-A*24:516 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:516 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:517N Protein Expression Plasmid Vector	PHLAP9255420	Plasmid vector containing HLA-A*24:517N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:517N protein. This plasmid can be used for constructing HLA-A*24:517N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:517N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:518N Protein Expression Plasmid Vector	PHLAP9255421	Plasmid vector containing HLA-A*24:518N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:518N protein. This plasmid can be used for constructing HLA-A*24:518N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:518N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:519 Protein Expression Plasmid Vector	PHLAP9255422	Plasmid vector containing HLA-A*24:519 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:519 protein. This plasmid can be used for constructing HLA-A*24:519 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:519 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:52 Protein Expression Plasmid Vector	PHLAP9255423	Plasmid vector containing HLA-A*24:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:52 protein. This plasmid can be used for constructing HLA-A*24:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:520 Protein Expression Plasmid Vector	PHLAP9255424	Plasmid vector containing HLA-A*24:520 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:520 protein. This plasmid can be used for constructing HLA-A*24:520 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:520 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:521 Protein Expression Plasmid Vector	PHLAP9255425	Plasmid vector containing HLA-A*24:521 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:521 protein. This plasmid can be used for constructing HLA-A*24:521 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:521 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:522 Protein Expression Plasmid Vector	PHLAP9255426	Plasmid vector containing HLA-A*24:522 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:522 protein. This plasmid can be used for constructing HLA-A*24:522 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:522 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:523 Protein Expression Plasmid Vector	PHLAP9255427	Plasmid vector containing HLA-A*24:523 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:523 protein. This plasmid can be used for constructing HLA-A*24:523 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:523 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:524 Protein Expression Plasmid Vector	PHLAP9255428	Plasmid vector containing HLA-A*24:524 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:524 protein. This plasmid can be used for constructing HLA-A*24:524 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:524 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:525 Protein Expression Plasmid Vector	PHLAP9255429	Plasmid vector containing HLA-A*24:525 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:525 protein. This plasmid can be used for constructing HLA-A*24:525 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:525 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:526 Protein Expression Plasmid Vector	PHLAP9255430	Plasmid vector containing HLA-A*24:526 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:526 protein. This plasmid can be used for constructing HLA-A*24:526 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:526 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:527 Protein Expression Plasmid Vector	PHLAP9255431	Plasmid vector containing HLA-A*24:527 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:527 protein. This plasmid can be used for constructing HLA-A*24:527 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:527 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:528 Protein Expression Plasmid Vector	PHLAP9255432	Plasmid vector containing HLA-A*24:528 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:528 protein. This plasmid can be used for constructing HLA-A*24:528 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:528 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:529N Protein Expression Plasmid Vector	PHLAP9255433	Plasmid vector containing HLA-A*24:529N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:529N protein. This plasmid can be used for constructing HLA-A*24:529N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:529N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:53 Protein Expression Plasmid Vector	PHLAP9255434	Plasmid vector containing HLA-A*24:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:53 protein. This plasmid can be used for constructing HLA-A*24:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:530 Protein Expression Plasmid Vector	PHLAP9255435	Plasmid vector containing HLA-A*24:530 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:530 protein. This plasmid can be used for constructing HLA-A*24:530 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:530 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:531 Protein Expression Plasmid Vector	PHLAP9255436	Plasmid vector containing HLA-A*24:531 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:531 protein. This plasmid can be used for constructing HLA-A*24:531 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:531 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:532 Protein Expression Plasmid Vector	PHLAP9255437	Plasmid vector containing HLA-A*24:532 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:532 protein. This plasmid can be used for constructing HLA-A*24:532 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:532 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:533 Protein Expression Plasmid Vector	PHLAP9255438	Plasmid vector containing HLA-A*24:533 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:533 protein. This plasmid can be used for constructing HLA-A*24:533 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:533 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:534 Protein Expression Plasmid Vector	PHLAP9255439	Plasmid vector containing HLA-A*24:534 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:534 protein. This plasmid can be used for constructing HLA-A*24:534 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:534 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:535 Protein Expression Plasmid Vector	PHLAP9255440	Plasmid vector containing HLA-A*24:535 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:535 protein. This plasmid can be used for constructing HLA-A*24:535 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:535 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:536Q Protein Expression Plasmid Vector	PHLAP9255441	Plasmid vector containing HLA-A*24:536Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:536Q protein. This plasmid can be used for constructing HLA-A*24:536Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:536Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:537 Protein Expression Plasmid Vector	PHLAP9255442	Plasmid vector containing HLA-A*24:537 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:537 protein. This plasmid can be used for constructing HLA-A*24:537 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:537 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:538 Protein Expression Plasmid Vector	PHLAP9255443	Plasmid vector containing HLA-A*24:538 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:538 protein. This plasmid can be used for constructing HLA-A*24:538 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:538 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:539 Protein Expression Plasmid Vector	PHLAP9255444	Plasmid vector containing HLA-A*24:539 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:539 protein. This plasmid can be used for constructing HLA-A*24:539 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:539 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:54 Protein Expression Plasmid Vector	PHLAP9255445	Plasmid vector containing HLA-A*24:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:54 protein. This plasmid can be used for constructing HLA-A*24:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:540 Protein Expression Plasmid Vector	PHLAP9255446	Plasmid vector containing HLA-A*24:540 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:540 protein. This plasmid can be used for constructing HLA-A*24:540 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:540 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:541 Protein Expression Plasmid Vector	PHLAP9255447	Plasmid vector containing HLA-A*24:541 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:541 protein. This plasmid can be used for constructing HLA-A*24:541 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:541 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:542 Protein Expression Plasmid Vector	PHLAP9255448	Plasmid vector containing HLA-A*24:542 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:542 protein. This plasmid can be used for constructing HLA-A*24:542 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:542 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:543 Protein Expression Plasmid Vector	PHLAP9255449	Plasmid vector containing HLA-A*24:543 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:543 protein. This plasmid can be used for constructing HLA-A*24:543 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:543 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:544 Protein Expression Plasmid Vector	PHLAP9255450	Plasmid vector containing HLA-A*24:544 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:544 protein. This plasmid can be used for constructing HLA-A*24:544 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:544 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:545 Protein Expression Plasmid Vector	PHLAP9255451	Plasmid vector containing HLA-A*24:545 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:545 protein. This plasmid can be used for constructing HLA-A*24:545 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:545 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:546 Protein Expression Plasmid Vector	PHLAP9255452	Plasmid vector containing HLA-A*24:546 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:546 protein. This plasmid can be used for constructing HLA-A*24:546 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:546 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:547 Protein Expression Plasmid Vector	PHLAP9255453	Plasmid vector containing HLA-A*24:547 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:547 protein. This plasmid can be used for constructing HLA-A*24:547 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:547 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:548 Protein Expression Plasmid Vector	PHLAP9255454	Plasmid vector containing HLA-A*24:548 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:548 protein. This plasmid can be used for constructing HLA-A*24:548 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:548 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:549 Protein Expression Plasmid Vector	PHLAP9255455	Plasmid vector containing HLA-A*24:549 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:549 protein. This plasmid can be used for constructing HLA-A*24:549 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:549 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:55 Protein Expression Plasmid Vector	PHLAP9255456	Plasmid vector containing HLA-A*24:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:55 protein. This plasmid can be used for constructing HLA-A*24:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:550 Protein Expression Plasmid Vector	PHLAP9255457	Plasmid vector containing HLA-A*24:550 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:550 protein. This plasmid can be used for constructing HLA-A*24:550 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:550 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:551 Protein Expression Plasmid Vector	PHLAP9255458	Plasmid vector containing HLA-A*24:551 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:551 protein. This plasmid can be used for constructing HLA-A*24:551 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:551 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:552 Protein Expression Plasmid Vector	PHLAP9255459	Plasmid vector containing HLA-A*24:552 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:552 protein. This plasmid can be used for constructing HLA-A*24:552 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:552 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:553 Protein Expression Plasmid Vector	PHLAP9255460	Plasmid vector containing HLA-A*24:553 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:553 protein. This plasmid can be used for constructing HLA-A*24:553 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:553 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:554 Protein Expression Plasmid Vector	PHLAP9255461	Plasmid vector containing HLA-A*24:554 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:554 protein. This plasmid can be used for constructing HLA-A*24:554 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:554 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:555 Protein Expression Plasmid Vector	PHLAP9255462	Plasmid vector containing HLA-A*24:555 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:555 protein. This plasmid can be used for constructing HLA-A*24:555 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:555 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:556N Protein Expression Plasmid Vector	PHLAP9255463	Plasmid vector containing HLA-A*24:556N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:556N protein. This plasmid can be used for constructing HLA-A*24:556N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:556N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:557 Protein Expression Plasmid Vector	PHLAP9255464	Plasmid vector containing HLA-A*24:557 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:557 protein. This plasmid can be used for constructing HLA-A*24:557 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:557 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:558 Protein Expression Plasmid Vector	PHLAP9255465	Plasmid vector containing HLA-A*24:558 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:558 protein. This plasmid can be used for constructing HLA-A*24:558 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:558 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:559 Protein Expression Plasmid Vector	PHLAP9255466	Plasmid vector containing HLA-A*24:559 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:559 protein. This plasmid can be used for constructing HLA-A*24:559 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:559 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:56:01 Protein Expression Plasmid Vector	PHLAP9255467	Plasmid vector containing HLA-A*24:56:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:56:01 protein. This plasmid can be used for constructing HLA-A*24:56:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:56:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:56:02 Protein Expression Plasmid Vector	PHLAP9255468	Plasmid vector containing HLA-A*24:56:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:56:02 protein. This plasmid can be used for constructing HLA-A*24:56:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:56:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:560 Protein Expression Plasmid Vector	PHLAP9255469	Plasmid vector containing HLA-A*24:560 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:560 protein. This plasmid can be used for constructing HLA-A*24:560 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:560 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:561:01 Protein Expression Plasmid Vector	PHLAP9255470	Plasmid vector containing HLA-A*24:561:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:561:01 protein. This plasmid can be used for constructing HLA-A*24:561:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:561:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:561:02 Protein Expression Plasmid Vector	PHLAP9255471	Plasmid vector containing HLA-A*24:561:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:561:02 protein. This plasmid can be used for constructing HLA-A*24:561:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:561:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:562 Protein Expression Plasmid Vector	PHLAP9255472	Plasmid vector containing HLA-A*24:562 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:562 protein. This plasmid can be used for constructing HLA-A*24:562 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:562 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:563 Protein Expression Plasmid Vector	PHLAP9255473	Plasmid vector containing HLA-A*24:563 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:563 protein. This plasmid can be used for constructing HLA-A*24:563 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:563 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:564 Protein Expression Plasmid Vector	PHLAP9255474	Plasmid vector containing HLA-A*24:564 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:564 protein. This plasmid can be used for constructing HLA-A*24:564 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:564 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:565 Protein Expression Plasmid Vector	PHLAP9255475	Plasmid vector containing HLA-A*24:565 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:565 protein. This plasmid can be used for constructing HLA-A*24:565 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:565 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:566 Protein Expression Plasmid Vector	PHLAP9255476	Plasmid vector containing HLA-A*24:566 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:566 protein. This plasmid can be used for constructing HLA-A*24:566 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:566 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:567N Protein Expression Plasmid Vector	PHLAP9255477	Plasmid vector containing HLA-A*24:567N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:567N protein. This plasmid can be used for constructing HLA-A*24:567N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:567N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:568N Protein Expression Plasmid Vector	PHLAP9255478	Plasmid vector containing HLA-A*24:568N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:568N protein. This plasmid can be used for constructing HLA-A*24:568N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:568N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:569 Protein Expression Plasmid Vector	PHLAP9255479	Plasmid vector containing HLA-A*24:569 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:569 protein. This plasmid can be used for constructing HLA-A*24:569 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:569 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:57 Protein Expression Plasmid Vector	PHLAP9255480	Plasmid vector containing HLA-A*24:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:57 protein. This plasmid can be used for constructing HLA-A*24:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:570 Protein Expression Plasmid Vector	PHLAP9255481	Plasmid vector containing HLA-A*24:570 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:570 protein. This plasmid can be used for constructing HLA-A*24:570 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:570 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:571 Protein Expression Plasmid Vector	PHLAP9255482	Plasmid vector containing HLA-A*24:571 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:571 protein. This plasmid can be used for constructing HLA-A*24:571 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:571 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:572 Protein Expression Plasmid Vector	PHLAP9255483	Plasmid vector containing HLA-A*24:572 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:572 protein. This plasmid can be used for constructing HLA-A*24:572 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:572 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:573 Protein Expression Plasmid Vector	PHLAP9255484	Plasmid vector containing HLA-A*24:573 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:573 protein. This plasmid can be used for constructing HLA-A*24:573 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:573 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:574 Protein Expression Plasmid Vector	PHLAP9255485	Plasmid vector containing HLA-A*24:574 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:574 protein. This plasmid can be used for constructing HLA-A*24:574 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:574 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:575 Protein Expression Plasmid Vector	PHLAP9255486	Plasmid vector containing HLA-A*24:575 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:575 protein. This plasmid can be used for constructing HLA-A*24:575 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:575 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:576N Protein Expression Plasmid Vector	PHLAP9255487	Plasmid vector containing HLA-A*24:576N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:576N protein. This plasmid can be used for constructing HLA-A*24:576N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:576N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:577 Protein Expression Plasmid Vector	PHLAP9255488	Plasmid vector containing HLA-A*24:577 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:577 protein. This plasmid can be used for constructing HLA-A*24:577 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:577 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:578 Protein Expression Plasmid Vector	PHLAP9255489	Plasmid vector containing HLA-A*24:578 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:578 protein. This plasmid can be used for constructing HLA-A*24:578 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:578 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:579 Protein Expression Plasmid Vector	PHLAP9255490	Plasmid vector containing HLA-A*24:579 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:579 protein. This plasmid can be used for constructing HLA-A*24:579 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:579 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:58 Protein Expression Plasmid Vector	PHLAP9255491	Plasmid vector containing HLA-A*24:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:58 protein. This plasmid can be used for constructing HLA-A*24:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:580 Protein Expression Plasmid Vector	PHLAP9255492	Plasmid vector containing HLA-A*24:580 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:580 protein. This plasmid can be used for constructing HLA-A*24:580 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:580 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:581 Protein Expression Plasmid Vector	PHLAP9255493	Plasmid vector containing HLA-A*24:581 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:581 protein. This plasmid can be used for constructing HLA-A*24:581 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:581 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:582 Protein Expression Plasmid Vector	PHLAP9255494	Plasmid vector containing HLA-A*24:582 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:582 protein. This plasmid can be used for constructing HLA-A*24:582 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:582 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:583 Protein Expression Plasmid Vector	PHLAP9255495	Plasmid vector containing HLA-A*24:583 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:583 protein. This plasmid can be used for constructing HLA-A*24:583 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:583 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:584 Protein Expression Plasmid Vector	PHLAP9255496	Plasmid vector containing HLA-A*24:584 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:584 protein. This plasmid can be used for constructing HLA-A*24:584 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:584 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:585:01 Protein Expression Plasmid Vector	PHLAP9255497	Plasmid vector containing HLA-A*24:585:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:585:01 protein. This plasmid can be used for constructing HLA-A*24:585:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:585:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:585:02 Protein Expression Plasmid Vector	PHLAP9255498	Plasmid vector containing HLA-A*24:585:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:585:02 protein. This plasmid can be used for constructing HLA-A*24:585:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:585:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:586N Protein Expression Plasmid Vector	PHLAP9255499	Plasmid vector containing HLA-A*24:586N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:586N protein. This plasmid can be used for constructing HLA-A*24:586N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:586N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:587 Protein Expression Plasmid Vector	PHLAP9255500	Plasmid vector containing HLA-A*24:587 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:587 protein. This plasmid can be used for constructing HLA-A*24:587 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:587 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:588 Protein Expression Plasmid Vector	PHLAP9255501	Plasmid vector containing HLA-A*24:588 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:588 protein. This plasmid can be used for constructing HLA-A*24:588 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:588 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:589 Protein Expression Plasmid Vector	PHLAP9255502	Plasmid vector containing HLA-A*24:589 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:589 protein. This plasmid can be used for constructing HLA-A*24:589 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:589 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:59 Protein Expression Plasmid Vector	PHLAP9255503	Plasmid vector containing HLA-A*24:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:59 protein. This plasmid can be used for constructing HLA-A*24:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:590:01 Protein Expression Plasmid Vector	PHLAP9255504	Plasmid vector containing HLA-A*24:590:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:590:01 protein. This plasmid can be used for constructing HLA-A*24:590:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:590:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:590:02 Protein Expression Plasmid Vector	PHLAP9255505	Plasmid vector containing HLA-A*24:590:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:590:02 protein. This plasmid can be used for constructing HLA-A*24:590:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:590:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:591 Protein Expression Plasmid Vector	PHLAP9255506	Plasmid vector containing HLA-A*24:591 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:591 protein. This plasmid can be used for constructing HLA-A*24:591 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:591 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:592 Protein Expression Plasmid Vector	PHLAP9255507	Plasmid vector containing HLA-A*24:592 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:592 protein. This plasmid can be used for constructing HLA-A*24:592 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:592 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:593 Protein Expression Plasmid Vector	PHLAP9255508	Plasmid vector containing HLA-A*24:593 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:593 protein. This plasmid can be used for constructing HLA-A*24:593 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:593 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:594 Protein Expression Plasmid Vector	PHLAP9255509	Plasmid vector containing HLA-A*24:594 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:594 protein. This plasmid can be used for constructing HLA-A*24:594 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:594 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:595 Protein Expression Plasmid Vector	PHLAP9255510	Plasmid vector containing HLA-A*24:595 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:595 protein. This plasmid can be used for constructing HLA-A*24:595 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:595 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:596N Protein Expression Plasmid Vector	PHLAP9255511	Plasmid vector containing HLA-A*24:596N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:596N protein. This plasmid can be used for constructing HLA-A*24:596N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:596N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:597N Protein Expression Plasmid Vector	PHLAP9255512	Plasmid vector containing HLA-A*24:597N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:597N protein. This plasmid can be used for constructing HLA-A*24:597N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:597N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:598 Protein Expression Plasmid Vector	PHLAP9255513	Plasmid vector containing HLA-A*24:598 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:598 protein. This plasmid can be used for constructing HLA-A*24:598 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:598 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:599 Protein Expression Plasmid Vector	PHLAP9255514	Plasmid vector containing HLA-A*24:599 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:599 protein. This plasmid can be used for constructing HLA-A*24:599 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:599 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:600 Protein Expression Plasmid Vector	PHLAP9255515	Plasmid vector containing HLA-A*24:600 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:600 protein. This plasmid can be used for constructing HLA-A*24:600 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:600 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:601 Protein Expression Plasmid Vector	PHLAP9255516	Plasmid vector containing HLA-A*24:601 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:601 protein. This plasmid can be used for constructing HLA-A*24:601 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:601 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:602 Protein Expression Plasmid Vector	PHLAP9255517	Plasmid vector containing HLA-A*24:602 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:602 protein. This plasmid can be used for constructing HLA-A*24:602 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:602 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:603 Protein Expression Plasmid Vector	PHLAP9255518	Plasmid vector containing HLA-A*24:603 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:603 protein. This plasmid can be used for constructing HLA-A*24:603 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:603 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:604 Protein Expression Plasmid Vector	PHLAP9255519	Plasmid vector containing HLA-A*24:604 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:604 protein. This plasmid can be used for constructing HLA-A*24:604 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:604 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:605 Protein Expression Plasmid Vector	PHLAP9255520	Plasmid vector containing HLA-A*24:605 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:605 protein. This plasmid can be used for constructing HLA-A*24:605 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:605 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:606 Protein Expression Plasmid Vector	PHLAP9255521	Plasmid vector containing HLA-A*24:606 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:606 protein. This plasmid can be used for constructing HLA-A*24:606 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:606 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:607 Protein Expression Plasmid Vector	PHLAP9255522	Plasmid vector containing HLA-A*24:607 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:607 protein. This plasmid can be used for constructing HLA-A*24:607 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:607 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:608N Protein Expression Plasmid Vector	PHLAP9255523	Plasmid vector containing HLA-A*24:608N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:608N protein. This plasmid can be used for constructing HLA-A*24:608N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:608N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:609 Protein Expression Plasmid Vector	PHLAP9255524	Plasmid vector containing HLA-A*24:609 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:609 protein. This plasmid can be used for constructing HLA-A*24:609 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:609 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:60N Protein Expression Plasmid Vector	PHLAP9255525	Plasmid vector containing HLA-A*24:60N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:60N protein. This plasmid can be used for constructing HLA-A*24:60N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:60N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:61 Protein Expression Plasmid Vector	PHLAP9255526	Plasmid vector containing HLA-A*24:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:61 protein. This plasmid can be used for constructing HLA-A*24:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:610 Protein Expression Plasmid Vector	PHLAP9255527	Plasmid vector containing HLA-A*24:610 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:610 protein. This plasmid can be used for constructing HLA-A*24:610 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:610 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:611 Protein Expression Plasmid Vector	PHLAP9255528	Plasmid vector containing HLA-A*24:611 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:611 protein. This plasmid can be used for constructing HLA-A*24:611 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:611 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:612 Protein Expression Plasmid Vector	PHLAP9255529	Plasmid vector containing HLA-A*24:612 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:612 protein. This plasmid can be used for constructing HLA-A*24:612 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:612 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:613 Protein Expression Plasmid Vector	PHLAP9255530	Plasmid vector containing HLA-A*24:613 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:613 protein. This plasmid can be used for constructing HLA-A*24:613 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:613 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:614 Protein Expression Plasmid Vector	PHLAP9255531	Plasmid vector containing HLA-A*24:614 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:614 protein. This plasmid can be used for constructing HLA-A*24:614 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:614 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:615 Protein Expression Plasmid Vector	PHLAP9255532	Plasmid vector containing HLA-A*24:615 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:615 protein. This plasmid can be used for constructing HLA-A*24:615 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:615 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:616 Protein Expression Plasmid Vector	PHLAP9255533	Plasmid vector containing HLA-A*24:616 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:616 protein. This plasmid can be used for constructing HLA-A*24:616 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:616 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:617 Protein Expression Plasmid Vector	PHLAP9255534	Plasmid vector containing HLA-A*24:617 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:617 protein. This plasmid can be used for constructing HLA-A*24:617 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:617 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:618 Protein Expression Plasmid Vector	PHLAP9255535	Plasmid vector containing HLA-A*24:618 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:618 protein. This plasmid can be used for constructing HLA-A*24:618 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:618 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:619 Protein Expression Plasmid Vector	PHLAP9255536	Plasmid vector containing HLA-A*24:619 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:619 protein. This plasmid can be used for constructing HLA-A*24:619 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:619 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:62 Protein Expression Plasmid Vector	PHLAP9255537	Plasmid vector containing HLA-A*24:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:62 protein. This plasmid can be used for constructing HLA-A*24:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:620 Protein Expression Plasmid Vector	PHLAP9255538	Plasmid vector containing HLA-A*24:620 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:620 protein. This plasmid can be used for constructing HLA-A*24:620 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:620 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:621 Protein Expression Plasmid Vector	PHLAP9255539	Plasmid vector containing HLA-A*24:621 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:621 protein. This plasmid can be used for constructing HLA-A*24:621 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:621 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:622 Protein Expression Plasmid Vector	PHLAP9255540	Plasmid vector containing HLA-A*24:622 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:622 protein. This plasmid can be used for constructing HLA-A*24:622 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:622 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:623N Protein Expression Plasmid Vector	PHLAP9255541	Plasmid vector containing HLA-A*24:623N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:623N protein. This plasmid can be used for constructing HLA-A*24:623N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:623N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:624 Protein Expression Plasmid Vector	PHLAP9255542	Plasmid vector containing HLA-A*24:624 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:624 protein. This plasmid can be used for constructing HLA-A*24:624 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:624 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:625N Protein Expression Plasmid Vector	PHLAP9255543	Plasmid vector containing HLA-A*24:625N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:625N protein. This plasmid can be used for constructing HLA-A*24:625N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:625N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:626 Protein Expression Plasmid Vector	PHLAP9255544	Plasmid vector containing HLA-A*24:626 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:626 protein. This plasmid can be used for constructing HLA-A*24:626 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:626 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:627 Protein Expression Plasmid Vector	PHLAP9255545	Plasmid vector containing HLA-A*24:627 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:627 protein. This plasmid can be used for constructing HLA-A*24:627 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:627 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:628 Protein Expression Plasmid Vector	PHLAP9255546	Plasmid vector containing HLA-A*24:628 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:628 protein. This plasmid can be used for constructing HLA-A*24:628 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:628 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:629 Protein Expression Plasmid Vector	PHLAP9255547	Plasmid vector containing HLA-A*24:629 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:629 protein. This plasmid can be used for constructing HLA-A*24:629 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:629 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:63 Protein Expression Plasmid Vector	PHLAP9255548	Plasmid vector containing HLA-A*24:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:63 protein. This plasmid can be used for constructing HLA-A*24:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:630 Protein Expression Plasmid Vector	PHLAP9255549	Plasmid vector containing HLA-A*24:630 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:630 protein. This plasmid can be used for constructing HLA-A*24:630 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:630 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:631 Protein Expression Plasmid Vector	PHLAP9255550	Plasmid vector containing HLA-A*24:631 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:631 protein. This plasmid can be used for constructing HLA-A*24:631 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:631 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:632 Protein Expression Plasmid Vector	PHLAP9255551	Plasmid vector containing HLA-A*24:632 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:632 protein. This plasmid can be used for constructing HLA-A*24:632 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:632 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:633 Protein Expression Plasmid Vector	PHLAP9255552	Plasmid vector containing HLA-A*24:633 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:633 protein. This plasmid can be used for constructing HLA-A*24:633 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:633 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:634 Protein Expression Plasmid Vector	PHLAP9255553	Plasmid vector containing HLA-A*24:634 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:634 protein. This plasmid can be used for constructing HLA-A*24:634 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:634 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:635 Protein Expression Plasmid Vector	PHLAP9255554	Plasmid vector containing HLA-A*24:635 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:635 protein. This plasmid can be used for constructing HLA-A*24:635 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:635 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:636N Protein Expression Plasmid Vector	PHLAP9255555	Plasmid vector containing HLA-A*24:636N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:636N protein. This plasmid can be used for constructing HLA-A*24:636N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:636N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:637 Protein Expression Plasmid Vector	PHLAP9255556	Plasmid vector containing HLA-A*24:637 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:637 protein. This plasmid can be used for constructing HLA-A*24:637 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:637 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:638 Protein Expression Plasmid Vector	PHLAP9255557	Plasmid vector containing HLA-A*24:638 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:638 protein. This plasmid can be used for constructing HLA-A*24:638 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:638 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:639 Protein Expression Plasmid Vector	PHLAP9255558	Plasmid vector containing HLA-A*24:639 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:639 protein. This plasmid can be used for constructing HLA-A*24:639 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:639 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:64 Protein Expression Plasmid Vector	PHLAP9255559	Plasmid vector containing HLA-A*24:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:64 protein. This plasmid can be used for constructing HLA-A*24:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:640 Protein Expression Plasmid Vector	PHLAP9255560	Plasmid vector containing HLA-A*24:640 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:640 protein. This plasmid can be used for constructing HLA-A*24:640 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:640 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:641N Protein Expression Plasmid Vector	PHLAP9255561	Plasmid vector containing HLA-A*24:641N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:641N protein. This plasmid can be used for constructing HLA-A*24:641N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:641N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:642 Protein Expression Plasmid Vector	PHLAP9255562	Plasmid vector containing HLA-A*24:642 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:642 protein. This plasmid can be used for constructing HLA-A*24:642 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:642 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:643 Protein Expression Plasmid Vector	PHLAP9255563	Plasmid vector containing HLA-A*24:643 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:643 protein. This plasmid can be used for constructing HLA-A*24:643 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:643 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:644 Protein Expression Plasmid Vector	PHLAP9255564	Plasmid vector containing HLA-A*24:644 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:644 protein. This plasmid can be used for constructing HLA-A*24:644 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:644 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:645 Protein Expression Plasmid Vector	PHLAP9255565	Plasmid vector containing HLA-A*24:645 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:645 protein. This plasmid can be used for constructing HLA-A*24:645 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:645 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:646 Protein Expression Plasmid Vector	PHLAP9255566	Plasmid vector containing HLA-A*24:646 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:646 protein. This plasmid can be used for constructing HLA-A*24:646 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:646 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:647 Protein Expression Plasmid Vector	PHLAP9255567	Plasmid vector containing HLA-A*24:647 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:647 protein. This plasmid can be used for constructing HLA-A*24:647 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:647 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:648 Protein Expression Plasmid Vector	PHLAP9255568	Plasmid vector containing HLA-A*24:648 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:648 protein. This plasmid can be used for constructing HLA-A*24:648 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:648 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:649 Protein Expression Plasmid Vector	PHLAP9255569	Plasmid vector containing HLA-A*24:649 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:649 protein. This plasmid can be used for constructing HLA-A*24:649 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:649 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:650 Protein Expression Plasmid Vector	PHLAP9255570	Plasmid vector containing HLA-A*24:650 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:650 protein. This plasmid can be used for constructing HLA-A*24:650 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:650 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:651N Protein Expression Plasmid Vector	PHLAP9255571	Plasmid vector containing HLA-A*24:651N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:651N protein. This plasmid can be used for constructing HLA-A*24:651N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:651N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:652 Protein Expression Plasmid Vector	PHLAP9255572	Plasmid vector containing HLA-A*24:652 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:652 protein. This plasmid can be used for constructing HLA-A*24:652 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:652 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:653 Protein Expression Plasmid Vector	PHLAP9255573	Plasmid vector containing HLA-A*24:653 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:653 protein. This plasmid can be used for constructing HLA-A*24:653 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:653 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:654 Protein Expression Plasmid Vector	PHLAP9255574	Plasmid vector containing HLA-A*24:654 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:654 protein. This plasmid can be used for constructing HLA-A*24:654 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:654 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:655 Protein Expression Plasmid Vector	PHLAP9255575	Plasmid vector containing HLA-A*24:655 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:655 protein. This plasmid can be used for constructing HLA-A*24:655 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:655 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:656 Protein Expression Plasmid Vector	PHLAP9255576	Plasmid vector containing HLA-A*24:656 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:656 protein. This plasmid can be used for constructing HLA-A*24:656 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:656 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:66 Protein Expression Plasmid Vector	PHLAP9255577	Plasmid vector containing HLA-A*24:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:66 protein. This plasmid can be used for constructing HLA-A*24:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:67 Protein Expression Plasmid Vector	PHLAP9255578	Plasmid vector containing HLA-A*24:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:67 protein. This plasmid can be used for constructing HLA-A*24:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:68 Protein Expression Plasmid Vector	PHLAP9255579	Plasmid vector containing HLA-A*24:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:68 protein. This plasmid can be used for constructing HLA-A*24:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:69 Protein Expression Plasmid Vector	PHLAP9255580	Plasmid vector containing HLA-A*24:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:69 protein. This plasmid can be used for constructing HLA-A*24:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:70 Protein Expression Plasmid Vector	PHLAP9255581	Plasmid vector containing HLA-A*24:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:70 protein. This plasmid can be used for constructing HLA-A*24:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:71 Protein Expression Plasmid Vector	PHLAP9255582	Plasmid vector containing HLA-A*24:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:71 protein. This plasmid can be used for constructing HLA-A*24:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:72 Protein Expression Plasmid Vector	PHLAP9255583	Plasmid vector containing HLA-A*24:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:72 protein. This plasmid can be used for constructing HLA-A*24:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:73 Protein Expression Plasmid Vector	PHLAP9255584	Plasmid vector containing HLA-A*24:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:73 protein. This plasmid can be used for constructing HLA-A*24:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:74:01 Protein Expression Plasmid Vector	PHLAP9255585	Plasmid vector containing HLA-A*24:74:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:74:01 protein. This plasmid can be used for constructing HLA-A*24:74:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:74:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:74:02 Protein Expression Plasmid Vector	PHLAP9255586	Plasmid vector containing HLA-A*24:74:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:74:02 protein. This plasmid can be used for constructing HLA-A*24:74:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:74:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:75 Protein Expression Plasmid Vector	PHLAP9255587	Plasmid vector containing HLA-A*24:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:75 protein. This plasmid can be used for constructing HLA-A*24:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:76 Protein Expression Plasmid Vector	PHLAP9255588	Plasmid vector containing HLA-A*24:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:76 protein. This plasmid can be used for constructing HLA-A*24:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:77 Protein Expression Plasmid Vector	PHLAP9255589	Plasmid vector containing HLA-A*24:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:77 protein. This plasmid can be used for constructing HLA-A*24:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:78 Protein Expression Plasmid Vector	PHLAP9255590	Plasmid vector containing HLA-A*24:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:78 protein. This plasmid can be used for constructing HLA-A*24:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:79 Protein Expression Plasmid Vector	PHLAP9255591	Plasmid vector containing HLA-A*24:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:79 protein. This plasmid can be used for constructing HLA-A*24:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:80 Protein Expression Plasmid Vector	PHLAP9255592	Plasmid vector containing HLA-A*24:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:80 protein. This plasmid can be used for constructing HLA-A*24:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:81 Protein Expression Plasmid Vector	PHLAP9255593	Plasmid vector containing HLA-A*24:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:81 protein. This plasmid can be used for constructing HLA-A*24:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:82 Protein Expression Plasmid Vector	PHLAP9255594	Plasmid vector containing HLA-A*24:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:82 protein. This plasmid can be used for constructing HLA-A*24:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:83N Protein Expression Plasmid Vector	PHLAP9255595	Plasmid vector containing HLA-A*24:83N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:83N protein. This plasmid can be used for constructing HLA-A*24:83N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:83N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:84N Protein Expression Plasmid Vector	PHLAP9255596	Plasmid vector containing HLA-A*24:84N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:84N protein. This plasmid can be used for constructing HLA-A*24:84N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:84N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:85 Protein Expression Plasmid Vector	PHLAP9255597	Plasmid vector containing HLA-A*24:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:85 protein. This plasmid can be used for constructing HLA-A*24:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:86N Protein Expression Plasmid Vector	PHLAP9255598	Plasmid vector containing HLA-A*24:86N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:86N protein. This plasmid can be used for constructing HLA-A*24:86N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:86N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:87 Protein Expression Plasmid Vector	PHLAP9255599	Plasmid vector containing HLA-A*24:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:87 protein. This plasmid can be used for constructing HLA-A*24:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:88 Protein Expression Plasmid Vector	PHLAP9255600	Plasmid vector containing HLA-A*24:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:88 protein. This plasmid can be used for constructing HLA-A*24:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:89 Protein Expression Plasmid Vector	PHLAP9255601	Plasmid vector containing HLA-A*24:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:89 protein. This plasmid can be used for constructing HLA-A*24:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:90:01N Protein Expression Plasmid Vector	PHLAP9255602	Plasmid vector containing HLA-A*24:90:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:90:01N protein. This plasmid can be used for constructing HLA-A*24:90:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:90:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:90:02N Protein Expression Plasmid Vector	PHLAP9255603	Plasmid vector containing HLA-A*24:90:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:90:02N protein. This plasmid can be used for constructing HLA-A*24:90:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:90:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:91 Protein Expression Plasmid Vector	PHLAP9255604	Plasmid vector containing HLA-A*24:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:91 protein. This plasmid can be used for constructing HLA-A*24:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:92 Protein Expression Plasmid Vector	PHLAP9255605	Plasmid vector containing HLA-A*24:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:92 protein. This plasmid can be used for constructing HLA-A*24:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:93 Protein Expression Plasmid Vector	PHLAP9255606	Plasmid vector containing HLA-A*24:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:93 protein. This plasmid can be used for constructing HLA-A*24:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:94 Protein Expression Plasmid Vector	PHLAP9255607	Plasmid vector containing HLA-A*24:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:94 protein. This plasmid can be used for constructing HLA-A*24:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:95 Protein Expression Plasmid Vector	PHLAP9255608	Plasmid vector containing HLA-A*24:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:95 protein. This plasmid can be used for constructing HLA-A*24:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:96 Protein Expression Plasmid Vector	PHLAP9255609	Plasmid vector containing HLA-A*24:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:96 protein. This plasmid can be used for constructing HLA-A*24:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:97 Protein Expression Plasmid Vector	PHLAP9255610	Plasmid vector containing HLA-A*24:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:97 protein. This plasmid can be used for constructing HLA-A*24:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*24:98 Protein Expression Plasmid Vector	PHLAP9255611	Plasmid vector containing HLA-A*24:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:98 protein. This plasmid can be used for constructing HLA-A*24:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*24:99 Protein Expression Plasmid Vector	PHLAP9255612	Plasmid vector containing HLA-A*24:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*24:99 protein. This plasmid can be used for constructing HLA-A*24:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*24:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*2401 Protein Expression Plasmid Vector	PHLAP9255613	Plasmid vector containing HLA-A*2401 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*2401 protein. This plasmid can be used for constructing HLA-A*2401 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*2401 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*2412 Protein Expression Plasmid Vector	PHLAP9255614	Plasmid vector containing HLA-A*2412 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*2412 protein. This plasmid can be used for constructing HLA-A*2412 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*2412 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*2416 Protein Expression Plasmid Vector	PHLAP9255615	Plasmid vector containing HLA-A*2416 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*2416 protein. This plasmid can be used for constructing HLA-A*2416 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*2416 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*2465 Protein Expression Plasmid Vector	PHLAP9255616	Plasmid vector containing HLA-A*2465 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*2465 protein. This plasmid can be used for constructing HLA-A*2465 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*2465 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:01:01 Protein Expression Plasmid Vector	PHLAP9255617	Plasmid vector containing HLA-A*25:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:01 protein. This plasmid can be used for constructing HLA-A*25:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:01:02 Protein Expression Plasmid Vector	PHLAP9255618	Plasmid vector containing HLA-A*25:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:02 protein. This plasmid can be used for constructing HLA-A*25:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:01:01:03 Protein Expression Plasmid Vector	PHLAP9255619	Plasmid vector containing HLA-A*25:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:03 protein. This plasmid can be used for constructing HLA-A*25:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:01:04 Protein Expression Plasmid Vector	PHLAP9255620	Plasmid vector containing HLA-A*25:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:04 protein. This plasmid can be used for constructing HLA-A*25:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:01:05 Protein Expression Plasmid Vector	PHLAP9255621	Plasmid vector containing HLA-A*25:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:05 protein. This plasmid can be used for constructing HLA-A*25:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:01:06 Protein Expression Plasmid Vector	PHLAP9255622	Plasmid vector containing HLA-A*25:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:06 protein. This plasmid can be used for constructing HLA-A*25:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:01:07 Protein Expression Plasmid Vector	PHLAP9255623	Plasmid vector containing HLA-A*25:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:07 protein. This plasmid can be used for constructing HLA-A*25:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:01:08 Protein Expression Plasmid Vector	PHLAP9255624	Plasmid vector containing HLA-A*25:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:08 protein. This plasmid can be used for constructing HLA-A*25:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:01:09 Protein Expression Plasmid Vector	PHLAP9255625	Plasmid vector containing HLA-A*25:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:09 protein. This plasmid can be used for constructing HLA-A*25:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:01:01:10 Protein Expression Plasmid Vector	PHLAP9255626	Plasmid vector containing HLA-A*25:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:10 protein. This plasmid can be used for constructing HLA-A*25:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:01:11 Protein Expression Plasmid Vector	PHLAP9255627	Plasmid vector containing HLA-A*25:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:11 protein. This plasmid can be used for constructing HLA-A*25:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:01:12 Protein Expression Plasmid Vector	PHLAP9255628	Plasmid vector containing HLA-A*25:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:01:12 protein. This plasmid can be used for constructing HLA-A*25:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:02 Protein Expression Plasmid Vector	PHLAP9255629	Plasmid vector containing HLA-A*25:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:02 protein. This plasmid can be used for constructing HLA-A*25:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:03 Protein Expression Plasmid Vector	PHLAP9255630	Plasmid vector containing HLA-A*25:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:03 protein. This plasmid can be used for constructing HLA-A*25:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:04 Protein Expression Plasmid Vector	PHLAP9255631	Plasmid vector containing HLA-A*25:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:04 protein. This plasmid can be used for constructing HLA-A*25:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:05 Protein Expression Plasmid Vector	PHLAP9255632	Plasmid vector containing HLA-A*25:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:05 protein. This plasmid can be used for constructing HLA-A*25:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:01:06 Protein Expression Plasmid Vector	PHLAP9255633	Plasmid vector containing HLA-A*25:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:06 protein. This plasmid can be used for constructing HLA-A*25:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:07 Protein Expression Plasmid Vector	PHLAP9255634	Plasmid vector containing HLA-A*25:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:07 protein. This plasmid can be used for constructing HLA-A*25:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:08 Protein Expression Plasmid Vector	PHLAP9255635	Plasmid vector containing HLA-A*25:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:08 protein. This plasmid can be used for constructing HLA-A*25:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:09 Protein Expression Plasmid Vector	PHLAP9255636	Plasmid vector containing HLA-A*25:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:09 protein. This plasmid can be used for constructing HLA-A*25:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:10 Protein Expression Plasmid Vector	PHLAP9255637	Plasmid vector containing HLA-A*25:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:10 protein. This plasmid can be used for constructing HLA-A*25:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:11 Protein Expression Plasmid Vector	PHLAP9255638	Plasmid vector containing HLA-A*25:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:11 protein. This plasmid can be used for constructing HLA-A*25:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:12 Protein Expression Plasmid Vector	PHLAP9255639	Plasmid vector containing HLA-A*25:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:12 protein. This plasmid can be used for constructing HLA-A*25:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:13 Protein Expression Plasmid Vector	PHLAP9255640	Plasmid vector containing HLA-A*25:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:13 protein. This plasmid can be used for constructing HLA-A*25:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:01:14 Protein Expression Plasmid Vector	PHLAP9255641	Plasmid vector containing HLA-A*25:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:14 protein. This plasmid can be used for constructing HLA-A*25:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:15 Protein Expression Plasmid Vector	PHLAP9255642	Plasmid vector containing HLA-A*25:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:15 protein. This plasmid can be used for constructing HLA-A*25:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:16 Protein Expression Plasmid Vector	PHLAP9255643	Plasmid vector containing HLA-A*25:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:16 protein. This plasmid can be used for constructing HLA-A*25:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:17 Protein Expression Plasmid Vector	PHLAP9255644	Plasmid vector containing HLA-A*25:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:17 protein. This plasmid can be used for constructing HLA-A*25:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:18 Protein Expression Plasmid Vector	PHLAP9255645	Plasmid vector containing HLA-A*25:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:18 protein. This plasmid can be used for constructing HLA-A*25:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:19 Protein Expression Plasmid Vector	PHLAP9255646	Plasmid vector containing HLA-A*25:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:19 protein. This plasmid can be used for constructing HLA-A*25:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:20 Protein Expression Plasmid Vector	PHLAP9255647	Plasmid vector containing HLA-A*25:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:20 protein. This plasmid can be used for constructing HLA-A*25:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:21 Protein Expression Plasmid Vector	PHLAP9255648	Plasmid vector containing HLA-A*25:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:21 protein. This plasmid can be used for constructing HLA-A*25:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:01:22 Protein Expression Plasmid Vector	PHLAP9255649	Plasmid vector containing HLA-A*25:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:22 protein. This plasmid can be used for constructing HLA-A*25:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:01:23 Protein Expression Plasmid Vector	PHLAP9255650	Plasmid vector containing HLA-A*25:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:01:23 protein. This plasmid can be used for constructing HLA-A*25:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:02 Protein Expression Plasmid Vector	PHLAP9255651	Plasmid vector containing HLA-A*25:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:02 protein. This plasmid can be used for constructing HLA-A*25:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:03 Protein Expression Plasmid Vector	PHLAP9255652	Plasmid vector containing HLA-A*25:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:03 protein. This plasmid can be used for constructing HLA-A*25:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:04 Protein Expression Plasmid Vector	PHLAP9255653	Plasmid vector containing HLA-A*25:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:04 protein. This plasmid can be used for constructing HLA-A*25:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:05 Protein Expression Plasmid Vector	PHLAP9255654	Plasmid vector containing HLA-A*25:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:05 protein. This plasmid can be used for constructing HLA-A*25:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:06 Protein Expression Plasmid Vector	PHLAP9255655	Plasmid vector containing HLA-A*25:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:06 protein. This plasmid can be used for constructing HLA-A*25:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:07 Protein Expression Plasmid Vector	PHLAP9255656	Plasmid vector containing HLA-A*25:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:07 protein. This plasmid can be used for constructing HLA-A*25:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:08 Protein Expression Plasmid Vector	PHLAP9255657	Plasmid vector containing HLA-A*25:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:08 protein. This plasmid can be used for constructing HLA-A*25:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:09 Protein Expression Plasmid Vector	PHLAP9255658	Plasmid vector containing HLA-A*25:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:09 protein. This plasmid can be used for constructing HLA-A*25:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:10 Protein Expression Plasmid Vector	PHLAP9255659	Plasmid vector containing HLA-A*25:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:10 protein. This plasmid can be used for constructing HLA-A*25:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:11 Protein Expression Plasmid Vector	PHLAP9255660	Plasmid vector containing HLA-A*25:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:11 protein. This plasmid can be used for constructing HLA-A*25:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:12N Protein Expression Plasmid Vector	PHLAP9255661	Plasmid vector containing HLA-A*25:12N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:12N protein. This plasmid can be used for constructing HLA-A*25:12N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:12N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:13 Protein Expression Plasmid Vector	PHLAP9255662	Plasmid vector containing HLA-A*25:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:13 protein. This plasmid can be used for constructing HLA-A*25:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:14 Protein Expression Plasmid Vector	PHLAP9255663	Plasmid vector containing HLA-A*25:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:14 protein. This plasmid can be used for constructing HLA-A*25:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:15 Protein Expression Plasmid Vector	PHLAP9255664	Plasmid vector containing HLA-A*25:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:15 protein. This plasmid can be used for constructing HLA-A*25:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:16 Protein Expression Plasmid Vector	PHLAP9255665	Plasmid vector containing HLA-A*25:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:16 protein. This plasmid can be used for constructing HLA-A*25:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:17 Protein Expression Plasmid Vector	PHLAP9255666	Plasmid vector containing HLA-A*25:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:17 protein. This plasmid can be used for constructing HLA-A*25:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:18 Protein Expression Plasmid Vector	PHLAP9255667	Plasmid vector containing HLA-A*25:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:18 protein. This plasmid can be used for constructing HLA-A*25:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:19:01 Protein Expression Plasmid Vector	PHLAP9255668	Plasmid vector containing HLA-A*25:19:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:19:01 protein. This plasmid can be used for constructing HLA-A*25:19:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:19:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:19:02 Protein Expression Plasmid Vector	PHLAP9255669	Plasmid vector containing HLA-A*25:19:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:19:02 protein. This plasmid can be used for constructing HLA-A*25:19:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:19:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:20 Protein Expression Plasmid Vector	PHLAP9255670	Plasmid vector containing HLA-A*25:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:20 protein. This plasmid can be used for constructing HLA-A*25:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:21 Protein Expression Plasmid Vector	PHLAP9255671	Plasmid vector containing HLA-A*25:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:21 protein. This plasmid can be used for constructing HLA-A*25:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:22 Protein Expression Plasmid Vector	PHLAP9255672	Plasmid vector containing HLA-A*25:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:22 protein. This plasmid can be used for constructing HLA-A*25:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:23 Protein Expression Plasmid Vector	PHLAP9255673	Plasmid vector containing HLA-A*25:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:23 protein. This plasmid can be used for constructing HLA-A*25:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:24 Protein Expression Plasmid Vector	PHLAP9255674	Plasmid vector containing HLA-A*25:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:24 protein. This plasmid can be used for constructing HLA-A*25:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:25 Protein Expression Plasmid Vector	PHLAP9255675	Plasmid vector containing HLA-A*25:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:25 protein. This plasmid can be used for constructing HLA-A*25:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:26 Protein Expression Plasmid Vector	PHLAP9255676	Plasmid vector containing HLA-A*25:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:26 protein. This plasmid can be used for constructing HLA-A*25:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:27:01 Protein Expression Plasmid Vector	PHLAP9255677	Plasmid vector containing HLA-A*25:27:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:27:01 protein. This plasmid can be used for constructing HLA-A*25:27:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:27:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:27:02 Protein Expression Plasmid Vector	PHLAP9255678	Plasmid vector containing HLA-A*25:27:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:27:02 protein. This plasmid can be used for constructing HLA-A*25:27:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:27:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:28 Protein Expression Plasmid Vector	PHLAP9255679	Plasmid vector containing HLA-A*25:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:28 protein. This plasmid can be used for constructing HLA-A*25:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:29 Protein Expression Plasmid Vector	PHLAP9255680	Plasmid vector containing HLA-A*25:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:29 protein. This plasmid can be used for constructing HLA-A*25:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:30 Protein Expression Plasmid Vector	PHLAP9255681	Plasmid vector containing HLA-A*25:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:30 protein. This plasmid can be used for constructing HLA-A*25:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:31 Protein Expression Plasmid Vector	PHLAP9255682	Plasmid vector containing HLA-A*25:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:31 protein. This plasmid can be used for constructing HLA-A*25:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:32 Protein Expression Plasmid Vector	PHLAP9255683	Plasmid vector containing HLA-A*25:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:32 protein. This plasmid can be used for constructing HLA-A*25:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:33 Protein Expression Plasmid Vector	PHLAP9255684	Plasmid vector containing HLA-A*25:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:33 protein. This plasmid can be used for constructing HLA-A*25:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:34 Protein Expression Plasmid Vector	PHLAP9255685	Plasmid vector containing HLA-A*25:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:34 protein. This plasmid can be used for constructing HLA-A*25:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:35 Protein Expression Plasmid Vector	PHLAP9255686	Plasmid vector containing HLA-A*25:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:35 protein. This plasmid can be used for constructing HLA-A*25:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:36 Protein Expression Plasmid Vector	PHLAP9255687	Plasmid vector containing HLA-A*25:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:36 protein. This plasmid can be used for constructing HLA-A*25:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:37 Protein Expression Plasmid Vector	PHLAP9255688	Plasmid vector containing HLA-A*25:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:37 protein. This plasmid can be used for constructing HLA-A*25:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:38 Protein Expression Plasmid Vector	PHLAP9255689	Plasmid vector containing HLA-A*25:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:38 protein. This plasmid can be used for constructing HLA-A*25:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:39 Protein Expression Plasmid Vector	PHLAP9255690	Plasmid vector containing HLA-A*25:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:39 protein. This plasmid can be used for constructing HLA-A*25:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:40 Protein Expression Plasmid Vector	PHLAP9255691	Plasmid vector containing HLA-A*25:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:40 protein. This plasmid can be used for constructing HLA-A*25:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:41 Protein Expression Plasmid Vector	PHLAP9255692	Plasmid vector containing HLA-A*25:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:41 protein. This plasmid can be used for constructing HLA-A*25:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:42N Protein Expression Plasmid Vector	PHLAP9255693	Plasmid vector containing HLA-A*25:42N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:42N protein. This plasmid can be used for constructing HLA-A*25:42N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:42N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:43 Protein Expression Plasmid Vector	PHLAP9255694	Plasmid vector containing HLA-A*25:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:43 protein. This plasmid can be used for constructing HLA-A*25:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:44 Protein Expression Plasmid Vector	PHLAP9255695	Plasmid vector containing HLA-A*25:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:44 protein. This plasmid can be used for constructing HLA-A*25:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:45 Protein Expression Plasmid Vector	PHLAP9255696	Plasmid vector containing HLA-A*25:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:45 protein. This plasmid can be used for constructing HLA-A*25:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:46 Protein Expression Plasmid Vector	PHLAP9255697	Plasmid vector containing HLA-A*25:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:46 protein. This plasmid can be used for constructing HLA-A*25:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:47 Protein Expression Plasmid Vector	PHLAP9255698	Plasmid vector containing HLA-A*25:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:47 protein. This plasmid can be used for constructing HLA-A*25:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:48 Protein Expression Plasmid Vector	PHLAP9255699	Plasmid vector containing HLA-A*25:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:48 protein. This plasmid can be used for constructing HLA-A*25:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:49N Protein Expression Plasmid Vector	PHLAP9255700	Plasmid vector containing HLA-A*25:49N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:49N protein. This plasmid can be used for constructing HLA-A*25:49N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:49N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:50 Protein Expression Plasmid Vector	PHLAP9255701	Plasmid vector containing HLA-A*25:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:50 protein. This plasmid can be used for constructing HLA-A*25:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:51 Protein Expression Plasmid Vector	PHLAP9255702	Plasmid vector containing HLA-A*25:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:51 protein. This plasmid can be used for constructing HLA-A*25:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:52 Protein Expression Plasmid Vector	PHLAP9255703	Plasmid vector containing HLA-A*25:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:52 protein. This plasmid can be used for constructing HLA-A*25:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:53 Protein Expression Plasmid Vector	PHLAP9255704	Plasmid vector containing HLA-A*25:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:53 protein. This plasmid can be used for constructing HLA-A*25:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:54 Protein Expression Plasmid Vector	PHLAP9255705	Plasmid vector containing HLA-A*25:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:54 protein. This plasmid can be used for constructing HLA-A*25:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:55 Protein Expression Plasmid Vector	PHLAP9255706	Plasmid vector containing HLA-A*25:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:55 protein. This plasmid can be used for constructing HLA-A*25:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:56 Protein Expression Plasmid Vector	PHLAP9255707	Plasmid vector containing HLA-A*25:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:56 protein. This plasmid can be used for constructing HLA-A*25:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:57 Protein Expression Plasmid Vector	PHLAP9255708	Plasmid vector containing HLA-A*25:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:57 protein. This plasmid can be used for constructing HLA-A*25:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:58 Protein Expression Plasmid Vector	PHLAP9255709	Plasmid vector containing HLA-A*25:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:58 protein. This plasmid can be used for constructing HLA-A*25:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:59 Protein Expression Plasmid Vector	PHLAP9255710	Plasmid vector containing HLA-A*25:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:59 protein. This plasmid can be used for constructing HLA-A*25:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:60 Protein Expression Plasmid Vector	PHLAP9255711	Plasmid vector containing HLA-A*25:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:60 protein. This plasmid can be used for constructing HLA-A*25:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:61 Protein Expression Plasmid Vector	PHLAP9255712	Plasmid vector containing HLA-A*25:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:61 protein. This plasmid can be used for constructing HLA-A*25:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:62 Protein Expression Plasmid Vector	PHLAP9255713	Plasmid vector containing HLA-A*25:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:62 protein. This plasmid can be used for constructing HLA-A*25:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:63 Protein Expression Plasmid Vector	PHLAP9255714	Plasmid vector containing HLA-A*25:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:63 protein. This plasmid can be used for constructing HLA-A*25:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:64 Protein Expression Plasmid Vector	PHLAP9255715	Plasmid vector containing HLA-A*25:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:64 protein. This plasmid can be used for constructing HLA-A*25:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:65 Protein Expression Plasmid Vector	PHLAP9255716	Plasmid vector containing HLA-A*25:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:65 protein. This plasmid can be used for constructing HLA-A*25:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:66 Protein Expression Plasmid Vector	PHLAP9255717	Plasmid vector containing HLA-A*25:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:66 protein. This plasmid can be used for constructing HLA-A*25:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:67 Protein Expression Plasmid Vector	PHLAP9255718	Plasmid vector containing HLA-A*25:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:67 protein. This plasmid can be used for constructing HLA-A*25:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:68 Protein Expression Plasmid Vector	PHLAP9255719	Plasmid vector containing HLA-A*25:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:68 protein. This plasmid can be used for constructing HLA-A*25:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:69N Protein Expression Plasmid Vector	PHLAP9255720	Plasmid vector containing HLA-A*25:69N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:69N protein. This plasmid can be used for constructing HLA-A*25:69N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:69N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:70 Protein Expression Plasmid Vector	PHLAP9255721	Plasmid vector containing HLA-A*25:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:70 protein. This plasmid can be used for constructing HLA-A*25:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:71 Protein Expression Plasmid Vector	PHLAP9255722	Plasmid vector containing HLA-A*25:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:71 protein. This plasmid can be used for constructing HLA-A*25:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:72 Protein Expression Plasmid Vector	PHLAP9255723	Plasmid vector containing HLA-A*25:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:72 protein. This plasmid can be used for constructing HLA-A*25:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:73 Protein Expression Plasmid Vector	PHLAP9255724	Plasmid vector containing HLA-A*25:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:73 protein. This plasmid can be used for constructing HLA-A*25:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:74 Protein Expression Plasmid Vector	PHLAP9255725	Plasmid vector containing HLA-A*25:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:74 protein. This plasmid can be used for constructing HLA-A*25:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:75 Protein Expression Plasmid Vector	PHLAP9255726	Plasmid vector containing HLA-A*25:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:75 protein. This plasmid can be used for constructing HLA-A*25:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:76:01 Protein Expression Plasmid Vector	PHLAP9255727	Plasmid vector containing HLA-A*25:76:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:76:01 protein. This plasmid can be used for constructing HLA-A*25:76:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:76:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:76:02 Protein Expression Plasmid Vector	PHLAP9255728	Plasmid vector containing HLA-A*25:76:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:76:02 protein. This plasmid can be used for constructing HLA-A*25:76:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:76:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:77 Protein Expression Plasmid Vector	PHLAP9255729	Plasmid vector containing HLA-A*25:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:77 protein. This plasmid can be used for constructing HLA-A*25:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:78 Protein Expression Plasmid Vector	PHLAP9255730	Plasmid vector containing HLA-A*25:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:78 protein. This plasmid can be used for constructing HLA-A*25:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:79 Protein Expression Plasmid Vector	PHLAP9255731	Plasmid vector containing HLA-A*25:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:79 protein. This plasmid can be used for constructing HLA-A*25:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:80 Protein Expression Plasmid Vector	PHLAP9255732	Plasmid vector containing HLA-A*25:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:80 protein. This plasmid can be used for constructing HLA-A*25:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:81 Protein Expression Plasmid Vector	PHLAP9255733	Plasmid vector containing HLA-A*25:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:81 protein. This plasmid can be used for constructing HLA-A*25:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:82 Protein Expression Plasmid Vector	PHLAP9255734	Plasmid vector containing HLA-A*25:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:82 protein. This plasmid can be used for constructing HLA-A*25:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:83 Protein Expression Plasmid Vector	PHLAP9255735	Plasmid vector containing HLA-A*25:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:83 protein. This plasmid can be used for constructing HLA-A*25:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:84 Protein Expression Plasmid Vector	PHLAP9255736	Plasmid vector containing HLA-A*25:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:84 protein. This plasmid can be used for constructing HLA-A*25:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:85 Protein Expression Plasmid Vector	PHLAP9255737	Plasmid vector containing HLA-A*25:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:85 protein. This plasmid can be used for constructing HLA-A*25:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:86 Protein Expression Plasmid Vector	PHLAP9255738	Plasmid vector containing HLA-A*25:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:86 protein. This plasmid can be used for constructing HLA-A*25:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:87 Protein Expression Plasmid Vector	PHLAP9255739	Plasmid vector containing HLA-A*25:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:87 protein. This plasmid can be used for constructing HLA-A*25:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:88 Protein Expression Plasmid Vector	PHLAP9255740	Plasmid vector containing HLA-A*25:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:88 protein. This plasmid can be used for constructing HLA-A*25:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:89 Protein Expression Plasmid Vector	PHLAP9255741	Plasmid vector containing HLA-A*25:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:89 protein. This plasmid can be used for constructing HLA-A*25:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:90 Protein Expression Plasmid Vector	PHLAP9255742	Plasmid vector containing HLA-A*25:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:90 protein. This plasmid can be used for constructing HLA-A*25:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:91 Protein Expression Plasmid Vector	PHLAP9255743	Plasmid vector containing HLA-A*25:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:91 protein. This plasmid can be used for constructing HLA-A*25:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:92 Protein Expression Plasmid Vector	PHLAP9255744	Plasmid vector containing HLA-A*25:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:92 protein. This plasmid can be used for constructing HLA-A*25:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*25:93 Protein Expression Plasmid Vector	PHLAP9255745	Plasmid vector containing HLA-A*25:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:93 protein. This plasmid can be used for constructing HLA-A*25:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:94 Protein Expression Plasmid Vector	PHLAP9255746	Plasmid vector containing HLA-A*25:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:94 protein. This plasmid can be used for constructing HLA-A*25:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*25:95 Protein Expression Plasmid Vector	PHLAP9255747	Plasmid vector containing HLA-A*25:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*25:95 protein. This plasmid can be used for constructing HLA-A*25:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*25:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:01 Protein Expression Plasmid Vector	PHLAP9255748	Plasmid vector containing HLA-A*26:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:01 protein. This plasmid can be used for constructing HLA-A*26:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:02 Protein Expression Plasmid Vector	PHLAP9255749	Plasmid vector containing HLA-A*26:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:02 protein. This plasmid can be used for constructing HLA-A*26:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:03N Protein Expression Plasmid Vector	PHLAP9255750	Plasmid vector containing HLA-A*26:01:01:03N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:03N protein. This plasmid can be used for constructing HLA-A*26:01:01:03N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:03N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:04 Protein Expression Plasmid Vector	PHLAP9255751	Plasmid vector containing HLA-A*26:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:04 protein. This plasmid can be used for constructing HLA-A*26:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:01:05 Protein Expression Plasmid Vector	PHLAP9255752	Plasmid vector containing HLA-A*26:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:05 protein. This plasmid can be used for constructing HLA-A*26:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:06 Protein Expression Plasmid Vector	PHLAP9255753	Plasmid vector containing HLA-A*26:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:06 protein. This plasmid can be used for constructing HLA-A*26:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:07 Protein Expression Plasmid Vector	PHLAP9255754	Plasmid vector containing HLA-A*26:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:07 protein. This plasmid can be used for constructing HLA-A*26:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:08 Protein Expression Plasmid Vector	PHLAP9255755	Plasmid vector containing HLA-A*26:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:08 protein. This plasmid can be used for constructing HLA-A*26:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:09 Protein Expression Plasmid Vector	PHLAP9255756	Plasmid vector containing HLA-A*26:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:09 protein. This plasmid can be used for constructing HLA-A*26:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:10 Protein Expression Plasmid Vector	PHLAP9255757	Plasmid vector containing HLA-A*26:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:10 protein. This plasmid can be used for constructing HLA-A*26:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:11 Protein Expression Plasmid Vector	PHLAP9255758	Plasmid vector containing HLA-A*26:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:11 protein. This plasmid can be used for constructing HLA-A*26:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:01:12 Protein Expression Plasmid Vector	PHLAP9255759	Plasmid vector containing HLA-A*26:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:12 protein. This plasmid can be used for constructing HLA-A*26:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:13 Protein Expression Plasmid Vector	PHLAP9255760	Plasmid vector containing HLA-A*26:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:13 protein. This plasmid can be used for constructing HLA-A*26:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:14 Protein Expression Plasmid Vector	PHLAP9255761	Plasmid vector containing HLA-A*26:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:14 protein. This plasmid can be used for constructing HLA-A*26:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:15 Protein Expression Plasmid Vector	PHLAP9255762	Plasmid vector containing HLA-A*26:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:15 protein. This plasmid can be used for constructing HLA-A*26:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:16 Protein Expression Plasmid Vector	PHLAP9255763	Plasmid vector containing HLA-A*26:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:16 protein. This plasmid can be used for constructing HLA-A*26:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:17 Protein Expression Plasmid Vector	PHLAP9255764	Plasmid vector containing HLA-A*26:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:17 protein. This plasmid can be used for constructing HLA-A*26:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:18 Protein Expression Plasmid Vector	PHLAP9255765	Plasmid vector containing HLA-A*26:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:18 protein. This plasmid can be used for constructing HLA-A*26:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:01:19 Protein Expression Plasmid Vector	PHLAP9255766	Plasmid vector containing HLA-A*26:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:19 protein. This plasmid can be used for constructing HLA-A*26:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:20 Protein Expression Plasmid Vector	PHLAP9255767	Plasmid vector containing HLA-A*26:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:20 protein. This plasmid can be used for constructing HLA-A*26:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:21 Protein Expression Plasmid Vector	PHLAP9255768	Plasmid vector containing HLA-A*26:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:21 protein. This plasmid can be used for constructing HLA-A*26:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:22 Protein Expression Plasmid Vector	PHLAP9255769	Plasmid vector containing HLA-A*26:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:22 protein. This plasmid can be used for constructing HLA-A*26:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:23 Protein Expression Plasmid Vector	PHLAP9255770	Plasmid vector containing HLA-A*26:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:23 protein. This plasmid can be used for constructing HLA-A*26:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:24 Protein Expression Plasmid Vector	PHLAP9255771	Plasmid vector containing HLA-A*26:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:24 protein. This plasmid can be used for constructing HLA-A*26:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:25 Protein Expression Plasmid Vector	PHLAP9255772	Plasmid vector containing HLA-A*26:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:25 protein. This plasmid can be used for constructing HLA-A*26:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:01:26 Protein Expression Plasmid Vector	PHLAP9255773	Plasmid vector containing HLA-A*26:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:26 protein. This plasmid can be used for constructing HLA-A*26:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:27 Protein Expression Plasmid Vector	PHLAP9255774	Plasmid vector containing HLA-A*26:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:27 protein. This plasmid can be used for constructing HLA-A*26:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:28 Protein Expression Plasmid Vector	PHLAP9255775	Plasmid vector containing HLA-A*26:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:28 protein. This plasmid can be used for constructing HLA-A*26:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:29 Protein Expression Plasmid Vector	PHLAP9255776	Plasmid vector containing HLA-A*26:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:29 protein. This plasmid can be used for constructing HLA-A*26:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:30 Protein Expression Plasmid Vector	PHLAP9255777	Plasmid vector containing HLA-A*26:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:30 protein. This plasmid can be used for constructing HLA-A*26:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:31 Protein Expression Plasmid Vector	PHLAP9255778	Plasmid vector containing HLA-A*26:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:31 protein. This plasmid can be used for constructing HLA-A*26:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:32 Protein Expression Plasmid Vector	PHLAP9255779	Plasmid vector containing HLA-A*26:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:32 protein. This plasmid can be used for constructing HLA-A*26:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:01:33 Protein Expression Plasmid Vector	PHLAP9255780	Plasmid vector containing HLA-A*26:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:33 protein. This plasmid can be used for constructing HLA-A*26:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:34 Protein Expression Plasmid Vector	PHLAP9255781	Plasmid vector containing HLA-A*26:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:34 protein. This plasmid can be used for constructing HLA-A*26:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:35 Protein Expression Plasmid Vector	PHLAP9255782	Plasmid vector containing HLA-A*26:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:35 protein. This plasmid can be used for constructing HLA-A*26:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:36 Protein Expression Plasmid Vector	PHLAP9255783	Plasmid vector containing HLA-A*26:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:36 protein. This plasmid can be used for constructing HLA-A*26:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:37 Protein Expression Plasmid Vector	PHLAP9255784	Plasmid vector containing HLA-A*26:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:37 protein. This plasmid can be used for constructing HLA-A*26:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:38 Protein Expression Plasmid Vector	PHLAP9255785	Plasmid vector containing HLA-A*26:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:38 protein. This plasmid can be used for constructing HLA-A*26:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:39 Protein Expression Plasmid Vector	PHLAP9255786	Plasmid vector containing HLA-A*26:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:39 protein. This plasmid can be used for constructing HLA-A*26:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:01:40 Protein Expression Plasmid Vector	PHLAP9255787	Plasmid vector containing HLA-A*26:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:40 protein. This plasmid can be used for constructing HLA-A*26:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:41 Protein Expression Plasmid Vector	PHLAP9255788	Plasmid vector containing HLA-A*26:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:41 protein. This plasmid can be used for constructing HLA-A*26:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:42 Protein Expression Plasmid Vector	PHLAP9255789	Plasmid vector containing HLA-A*26:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:42 protein. This plasmid can be used for constructing HLA-A*26:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:43 Protein Expression Plasmid Vector	PHLAP9255790	Plasmid vector containing HLA-A*26:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:43 protein. This plasmid can be used for constructing HLA-A*26:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:44 Protein Expression Plasmid Vector	PHLAP9255791	Plasmid vector containing HLA-A*26:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:44 protein. This plasmid can be used for constructing HLA-A*26:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:45 Protein Expression Plasmid Vector	PHLAP9255792	Plasmid vector containing HLA-A*26:01:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:45 protein. This plasmid can be used for constructing HLA-A*26:01:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:46 Protein Expression Plasmid Vector	PHLAP9255793	Plasmid vector containing HLA-A*26:01:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:46 protein. This plasmid can be used for constructing HLA-A*26:01:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:01:47 Protein Expression Plasmid Vector	PHLAP9255794	Plasmid vector containing HLA-A*26:01:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:47 protein. This plasmid can be used for constructing HLA-A*26:01:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:48 Protein Expression Plasmid Vector	PHLAP9255795	Plasmid vector containing HLA-A*26:01:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:48 protein. This plasmid can be used for constructing HLA-A*26:01:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:49 Protein Expression Plasmid Vector	PHLAP9255796	Plasmid vector containing HLA-A*26:01:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:49 protein. This plasmid can be used for constructing HLA-A*26:01:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:50 Protein Expression Plasmid Vector	PHLAP9255797	Plasmid vector containing HLA-A*26:01:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:50 protein. This plasmid can be used for constructing HLA-A*26:01:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:51 Protein Expression Plasmid Vector	PHLAP9255798	Plasmid vector containing HLA-A*26:01:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:51 protein. This plasmid can be used for constructing HLA-A*26:01:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:52Q Protein Expression Plasmid Vector	PHLAP9255799	Plasmid vector containing HLA-A*26:01:01:52Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:52Q protein. This plasmid can be used for constructing HLA-A*26:01:01:52Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:52Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:53 Protein Expression Plasmid Vector	PHLAP9255800	Plasmid vector containing HLA-A*26:01:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:53 protein. This plasmid can be used for constructing HLA-A*26:01:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:01:54 Protein Expression Plasmid Vector	PHLAP9255801	Plasmid vector containing HLA-A*26:01:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:54 protein. This plasmid can be used for constructing HLA-A*26:01:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:55 Protein Expression Plasmid Vector	PHLAP9255802	Plasmid vector containing HLA-A*26:01:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:55 protein. This plasmid can be used for constructing HLA-A*26:01:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:56 Protein Expression Plasmid Vector	PHLAP9255803	Plasmid vector containing HLA-A*26:01:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:56 protein. This plasmid can be used for constructing HLA-A*26:01:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:01:57 Protein Expression Plasmid Vector	PHLAP9255804	Plasmid vector containing HLA-A*26:01:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:01:57 protein. This plasmid can be used for constructing HLA-A*26:01:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:02 Protein Expression Plasmid Vector	PHLAP9255805	Plasmid vector containing HLA-A*26:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:02 protein. This plasmid can be used for constructing HLA-A*26:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:03 Protein Expression Plasmid Vector	PHLAP9255806	Plasmid vector containing HLA-A*26:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:03 protein. This plasmid can be used for constructing HLA-A*26:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:04 Protein Expression Plasmid Vector	PHLAP9255807	Plasmid vector containing HLA-A*26:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:04 protein. This plasmid can be used for constructing HLA-A*26:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:05 Protein Expression Plasmid Vector	PHLAP9255808	Plasmid vector containing HLA-A*26:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:05 protein. This plasmid can be used for constructing HLA-A*26:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:06 Protein Expression Plasmid Vector	PHLAP9255809	Plasmid vector containing HLA-A*26:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:06 protein. This plasmid can be used for constructing HLA-A*26:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:07 Protein Expression Plasmid Vector	PHLAP9255810	Plasmid vector containing HLA-A*26:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:07 protein. This plasmid can be used for constructing HLA-A*26:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:08 Protein Expression Plasmid Vector	PHLAP9255811	Plasmid vector containing HLA-A*26:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:08 protein. This plasmid can be used for constructing HLA-A*26:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:09 Protein Expression Plasmid Vector	PHLAP9255812	Plasmid vector containing HLA-A*26:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:09 protein. This plasmid can be used for constructing HLA-A*26:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:10 Protein Expression Plasmid Vector	PHLAP9255813	Plasmid vector containing HLA-A*26:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:10 protein. This plasmid can be used for constructing HLA-A*26:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:11 Protein Expression Plasmid Vector	PHLAP9255814	Plasmid vector containing HLA-A*26:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:11 protein. This plasmid can be used for constructing HLA-A*26:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:12 Protein Expression Plasmid Vector	PHLAP9255815	Plasmid vector containing HLA-A*26:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:12 protein. This plasmid can be used for constructing HLA-A*26:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:13 Protein Expression Plasmid Vector	PHLAP9255816	Plasmid vector containing HLA-A*26:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:13 protein. This plasmid can be used for constructing HLA-A*26:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:14 Protein Expression Plasmid Vector	PHLAP9255817	Plasmid vector containing HLA-A*26:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:14 protein. This plasmid can be used for constructing HLA-A*26:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:15 Protein Expression Plasmid Vector	PHLAP9255818	Plasmid vector containing HLA-A*26:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:15 protein. This plasmid can be used for constructing HLA-A*26:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:16 Protein Expression Plasmid Vector	PHLAP9255819	Plasmid vector containing HLA-A*26:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:16 protein. This plasmid can be used for constructing HLA-A*26:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:17 Protein Expression Plasmid Vector	PHLAP9255820	Plasmid vector containing HLA-A*26:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:17 protein. This plasmid can be used for constructing HLA-A*26:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:18 Protein Expression Plasmid Vector	PHLAP9255821	Plasmid vector containing HLA-A*26:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:18 protein. This plasmid can be used for constructing HLA-A*26:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:19 Protein Expression Plasmid Vector	PHLAP9255822	Plasmid vector containing HLA-A*26:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:19 protein. This plasmid can be used for constructing HLA-A*26:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:20 Protein Expression Plasmid Vector	PHLAP9255823	Plasmid vector containing HLA-A*26:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:20 protein. This plasmid can be used for constructing HLA-A*26:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:21 Protein Expression Plasmid Vector	PHLAP9255824	Plasmid vector containing HLA-A*26:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:21 protein. This plasmid can be used for constructing HLA-A*26:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:22 Protein Expression Plasmid Vector	PHLAP9255825	Plasmid vector containing HLA-A*26:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:22 protein. This plasmid can be used for constructing HLA-A*26:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:23 Protein Expression Plasmid Vector	PHLAP9255826	Plasmid vector containing HLA-A*26:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:23 protein. This plasmid can be used for constructing HLA-A*26:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:24 Protein Expression Plasmid Vector	PHLAP9255827	Plasmid vector containing HLA-A*26:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:24 protein. This plasmid can be used for constructing HLA-A*26:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:25 Protein Expression Plasmid Vector	PHLAP9255828	Plasmid vector containing HLA-A*26:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:25 protein. This plasmid can be used for constructing HLA-A*26:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:26 Protein Expression Plasmid Vector	PHLAP9255829	Plasmid vector containing HLA-A*26:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:26 protein. This plasmid can be used for constructing HLA-A*26:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:27 Protein Expression Plasmid Vector	PHLAP9255830	Plasmid vector containing HLA-A*26:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:27 protein. This plasmid can be used for constructing HLA-A*26:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:28 Protein Expression Plasmid Vector	PHLAP9255831	Plasmid vector containing HLA-A*26:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:28 protein. This plasmid can be used for constructing HLA-A*26:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:29 Protein Expression Plasmid Vector	PHLAP9255832	Plasmid vector containing HLA-A*26:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:29 protein. This plasmid can be used for constructing HLA-A*26:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:30 Protein Expression Plasmid Vector	PHLAP9255833	Plasmid vector containing HLA-A*26:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:30 protein. This plasmid can be used for constructing HLA-A*26:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:31 Protein Expression Plasmid Vector	PHLAP9255834	Plasmid vector containing HLA-A*26:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:31 protein. This plasmid can be used for constructing HLA-A*26:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:32 Protein Expression Plasmid Vector	PHLAP9255835	Plasmid vector containing HLA-A*26:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:32 protein. This plasmid can be used for constructing HLA-A*26:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:33 Protein Expression Plasmid Vector	PHLAP9255836	Plasmid vector containing HLA-A*26:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:33 protein. This plasmid can be used for constructing HLA-A*26:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:34 Protein Expression Plasmid Vector	PHLAP9255837	Plasmid vector containing HLA-A*26:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:34 protein. This plasmid can be used for constructing HLA-A*26:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:35 Protein Expression Plasmid Vector	PHLAP9255838	Plasmid vector containing HLA-A*26:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:35 protein. This plasmid can be used for constructing HLA-A*26:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:36 Protein Expression Plasmid Vector	PHLAP9255839	Plasmid vector containing HLA-A*26:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:36 protein. This plasmid can be used for constructing HLA-A*26:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:37 Protein Expression Plasmid Vector	PHLAP9255840	Plasmid vector containing HLA-A*26:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:37 protein. This plasmid can be used for constructing HLA-A*26:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:38 Protein Expression Plasmid Vector	PHLAP9255841	Plasmid vector containing HLA-A*26:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:38 protein. This plasmid can be used for constructing HLA-A*26:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:39 Protein Expression Plasmid Vector	PHLAP9255842	Plasmid vector containing HLA-A*26:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:39 protein. This plasmid can be used for constructing HLA-A*26:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:40 Protein Expression Plasmid Vector	PHLAP9255843	Plasmid vector containing HLA-A*26:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:40 protein. This plasmid can be used for constructing HLA-A*26:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:41 Protein Expression Plasmid Vector	PHLAP9255844	Plasmid vector containing HLA-A*26:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:41 protein. This plasmid can be used for constructing HLA-A*26:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:42 Protein Expression Plasmid Vector	PHLAP9255845	Plasmid vector containing HLA-A*26:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:42 protein. This plasmid can be used for constructing HLA-A*26:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:43 Protein Expression Plasmid Vector	PHLAP9255846	Plasmid vector containing HLA-A*26:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:43 protein. This plasmid can be used for constructing HLA-A*26:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:44 Protein Expression Plasmid Vector	PHLAP9255847	Plasmid vector containing HLA-A*26:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:44 protein. This plasmid can be used for constructing HLA-A*26:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:45 Protein Expression Plasmid Vector	PHLAP9255848	Plasmid vector containing HLA-A*26:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:45 protein. This plasmid can be used for constructing HLA-A*26:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:46:01 Protein Expression Plasmid Vector	PHLAP9255849	Plasmid vector containing HLA-A*26:01:46:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:46:01 protein. This plasmid can be used for constructing HLA-A*26:01:46:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:46:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:46:02 Protein Expression Plasmid Vector	PHLAP9255850	Plasmid vector containing HLA-A*26:01:46:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:46:02 protein. This plasmid can be used for constructing HLA-A*26:01:46:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:46:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:47 Protein Expression Plasmid Vector	PHLAP9255851	Plasmid vector containing HLA-A*26:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:47 protein. This plasmid can be used for constructing HLA-A*26:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:48 Protein Expression Plasmid Vector	PHLAP9255852	Plasmid vector containing HLA-A*26:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:48 protein. This plasmid can be used for constructing HLA-A*26:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:49 Protein Expression Plasmid Vector	PHLAP9255853	Plasmid vector containing HLA-A*26:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:49 protein. This plasmid can be used for constructing HLA-A*26:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:50 Protein Expression Plasmid Vector	PHLAP9255854	Plasmid vector containing HLA-A*26:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:50 protein. This plasmid can be used for constructing HLA-A*26:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:51 Protein Expression Plasmid Vector	PHLAP9255855	Plasmid vector containing HLA-A*26:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:51 protein. This plasmid can be used for constructing HLA-A*26:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:52 Protein Expression Plasmid Vector	PHLAP9255856	Plasmid vector containing HLA-A*26:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:52 protein. This plasmid can be used for constructing HLA-A*26:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:53 Protein Expression Plasmid Vector	PHLAP9255857	Plasmid vector containing HLA-A*26:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:53 protein. This plasmid can be used for constructing HLA-A*26:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:54 Protein Expression Plasmid Vector	PHLAP9255858	Plasmid vector containing HLA-A*26:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:54 protein. This plasmid can be used for constructing HLA-A*26:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:55 Protein Expression Plasmid Vector	PHLAP9255859	Plasmid vector containing HLA-A*26:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:55 protein. This plasmid can be used for constructing HLA-A*26:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:56 Protein Expression Plasmid Vector	PHLAP9255860	Plasmid vector containing HLA-A*26:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:56 protein. This plasmid can be used for constructing HLA-A*26:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:57 Protein Expression Plasmid Vector	PHLAP9255861	Plasmid vector containing HLA-A*26:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:57 protein. This plasmid can be used for constructing HLA-A*26:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:58 Protein Expression Plasmid Vector	PHLAP9255862	Plasmid vector containing HLA-A*26:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:58 protein. This plasmid can be used for constructing HLA-A*26:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:59 Protein Expression Plasmid Vector	PHLAP9255863	Plasmid vector containing HLA-A*26:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:59 protein. This plasmid can be used for constructing HLA-A*26:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:60 Protein Expression Plasmid Vector	PHLAP9255864	Plasmid vector containing HLA-A*26:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:60 protein. This plasmid can be used for constructing HLA-A*26:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:61 Protein Expression Plasmid Vector	PHLAP9255865	Plasmid vector containing HLA-A*26:01:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:61 protein. This plasmid can be used for constructing HLA-A*26:01:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:62 Protein Expression Plasmid Vector	PHLAP9255866	Plasmid vector containing HLA-A*26:01:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:62 protein. This plasmid can be used for constructing HLA-A*26:01:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:63 Protein Expression Plasmid Vector	PHLAP9255867	Plasmid vector containing HLA-A*26:01:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:63 protein. This plasmid can be used for constructing HLA-A*26:01:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:64 Protein Expression Plasmid Vector	PHLAP9255868	Plasmid vector containing HLA-A*26:01:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:64 protein. This plasmid can be used for constructing HLA-A*26:01:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:65 Protein Expression Plasmid Vector	PHLAP9255869	Plasmid vector containing HLA-A*26:01:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:65 protein. This plasmid can be used for constructing HLA-A*26:01:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:66 Protein Expression Plasmid Vector	PHLAP9255870	Plasmid vector containing HLA-A*26:01:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:66 protein. This plasmid can be used for constructing HLA-A*26:01:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:67 Protein Expression Plasmid Vector	PHLAP9255871	Plasmid vector containing HLA-A*26:01:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:67 protein. This plasmid can be used for constructing HLA-A*26:01:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:68 Protein Expression Plasmid Vector	PHLAP9255872	Plasmid vector containing HLA-A*26:01:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:68 protein. This plasmid can be used for constructing HLA-A*26:01:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:69 Protein Expression Plasmid Vector	PHLAP9255873	Plasmid vector containing HLA-A*26:01:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:69 protein. This plasmid can be used for constructing HLA-A*26:01:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:70 Protein Expression Plasmid Vector	PHLAP9255874	Plasmid vector containing HLA-A*26:01:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:70 protein. This plasmid can be used for constructing HLA-A*26:01:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:71 Protein Expression Plasmid Vector	PHLAP9255875	Plasmid vector containing HLA-A*26:01:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:71 protein. This plasmid can be used for constructing HLA-A*26:01:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:72 Protein Expression Plasmid Vector	PHLAP9255876	Plasmid vector containing HLA-A*26:01:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:72 protein. This plasmid can be used for constructing HLA-A*26:01:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:73 Protein Expression Plasmid Vector	PHLAP9255877	Plasmid vector containing HLA-A*26:01:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:73 protein. This plasmid can be used for constructing HLA-A*26:01:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:74 Protein Expression Plasmid Vector	PHLAP9255878	Plasmid vector containing HLA-A*26:01:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:74 protein. This plasmid can be used for constructing HLA-A*26:01:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:75 Protein Expression Plasmid Vector	PHLAP9255879	Plasmid vector containing HLA-A*26:01:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:75 protein. This plasmid can be used for constructing HLA-A*26:01:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:76 Protein Expression Plasmid Vector	PHLAP9255880	Plasmid vector containing HLA-A*26:01:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:76 protein. This plasmid can be used for constructing HLA-A*26:01:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:77 Protein Expression Plasmid Vector	PHLAP9255881	Plasmid vector containing HLA-A*26:01:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:77 protein. This plasmid can be used for constructing HLA-A*26:01:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:78 Protein Expression Plasmid Vector	PHLAP9255882	Plasmid vector containing HLA-A*26:01:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:78 protein. This plasmid can be used for constructing HLA-A*26:01:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:79 Protein Expression Plasmid Vector	PHLAP9255883	Plasmid vector containing HLA-A*26:01:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:79 protein. This plasmid can be used for constructing HLA-A*26:01:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:80 Protein Expression Plasmid Vector	PHLAP9255884	Plasmid vector containing HLA-A*26:01:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:80 protein. This plasmid can be used for constructing HLA-A*26:01:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:81 Protein Expression Plasmid Vector	PHLAP9255885	Plasmid vector containing HLA-A*26:01:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:81 protein. This plasmid can be used for constructing HLA-A*26:01:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:82 Protein Expression Plasmid Vector	PHLAP9255886	Plasmid vector containing HLA-A*26:01:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:82 protein. This plasmid can be used for constructing HLA-A*26:01:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:83 Protein Expression Plasmid Vector	PHLAP9255887	Plasmid vector containing HLA-A*26:01:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:83 protein. This plasmid can be used for constructing HLA-A*26:01:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:01:84 Protein Expression Plasmid Vector	PHLAP9255888	Plasmid vector containing HLA-A*26:01:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:84 protein. This plasmid can be used for constructing HLA-A*26:01:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:85 Protein Expression Plasmid Vector	PHLAP9255889	Plasmid vector containing HLA-A*26:01:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:85 protein. This plasmid can be used for constructing HLA-A*26:01:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:86 Protein Expression Plasmid Vector	PHLAP9255890	Plasmid vector containing HLA-A*26:01:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:86 protein. This plasmid can be used for constructing HLA-A*26:01:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:01:87 Protein Expression Plasmid Vector	PHLAP9255891	Plasmid vector containing HLA-A*26:01:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:01:87 protein. This plasmid can be used for constructing HLA-A*26:01:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:01:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:02:01 Protein Expression Plasmid Vector	PHLAP9255892	Plasmid vector containing HLA-A*26:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:02:01 protein. This plasmid can be used for constructing HLA-A*26:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:02:02 Protein Expression Plasmid Vector	PHLAP9255893	Plasmid vector containing HLA-A*26:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:02:02 protein. This plasmid can be used for constructing HLA-A*26:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:03:01:01 Protein Expression Plasmid Vector	PHLAP9255894	Plasmid vector containing HLA-A*26:03:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:03:01:01 protein. This plasmid can be used for constructing HLA-A*26:03:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:03:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:03:01:02 Protein Expression Plasmid Vector	PHLAP9255895	Plasmid vector containing HLA-A*26:03:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:03:01:02 protein. This plasmid can be used for constructing HLA-A*26:03:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:03:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:03:02 Protein Expression Plasmid Vector	PHLAP9255896	Plasmid vector containing HLA-A*26:03:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:03:02 protein. This plasmid can be used for constructing HLA-A*26:03:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:03:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:03:03 Protein Expression Plasmid Vector	PHLAP9255897	Plasmid vector containing HLA-A*26:03:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:03:03 protein. This plasmid can be used for constructing HLA-A*26:03:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:03:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:03:04 Protein Expression Plasmid Vector	PHLAP9255898	Plasmid vector containing HLA-A*26:03:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:03:04 protein. This plasmid can be used for constructing HLA-A*26:03:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:03:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:04 Protein Expression Plasmid Vector	PHLAP9255899	Plasmid vector containing HLA-A*26:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:04 protein. This plasmid can be used for constructing HLA-A*26:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:05 Protein Expression Plasmid Vector	PHLAP9255900	Plasmid vector containing HLA-A*26:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:05 protein. This plasmid can be used for constructing HLA-A*26:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:06 Protein Expression Plasmid Vector	PHLAP9255901	Plasmid vector containing HLA-A*26:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:06 protein. This plasmid can be used for constructing HLA-A*26:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:07:01 Protein Expression Plasmid Vector	PHLAP9255902	Plasmid vector containing HLA-A*26:07:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:07:01 protein. This plasmid can be used for constructing HLA-A*26:07:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:07:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:07:02 Protein Expression Plasmid Vector	PHLAP9255903	Plasmid vector containing HLA-A*26:07:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:07:02 protein. This plasmid can be used for constructing HLA-A*26:07:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:07:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:08:01:01 Protein Expression Plasmid Vector	PHLAP9255904	Plasmid vector containing HLA-A*26:08:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:08:01:01 protein. This plasmid can be used for constructing HLA-A*26:08:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:08:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:08:01:02 Protein Expression Plasmid Vector	PHLAP9255905	Plasmid vector containing HLA-A*26:08:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:08:01:02 protein. This plasmid can be used for constructing HLA-A*26:08:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:08:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:08:01:03 Protein Expression Plasmid Vector	PHLAP9255906	Plasmid vector containing HLA-A*26:08:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:08:01:03 protein. This plasmid can be used for constructing HLA-A*26:08:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:08:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:08:02 Protein Expression Plasmid Vector	PHLAP9255907	Plasmid vector containing HLA-A*26:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:08:02 protein. This plasmid can be used for constructing HLA-A*26:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:08:03 Protein Expression Plasmid Vector	PHLAP9255908	Plasmid vector containing HLA-A*26:08:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:08:03 protein. This plasmid can be used for constructing HLA-A*26:08:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:08:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:09 Protein Expression Plasmid Vector	PHLAP9255909	Plasmid vector containing HLA-A*26:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:09 protein. This plasmid can be used for constructing HLA-A*26:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:10 Protein Expression Plasmid Vector	PHLAP9255910	Plasmid vector containing HLA-A*26:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:10 protein. This plasmid can be used for constructing HLA-A*26:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:100 Protein Expression Plasmid Vector	PHLAP9255911	Plasmid vector containing HLA-A*26:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:100 protein. This plasmid can be used for constructing HLA-A*26:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:101 Protein Expression Plasmid Vector	PHLAP9255912	Plasmid vector containing HLA-A*26:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:101 protein. This plasmid can be used for constructing HLA-A*26:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:102 Protein Expression Plasmid Vector	PHLAP9255913	Plasmid vector containing HLA-A*26:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:102 protein. This plasmid can be used for constructing HLA-A*26:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:103 Protein Expression Plasmid Vector	PHLAP9255914	Plasmid vector containing HLA-A*26:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:103 protein. This plasmid can be used for constructing HLA-A*26:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:104 Protein Expression Plasmid Vector	PHLAP9255915	Plasmid vector containing HLA-A*26:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:104 protein. This plasmid can be used for constructing HLA-A*26:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:105 Protein Expression Plasmid Vector	PHLAP9255916	Plasmid vector containing HLA-A*26:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:105 protein. This plasmid can be used for constructing HLA-A*26:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:106 Protein Expression Plasmid Vector	PHLAP9255917	Plasmid vector containing HLA-A*26:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:106 protein. This plasmid can be used for constructing HLA-A*26:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:107:01N Protein Expression Plasmid Vector	PHLAP9255918	Plasmid vector containing HLA-A*26:107:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:107:01N protein. This plasmid can be used for constructing HLA-A*26:107:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:107:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:107:02N Protein Expression Plasmid Vector	PHLAP9255919	Plasmid vector containing HLA-A*26:107:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:107:02N protein. This plasmid can be used for constructing HLA-A*26:107:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:107:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:108 Protein Expression Plasmid Vector	PHLAP9255920	Plasmid vector containing HLA-A*26:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:108 protein. This plasmid can be used for constructing HLA-A*26:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:109 Protein Expression Plasmid Vector	PHLAP9255921	Plasmid vector containing HLA-A*26:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:109 protein. This plasmid can be used for constructing HLA-A*26:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:110 Protein Expression Plasmid Vector	PHLAP9255922	Plasmid vector containing HLA-A*26:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:110 protein. This plasmid can be used for constructing HLA-A*26:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:111 Protein Expression Plasmid Vector	PHLAP9255923	Plasmid vector containing HLA-A*26:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:111 protein. This plasmid can be used for constructing HLA-A*26:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:112:01 Protein Expression Plasmid Vector	PHLAP9255924	Plasmid vector containing HLA-A*26:112:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:112:01 protein. This plasmid can be used for constructing HLA-A*26:112:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:112:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:112:02 Protein Expression Plasmid Vector	PHLAP9255925	Plasmid vector containing HLA-A*26:112:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:112:02 protein. This plasmid can be used for constructing HLA-A*26:112:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:112:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:113 Protein Expression Plasmid Vector	PHLAP9255926	Plasmid vector containing HLA-A*26:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:113 protein. This plasmid can be used for constructing HLA-A*26:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:114 Protein Expression Plasmid Vector	PHLAP9255927	Plasmid vector containing HLA-A*26:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:114 protein. This plasmid can be used for constructing HLA-A*26:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:115 Protein Expression Plasmid Vector	PHLAP9255928	Plasmid vector containing HLA-A*26:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:115 protein. This plasmid can be used for constructing HLA-A*26:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:116 Protein Expression Plasmid Vector	PHLAP9255929	Plasmid vector containing HLA-A*26:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:116 protein. This plasmid can be used for constructing HLA-A*26:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:117 Protein Expression Plasmid Vector	PHLAP9255930	Plasmid vector containing HLA-A*26:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:117 protein. This plasmid can be used for constructing HLA-A*26:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:118 Protein Expression Plasmid Vector	PHLAP9255931	Plasmid vector containing HLA-A*26:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:118 protein. This plasmid can be used for constructing HLA-A*26:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:119 Protein Expression Plasmid Vector	PHLAP9255932	Plasmid vector containing HLA-A*26:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:119 protein. This plasmid can be used for constructing HLA-A*26:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:11N Protein Expression Plasmid Vector	PHLAP9255933	Plasmid vector containing HLA-A*26:11N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:11N protein. This plasmid can be used for constructing HLA-A*26:11N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:11N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:12:01:01 Protein Expression Plasmid Vector	PHLAP9255934	Plasmid vector containing HLA-A*26:12:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:12:01:01 protein. This plasmid can be used for constructing HLA-A*26:12:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:12:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:12:01:02 Protein Expression Plasmid Vector	PHLAP9255935	Plasmid vector containing HLA-A*26:12:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:12:01:02 protein. This plasmid can be used for constructing HLA-A*26:12:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:12:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:120 Protein Expression Plasmid Vector	PHLAP9255936	Plasmid vector containing HLA-A*26:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:120 protein. This plasmid can be used for constructing HLA-A*26:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:121 Protein Expression Plasmid Vector	PHLAP9255937	Plasmid vector containing HLA-A*26:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:121 protein. This plasmid can be used for constructing HLA-A*26:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:122 Protein Expression Plasmid Vector	PHLAP9255938	Plasmid vector containing HLA-A*26:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:122 protein. This plasmid can be used for constructing HLA-A*26:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:123 Protein Expression Plasmid Vector	PHLAP9255939	Plasmid vector containing HLA-A*26:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:123 protein. This plasmid can be used for constructing HLA-A*26:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:124 Protein Expression Plasmid Vector	PHLAP9255940	Plasmid vector containing HLA-A*26:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:124 protein. This plasmid can be used for constructing HLA-A*26:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:125 Protein Expression Plasmid Vector	PHLAP9255941	Plasmid vector containing HLA-A*26:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:125 protein. This plasmid can be used for constructing HLA-A*26:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:126 Protein Expression Plasmid Vector	PHLAP9255942	Plasmid vector containing HLA-A*26:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:126 protein. This plasmid can be used for constructing HLA-A*26:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:127N Protein Expression Plasmid Vector	PHLAP9255943	Plasmid vector containing HLA-A*26:127N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:127N protein. This plasmid can be used for constructing HLA-A*26:127N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:127N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:128 Protein Expression Plasmid Vector	PHLAP9255944	Plasmid vector containing HLA-A*26:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:128 protein. This plasmid can be used for constructing HLA-A*26:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:129 Protein Expression Plasmid Vector	PHLAP9255945	Plasmid vector containing HLA-A*26:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:129 protein. This plasmid can be used for constructing HLA-A*26:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:13 Protein Expression Plasmid Vector	PHLAP9255946	Plasmid vector containing HLA-A*26:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:13 protein. This plasmid can be used for constructing HLA-A*26:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:130 Protein Expression Plasmid Vector	PHLAP9255947	Plasmid vector containing HLA-A*26:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:130 protein. This plasmid can be used for constructing HLA-A*26:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:131 Protein Expression Plasmid Vector	PHLAP9255948	Plasmid vector containing HLA-A*26:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:131 protein. This plasmid can be used for constructing HLA-A*26:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:132 Protein Expression Plasmid Vector	PHLAP9255949	Plasmid vector containing HLA-A*26:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:132 protein. This plasmid can be used for constructing HLA-A*26:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:133 Protein Expression Plasmid Vector	PHLAP9255950	Plasmid vector containing HLA-A*26:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:133 protein. This plasmid can be used for constructing HLA-A*26:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:134 Protein Expression Plasmid Vector	PHLAP9255951	Plasmid vector containing HLA-A*26:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:134 protein. This plasmid can be used for constructing HLA-A*26:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:135 Protein Expression Plasmid Vector	PHLAP9255952	Plasmid vector containing HLA-A*26:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:135 protein. This plasmid can be used for constructing HLA-A*26:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:136 Protein Expression Plasmid Vector	PHLAP9255953	Plasmid vector containing HLA-A*26:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:136 protein. This plasmid can be used for constructing HLA-A*26:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:137 Protein Expression Plasmid Vector	PHLAP9255954	Plasmid vector containing HLA-A*26:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:137 protein. This plasmid can be used for constructing HLA-A*26:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:138 Protein Expression Plasmid Vector	PHLAP9255955	Plasmid vector containing HLA-A*26:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:138 protein. This plasmid can be used for constructing HLA-A*26:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:139 Protein Expression Plasmid Vector	PHLAP9255956	Plasmid vector containing HLA-A*26:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:139 protein. This plasmid can be used for constructing HLA-A*26:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:14 Protein Expression Plasmid Vector	PHLAP9255957	Plasmid vector containing HLA-A*26:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:14 protein. This plasmid can be used for constructing HLA-A*26:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:140 Protein Expression Plasmid Vector	PHLAP9255958	Plasmid vector containing HLA-A*26:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:140 protein. This plasmid can be used for constructing HLA-A*26:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:141 Protein Expression Plasmid Vector	PHLAP9255959	Plasmid vector containing HLA-A*26:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:141 protein. This plasmid can be used for constructing HLA-A*26:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:142 Protein Expression Plasmid Vector	PHLAP9255960	Plasmid vector containing HLA-A*26:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:142 protein. This plasmid can be used for constructing HLA-A*26:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:143 Protein Expression Plasmid Vector	PHLAP9255961	Plasmid vector containing HLA-A*26:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:143 protein. This plasmid can be used for constructing HLA-A*26:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:144 Protein Expression Plasmid Vector	PHLAP9255962	Plasmid vector containing HLA-A*26:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:144 protein. This plasmid can be used for constructing HLA-A*26:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:145N Protein Expression Plasmid Vector	PHLAP9255963	Plasmid vector containing HLA-A*26:145N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:145N protein. This plasmid can be used for constructing HLA-A*26:145N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:145N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:146 Protein Expression Plasmid Vector	PHLAP9255964	Plasmid vector containing HLA-A*26:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:146 protein. This plasmid can be used for constructing HLA-A*26:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:147 Protein Expression Plasmid Vector	PHLAP9255965	Plasmid vector containing HLA-A*26:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:147 protein. This plasmid can be used for constructing HLA-A*26:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:148 Protein Expression Plasmid Vector	PHLAP9255966	Plasmid vector containing HLA-A*26:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:148 protein. This plasmid can be used for constructing HLA-A*26:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:149 Protein Expression Plasmid Vector	PHLAP9255967	Plasmid vector containing HLA-A*26:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:149 protein. This plasmid can be used for constructing HLA-A*26:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:15 Protein Expression Plasmid Vector	PHLAP9255968	Plasmid vector containing HLA-A*26:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:15 protein. This plasmid can be used for constructing HLA-A*26:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:150 Protein Expression Plasmid Vector	PHLAP9255969	Plasmid vector containing HLA-A*26:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:150 protein. This plasmid can be used for constructing HLA-A*26:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:151 Protein Expression Plasmid Vector	PHLAP9255970	Plasmid vector containing HLA-A*26:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:151 protein. This plasmid can be used for constructing HLA-A*26:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:152 Protein Expression Plasmid Vector	PHLAP9255971	Plasmid vector containing HLA-A*26:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:152 protein. This plasmid can be used for constructing HLA-A*26:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:153 Protein Expression Plasmid Vector	PHLAP9255972	Plasmid vector containing HLA-A*26:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:153 protein. This plasmid can be used for constructing HLA-A*26:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:154 Protein Expression Plasmid Vector	PHLAP9255973	Plasmid vector containing HLA-A*26:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:154 protein. This plasmid can be used for constructing HLA-A*26:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:155 Protein Expression Plasmid Vector	PHLAP9255974	Plasmid vector containing HLA-A*26:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:155 protein. This plasmid can be used for constructing HLA-A*26:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:156 Protein Expression Plasmid Vector	PHLAP9255975	Plasmid vector containing HLA-A*26:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:156 protein. This plasmid can be used for constructing HLA-A*26:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:157 Protein Expression Plasmid Vector	PHLAP9255976	Plasmid vector containing HLA-A*26:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:157 protein. This plasmid can be used for constructing HLA-A*26:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:158 Protein Expression Plasmid Vector	PHLAP9255977	Plasmid vector containing HLA-A*26:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:158 protein. This plasmid can be used for constructing HLA-A*26:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:159 Protein Expression Plasmid Vector	PHLAP9255978	Plasmid vector containing HLA-A*26:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:159 protein. This plasmid can be used for constructing HLA-A*26:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:16 Protein Expression Plasmid Vector	PHLAP9255979	Plasmid vector containing HLA-A*26:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:16 protein. This plasmid can be used for constructing HLA-A*26:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:160 Protein Expression Plasmid Vector	PHLAP9255980	Plasmid vector containing HLA-A*26:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:160 protein. This plasmid can be used for constructing HLA-A*26:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:161N Protein Expression Plasmid Vector	PHLAP9255981	Plasmid vector containing HLA-A*26:161N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:161N protein. This plasmid can be used for constructing HLA-A*26:161N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:161N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:162 Protein Expression Plasmid Vector	PHLAP9255982	Plasmid vector containing HLA-A*26:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:162 protein. This plasmid can be used for constructing HLA-A*26:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:163 Protein Expression Plasmid Vector	PHLAP9255983	Plasmid vector containing HLA-A*26:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:163 protein. This plasmid can be used for constructing HLA-A*26:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:164 Protein Expression Plasmid Vector	PHLAP9255984	Plasmid vector containing HLA-A*26:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:164 protein. This plasmid can be used for constructing HLA-A*26:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:165 Protein Expression Plasmid Vector	PHLAP9255985	Plasmid vector containing HLA-A*26:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:165 protein. This plasmid can be used for constructing HLA-A*26:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:166 Protein Expression Plasmid Vector	PHLAP9255986	Plasmid vector containing HLA-A*26:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:166 protein. This plasmid can be used for constructing HLA-A*26:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:167 Protein Expression Plasmid Vector	PHLAP9255987	Plasmid vector containing HLA-A*26:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:167 protein. This plasmid can be used for constructing HLA-A*26:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:168 Protein Expression Plasmid Vector	PHLAP9255988	Plasmid vector containing HLA-A*26:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:168 protein. This plasmid can be used for constructing HLA-A*26:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:169 Protein Expression Plasmid Vector	PHLAP9255989	Plasmid vector containing HLA-A*26:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:169 protein. This plasmid can be used for constructing HLA-A*26:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:17 Protein Expression Plasmid Vector	PHLAP9255990	Plasmid vector containing HLA-A*26:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:17 protein. This plasmid can be used for constructing HLA-A*26:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:170 Protein Expression Plasmid Vector	PHLAP9255991	Plasmid vector containing HLA-A*26:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:170 protein. This plasmid can be used for constructing HLA-A*26:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:171 Protein Expression Plasmid Vector	PHLAP9255992	Plasmid vector containing HLA-A*26:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:171 protein. This plasmid can be used for constructing HLA-A*26:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:172 Protein Expression Plasmid Vector	PHLAP9255993	Plasmid vector containing HLA-A*26:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:172 protein. This plasmid can be used for constructing HLA-A*26:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:173 Protein Expression Plasmid Vector	PHLAP9255994	Plasmid vector containing HLA-A*26:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:173 protein. This plasmid can be used for constructing HLA-A*26:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:174 Protein Expression Plasmid Vector	PHLAP9255995	Plasmid vector containing HLA-A*26:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:174 protein. This plasmid can be used for constructing HLA-A*26:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:175 Protein Expression Plasmid Vector	PHLAP9255996	Plasmid vector containing HLA-A*26:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:175 protein. This plasmid can be used for constructing HLA-A*26:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:176 Protein Expression Plasmid Vector	PHLAP9255997	Plasmid vector containing HLA-A*26:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:176 protein. This plasmid can be used for constructing HLA-A*26:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:177 Protein Expression Plasmid Vector	PHLAP9255998	Plasmid vector containing HLA-A*26:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:177 protein. This plasmid can be used for constructing HLA-A*26:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:178 Protein Expression Plasmid Vector	PHLAP9255999	Plasmid vector containing HLA-A*26:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:178 protein. This plasmid can be used for constructing HLA-A*26:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:179 Protein Expression Plasmid Vector	PHLAP9256000	Plasmid vector containing HLA-A*26:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:179 protein. This plasmid can be used for constructing HLA-A*26:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:18 Protein Expression Plasmid Vector	PHLAP9256001	Plasmid vector containing HLA-A*26:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:18 protein. This plasmid can be used for constructing HLA-A*26:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:180N Protein Expression Plasmid Vector	PHLAP9256002	Plasmid vector containing HLA-A*26:180N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:180N protein. This plasmid can be used for constructing HLA-A*26:180N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:180N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:181 Protein Expression Plasmid Vector	PHLAP9256003	Plasmid vector containing HLA-A*26:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:181 protein. This plasmid can be used for constructing HLA-A*26:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:182 Protein Expression Plasmid Vector	PHLAP9256004	Plasmid vector containing HLA-A*26:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:182 protein. This plasmid can be used for constructing HLA-A*26:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:183 Protein Expression Plasmid Vector	PHLAP9256005	Plasmid vector containing HLA-A*26:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:183 protein. This plasmid can be used for constructing HLA-A*26:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:184 Protein Expression Plasmid Vector	PHLAP9256006	Plasmid vector containing HLA-A*26:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:184 protein. This plasmid can be used for constructing HLA-A*26:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:185 Protein Expression Plasmid Vector	PHLAP9256007	Plasmid vector containing HLA-A*26:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:185 protein. This plasmid can be used for constructing HLA-A*26:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:186 Protein Expression Plasmid Vector	PHLAP9256008	Plasmid vector containing HLA-A*26:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:186 protein. This plasmid can be used for constructing HLA-A*26:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:187 Protein Expression Plasmid Vector	PHLAP9256009	Plasmid vector containing HLA-A*26:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:187 protein. This plasmid can be used for constructing HLA-A*26:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:188 Protein Expression Plasmid Vector	PHLAP9256010	Plasmid vector containing HLA-A*26:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:188 protein. This plasmid can be used for constructing HLA-A*26:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:189 Protein Expression Plasmid Vector	PHLAP9256011	Plasmid vector containing HLA-A*26:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:189 protein. This plasmid can be used for constructing HLA-A*26:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:19 Protein Expression Plasmid Vector	PHLAP9256012	Plasmid vector containing HLA-A*26:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:19 protein. This plasmid can be used for constructing HLA-A*26:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:190 Protein Expression Plasmid Vector	PHLAP9256013	Plasmid vector containing HLA-A*26:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:190 protein. This plasmid can be used for constructing HLA-A*26:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:191N Protein Expression Plasmid Vector	PHLAP9256014	Plasmid vector containing HLA-A*26:191N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:191N protein. This plasmid can be used for constructing HLA-A*26:191N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:191N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:192 Protein Expression Plasmid Vector	PHLAP9256015	Plasmid vector containing HLA-A*26:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:192 protein. This plasmid can be used for constructing HLA-A*26:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:193 Protein Expression Plasmid Vector	PHLAP9256016	Plasmid vector containing HLA-A*26:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:193 protein. This plasmid can be used for constructing HLA-A*26:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:194 Protein Expression Plasmid Vector	PHLAP9256017	Plasmid vector containing HLA-A*26:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:194 protein. This plasmid can be used for constructing HLA-A*26:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:195 Protein Expression Plasmid Vector	PHLAP9256018	Plasmid vector containing HLA-A*26:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:195 protein. This plasmid can be used for constructing HLA-A*26:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:196 Protein Expression Plasmid Vector	PHLAP9256019	Plasmid vector containing HLA-A*26:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:196 protein. This plasmid can be used for constructing HLA-A*26:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:197 Protein Expression Plasmid Vector	PHLAP9256020	Plasmid vector containing HLA-A*26:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:197 protein. This plasmid can be used for constructing HLA-A*26:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:198 Protein Expression Plasmid Vector	PHLAP9256021	Plasmid vector containing HLA-A*26:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:198 protein. This plasmid can be used for constructing HLA-A*26:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:199 Protein Expression Plasmid Vector	PHLAP9256022	Plasmid vector containing HLA-A*26:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:199 protein. This plasmid can be used for constructing HLA-A*26:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:20:01 Protein Expression Plasmid Vector	PHLAP9256023	Plasmid vector containing HLA-A*26:20:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:20:01 protein. This plasmid can be used for constructing HLA-A*26:20:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:20:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:20:02 Protein Expression Plasmid Vector	PHLAP9256024	Plasmid vector containing HLA-A*26:20:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:20:02 protein. This plasmid can be used for constructing HLA-A*26:20:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:20:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:200 Protein Expression Plasmid Vector	PHLAP9256025	Plasmid vector containing HLA-A*26:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:200 protein. This plasmid can be used for constructing HLA-A*26:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:201 Protein Expression Plasmid Vector	PHLAP9256026	Plasmid vector containing HLA-A*26:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:201 protein. This plasmid can be used for constructing HLA-A*26:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:202N Protein Expression Plasmid Vector	PHLAP9256027	Plasmid vector containing HLA-A*26:202N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:202N protein. This plasmid can be used for constructing HLA-A*26:202N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:202N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:203 Protein Expression Plasmid Vector	PHLAP9256028	Plasmid vector containing HLA-A*26:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:203 protein. This plasmid can be used for constructing HLA-A*26:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:204:01:01 Protein Expression Plasmid Vector	PHLAP9256029	Plasmid vector containing HLA-A*26:204:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:204:01:01 protein. This plasmid can be used for constructing HLA-A*26:204:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:204:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:204:01:02 Protein Expression Plasmid Vector	PHLAP9256030	Plasmid vector containing HLA-A*26:204:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:204:01:02 protein. This plasmid can be used for constructing HLA-A*26:204:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:204:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:205 Protein Expression Plasmid Vector	PHLAP9256031	Plasmid vector containing HLA-A*26:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:205 protein. This plasmid can be used for constructing HLA-A*26:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:206:01N Protein Expression Plasmid Vector	PHLAP9256032	Plasmid vector containing HLA-A*26:206:01N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:206:01N protein. This plasmid can be used for constructing HLA-A*26:206:01N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:206:01N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:206:02N Protein Expression Plasmid Vector	PHLAP9256033	Plasmid vector containing HLA-A*26:206:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:206:02N protein. This plasmid can be used for constructing HLA-A*26:206:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:206:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:207 Protein Expression Plasmid Vector	PHLAP9256034	Plasmid vector containing HLA-A*26:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:207 protein. This plasmid can be used for constructing HLA-A*26:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:208 Protein Expression Plasmid Vector	PHLAP9256035	Plasmid vector containing HLA-A*26:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:208 protein. This plasmid can be used for constructing HLA-A*26:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:209 Protein Expression Plasmid Vector	PHLAP9256036	Plasmid vector containing HLA-A*26:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:209 protein. This plasmid can be used for constructing HLA-A*26:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:21 Protein Expression Plasmid Vector	PHLAP9256037	Plasmid vector containing HLA-A*26:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:21 protein. This plasmid can be used for constructing HLA-A*26:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:210N Protein Expression Plasmid Vector	PHLAP9256038	Plasmid vector containing HLA-A*26:210N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:210N protein. This plasmid can be used for constructing HLA-A*26:210N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:210N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:211 Protein Expression Plasmid Vector	PHLAP9256039	Plasmid vector containing HLA-A*26:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:211 protein. This plasmid can be used for constructing HLA-A*26:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:212 Protein Expression Plasmid Vector	PHLAP9256040	Plasmid vector containing HLA-A*26:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:212 protein. This plasmid can be used for constructing HLA-A*26:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:213 Protein Expression Plasmid Vector	PHLAP9256041	Plasmid vector containing HLA-A*26:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:213 protein. This plasmid can be used for constructing HLA-A*26:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:214 Protein Expression Plasmid Vector	PHLAP9256042	Plasmid vector containing HLA-A*26:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:214 protein. This plasmid can be used for constructing HLA-A*26:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:215 Protein Expression Plasmid Vector	PHLAP9256043	Plasmid vector containing HLA-A*26:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:215 protein. This plasmid can be used for constructing HLA-A*26:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:216 Protein Expression Plasmid Vector	PHLAP9256044	Plasmid vector containing HLA-A*26:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:216 protein. This plasmid can be used for constructing HLA-A*26:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:217 Protein Expression Plasmid Vector	PHLAP9256045	Plasmid vector containing HLA-A*26:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:217 protein. This plasmid can be used for constructing HLA-A*26:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:218 Protein Expression Plasmid Vector	PHLAP9256046	Plasmid vector containing HLA-A*26:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:218 protein. This plasmid can be used for constructing HLA-A*26:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:219 Protein Expression Plasmid Vector	PHLAP9256047	Plasmid vector containing HLA-A*26:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:219 protein. This plasmid can be used for constructing HLA-A*26:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:22 Protein Expression Plasmid Vector	PHLAP9256048	Plasmid vector containing HLA-A*26:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:22 protein. This plasmid can be used for constructing HLA-A*26:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:220 Protein Expression Plasmid Vector	PHLAP9256049	Plasmid vector containing HLA-A*26:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:220 protein. This plasmid can be used for constructing HLA-A*26:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:221 Protein Expression Plasmid Vector	PHLAP9256050	Plasmid vector containing HLA-A*26:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:221 protein. This plasmid can be used for constructing HLA-A*26:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:222 Protein Expression Plasmid Vector	PHLAP9256051	Plasmid vector containing HLA-A*26:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:222 protein. This plasmid can be used for constructing HLA-A*26:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:223 Protein Expression Plasmid Vector	PHLAP9256052	Plasmid vector containing HLA-A*26:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:223 protein. This plasmid can be used for constructing HLA-A*26:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:224 Protein Expression Plasmid Vector	PHLAP9256053	Plasmid vector containing HLA-A*26:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:224 protein. This plasmid can be used for constructing HLA-A*26:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:225 Protein Expression Plasmid Vector	PHLAP9256054	Plasmid vector containing HLA-A*26:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:225 protein. This plasmid can be used for constructing HLA-A*26:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:226 Protein Expression Plasmid Vector	PHLAP9256055	Plasmid vector containing HLA-A*26:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:226 protein. This plasmid can be used for constructing HLA-A*26:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:227 Protein Expression Plasmid Vector	PHLAP9256056	Plasmid vector containing HLA-A*26:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:227 protein. This plasmid can be used for constructing HLA-A*26:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:228 Protein Expression Plasmid Vector	PHLAP9256057	Plasmid vector containing HLA-A*26:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:228 protein. This plasmid can be used for constructing HLA-A*26:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:229 Protein Expression Plasmid Vector	PHLAP9256058	Plasmid vector containing HLA-A*26:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:229 protein. This plasmid can be used for constructing HLA-A*26:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:23 Protein Expression Plasmid Vector	PHLAP9256059	Plasmid vector containing HLA-A*26:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:23 protein. This plasmid can be used for constructing HLA-A*26:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:230N Protein Expression Plasmid Vector	PHLAP9256060	Plasmid vector containing HLA-A*26:230N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:230N protein. This plasmid can be used for constructing HLA-A*26:230N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:230N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:231 Protein Expression Plasmid Vector	PHLAP9256061	Plasmid vector containing HLA-A*26:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:231 protein. This plasmid can be used for constructing HLA-A*26:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:232 Protein Expression Plasmid Vector	PHLAP9256062	Plasmid vector containing HLA-A*26:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:232 protein. This plasmid can be used for constructing HLA-A*26:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:233 Protein Expression Plasmid Vector	PHLAP9256063	Plasmid vector containing HLA-A*26:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:233 protein. This plasmid can be used for constructing HLA-A*26:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:234 Protein Expression Plasmid Vector	PHLAP9256064	Plasmid vector containing HLA-A*26:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:234 protein. This plasmid can be used for constructing HLA-A*26:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:235 Protein Expression Plasmid Vector	PHLAP9256065	Plasmid vector containing HLA-A*26:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:235 protein. This plasmid can be used for constructing HLA-A*26:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:236 Protein Expression Plasmid Vector	PHLAP9256066	Plasmid vector containing HLA-A*26:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:236 protein. This plasmid can be used for constructing HLA-A*26:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:237 Protein Expression Plasmid Vector	PHLAP9256067	Plasmid vector containing HLA-A*26:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:237 protein. This plasmid can be used for constructing HLA-A*26:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:238 Protein Expression Plasmid Vector	PHLAP9256068	Plasmid vector containing HLA-A*26:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:238 protein. This plasmid can be used for constructing HLA-A*26:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:239 Protein Expression Plasmid Vector	PHLAP9256069	Plasmid vector containing HLA-A*26:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:239 protein. This plasmid can be used for constructing HLA-A*26:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:24 Protein Expression Plasmid Vector	PHLAP9256070	Plasmid vector containing HLA-A*26:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:24 protein. This plasmid can be used for constructing HLA-A*26:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:240N Protein Expression Plasmid Vector	PHLAP9256071	Plasmid vector containing HLA-A*26:240N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:240N protein. This plasmid can be used for constructing HLA-A*26:240N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:240N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:241 Protein Expression Plasmid Vector	PHLAP9256072	Plasmid vector containing HLA-A*26:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:241 protein. This plasmid can be used for constructing HLA-A*26:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:242 Protein Expression Plasmid Vector	PHLAP9256073	Plasmid vector containing HLA-A*26:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:242 protein. This plasmid can be used for constructing HLA-A*26:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:243 Protein Expression Plasmid Vector	PHLAP9256074	Plasmid vector containing HLA-A*26:243 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:243 protein. This plasmid can be used for constructing HLA-A*26:243 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:243 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:244 Protein Expression Plasmid Vector	PHLAP9256075	Plasmid vector containing HLA-A*26:244 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:244 protein. This plasmid can be used for constructing HLA-A*26:244 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:244 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:245 Protein Expression Plasmid Vector	PHLAP9256076	Plasmid vector containing HLA-A*26:245 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:245 protein. This plasmid can be used for constructing HLA-A*26:245 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:245 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:246 Protein Expression Plasmid Vector	PHLAP9256077	Plasmid vector containing HLA-A*26:246 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:246 protein. This plasmid can be used for constructing HLA-A*26:246 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:246 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:247 Protein Expression Plasmid Vector	PHLAP9256078	Plasmid vector containing HLA-A*26:247 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:247 protein. This plasmid can be used for constructing HLA-A*26:247 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:247 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:248 Protein Expression Plasmid Vector	PHLAP9256079	Plasmid vector containing HLA-A*26:248 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:248 protein. This plasmid can be used for constructing HLA-A*26:248 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:248 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:249 Protein Expression Plasmid Vector	PHLAP9256080	Plasmid vector containing HLA-A*26:249 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:249 protein. This plasmid can be used for constructing HLA-A*26:249 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:249 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:250:01:01 Protein Expression Plasmid Vector	PHLAP9256081	Plasmid vector containing HLA-A*26:250:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:250:01:01 protein. This plasmid can be used for constructing HLA-A*26:250:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:250:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:250:01:02 Protein Expression Plasmid Vector	PHLAP9256082	Plasmid vector containing HLA-A*26:250:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:250:01:02 protein. This plasmid can be used for constructing HLA-A*26:250:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:250:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:251Q Protein Expression Plasmid Vector	PHLAP9256083	Plasmid vector containing HLA-A*26:251Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:251Q protein. This plasmid can be used for constructing HLA-A*26:251Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:251Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:252N Protein Expression Plasmid Vector	PHLAP9256084	Plasmid vector containing HLA-A*26:252N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:252N protein. This plasmid can be used for constructing HLA-A*26:252N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:252N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:253 Protein Expression Plasmid Vector	PHLAP9256085	Plasmid vector containing HLA-A*26:253 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:253 protein. This plasmid can be used for constructing HLA-A*26:253 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:253 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:254 Protein Expression Plasmid Vector	PHLAP9256086	Plasmid vector containing HLA-A*26:254 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:254 protein. This plasmid can be used for constructing HLA-A*26:254 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:254 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:255 Protein Expression Plasmid Vector	PHLAP9256087	Plasmid vector containing HLA-A*26:255 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:255 protein. This plasmid can be used for constructing HLA-A*26:255 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:255 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:256 Protein Expression Plasmid Vector	PHLAP9256088	Plasmid vector containing HLA-A*26:256 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:256 protein. This plasmid can be used for constructing HLA-A*26:256 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:256 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:257 Protein Expression Plasmid Vector	PHLAP9256089	Plasmid vector containing HLA-A*26:257 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:257 protein. This plasmid can be used for constructing HLA-A*26:257 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:257 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:25N Protein Expression Plasmid Vector	PHLAP9256090	Plasmid vector containing HLA-A*26:25N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:25N protein. This plasmid can be used for constructing HLA-A*26:25N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:25N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:26 Protein Expression Plasmid Vector	PHLAP9256091	Plasmid vector containing HLA-A*26:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:26 protein. This plasmid can be used for constructing HLA-A*26:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:27 Protein Expression Plasmid Vector	PHLAP9256092	Plasmid vector containing HLA-A*26:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:27 protein. This plasmid can be used for constructing HLA-A*26:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:28 Protein Expression Plasmid Vector	PHLAP9256093	Plasmid vector containing HLA-A*26:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:28 protein. This plasmid can be used for constructing HLA-A*26:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:29 Protein Expression Plasmid Vector	PHLAP9256094	Plasmid vector containing HLA-A*26:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:29 protein. This plasmid can be used for constructing HLA-A*26:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:30 Protein Expression Plasmid Vector	PHLAP9256095	Plasmid vector containing HLA-A*26:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:30 protein. This plasmid can be used for constructing HLA-A*26:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:31 Protein Expression Plasmid Vector	PHLAP9256096	Plasmid vector containing HLA-A*26:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:31 protein. This plasmid can be used for constructing HLA-A*26:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:32 Protein Expression Plasmid Vector	PHLAP9256097	Plasmid vector containing HLA-A*26:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:32 protein. This plasmid can be used for constructing HLA-A*26:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:33 Protein Expression Plasmid Vector	PHLAP9256098	Plasmid vector containing HLA-A*26:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:33 protein. This plasmid can be used for constructing HLA-A*26:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:34 Protein Expression Plasmid Vector	PHLAP9256099	Plasmid vector containing HLA-A*26:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:34 protein. This plasmid can be used for constructing HLA-A*26:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:35 Protein Expression Plasmid Vector	PHLAP9256100	Plasmid vector containing HLA-A*26:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:35 protein. This plasmid can be used for constructing HLA-A*26:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:36 Protein Expression Plasmid Vector	PHLAP9256101	Plasmid vector containing HLA-A*26:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:36 protein. This plasmid can be used for constructing HLA-A*26:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:37 Protein Expression Plasmid Vector	PHLAP9256102	Plasmid vector containing HLA-A*26:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:37 protein. This plasmid can be used for constructing HLA-A*26:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:38 Protein Expression Plasmid Vector	PHLAP9256103	Plasmid vector containing HLA-A*26:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:38 protein. This plasmid can be used for constructing HLA-A*26:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:39 Protein Expression Plasmid Vector	PHLAP9256104	Plasmid vector containing HLA-A*26:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:39 protein. This plasmid can be used for constructing HLA-A*26:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:40 Protein Expression Plasmid Vector	PHLAP9256105	Plasmid vector containing HLA-A*26:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:40 protein. This plasmid can be used for constructing HLA-A*26:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:41 Protein Expression Plasmid Vector	PHLAP9256106	Plasmid vector containing HLA-A*26:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:41 protein. This plasmid can be used for constructing HLA-A*26:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:42 Protein Expression Plasmid Vector	PHLAP9256107	Plasmid vector containing HLA-A*26:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:42 protein. This plasmid can be used for constructing HLA-A*26:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:43:01 Protein Expression Plasmid Vector	PHLAP9256108	Plasmid vector containing HLA-A*26:43:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:43:01 protein. This plasmid can be used for constructing HLA-A*26:43:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:43:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:43:02 Protein Expression Plasmid Vector	PHLAP9256109	Plasmid vector containing HLA-A*26:43:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:43:02 protein. This plasmid can be used for constructing HLA-A*26:43:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:43:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:44 Protein Expression Plasmid Vector	PHLAP9256110	Plasmid vector containing HLA-A*26:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:44 protein. This plasmid can be used for constructing HLA-A*26:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:45 Protein Expression Plasmid Vector	PHLAP9256111	Plasmid vector containing HLA-A*26:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:45 protein. This plasmid can be used for constructing HLA-A*26:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:46 Protein Expression Plasmid Vector	PHLAP9256112	Plasmid vector containing HLA-A*26:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:46 protein. This plasmid can be used for constructing HLA-A*26:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:47 Protein Expression Plasmid Vector	PHLAP9256113	Plasmid vector containing HLA-A*26:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:47 protein. This plasmid can be used for constructing HLA-A*26:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:48 Protein Expression Plasmid Vector	PHLAP9256114	Plasmid vector containing HLA-A*26:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:48 protein. This plasmid can be used for constructing HLA-A*26:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:49 Protein Expression Plasmid Vector	PHLAP9256115	Plasmid vector containing HLA-A*26:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:49 protein. This plasmid can be used for constructing HLA-A*26:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:50 Protein Expression Plasmid Vector	PHLAP9256116	Plasmid vector containing HLA-A*26:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:50 protein. This plasmid can be used for constructing HLA-A*26:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:51 Protein Expression Plasmid Vector	PHLAP9256117	Plasmid vector containing HLA-A*26:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:51 protein. This plasmid can be used for constructing HLA-A*26:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:52 Protein Expression Plasmid Vector	PHLAP9256118	Plasmid vector containing HLA-A*26:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:52 protein. This plasmid can be used for constructing HLA-A*26:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:53 Protein Expression Plasmid Vector	PHLAP9256119	Plasmid vector containing HLA-A*26:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:53 protein. This plasmid can be used for constructing HLA-A*26:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:54 Protein Expression Plasmid Vector	PHLAP9256120	Plasmid vector containing HLA-A*26:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:54 protein. This plasmid can be used for constructing HLA-A*26:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:55 Protein Expression Plasmid Vector	PHLAP9256121	Plasmid vector containing HLA-A*26:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:55 protein. This plasmid can be used for constructing HLA-A*26:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:56 Protein Expression Plasmid Vector	PHLAP9256122	Plasmid vector containing HLA-A*26:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:56 protein. This plasmid can be used for constructing HLA-A*26:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:57 Protein Expression Plasmid Vector	PHLAP9256123	Plasmid vector containing HLA-A*26:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:57 protein. This plasmid can be used for constructing HLA-A*26:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:58 Protein Expression Plasmid Vector	PHLAP9256124	Plasmid vector containing HLA-A*26:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:58 protein. This plasmid can be used for constructing HLA-A*26:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:59:01 Protein Expression Plasmid Vector	PHLAP9256125	Plasmid vector containing HLA-A*26:59:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:59:01 protein. This plasmid can be used for constructing HLA-A*26:59:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:59:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:59:02 Protein Expression Plasmid Vector	PHLAP9256126	Plasmid vector containing HLA-A*26:59:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:59:02 protein. This plasmid can be used for constructing HLA-A*26:59:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:59:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:60N Protein Expression Plasmid Vector	PHLAP9256127	Plasmid vector containing HLA-A*26:60N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:60N protein. This plasmid can be used for constructing HLA-A*26:60N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:60N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:61 Protein Expression Plasmid Vector	PHLAP9256128	Plasmid vector containing HLA-A*26:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:61 protein. This plasmid can be used for constructing HLA-A*26:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:62 Protein Expression Plasmid Vector	PHLAP9256129	Plasmid vector containing HLA-A*26:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:62 protein. This plasmid can be used for constructing HLA-A*26:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:63 Protein Expression Plasmid Vector	PHLAP9256130	Plasmid vector containing HLA-A*26:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:63 protein. This plasmid can be used for constructing HLA-A*26:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:64 Protein Expression Plasmid Vector	PHLAP9256131	Plasmid vector containing HLA-A*26:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:64 protein. This plasmid can be used for constructing HLA-A*26:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:65 Protein Expression Plasmid Vector	PHLAP9256132	Plasmid vector containing HLA-A*26:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:65 protein. This plasmid can be used for constructing HLA-A*26:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:66 Protein Expression Plasmid Vector	PHLAP9256133	Plasmid vector containing HLA-A*26:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:66 protein. This plasmid can be used for constructing HLA-A*26:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:67 Protein Expression Plasmid Vector	PHLAP9256134	Plasmid vector containing HLA-A*26:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:67 protein. This plasmid can be used for constructing HLA-A*26:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:68 Protein Expression Plasmid Vector	PHLAP9256135	Plasmid vector containing HLA-A*26:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:68 protein. This plasmid can be used for constructing HLA-A*26:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:69 Protein Expression Plasmid Vector	PHLAP9256136	Plasmid vector containing HLA-A*26:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:69 protein. This plasmid can be used for constructing HLA-A*26:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:70 Protein Expression Plasmid Vector	PHLAP9256137	Plasmid vector containing HLA-A*26:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:70 protein. This plasmid can be used for constructing HLA-A*26:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:71N Protein Expression Plasmid Vector	PHLAP9256138	Plasmid vector containing HLA-A*26:71N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:71N protein. This plasmid can be used for constructing HLA-A*26:71N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:71N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:72 Protein Expression Plasmid Vector	PHLAP9256139	Plasmid vector containing HLA-A*26:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:72 protein. This plasmid can be used for constructing HLA-A*26:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:73 Protein Expression Plasmid Vector	PHLAP9256140	Plasmid vector containing HLA-A*26:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:73 protein. This plasmid can be used for constructing HLA-A*26:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:74 Protein Expression Plasmid Vector	PHLAP9256141	Plasmid vector containing HLA-A*26:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:74 protein. This plasmid can be used for constructing HLA-A*26:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:75 Protein Expression Plasmid Vector	PHLAP9256142	Plasmid vector containing HLA-A*26:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:75 protein. This plasmid can be used for constructing HLA-A*26:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:76 Protein Expression Plasmid Vector	PHLAP9256143	Plasmid vector containing HLA-A*26:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:76 protein. This plasmid can be used for constructing HLA-A*26:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:77 Protein Expression Plasmid Vector	PHLAP9256144	Plasmid vector containing HLA-A*26:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:77 protein. This plasmid can be used for constructing HLA-A*26:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:78 Protein Expression Plasmid Vector	PHLAP9256145	Plasmid vector containing HLA-A*26:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:78 protein. This plasmid can be used for constructing HLA-A*26:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:79 Protein Expression Plasmid Vector	PHLAP9256146	Plasmid vector containing HLA-A*26:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:79 protein. This plasmid can be used for constructing HLA-A*26:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:80 Protein Expression Plasmid Vector	PHLAP9256147	Plasmid vector containing HLA-A*26:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:80 protein. This plasmid can be used for constructing HLA-A*26:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:81 Protein Expression Plasmid Vector	PHLAP9256148	Plasmid vector containing HLA-A*26:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:81 protein. This plasmid can be used for constructing HLA-A*26:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:82 Protein Expression Plasmid Vector	PHLAP9256149	Plasmid vector containing HLA-A*26:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:82 protein. This plasmid can be used for constructing HLA-A*26:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:83 Protein Expression Plasmid Vector	PHLAP9256150	Plasmid vector containing HLA-A*26:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:83 protein. This plasmid can be used for constructing HLA-A*26:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:84 Protein Expression Plasmid Vector	PHLAP9256151	Plasmid vector containing HLA-A*26:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:84 protein. This plasmid can be used for constructing HLA-A*26:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:85 Protein Expression Plasmid Vector	PHLAP9256152	Plasmid vector containing HLA-A*26:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:85 protein. This plasmid can be used for constructing HLA-A*26:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:86 Protein Expression Plasmid Vector	PHLAP9256153	Plasmid vector containing HLA-A*26:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:86 protein. This plasmid can be used for constructing HLA-A*26:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:87 Protein Expression Plasmid Vector	PHLAP9256154	Plasmid vector containing HLA-A*26:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:87 protein. This plasmid can be used for constructing HLA-A*26:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:88 Protein Expression Plasmid Vector	PHLAP9256155	Plasmid vector containing HLA-A*26:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:88 protein. This plasmid can be used for constructing HLA-A*26:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:89 Protein Expression Plasmid Vector	PHLAP9256156	Plasmid vector containing HLA-A*26:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:89 protein. This plasmid can be used for constructing HLA-A*26:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:90 Protein Expression Plasmid Vector	PHLAP9256157	Plasmid vector containing HLA-A*26:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:90 protein. This plasmid can be used for constructing HLA-A*26:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:91 Protein Expression Plasmid Vector	PHLAP9256158	Plasmid vector containing HLA-A*26:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:91 protein. This plasmid can be used for constructing HLA-A*26:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:92 Protein Expression Plasmid Vector	PHLAP9256159	Plasmid vector containing HLA-A*26:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:92 protein. This plasmid can be used for constructing HLA-A*26:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:93 Protein Expression Plasmid Vector	PHLAP9256160	Plasmid vector containing HLA-A*26:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:93 protein. This plasmid can be used for constructing HLA-A*26:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:94 Protein Expression Plasmid Vector	PHLAP9256161	Plasmid vector containing HLA-A*26:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:94 protein. This plasmid can be used for constructing HLA-A*26:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:95 Protein Expression Plasmid Vector	PHLAP9256162	Plasmid vector containing HLA-A*26:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:95 protein. This plasmid can be used for constructing HLA-A*26:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:96 Protein Expression Plasmid Vector	PHLAP9256163	Plasmid vector containing HLA-A*26:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:96 protein. This plasmid can be used for constructing HLA-A*26:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:97 Protein Expression Plasmid Vector	PHLAP9256164	Plasmid vector containing HLA-A*26:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:97 protein. This plasmid can be used for constructing HLA-A*26:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*26:98 Protein Expression Plasmid Vector	PHLAP9256165	Plasmid vector containing HLA-A*26:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:98 protein. This plasmid can be used for constructing HLA-A*26:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*26:99 Protein Expression Plasmid Vector	PHLAP9256166	Plasmid vector containing HLA-A*26:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*26:99 protein. This plasmid can be used for constructing HLA-A*26:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*26:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:01 Protein Expression Plasmid Vector	PHLAP9256167	Plasmid vector containing HLA-A*29:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:01 protein. This plasmid can be used for constructing HLA-A*29:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:02N Protein Expression Plasmid Vector	PHLAP9256168	Plasmid vector containing HLA-A*29:01:01:02N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:02N protein. This plasmid can be used for constructing HLA-A*29:01:01:02N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:02N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:03 Protein Expression Plasmid Vector	PHLAP9256169	Plasmid vector containing HLA-A*29:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:03 protein. This plasmid can be used for constructing HLA-A*29:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:04 Protein Expression Plasmid Vector	PHLAP9256170	Plasmid vector containing HLA-A*29:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:04 protein. This plasmid can be used for constructing HLA-A*29:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:05 Protein Expression Plasmid Vector	PHLAP9256171	Plasmid vector containing HLA-A*29:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:05 protein. This plasmid can be used for constructing HLA-A*29:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:01:01:06 Protein Expression Plasmid Vector	PHLAP9256172	Plasmid vector containing HLA-A*29:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:06 protein. This plasmid can be used for constructing HLA-A*29:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:07 Protein Expression Plasmid Vector	PHLAP9256173	Plasmid vector containing HLA-A*29:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:07 protein. This plasmid can be used for constructing HLA-A*29:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:08 Protein Expression Plasmid Vector	PHLAP9256174	Plasmid vector containing HLA-A*29:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:08 protein. This plasmid can be used for constructing HLA-A*29:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:09 Protein Expression Plasmid Vector	PHLAP9256175	Plasmid vector containing HLA-A*29:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:09 protein. This plasmid can be used for constructing HLA-A*29:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:10 Protein Expression Plasmid Vector	PHLAP9256176	Plasmid vector containing HLA-A*29:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:10 protein. This plasmid can be used for constructing HLA-A*29:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:11 Protein Expression Plasmid Vector	PHLAP9256177	Plasmid vector containing HLA-A*29:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:11 protein. This plasmid can be used for constructing HLA-A*29:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:01:12 Protein Expression Plasmid Vector	PHLAP9256178	Plasmid vector containing HLA-A*29:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:01:12 protein. This plasmid can be used for constructing HLA-A*29:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:01:02 Protein Expression Plasmid Vector	PHLAP9256179	Plasmid vector containing HLA-A*29:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:02 protein. This plasmid can be used for constructing HLA-A*29:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:03 Protein Expression Plasmid Vector	PHLAP9256180	Plasmid vector containing HLA-A*29:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:03 protein. This plasmid can be used for constructing HLA-A*29:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:04 Protein Expression Plasmid Vector	PHLAP9256181	Plasmid vector containing HLA-A*29:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:04 protein. This plasmid can be used for constructing HLA-A*29:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:05 Protein Expression Plasmid Vector	PHLAP9256182	Plasmid vector containing HLA-A*29:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:05 protein. This plasmid can be used for constructing HLA-A*29:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:06 Protein Expression Plasmid Vector	PHLAP9256183	Plasmid vector containing HLA-A*29:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:06 protein. This plasmid can be used for constructing HLA-A*29:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:07 Protein Expression Plasmid Vector	PHLAP9256184	Plasmid vector containing HLA-A*29:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:07 protein. This plasmid can be used for constructing HLA-A*29:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:08 Protein Expression Plasmid Vector	PHLAP9256185	Plasmid vector containing HLA-A*29:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:08 protein. This plasmid can be used for constructing HLA-A*29:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:09 Protein Expression Plasmid Vector	PHLAP9256186	Plasmid vector containing HLA-A*29:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:09 protein. This plasmid can be used for constructing HLA-A*29:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:01:10 Protein Expression Plasmid Vector	PHLAP9256187	Plasmid vector containing HLA-A*29:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:10 protein. This plasmid can be used for constructing HLA-A*29:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:11 Protein Expression Plasmid Vector	PHLAP9256188	Plasmid vector containing HLA-A*29:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:11 protein. This plasmid can be used for constructing HLA-A*29:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:12 Protein Expression Plasmid Vector	PHLAP9256189	Plasmid vector containing HLA-A*29:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:12 protein. This plasmid can be used for constructing HLA-A*29:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:13 Protein Expression Plasmid Vector	PHLAP9256190	Plasmid vector containing HLA-A*29:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:13 protein. This plasmid can be used for constructing HLA-A*29:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:14 Protein Expression Plasmid Vector	PHLAP9256191	Plasmid vector containing HLA-A*29:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:14 protein. This plasmid can be used for constructing HLA-A*29:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:01:15 Protein Expression Plasmid Vector	PHLAP9256192	Plasmid vector containing HLA-A*29:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:01:15 protein. This plasmid can be used for constructing HLA-A*29:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:01 Protein Expression Plasmid Vector	PHLAP9256193	Plasmid vector containing HLA-A*29:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:01 protein. This plasmid can be used for constructing HLA-A*29:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:02 Protein Expression Plasmid Vector	PHLAP9256194	Plasmid vector containing HLA-A*29:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:02 protein. This plasmid can be used for constructing HLA-A*29:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:01:03 Protein Expression Plasmid Vector	PHLAP9256195	Plasmid vector containing HLA-A*29:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:03 protein. This plasmid can be used for constructing HLA-A*29:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:04 Protein Expression Plasmid Vector	PHLAP9256196	Plasmid vector containing HLA-A*29:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:04 protein. This plasmid can be used for constructing HLA-A*29:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:05 Protein Expression Plasmid Vector	PHLAP9256197	Plasmid vector containing HLA-A*29:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:05 protein. This plasmid can be used for constructing HLA-A*29:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:06 Protein Expression Plasmid Vector	PHLAP9256198	Plasmid vector containing HLA-A*29:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:06 protein. This plasmid can be used for constructing HLA-A*29:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:07 Protein Expression Plasmid Vector	PHLAP9256199	Plasmid vector containing HLA-A*29:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:07 protein. This plasmid can be used for constructing HLA-A*29:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:08 Protein Expression Plasmid Vector	PHLAP9256200	Plasmid vector containing HLA-A*29:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:08 protein. This plasmid can be used for constructing HLA-A*29:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:09 Protein Expression Plasmid Vector	PHLAP9256201	Plasmid vector containing HLA-A*29:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:09 protein. This plasmid can be used for constructing HLA-A*29:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:01:10 Protein Expression Plasmid Vector	PHLAP9256202	Plasmid vector containing HLA-A*29:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:10 protein. This plasmid can be used for constructing HLA-A*29:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:11 Protein Expression Plasmid Vector	PHLAP9256203	Plasmid vector containing HLA-A*29:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:11 protein. This plasmid can be used for constructing HLA-A*29:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:12 Protein Expression Plasmid Vector	PHLAP9256204	Plasmid vector containing HLA-A*29:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:12 protein. This plasmid can be used for constructing HLA-A*29:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:13 Protein Expression Plasmid Vector	PHLAP9256205	Plasmid vector containing HLA-A*29:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:13 protein. This plasmid can be used for constructing HLA-A*29:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:14 Protein Expression Plasmid Vector	PHLAP9256206	Plasmid vector containing HLA-A*29:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:14 protein. This plasmid can be used for constructing HLA-A*29:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:15 Protein Expression Plasmid Vector	PHLAP9256207	Plasmid vector containing HLA-A*29:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:15 protein. This plasmid can be used for constructing HLA-A*29:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:16 Protein Expression Plasmid Vector	PHLAP9256208	Plasmid vector containing HLA-A*29:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:16 protein. This plasmid can be used for constructing HLA-A*29:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:01:17 Protein Expression Plasmid Vector	PHLAP9256209	Plasmid vector containing HLA-A*29:02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:17 protein. This plasmid can be used for constructing HLA-A*29:02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:18 Protein Expression Plasmid Vector	PHLAP9256210	Plasmid vector containing HLA-A*29:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:18 protein. This plasmid can be used for constructing HLA-A*29:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:19 Protein Expression Plasmid Vector	PHLAP9256211	Plasmid vector containing HLA-A*29:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:19 protein. This plasmid can be used for constructing HLA-A*29:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:20 Protein Expression Plasmid Vector	PHLAP9256212	Plasmid vector containing HLA-A*29:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:20 protein. This plasmid can be used for constructing HLA-A*29:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:21 Protein Expression Plasmid Vector	PHLAP9256213	Plasmid vector containing HLA-A*29:02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:21 protein. This plasmid can be used for constructing HLA-A*29:02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:22 Protein Expression Plasmid Vector	PHLAP9256214	Plasmid vector containing HLA-A*29:02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:22 protein. This plasmid can be used for constructing HLA-A*29:02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:23 Protein Expression Plasmid Vector	PHLAP9256215	Plasmid vector containing HLA-A*29:02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:23 protein. This plasmid can be used for constructing HLA-A*29:02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:01:24 Protein Expression Plasmid Vector	PHLAP9256216	Plasmid vector containing HLA-A*29:02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:24 protein. This plasmid can be used for constructing HLA-A*29:02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:25 Protein Expression Plasmid Vector	PHLAP9256217	Plasmid vector containing HLA-A*29:02:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:25 protein. This plasmid can be used for constructing HLA-A*29:02:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:26 Protein Expression Plasmid Vector	PHLAP9256218	Plasmid vector containing HLA-A*29:02:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:26 protein. This plasmid can be used for constructing HLA-A*29:02:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:27 Protein Expression Plasmid Vector	PHLAP9256219	Plasmid vector containing HLA-A*29:02:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:27 protein. This plasmid can be used for constructing HLA-A*29:02:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:28 Protein Expression Plasmid Vector	PHLAP9256220	Plasmid vector containing HLA-A*29:02:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:28 protein. This plasmid can be used for constructing HLA-A*29:02:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:29 Protein Expression Plasmid Vector	PHLAP9256221	Plasmid vector containing HLA-A*29:02:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:29 protein. This plasmid can be used for constructing HLA-A*29:02:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:30 Protein Expression Plasmid Vector	PHLAP9256222	Plasmid vector containing HLA-A*29:02:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:30 protein. This plasmid can be used for constructing HLA-A*29:02:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:01:31 Protein Expression Plasmid Vector	PHLAP9256223	Plasmid vector containing HLA-A*29:02:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:31 protein. This plasmid can be used for constructing HLA-A*29:02:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:32 Protein Expression Plasmid Vector	PHLAP9256224	Plasmid vector containing HLA-A*29:02:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:32 protein. This plasmid can be used for constructing HLA-A*29:02:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:33 Protein Expression Plasmid Vector	PHLAP9256225	Plasmid vector containing HLA-A*29:02:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:33 protein. This plasmid can be used for constructing HLA-A*29:02:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:34 Protein Expression Plasmid Vector	PHLAP9256226	Plasmid vector containing HLA-A*29:02:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:34 protein. This plasmid can be used for constructing HLA-A*29:02:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:35 Protein Expression Plasmid Vector	PHLAP9256227	Plasmid vector containing HLA-A*29:02:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:35 protein. This plasmid can be used for constructing HLA-A*29:02:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:36 Protein Expression Plasmid Vector	PHLAP9256228	Plasmid vector containing HLA-A*29:02:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:36 protein. This plasmid can be used for constructing HLA-A*29:02:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:37 Protein Expression Plasmid Vector	PHLAP9256229	Plasmid vector containing HLA-A*29:02:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:37 protein. This plasmid can be used for constructing HLA-A*29:02:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:01:38 Protein Expression Plasmid Vector	PHLAP9256230	Plasmid vector containing HLA-A*29:02:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:38 protein. This plasmid can be used for constructing HLA-A*29:02:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:39 Protein Expression Plasmid Vector	PHLAP9256231	Plasmid vector containing HLA-A*29:02:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:39 protein. This plasmid can be used for constructing HLA-A*29:02:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:40 Protein Expression Plasmid Vector	PHLAP9256232	Plasmid vector containing HLA-A*29:02:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:40 protein. This plasmid can be used for constructing HLA-A*29:02:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:01:41 Protein Expression Plasmid Vector	PHLAP9256233	Plasmid vector containing HLA-A*29:02:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:01:41 protein. This plasmid can be used for constructing HLA-A*29:02:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:02 Protein Expression Plasmid Vector	PHLAP9256234	Plasmid vector containing HLA-A*29:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:02 protein. This plasmid can be used for constructing HLA-A*29:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:03 Protein Expression Plasmid Vector	PHLAP9256235	Plasmid vector containing HLA-A*29:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:03 protein. This plasmid can be used for constructing HLA-A*29:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:04 Protein Expression Plasmid Vector	PHLAP9256236	Plasmid vector containing HLA-A*29:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:04 protein. This plasmid can be used for constructing HLA-A*29:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:05 Protein Expression Plasmid Vector	PHLAP9256237	Plasmid vector containing HLA-A*29:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:05 protein. This plasmid can be used for constructing HLA-A*29:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:06 Protein Expression Plasmid Vector	PHLAP9256238	Plasmid vector containing HLA-A*29:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:06 protein. This plasmid can be used for constructing HLA-A*29:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:07 Protein Expression Plasmid Vector	PHLAP9256239	Plasmid vector containing HLA-A*29:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:07 protein. This plasmid can be used for constructing HLA-A*29:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:08 Protein Expression Plasmid Vector	PHLAP9256240	Plasmid vector containing HLA-A*29:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:08 protein. This plasmid can be used for constructing HLA-A*29:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:09 Protein Expression Plasmid Vector	PHLAP9256241	Plasmid vector containing HLA-A*29:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:09 protein. This plasmid can be used for constructing HLA-A*29:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:10 Protein Expression Plasmid Vector	PHLAP9256242	Plasmid vector containing HLA-A*29:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:10 protein. This plasmid can be used for constructing HLA-A*29:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:11 Protein Expression Plasmid Vector	PHLAP9256243	Plasmid vector containing HLA-A*29:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:11 protein. This plasmid can be used for constructing HLA-A*29:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:12 Protein Expression Plasmid Vector	PHLAP9256244	Plasmid vector containing HLA-A*29:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:12 protein. This plasmid can be used for constructing HLA-A*29:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:13 Protein Expression Plasmid Vector	PHLAP9256245	Plasmid vector containing HLA-A*29:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:13 protein. This plasmid can be used for constructing HLA-A*29:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:14 Protein Expression Plasmid Vector	PHLAP9256246	Plasmid vector containing HLA-A*29:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:14 protein. This plasmid can be used for constructing HLA-A*29:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:15 Protein Expression Plasmid Vector	PHLAP9256247	Plasmid vector containing HLA-A*29:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:15 protein. This plasmid can be used for constructing HLA-A*29:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:16 Protein Expression Plasmid Vector	PHLAP9256248	Plasmid vector containing HLA-A*29:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:16 protein. This plasmid can be used for constructing HLA-A*29:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:17:01 Protein Expression Plasmid Vector	PHLAP9256249	Plasmid vector containing HLA-A*29:02:17:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:17:01 protein. This plasmid can be used for constructing HLA-A*29:02:17:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:17:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:17:02 Protein Expression Plasmid Vector	PHLAP9256250	Plasmid vector containing HLA-A*29:02:17:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:17:02 protein. This plasmid can be used for constructing HLA-A*29:02:17:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:17:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:18 Protein Expression Plasmid Vector	PHLAP9256251	Plasmid vector containing HLA-A*29:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:18 protein. This plasmid can be used for constructing HLA-A*29:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:19 Protein Expression Plasmid Vector	PHLAP9256252	Plasmid vector containing HLA-A*29:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:19 protein. This plasmid can be used for constructing HLA-A*29:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:20 Protein Expression Plasmid Vector	PHLAP9256253	Plasmid vector containing HLA-A*29:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:20 protein. This plasmid can be used for constructing HLA-A*29:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:21 Protein Expression Plasmid Vector	PHLAP9256254	Plasmid vector containing HLA-A*29:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:21 protein. This plasmid can be used for constructing HLA-A*29:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:22 Protein Expression Plasmid Vector	PHLAP9256255	Plasmid vector containing HLA-A*29:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:22 protein. This plasmid can be used for constructing HLA-A*29:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:23 Protein Expression Plasmid Vector	PHLAP9256256	Plasmid vector containing HLA-A*29:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:23 protein. This plasmid can be used for constructing HLA-A*29:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:24 Protein Expression Plasmid Vector	PHLAP9256257	Plasmid vector containing HLA-A*29:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:24 protein. This plasmid can be used for constructing HLA-A*29:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:25 Protein Expression Plasmid Vector	PHLAP9256258	Plasmid vector containing HLA-A*29:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:25 protein. This plasmid can be used for constructing HLA-A*29:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:26 Protein Expression Plasmid Vector	PHLAP9256259	Plasmid vector containing HLA-A*29:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:26 protein. This plasmid can be used for constructing HLA-A*29:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:27 Protein Expression Plasmid Vector	PHLAP9256260	Plasmid vector containing HLA-A*29:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:27 protein. This plasmid can be used for constructing HLA-A*29:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:28 Protein Expression Plasmid Vector	PHLAP9256261	Plasmid vector containing HLA-A*29:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:28 protein. This plasmid can be used for constructing HLA-A*29:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:29 Protein Expression Plasmid Vector	PHLAP9256262	Plasmid vector containing HLA-A*29:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:29 protein. This plasmid can be used for constructing HLA-A*29:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:30 Protein Expression Plasmid Vector	PHLAP9256263	Plasmid vector containing HLA-A*29:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:30 protein. This plasmid can be used for constructing HLA-A*29:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:31 Protein Expression Plasmid Vector	PHLAP9256264	Plasmid vector containing HLA-A*29:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:31 protein. This plasmid can be used for constructing HLA-A*29:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:32 Protein Expression Plasmid Vector	PHLAP9256265	Plasmid vector containing HLA-A*29:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:32 protein. This plasmid can be used for constructing HLA-A*29:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:33 Protein Expression Plasmid Vector	PHLAP9256266	Plasmid vector containing HLA-A*29:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:33 protein. This plasmid can be used for constructing HLA-A*29:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:34 Protein Expression Plasmid Vector	PHLAP9256267	Plasmid vector containing HLA-A*29:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:34 protein. This plasmid can be used for constructing HLA-A*29:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:35 Protein Expression Plasmid Vector	PHLAP9256268	Plasmid vector containing HLA-A*29:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:35 protein. This plasmid can be used for constructing HLA-A*29:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:02:36 Protein Expression Plasmid Vector	PHLAP9256269	Plasmid vector containing HLA-A*29:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:36 protein. This plasmid can be used for constructing HLA-A*29:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:37 Protein Expression Plasmid Vector	PHLAP9256270	Plasmid vector containing HLA-A*29:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:37 protein. This plasmid can be used for constructing HLA-A*29:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:38 Protein Expression Plasmid Vector	PHLAP9256271	Plasmid vector containing HLA-A*29:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:38 protein. This plasmid can be used for constructing HLA-A*29:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:39 Protein Expression Plasmid Vector	PHLAP9256272	Plasmid vector containing HLA-A*29:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:39 protein. This plasmid can be used for constructing HLA-A*29:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:40 Protein Expression Plasmid Vector	PHLAP9256273	Plasmid vector containing HLA-A*29:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:40 protein. This plasmid can be used for constructing HLA-A*29:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:02:41 Protein Expression Plasmid Vector	PHLAP9256274	Plasmid vector containing HLA-A*29:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:02:41 protein. This plasmid can be used for constructing HLA-A*29:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:03 Protein Expression Plasmid Vector	PHLAP9256275	Plasmid vector containing HLA-A*29:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:03 protein. This plasmid can be used for constructing HLA-A*29:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:04 Protein Expression Plasmid Vector	PHLAP9256276	Plasmid vector containing HLA-A*29:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:04 protein. This plasmid can be used for constructing HLA-A*29:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:05 Protein Expression Plasmid Vector	PHLAP9256277	Plasmid vector containing HLA-A*29:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:05 protein. This plasmid can be used for constructing HLA-A*29:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:06 Protein Expression Plasmid Vector	PHLAP9256278	Plasmid vector containing HLA-A*29:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:06 protein. This plasmid can be used for constructing HLA-A*29:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:07 Protein Expression Plasmid Vector	PHLAP9256279	Plasmid vector containing HLA-A*29:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:07 protein. This plasmid can be used for constructing HLA-A*29:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:08N Protein Expression Plasmid Vector	PHLAP9256280	Plasmid vector containing HLA-A*29:08N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:08N protein. This plasmid can be used for constructing HLA-A*29:08N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:08N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:09 Protein Expression Plasmid Vector	PHLAP9256281	Plasmid vector containing HLA-A*29:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:09 protein. This plasmid can be used for constructing HLA-A*29:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:10:01 Protein Expression Plasmid Vector	PHLAP9256282	Plasmid vector containing HLA-A*29:10:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:10:01 protein. This plasmid can be used for constructing HLA-A*29:10:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:10:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:10:02 Protein Expression Plasmid Vector	PHLAP9256283	Plasmid vector containing HLA-A*29:10:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:10:02 protein. This plasmid can be used for constructing HLA-A*29:10:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:10:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:100 Protein Expression Plasmid Vector	PHLAP9256284	Plasmid vector containing HLA-A*29:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:100 protein. This plasmid can be used for constructing HLA-A*29:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:101:01 Protein Expression Plasmid Vector	PHLAP9256285	Plasmid vector containing HLA-A*29:101:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:101:01 protein. This plasmid can be used for constructing HLA-A*29:101:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:101:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:101:02 Protein Expression Plasmid Vector	PHLAP9256286	Plasmid vector containing HLA-A*29:101:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:101:02 protein. This plasmid can be used for constructing HLA-A*29:101:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:101:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:102 Protein Expression Plasmid Vector	PHLAP9256287	Plasmid vector containing HLA-A*29:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:102 protein. This plasmid can be used for constructing HLA-A*29:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:103 Protein Expression Plasmid Vector	PHLAP9256288	Plasmid vector containing HLA-A*29:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:103 protein. This plasmid can be used for constructing HLA-A*29:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:104 Protein Expression Plasmid Vector	PHLAP9256289	Plasmid vector containing HLA-A*29:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:104 protein. This plasmid can be used for constructing HLA-A*29:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:105 Protein Expression Plasmid Vector	PHLAP9256290	Plasmid vector containing HLA-A*29:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:105 protein. This plasmid can be used for constructing HLA-A*29:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:106 Protein Expression Plasmid Vector	PHLAP9256291	Plasmid vector containing HLA-A*29:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:106 protein. This plasmid can be used for constructing HLA-A*29:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:107 Protein Expression Plasmid Vector	PHLAP9256292	Plasmid vector containing HLA-A*29:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:107 protein. This plasmid can be used for constructing HLA-A*29:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:108 Protein Expression Plasmid Vector	PHLAP9256293	Plasmid vector containing HLA-A*29:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:108 protein. This plasmid can be used for constructing HLA-A*29:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:109 Protein Expression Plasmid Vector	PHLAP9256294	Plasmid vector containing HLA-A*29:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:109 protein. This plasmid can be used for constructing HLA-A*29:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:11 Protein Expression Plasmid Vector	PHLAP9256295	Plasmid vector containing HLA-A*29:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:11 protein. This plasmid can be used for constructing HLA-A*29:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:110 Protein Expression Plasmid Vector	PHLAP9256296	Plasmid vector containing HLA-A*29:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:110 protein. This plasmid can be used for constructing HLA-A*29:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:111 Protein Expression Plasmid Vector	PHLAP9256297	Plasmid vector containing HLA-A*29:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:111 protein. This plasmid can be used for constructing HLA-A*29:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:112N Protein Expression Plasmid Vector	PHLAP9256298	Plasmid vector containing HLA-A*29:112N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:112N protein. This plasmid can be used for constructing HLA-A*29:112N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:112N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:113 Protein Expression Plasmid Vector	PHLAP9256299	Plasmid vector containing HLA-A*29:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:113 protein. This plasmid can be used for constructing HLA-A*29:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:114 Protein Expression Plasmid Vector	PHLAP9256300	Plasmid vector containing HLA-A*29:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:114 protein. This plasmid can be used for constructing HLA-A*29:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:115 Protein Expression Plasmid Vector	PHLAP9256301	Plasmid vector containing HLA-A*29:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:115 protein. This plasmid can be used for constructing HLA-A*29:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:116 Protein Expression Plasmid Vector	PHLAP9256302	Plasmid vector containing HLA-A*29:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:116 protein. This plasmid can be used for constructing HLA-A*29:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:117 Protein Expression Plasmid Vector	PHLAP9256303	Plasmid vector containing HLA-A*29:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:117 protein. This plasmid can be used for constructing HLA-A*29:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:118 Protein Expression Plasmid Vector	PHLAP9256304	Plasmid vector containing HLA-A*29:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:118 protein. This plasmid can be used for constructing HLA-A*29:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:119 Protein Expression Plasmid Vector	PHLAP9256305	Plasmid vector containing HLA-A*29:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:119 protein. This plasmid can be used for constructing HLA-A*29:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:12 Protein Expression Plasmid Vector	PHLAP9256306	Plasmid vector containing HLA-A*29:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:12 protein. This plasmid can be used for constructing HLA-A*29:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:120 Protein Expression Plasmid Vector	PHLAP9256307	Plasmid vector containing HLA-A*29:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:120 protein. This plasmid can be used for constructing HLA-A*29:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:121 Protein Expression Plasmid Vector	PHLAP9256308	Plasmid vector containing HLA-A*29:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:121 protein. This plasmid can be used for constructing HLA-A*29:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:122 Protein Expression Plasmid Vector	PHLAP9256309	Plasmid vector containing HLA-A*29:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:122 protein. This plasmid can be used for constructing HLA-A*29:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:123 Protein Expression Plasmid Vector	PHLAP9256310	Plasmid vector containing HLA-A*29:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:123 protein. This plasmid can be used for constructing HLA-A*29:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:124 Protein Expression Plasmid Vector	PHLAP9256311	Plasmid vector containing HLA-A*29:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:124 protein. This plasmid can be used for constructing HLA-A*29:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:125 Protein Expression Plasmid Vector	PHLAP9256312	Plasmid vector containing HLA-A*29:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:125 protein. This plasmid can be used for constructing HLA-A*29:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:126Q Protein Expression Plasmid Vector	PHLAP9256313	Plasmid vector containing HLA-A*29:126Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:126Q protein. This plasmid can be used for constructing HLA-A*29:126Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:126Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:127 Protein Expression Plasmid Vector	PHLAP9256314	Plasmid vector containing HLA-A*29:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:127 protein. This plasmid can be used for constructing HLA-A*29:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:128 Protein Expression Plasmid Vector	PHLAP9256315	Plasmid vector containing HLA-A*29:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:128 protein. This plasmid can be used for constructing HLA-A*29:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:129 Protein Expression Plasmid Vector	PHLAP9256316	Plasmid vector containing HLA-A*29:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:129 protein. This plasmid can be used for constructing HLA-A*29:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:13 Protein Expression Plasmid Vector	PHLAP9256317	Plasmid vector containing HLA-A*29:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:13 protein. This plasmid can be used for constructing HLA-A*29:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:130 Protein Expression Plasmid Vector	PHLAP9256318	Plasmid vector containing HLA-A*29:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:130 protein. This plasmid can be used for constructing HLA-A*29:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:131 Protein Expression Plasmid Vector	PHLAP9256319	Plasmid vector containing HLA-A*29:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:131 protein. This plasmid can be used for constructing HLA-A*29:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:132 Protein Expression Plasmid Vector	PHLAP9256320	Plasmid vector containing HLA-A*29:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:132 protein. This plasmid can be used for constructing HLA-A*29:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:133:01:01 Protein Expression Plasmid Vector	PHLAP9256321	Plasmid vector containing HLA-A*29:133:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:133:01:01 protein. This plasmid can be used for constructing HLA-A*29:133:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:133:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:133:01:02 Protein Expression Plasmid Vector	PHLAP9256322	Plasmid vector containing HLA-A*29:133:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:133:01:02 protein. This plasmid can be used for constructing HLA-A*29:133:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:133:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:134 Protein Expression Plasmid Vector	PHLAP9256323	Plasmid vector containing HLA-A*29:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:134 protein. This plasmid can be used for constructing HLA-A*29:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:135 Protein Expression Plasmid Vector	PHLAP9256324	Plasmid vector containing HLA-A*29:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:135 protein. This plasmid can be used for constructing HLA-A*29:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:136 Protein Expression Plasmid Vector	PHLAP9256325	Plasmid vector containing HLA-A*29:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:136 protein. This plasmid can be used for constructing HLA-A*29:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:137 Protein Expression Plasmid Vector	PHLAP9256326	Plasmid vector containing HLA-A*29:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:137 protein. This plasmid can be used for constructing HLA-A*29:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:138 Protein Expression Plasmid Vector	PHLAP9256327	Plasmid vector containing HLA-A*29:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:138 protein. This plasmid can be used for constructing HLA-A*29:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:139 Protein Expression Plasmid Vector	PHLAP9256328	Plasmid vector containing HLA-A*29:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:139 protein. This plasmid can be used for constructing HLA-A*29:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:14 Protein Expression Plasmid Vector	PHLAP9256329	Plasmid vector containing HLA-A*29:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:14 protein. This plasmid can be used for constructing HLA-A*29:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:140 Protein Expression Plasmid Vector	PHLAP9256330	Plasmid vector containing HLA-A*29:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:140 protein. This plasmid can be used for constructing HLA-A*29:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:141 Protein Expression Plasmid Vector	PHLAP9256331	Plasmid vector containing HLA-A*29:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:141 protein. This plasmid can be used for constructing HLA-A*29:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:142 Protein Expression Plasmid Vector	PHLAP9256332	Plasmid vector containing HLA-A*29:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:142 protein. This plasmid can be used for constructing HLA-A*29:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:143 Protein Expression Plasmid Vector	PHLAP9256333	Plasmid vector containing HLA-A*29:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:143 protein. This plasmid can be used for constructing HLA-A*29:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:144 Protein Expression Plasmid Vector	PHLAP9256334	Plasmid vector containing HLA-A*29:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:144 protein. This plasmid can be used for constructing HLA-A*29:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:145 Protein Expression Plasmid Vector	PHLAP9256335	Plasmid vector containing HLA-A*29:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:145 protein. This plasmid can be used for constructing HLA-A*29:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:146 Protein Expression Plasmid Vector	PHLAP9256336	Plasmid vector containing HLA-A*29:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:146 protein. This plasmid can be used for constructing HLA-A*29:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:147 Protein Expression Plasmid Vector	PHLAP9256337	Plasmid vector containing HLA-A*29:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:147 protein. This plasmid can be used for constructing HLA-A*29:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:148 Protein Expression Plasmid Vector	PHLAP9256338	Plasmid vector containing HLA-A*29:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:148 protein. This plasmid can be used for constructing HLA-A*29:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:149 Protein Expression Plasmid Vector	PHLAP9256339	Plasmid vector containing HLA-A*29:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:149 protein. This plasmid can be used for constructing HLA-A*29:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:15 Protein Expression Plasmid Vector	PHLAP9256340	Plasmid vector containing HLA-A*29:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:15 protein. This plasmid can be used for constructing HLA-A*29:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:150 Protein Expression Plasmid Vector	PHLAP9256341	Plasmid vector containing HLA-A*29:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:150 protein. This plasmid can be used for constructing HLA-A*29:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:151 Protein Expression Plasmid Vector	PHLAP9256342	Plasmid vector containing HLA-A*29:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:151 protein. This plasmid can be used for constructing HLA-A*29:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:152 Protein Expression Plasmid Vector	PHLAP9256343	Plasmid vector containing HLA-A*29:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:152 protein. This plasmid can be used for constructing HLA-A*29:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:153 Protein Expression Plasmid Vector	PHLAP9256344	Plasmid vector containing HLA-A*29:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:153 protein. This plasmid can be used for constructing HLA-A*29:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:154 Protein Expression Plasmid Vector	PHLAP9256345	Plasmid vector containing HLA-A*29:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:154 protein. This plasmid can be used for constructing HLA-A*29:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:155 Protein Expression Plasmid Vector	PHLAP9256346	Plasmid vector containing HLA-A*29:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:155 protein. This plasmid can be used for constructing HLA-A*29:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:156 Protein Expression Plasmid Vector	PHLAP9256347	Plasmid vector containing HLA-A*29:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:156 protein. This plasmid can be used for constructing HLA-A*29:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:157 Protein Expression Plasmid Vector	PHLAP9256348	Plasmid vector containing HLA-A*29:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:157 protein. This plasmid can be used for constructing HLA-A*29:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:158 Protein Expression Plasmid Vector	PHLAP9256349	Plasmid vector containing HLA-A*29:158 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:158 protein. This plasmid can be used for constructing HLA-A*29:158 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:158 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:159 Protein Expression Plasmid Vector	PHLAP9256350	Plasmid vector containing HLA-A*29:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:159 protein. This plasmid can be used for constructing HLA-A*29:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:16 Protein Expression Plasmid Vector	PHLAP9256351	Plasmid vector containing HLA-A*29:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:16 protein. This plasmid can be used for constructing HLA-A*29:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:160 Protein Expression Plasmid Vector	PHLAP9256352	Plasmid vector containing HLA-A*29:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:160 protein. This plasmid can be used for constructing HLA-A*29:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:161 Protein Expression Plasmid Vector	PHLAP9256353	Plasmid vector containing HLA-A*29:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:161 protein. This plasmid can be used for constructing HLA-A*29:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:162 Protein Expression Plasmid Vector	PHLAP9256354	Plasmid vector containing HLA-A*29:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:162 protein. This plasmid can be used for constructing HLA-A*29:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:163 Protein Expression Plasmid Vector	PHLAP9256355	Plasmid vector containing HLA-A*29:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:163 protein. This plasmid can be used for constructing HLA-A*29:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:164 Protein Expression Plasmid Vector	PHLAP9256356	Plasmid vector containing HLA-A*29:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:164 protein. This plasmid can be used for constructing HLA-A*29:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:165 Protein Expression Plasmid Vector	PHLAP9256357	Plasmid vector containing HLA-A*29:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:165 protein. This plasmid can be used for constructing HLA-A*29:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:166 Protein Expression Plasmid Vector	PHLAP9256358	Plasmid vector containing HLA-A*29:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:166 protein. This plasmid can be used for constructing HLA-A*29:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:167 Protein Expression Plasmid Vector	PHLAP9256359	Plasmid vector containing HLA-A*29:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:167 protein. This plasmid can be used for constructing HLA-A*29:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:168 Protein Expression Plasmid Vector	PHLAP9256360	Plasmid vector containing HLA-A*29:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:168 protein. This plasmid can be used for constructing HLA-A*29:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:169 Protein Expression Plasmid Vector	PHLAP9256361	Plasmid vector containing HLA-A*29:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:169 protein. This plasmid can be used for constructing HLA-A*29:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:17 Protein Expression Plasmid Vector	PHLAP9256362	Plasmid vector containing HLA-A*29:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:17 protein. This plasmid can be used for constructing HLA-A*29:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:170 Protein Expression Plasmid Vector	PHLAP9256363	Plasmid vector containing HLA-A*29:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:170 protein. This plasmid can be used for constructing HLA-A*29:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:171 Protein Expression Plasmid Vector	PHLAP9256364	Plasmid vector containing HLA-A*29:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:171 protein. This plasmid can be used for constructing HLA-A*29:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:172 Protein Expression Plasmid Vector	PHLAP9256365	Plasmid vector containing HLA-A*29:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:172 protein. This plasmid can be used for constructing HLA-A*29:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:173 Protein Expression Plasmid Vector	PHLAP9256366	Plasmid vector containing HLA-A*29:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:173 protein. This plasmid can be used for constructing HLA-A*29:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:174 Protein Expression Plasmid Vector	PHLAP9256367	Plasmid vector containing HLA-A*29:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:174 protein. This plasmid can be used for constructing HLA-A*29:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:175Q Protein Expression Plasmid Vector	PHLAP9256368	Plasmid vector containing HLA-A*29:175Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:175Q protein. This plasmid can be used for constructing HLA-A*29:175Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:175Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:176 Protein Expression Plasmid Vector	PHLAP9256369	Plasmid vector containing HLA-A*29:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:176 protein. This plasmid can be used for constructing HLA-A*29:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:177 Protein Expression Plasmid Vector	PHLAP9256370	Plasmid vector containing HLA-A*29:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:177 protein. This plasmid can be used for constructing HLA-A*29:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:178 Protein Expression Plasmid Vector	PHLAP9256371	Plasmid vector containing HLA-A*29:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:178 protein. This plasmid can be used for constructing HLA-A*29:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:179 Protein Expression Plasmid Vector	PHLAP9256372	Plasmid vector containing HLA-A*29:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:179 protein. This plasmid can be used for constructing HLA-A*29:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:18 Protein Expression Plasmid Vector	PHLAP9256373	Plasmid vector containing HLA-A*29:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:18 protein. This plasmid can be used for constructing HLA-A*29:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:180 Protein Expression Plasmid Vector	PHLAP9256374	Plasmid vector containing HLA-A*29:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:180 protein. This plasmid can be used for constructing HLA-A*29:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:181 Protein Expression Plasmid Vector	PHLAP9256375	Plasmid vector containing HLA-A*29:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:181 protein. This plasmid can be used for constructing HLA-A*29:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:182 Protein Expression Plasmid Vector	PHLAP9256376	Plasmid vector containing HLA-A*29:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:182 protein. This plasmid can be used for constructing HLA-A*29:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:183 Protein Expression Plasmid Vector	PHLAP9256377	Plasmid vector containing HLA-A*29:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:183 protein. This plasmid can be used for constructing HLA-A*29:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:184 Protein Expression Plasmid Vector	PHLAP9256378	Plasmid vector containing HLA-A*29:184 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:184 protein. This plasmid can be used for constructing HLA-A*29:184 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:184 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:185 Protein Expression Plasmid Vector	PHLAP9256379	Plasmid vector containing HLA-A*29:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:185 protein. This plasmid can be used for constructing HLA-A*29:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:186 Protein Expression Plasmid Vector	PHLAP9256380	Plasmid vector containing HLA-A*29:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:186 protein. This plasmid can be used for constructing HLA-A*29:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:187 Protein Expression Plasmid Vector	PHLAP9256381	Plasmid vector containing HLA-A*29:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:187 protein. This plasmid can be used for constructing HLA-A*29:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:188 Protein Expression Plasmid Vector	PHLAP9256382	Plasmid vector containing HLA-A*29:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:188 protein. This plasmid can be used for constructing HLA-A*29:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:189 Protein Expression Plasmid Vector	PHLAP9256383	Plasmid vector containing HLA-A*29:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:189 protein. This plasmid can be used for constructing HLA-A*29:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:19 Protein Expression Plasmid Vector	PHLAP9256384	Plasmid vector containing HLA-A*29:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:19 protein. This plasmid can be used for constructing HLA-A*29:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:190 Protein Expression Plasmid Vector	PHLAP9256385	Plasmid vector containing HLA-A*29:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:190 protein. This plasmid can be used for constructing HLA-A*29:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:191:01 Protein Expression Plasmid Vector	PHLAP9256386	Plasmid vector containing HLA-A*29:191:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:191:01 protein. This plasmid can be used for constructing HLA-A*29:191:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:191:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:191:02 Protein Expression Plasmid Vector	PHLAP9256387	Plasmid vector containing HLA-A*29:191:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:191:02 protein. This plasmid can be used for constructing HLA-A*29:191:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:191:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:192 Protein Expression Plasmid Vector	PHLAP9256388	Plasmid vector containing HLA-A*29:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:192 protein. This plasmid can be used for constructing HLA-A*29:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:193 Protein Expression Plasmid Vector	PHLAP9256389	Plasmid vector containing HLA-A*29:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:193 protein. This plasmid can be used for constructing HLA-A*29:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:194 Protein Expression Plasmid Vector	PHLAP9256390	Plasmid vector containing HLA-A*29:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:194 protein. This plasmid can be used for constructing HLA-A*29:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:195 Protein Expression Plasmid Vector	PHLAP9256391	Plasmid vector containing HLA-A*29:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:195 protein. This plasmid can be used for constructing HLA-A*29:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:196 Protein Expression Plasmid Vector	PHLAP9256392	Plasmid vector containing HLA-A*29:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:196 protein. This plasmid can be used for constructing HLA-A*29:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:197 Protein Expression Plasmid Vector	PHLAP9256393	Plasmid vector containing HLA-A*29:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:197 protein. This plasmid can be used for constructing HLA-A*29:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:198 Protein Expression Plasmid Vector	PHLAP9256394	Plasmid vector containing HLA-A*29:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:198 protein. This plasmid can be used for constructing HLA-A*29:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:199N Protein Expression Plasmid Vector	PHLAP9256395	Plasmid vector containing HLA-A*29:199N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:199N protein. This plasmid can be used for constructing HLA-A*29:199N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:199N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:20 Protein Expression Plasmid Vector	PHLAP9256396	Plasmid vector containing HLA-A*29:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:20 protein. This plasmid can be used for constructing HLA-A*29:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:200N Protein Expression Plasmid Vector	PHLAP9256397	Plasmid vector containing HLA-A*29:200N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:200N protein. This plasmid can be used for constructing HLA-A*29:200N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:200N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:201 Protein Expression Plasmid Vector	PHLAP9256398	Plasmid vector containing HLA-A*29:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:201 protein. This plasmid can be used for constructing HLA-A*29:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:202 Protein Expression Plasmid Vector	PHLAP9256399	Plasmid vector containing HLA-A*29:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:202 protein. This plasmid can be used for constructing HLA-A*29:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:203 Protein Expression Plasmid Vector	PHLAP9256400	Plasmid vector containing HLA-A*29:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:203 protein. This plasmid can be used for constructing HLA-A*29:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:204 Protein Expression Plasmid Vector	PHLAP9256401	Plasmid vector containing HLA-A*29:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:204 protein. This plasmid can be used for constructing HLA-A*29:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:21 Protein Expression Plasmid Vector	PHLAP9256402	Plasmid vector containing HLA-A*29:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:21 protein. This plasmid can be used for constructing HLA-A*29:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:22 Protein Expression Plasmid Vector	PHLAP9256403	Plasmid vector containing HLA-A*29:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:22 protein. This plasmid can be used for constructing HLA-A*29:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:23 Protein Expression Plasmid Vector	PHLAP9256404	Plasmid vector containing HLA-A*29:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:23 protein. This plasmid can be used for constructing HLA-A*29:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:24 Protein Expression Plasmid Vector	PHLAP9256405	Plasmid vector containing HLA-A*29:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:24 protein. This plasmid can be used for constructing HLA-A*29:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:25 Protein Expression Plasmid Vector	PHLAP9256406	Plasmid vector containing HLA-A*29:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:25 protein. This plasmid can be used for constructing HLA-A*29:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:26 Protein Expression Plasmid Vector	PHLAP9256407	Plasmid vector containing HLA-A*29:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:26 protein. This plasmid can be used for constructing HLA-A*29:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:27 Protein Expression Plasmid Vector	PHLAP9256408	Plasmid vector containing HLA-A*29:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:27 protein. This plasmid can be used for constructing HLA-A*29:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:28 Protein Expression Plasmid Vector	PHLAP9256409	Plasmid vector containing HLA-A*29:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:28 protein. This plasmid can be used for constructing HLA-A*29:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:29 Protein Expression Plasmid Vector	PHLAP9256410	Plasmid vector containing HLA-A*29:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:29 protein. This plasmid can be used for constructing HLA-A*29:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:30 Protein Expression Plasmid Vector	PHLAP9256411	Plasmid vector containing HLA-A*29:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:30 protein. This plasmid can be used for constructing HLA-A*29:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:31 Protein Expression Plasmid Vector	PHLAP9256412	Plasmid vector containing HLA-A*29:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:31 protein. This plasmid can be used for constructing HLA-A*29:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:32 Protein Expression Plasmid Vector	PHLAP9256413	Plasmid vector containing HLA-A*29:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:32 protein. This plasmid can be used for constructing HLA-A*29:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:33 Protein Expression Plasmid Vector	PHLAP9256414	Plasmid vector containing HLA-A*29:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:33 protein. This plasmid can be used for constructing HLA-A*29:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:34 Protein Expression Plasmid Vector	PHLAP9256415	Plasmid vector containing HLA-A*29:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:34 protein. This plasmid can be used for constructing HLA-A*29:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:35 Protein Expression Plasmid Vector	PHLAP9256416	Plasmid vector containing HLA-A*29:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:35 protein. This plasmid can be used for constructing HLA-A*29:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:36 Protein Expression Plasmid Vector	PHLAP9256417	Plasmid vector containing HLA-A*29:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:36 protein. This plasmid can be used for constructing HLA-A*29:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:37 Protein Expression Plasmid Vector	PHLAP9256418	Plasmid vector containing HLA-A*29:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:37 protein. This plasmid can be used for constructing HLA-A*29:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:38 Protein Expression Plasmid Vector	PHLAP9256419	Plasmid vector containing HLA-A*29:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:38 protein. This plasmid can be used for constructing HLA-A*29:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:39 Protein Expression Plasmid Vector	PHLAP9256420	Plasmid vector containing HLA-A*29:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:39 protein. This plasmid can be used for constructing HLA-A*29:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:40 Protein Expression Plasmid Vector	PHLAP9256421	Plasmid vector containing HLA-A*29:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:40 protein. This plasmid can be used for constructing HLA-A*29:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:41 Protein Expression Plasmid Vector	PHLAP9256422	Plasmid vector containing HLA-A*29:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:41 protein. This plasmid can be used for constructing HLA-A*29:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:42 Protein Expression Plasmid Vector	PHLAP9256423	Plasmid vector containing HLA-A*29:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:42 protein. This plasmid can be used for constructing HLA-A*29:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:43 Protein Expression Plasmid Vector	PHLAP9256424	Plasmid vector containing HLA-A*29:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:43 protein. This plasmid can be used for constructing HLA-A*29:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:44 Protein Expression Plasmid Vector	PHLAP9256425	Plasmid vector containing HLA-A*29:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:44 protein. This plasmid can be used for constructing HLA-A*29:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:45 Protein Expression Plasmid Vector	PHLAP9256426	Plasmid vector containing HLA-A*29:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:45 protein. This plasmid can be used for constructing HLA-A*29:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:46 Protein Expression Plasmid Vector	PHLAP9256427	Plasmid vector containing HLA-A*29:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:46 protein. This plasmid can be used for constructing HLA-A*29:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:47 Protein Expression Plasmid Vector	PHLAP9256428	Plasmid vector containing HLA-A*29:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:47 protein. This plasmid can be used for constructing HLA-A*29:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:48 Protein Expression Plasmid Vector	PHLAP9256429	Plasmid vector containing HLA-A*29:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:48 protein. This plasmid can be used for constructing HLA-A*29:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:49 Protein Expression Plasmid Vector	PHLAP9256430	Plasmid vector containing HLA-A*29:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:49 protein. This plasmid can be used for constructing HLA-A*29:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:50 Protein Expression Plasmid Vector	PHLAP9256431	Plasmid vector containing HLA-A*29:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:50 protein. This plasmid can be used for constructing HLA-A*29:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:51 Protein Expression Plasmid Vector	PHLAP9256432	Plasmid vector containing HLA-A*29:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:51 protein. This plasmid can be used for constructing HLA-A*29:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:52 Protein Expression Plasmid Vector	PHLAP9256433	Plasmid vector containing HLA-A*29:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:52 protein. This plasmid can be used for constructing HLA-A*29:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:53 Protein Expression Plasmid Vector	PHLAP9256434	Plasmid vector containing HLA-A*29:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:53 protein. This plasmid can be used for constructing HLA-A*29:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:54 Protein Expression Plasmid Vector	PHLAP9256435	Plasmid vector containing HLA-A*29:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:54 protein. This plasmid can be used for constructing HLA-A*29:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:55 Protein Expression Plasmid Vector	PHLAP9256436	Plasmid vector containing HLA-A*29:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:55 protein. This plasmid can be used for constructing HLA-A*29:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:56 Protein Expression Plasmid Vector	PHLAP9256437	Plasmid vector containing HLA-A*29:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:56 protein. This plasmid can be used for constructing HLA-A*29:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:57 Protein Expression Plasmid Vector	PHLAP9256438	Plasmid vector containing HLA-A*29:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:57 protein. This plasmid can be used for constructing HLA-A*29:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:58 Protein Expression Plasmid Vector	PHLAP9256439	Plasmid vector containing HLA-A*29:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:58 protein. This plasmid can be used for constructing HLA-A*29:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:59 Protein Expression Plasmid Vector	PHLAP9256440	Plasmid vector containing HLA-A*29:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:59 protein. This plasmid can be used for constructing HLA-A*29:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:60 Protein Expression Plasmid Vector	PHLAP9256441	Plasmid vector containing HLA-A*29:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:60 protein. This plasmid can be used for constructing HLA-A*29:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:61 Protein Expression Plasmid Vector	PHLAP9256442	Plasmid vector containing HLA-A*29:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:61 protein. This plasmid can be used for constructing HLA-A*29:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:62 Protein Expression Plasmid Vector	PHLAP9256443	Plasmid vector containing HLA-A*29:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:62 protein. This plasmid can be used for constructing HLA-A*29:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:63 Protein Expression Plasmid Vector	PHLAP9256444	Plasmid vector containing HLA-A*29:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:63 protein. This plasmid can be used for constructing HLA-A*29:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:64 Protein Expression Plasmid Vector	PHLAP9256445	Plasmid vector containing HLA-A*29:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:64 protein. This plasmid can be used for constructing HLA-A*29:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:65 Protein Expression Plasmid Vector	PHLAP9256446	Plasmid vector containing HLA-A*29:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:65 protein. This plasmid can be used for constructing HLA-A*29:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:66 Protein Expression Plasmid Vector	PHLAP9256447	Plasmid vector containing HLA-A*29:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:66 protein. This plasmid can be used for constructing HLA-A*29:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:67:01 Protein Expression Plasmid Vector	PHLAP9256448	Plasmid vector containing HLA-A*29:67:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:67:01 protein. This plasmid can be used for constructing HLA-A*29:67:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:67:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:67:02 Protein Expression Plasmid Vector	PHLAP9256449	Plasmid vector containing HLA-A*29:67:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:67:02 protein. This plasmid can be used for constructing HLA-A*29:67:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:67:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:68 Protein Expression Plasmid Vector	PHLAP9256450	Plasmid vector containing HLA-A*29:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:68 protein. This plasmid can be used for constructing HLA-A*29:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:69 Protein Expression Plasmid Vector	PHLAP9256451	Plasmid vector containing HLA-A*29:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:69 protein. This plasmid can be used for constructing HLA-A*29:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:70 Protein Expression Plasmid Vector	PHLAP9256452	Plasmid vector containing HLA-A*29:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:70 protein. This plasmid can be used for constructing HLA-A*29:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:71 Protein Expression Plasmid Vector	PHLAP9256453	Plasmid vector containing HLA-A*29:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:71 protein. This plasmid can be used for constructing HLA-A*29:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:72 Protein Expression Plasmid Vector	PHLAP9256454	Plasmid vector containing HLA-A*29:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:72 protein. This plasmid can be used for constructing HLA-A*29:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:73 Protein Expression Plasmid Vector	PHLAP9256455	Plasmid vector containing HLA-A*29:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:73 protein. This plasmid can be used for constructing HLA-A*29:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:74 Protein Expression Plasmid Vector	PHLAP9256456	Plasmid vector containing HLA-A*29:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:74 protein. This plasmid can be used for constructing HLA-A*29:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:75 Protein Expression Plasmid Vector	PHLAP9256457	Plasmid vector containing HLA-A*29:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:75 protein. This plasmid can be used for constructing HLA-A*29:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:76 Protein Expression Plasmid Vector	PHLAP9256458	Plasmid vector containing HLA-A*29:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:76 protein. This plasmid can be used for constructing HLA-A*29:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:77 Protein Expression Plasmid Vector	PHLAP9256459	Plasmid vector containing HLA-A*29:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:77 protein. This plasmid can be used for constructing HLA-A*29:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:78N Protein Expression Plasmid Vector	PHLAP9256460	Plasmid vector containing HLA-A*29:78N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:78N protein. This plasmid can be used for constructing HLA-A*29:78N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:78N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:79 Protein Expression Plasmid Vector	PHLAP9256461	Plasmid vector containing HLA-A*29:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:79 protein. This plasmid can be used for constructing HLA-A*29:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:80 Protein Expression Plasmid Vector	PHLAP9256462	Plasmid vector containing HLA-A*29:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:80 protein. This plasmid can be used for constructing HLA-A*29:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:81 Protein Expression Plasmid Vector	PHLAP9256463	Plasmid vector containing HLA-A*29:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:81 protein. This plasmid can be used for constructing HLA-A*29:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:82 Protein Expression Plasmid Vector	PHLAP9256464	Plasmid vector containing HLA-A*29:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:82 protein. This plasmid can be used for constructing HLA-A*29:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:83 Protein Expression Plasmid Vector	PHLAP9256465	Plasmid vector containing HLA-A*29:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:83 protein. This plasmid can be used for constructing HLA-A*29:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:84 Protein Expression Plasmid Vector	PHLAP9256466	Plasmid vector containing HLA-A*29:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:84 protein. This plasmid can be used for constructing HLA-A*29:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:85 Protein Expression Plasmid Vector	PHLAP9256467	Plasmid vector containing HLA-A*29:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:85 protein. This plasmid can be used for constructing HLA-A*29:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:86 Protein Expression Plasmid Vector	PHLAP9256468	Plasmid vector containing HLA-A*29:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:86 protein. This plasmid can be used for constructing HLA-A*29:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:87 Protein Expression Plasmid Vector	PHLAP9256469	Plasmid vector containing HLA-A*29:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:87 protein. This plasmid can be used for constructing HLA-A*29:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:88 Protein Expression Plasmid Vector	PHLAP9256470	Plasmid vector containing HLA-A*29:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:88 protein. This plasmid can be used for constructing HLA-A*29:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:89 Protein Expression Plasmid Vector	PHLAP9256471	Plasmid vector containing HLA-A*29:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:89 protein. This plasmid can be used for constructing HLA-A*29:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:90 Protein Expression Plasmid Vector	PHLAP9256472	Plasmid vector containing HLA-A*29:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:90 protein. This plasmid can be used for constructing HLA-A*29:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:91 Protein Expression Plasmid Vector	PHLAP9256473	Plasmid vector containing HLA-A*29:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:91 protein. This plasmid can be used for constructing HLA-A*29:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:92 Protein Expression Plasmid Vector	PHLAP9256474	Plasmid vector containing HLA-A*29:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:92 protein. This plasmid can be used for constructing HLA-A*29:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:93 Protein Expression Plasmid Vector	PHLAP9256475	Plasmid vector containing HLA-A*29:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:93 protein. This plasmid can be used for constructing HLA-A*29:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:94 Protein Expression Plasmid Vector	PHLAP9256476	Plasmid vector containing HLA-A*29:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:94 protein. This plasmid can be used for constructing HLA-A*29:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*29:95 Protein Expression Plasmid Vector	PHLAP9256477	Plasmid vector containing HLA-A*29:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:95 protein. This plasmid can be used for constructing HLA-A*29:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:96 Protein Expression Plasmid Vector	PHLAP9256478	Plasmid vector containing HLA-A*29:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:96 protein. This plasmid can be used for constructing HLA-A*29:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:97 Protein Expression Plasmid Vector	PHLAP9256479	Plasmid vector containing HLA-A*29:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:97 protein. This plasmid can be used for constructing HLA-A*29:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:98 Protein Expression Plasmid Vector	PHLAP9256480	Plasmid vector containing HLA-A*29:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:98 protein. This plasmid can be used for constructing HLA-A*29:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*29:99 Protein Expression Plasmid Vector	PHLAP9256481	Plasmid vector containing HLA-A*29:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*29:99 protein. This plasmid can be used for constructing HLA-A*29:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*29:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:01 Protein Expression Plasmid Vector	PHLAP9256482	Plasmid vector containing HLA-A*30:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:01 protein. This plasmid can be used for constructing HLA-A*30:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:02 Protein Expression Plasmid Vector	PHLAP9256483	Plasmid vector containing HLA-A*30:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:02 protein. This plasmid can be used for constructing HLA-A*30:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:01:01:03 Protein Expression Plasmid Vector	PHLAP9256484	Plasmid vector containing HLA-A*30:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:03 protein. This plasmid can be used for constructing HLA-A*30:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:04 Protein Expression Plasmid Vector	PHLAP9256485	Plasmid vector containing HLA-A*30:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:04 protein. This plasmid can be used for constructing HLA-A*30:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:05 Protein Expression Plasmid Vector	PHLAP9256486	Plasmid vector containing HLA-A*30:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:05 protein. This plasmid can be used for constructing HLA-A*30:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:06 Protein Expression Plasmid Vector	PHLAP9256487	Plasmid vector containing HLA-A*30:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:06 protein. This plasmid can be used for constructing HLA-A*30:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:07 Protein Expression Plasmid Vector	PHLAP9256488	Plasmid vector containing HLA-A*30:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:07 protein. This plasmid can be used for constructing HLA-A*30:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:08 Protein Expression Plasmid Vector	PHLAP9256489	Plasmid vector containing HLA-A*30:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:08 protein. This plasmid can be used for constructing HLA-A*30:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:09 Protein Expression Plasmid Vector	PHLAP9256490	Plasmid vector containing HLA-A*30:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:09 protein. This plasmid can be used for constructing HLA-A*30:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:01:01:10 Protein Expression Plasmid Vector	PHLAP9256491	Plasmid vector containing HLA-A*30:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:10 protein. This plasmid can be used for constructing HLA-A*30:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:11 Protein Expression Plasmid Vector	PHLAP9256492	Plasmid vector containing HLA-A*30:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:11 protein. This plasmid can be used for constructing HLA-A*30:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:12 Protein Expression Plasmid Vector	PHLAP9256493	Plasmid vector containing HLA-A*30:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:12 protein. This plasmid can be used for constructing HLA-A*30:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:13 Protein Expression Plasmid Vector	PHLAP9256494	Plasmid vector containing HLA-A*30:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:13 protein. This plasmid can be used for constructing HLA-A*30:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:14 Protein Expression Plasmid Vector	PHLAP9256495	Plasmid vector containing HLA-A*30:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:14 protein. This plasmid can be used for constructing HLA-A*30:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:15 Protein Expression Plasmid Vector	PHLAP9256496	Plasmid vector containing HLA-A*30:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:15 protein. This plasmid can be used for constructing HLA-A*30:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:16 Protein Expression Plasmid Vector	PHLAP9256497	Plasmid vector containing HLA-A*30:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:16 protein. This plasmid can be used for constructing HLA-A*30:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:01:01:17 Protein Expression Plasmid Vector	PHLAP9256498	Plasmid vector containing HLA-A*30:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:17 protein. This plasmid can be used for constructing HLA-A*30:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:18 Protein Expression Plasmid Vector	PHLAP9256499	Plasmid vector containing HLA-A*30:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:18 protein. This plasmid can be used for constructing HLA-A*30:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:19 Protein Expression Plasmid Vector	PHLAP9256500	Plasmid vector containing HLA-A*30:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:19 protein. This plasmid can be used for constructing HLA-A*30:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:20 Protein Expression Plasmid Vector	PHLAP9256501	Plasmid vector containing HLA-A*30:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:20 protein. This plasmid can be used for constructing HLA-A*30:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:21 Protein Expression Plasmid Vector	PHLAP9256502	Plasmid vector containing HLA-A*30:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:21 protein. This plasmid can be used for constructing HLA-A*30:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:22 Protein Expression Plasmid Vector	PHLAP9256503	Plasmid vector containing HLA-A*30:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:22 protein. This plasmid can be used for constructing HLA-A*30:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:23 Protein Expression Plasmid Vector	PHLAP9256504	Plasmid vector containing HLA-A*30:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:23 protein. This plasmid can be used for constructing HLA-A*30:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:01:01:24 Protein Expression Plasmid Vector	PHLAP9256505	Plasmid vector containing HLA-A*30:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:24 protein. This plasmid can be used for constructing HLA-A*30:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:01:25 Protein Expression Plasmid Vector	PHLAP9256506	Plasmid vector containing HLA-A*30:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:01:25 protein. This plasmid can be used for constructing HLA-A*30:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:02 Protein Expression Plasmid Vector	PHLAP9256507	Plasmid vector containing HLA-A*30:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:02 protein. This plasmid can be used for constructing HLA-A*30:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:03 Protein Expression Plasmid Vector	PHLAP9256508	Plasmid vector containing HLA-A*30:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:03 protein. This plasmid can be used for constructing HLA-A*30:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:04 Protein Expression Plasmid Vector	PHLAP9256509	Plasmid vector containing HLA-A*30:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:04 protein. This plasmid can be used for constructing HLA-A*30:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:05 Protein Expression Plasmid Vector	PHLAP9256510	Plasmid vector containing HLA-A*30:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:05 protein. This plasmid can be used for constructing HLA-A*30:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:06 Protein Expression Plasmid Vector	PHLAP9256511	Plasmid vector containing HLA-A*30:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:06 protein. This plasmid can be used for constructing HLA-A*30:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:07 Protein Expression Plasmid Vector	PHLAP9256512	Plasmid vector containing HLA-A*30:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:07 protein. This plasmid can be used for constructing HLA-A*30:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:01:08 Protein Expression Plasmid Vector	PHLAP9256513	Plasmid vector containing HLA-A*30:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:08 protein. This plasmid can be used for constructing HLA-A*30:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:09 Protein Expression Plasmid Vector	PHLAP9256514	Plasmid vector containing HLA-A*30:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:09 protein. This plasmid can be used for constructing HLA-A*30:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:10 Protein Expression Plasmid Vector	PHLAP9256515	Plasmid vector containing HLA-A*30:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:10 protein. This plasmid can be used for constructing HLA-A*30:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:11 Protein Expression Plasmid Vector	PHLAP9256516	Plasmid vector containing HLA-A*30:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:11 protein. This plasmid can be used for constructing HLA-A*30:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:12 Protein Expression Plasmid Vector	PHLAP9256517	Plasmid vector containing HLA-A*30:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:12 protein. This plasmid can be used for constructing HLA-A*30:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:13 Protein Expression Plasmid Vector	PHLAP9256518	Plasmid vector containing HLA-A*30:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:13 protein. This plasmid can be used for constructing HLA-A*30:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:14 Protein Expression Plasmid Vector	PHLAP9256519	Plasmid vector containing HLA-A*30:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:14 protein. This plasmid can be used for constructing HLA-A*30:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:15 Protein Expression Plasmid Vector	PHLAP9256520	Plasmid vector containing HLA-A*30:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:15 protein. This plasmid can be used for constructing HLA-A*30:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:01:16 Protein Expression Plasmid Vector	PHLAP9256521	Plasmid vector containing HLA-A*30:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:16 protein. This plasmid can be used for constructing HLA-A*30:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:17 Protein Expression Plasmid Vector	PHLAP9256522	Plasmid vector containing HLA-A*30:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:17 protein. This plasmid can be used for constructing HLA-A*30:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:18 Protein Expression Plasmid Vector	PHLAP9256523	Plasmid vector containing HLA-A*30:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:18 protein. This plasmid can be used for constructing HLA-A*30:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:19 Protein Expression Plasmid Vector	PHLAP9256524	Plasmid vector containing HLA-A*30:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:19 protein. This plasmid can be used for constructing HLA-A*30:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:20 Protein Expression Plasmid Vector	PHLAP9256525	Plasmid vector containing HLA-A*30:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:20 protein. This plasmid can be used for constructing HLA-A*30:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:21 Protein Expression Plasmid Vector	PHLAP9256526	Plasmid vector containing HLA-A*30:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:21 protein. This plasmid can be used for constructing HLA-A*30:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:22 Protein Expression Plasmid Vector	PHLAP9256527	Plasmid vector containing HLA-A*30:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:22 protein. This plasmid can be used for constructing HLA-A*30:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:23 Protein Expression Plasmid Vector	PHLAP9256528	Plasmid vector containing HLA-A*30:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:23 protein. This plasmid can be used for constructing HLA-A*30:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:01:24 Protein Expression Plasmid Vector	PHLAP9256529	Plasmid vector containing HLA-A*30:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:24 protein. This plasmid can be used for constructing HLA-A*30:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:25 Protein Expression Plasmid Vector	PHLAP9256530	Plasmid vector containing HLA-A*30:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:25 protein. This plasmid can be used for constructing HLA-A*30:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:26 Protein Expression Plasmid Vector	PHLAP9256531	Plasmid vector containing HLA-A*30:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:26 protein. This plasmid can be used for constructing HLA-A*30:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:27 Protein Expression Plasmid Vector	PHLAP9256532	Plasmid vector containing HLA-A*30:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:27 protein. This plasmid can be used for constructing HLA-A*30:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:28 Protein Expression Plasmid Vector	PHLAP9256533	Plasmid vector containing HLA-A*30:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:28 protein. This plasmid can be used for constructing HLA-A*30:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:29 Protein Expression Plasmid Vector	PHLAP9256534	Plasmid vector containing HLA-A*30:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:29 protein. This plasmid can be used for constructing HLA-A*30:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:30 Protein Expression Plasmid Vector	PHLAP9256535	Plasmid vector containing HLA-A*30:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:30 protein. This plasmid can be used for constructing HLA-A*30:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:01:31 Protein Expression Plasmid Vector	PHLAP9256536	Plasmid vector containing HLA-A*30:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:01:31 protein. This plasmid can be used for constructing HLA-A*30:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:02:01:01 Protein Expression Plasmid Vector	PHLAP9256537	Plasmid vector containing HLA-A*30:02:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:01 protein. This plasmid can be used for constructing HLA-A*30:02:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:02 Protein Expression Plasmid Vector	PHLAP9256538	Plasmid vector containing HLA-A*30:02:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:02 protein. This plasmid can be used for constructing HLA-A*30:02:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:03 Protein Expression Plasmid Vector	PHLAP9256539	Plasmid vector containing HLA-A*30:02:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:03 protein. This plasmid can be used for constructing HLA-A*30:02:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:04 Protein Expression Plasmid Vector	PHLAP9256540	Plasmid vector containing HLA-A*30:02:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:04 protein. This plasmid can be used for constructing HLA-A*30:02:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:05 Protein Expression Plasmid Vector	PHLAP9256541	Plasmid vector containing HLA-A*30:02:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:05 protein. This plasmid can be used for constructing HLA-A*30:02:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:06 Protein Expression Plasmid Vector	PHLAP9256542	Plasmid vector containing HLA-A*30:02:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:06 protein. This plasmid can be used for constructing HLA-A*30:02:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:07 Protein Expression Plasmid Vector	PHLAP9256543	Plasmid vector containing HLA-A*30:02:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:07 protein. This plasmid can be used for constructing HLA-A*30:02:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:02:01:08 Protein Expression Plasmid Vector	PHLAP9256544	Plasmid vector containing HLA-A*30:02:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:08 protein. This plasmid can be used for constructing HLA-A*30:02:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:09 Protein Expression Plasmid Vector	PHLAP9256545	Plasmid vector containing HLA-A*30:02:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:09 protein. This plasmid can be used for constructing HLA-A*30:02:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:10 Protein Expression Plasmid Vector	PHLAP9256546	Plasmid vector containing HLA-A*30:02:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:10 protein. This plasmid can be used for constructing HLA-A*30:02:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:11 Protein Expression Plasmid Vector	PHLAP9256547	Plasmid vector containing HLA-A*30:02:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:11 protein. This plasmid can be used for constructing HLA-A*30:02:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:12 Protein Expression Plasmid Vector	PHLAP9256548	Plasmid vector containing HLA-A*30:02:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:12 protein. This plasmid can be used for constructing HLA-A*30:02:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:13 Protein Expression Plasmid Vector	PHLAP9256549	Plasmid vector containing HLA-A*30:02:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:13 protein. This plasmid can be used for constructing HLA-A*30:02:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:14 Protein Expression Plasmid Vector	PHLAP9256550	Plasmid vector containing HLA-A*30:02:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:14 protein. This plasmid can be used for constructing HLA-A*30:02:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:02:01:15 Protein Expression Plasmid Vector	PHLAP9256551	Plasmid vector containing HLA-A*30:02:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:15 protein. This plasmid can be used for constructing HLA-A*30:02:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:16 Protein Expression Plasmid Vector	PHLAP9256552	Plasmid vector containing HLA-A*30:02:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:16 protein. This plasmid can be used for constructing HLA-A*30:02:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:17 Protein Expression Plasmid Vector	PHLAP9256553	Plasmid vector containing HLA-A*30:02:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:17 protein. This plasmid can be used for constructing HLA-A*30:02:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:18 Protein Expression Plasmid Vector	PHLAP9256554	Plasmid vector containing HLA-A*30:02:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:18 protein. This plasmid can be used for constructing HLA-A*30:02:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:19 Protein Expression Plasmid Vector	PHLAP9256555	Plasmid vector containing HLA-A*30:02:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:19 protein. This plasmid can be used for constructing HLA-A*30:02:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:20 Protein Expression Plasmid Vector	PHLAP9256556	Plasmid vector containing HLA-A*30:02:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:20 protein. This plasmid can be used for constructing HLA-A*30:02:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:21 Protein Expression Plasmid Vector	PHLAP9256557	Plasmid vector containing HLA-A*30:02:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:21 protein. This plasmid can be used for constructing HLA-A*30:02:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:02:01:22 Protein Expression Plasmid Vector	PHLAP9256558	Plasmid vector containing HLA-A*30:02:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:22 protein. This plasmid can be used for constructing HLA-A*30:02:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:23 Protein Expression Plasmid Vector	PHLAP9256559	Plasmid vector containing HLA-A*30:02:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:23 protein. This plasmid can be used for constructing HLA-A*30:02:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:01:24 Protein Expression Plasmid Vector	PHLAP9256560	Plasmid vector containing HLA-A*30:02:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:01:24 protein. This plasmid can be used for constructing HLA-A*30:02:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:02 Protein Expression Plasmid Vector	PHLAP9256561	Plasmid vector containing HLA-A*30:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:02 protein. This plasmid can be used for constructing HLA-A*30:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:03 Protein Expression Plasmid Vector	PHLAP9256562	Plasmid vector containing HLA-A*30:02:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:03 protein. This plasmid can be used for constructing HLA-A*30:02:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:04 Protein Expression Plasmid Vector	PHLAP9256563	Plasmid vector containing HLA-A*30:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:04 protein. This plasmid can be used for constructing HLA-A*30:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:05 Protein Expression Plasmid Vector	PHLAP9256564	Plasmid vector containing HLA-A*30:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:05 protein. This plasmid can be used for constructing HLA-A*30:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:02:06 Protein Expression Plasmid Vector	PHLAP9256565	Plasmid vector containing HLA-A*30:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:06 protein. This plasmid can be used for constructing HLA-A*30:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:07 Protein Expression Plasmid Vector	PHLAP9256566	Plasmid vector containing HLA-A*30:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:07 protein. This plasmid can be used for constructing HLA-A*30:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:08 Protein Expression Plasmid Vector	PHLAP9256567	Plasmid vector containing HLA-A*30:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:08 protein. This plasmid can be used for constructing HLA-A*30:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:09 Protein Expression Plasmid Vector	PHLAP9256568	Plasmid vector containing HLA-A*30:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:09 protein. This plasmid can be used for constructing HLA-A*30:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:10 Protein Expression Plasmid Vector	PHLAP9256569	Plasmid vector containing HLA-A*30:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:10 protein. This plasmid can be used for constructing HLA-A*30:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:11 Protein Expression Plasmid Vector	PHLAP9256570	Plasmid vector containing HLA-A*30:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:11 protein. This plasmid can be used for constructing HLA-A*30:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:12 Protein Expression Plasmid Vector	PHLAP9256571	Plasmid vector containing HLA-A*30:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:12 protein. This plasmid can be used for constructing HLA-A*30:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:13 Protein Expression Plasmid Vector	PHLAP9256572	Plasmid vector containing HLA-A*30:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:13 protein. This plasmid can be used for constructing HLA-A*30:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:02:14 Protein Expression Plasmid Vector	PHLAP9256573	Plasmid vector containing HLA-A*30:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:14 protein. This plasmid can be used for constructing HLA-A*30:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:15 Protein Expression Plasmid Vector	PHLAP9256574	Plasmid vector containing HLA-A*30:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:15 protein. This plasmid can be used for constructing HLA-A*30:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:16 Protein Expression Plasmid Vector	PHLAP9256575	Plasmid vector containing HLA-A*30:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:16 protein. This plasmid can be used for constructing HLA-A*30:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:17 Protein Expression Plasmid Vector	PHLAP9256576	Plasmid vector containing HLA-A*30:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:17 protein. This plasmid can be used for constructing HLA-A*30:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:18 Protein Expression Plasmid Vector	PHLAP9256577	Plasmid vector containing HLA-A*30:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:18 protein. This plasmid can be used for constructing HLA-A*30:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:19 Protein Expression Plasmid Vector	PHLAP9256578	Plasmid vector containing HLA-A*30:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:19 protein. This plasmid can be used for constructing HLA-A*30:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:20 Protein Expression Plasmid Vector	PHLAP9256579	Plasmid vector containing HLA-A*30:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:20 protein. This plasmid can be used for constructing HLA-A*30:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:21 Protein Expression Plasmid Vector	PHLAP9256580	Plasmid vector containing HLA-A*30:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:21 protein. This plasmid can be used for constructing HLA-A*30:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:02:22 Protein Expression Plasmid Vector	PHLAP9256581	Plasmid vector containing HLA-A*30:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:22 protein. This plasmid can be used for constructing HLA-A*30:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:23 Protein Expression Plasmid Vector	PHLAP9256582	Plasmid vector containing HLA-A*30:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:23 protein. This plasmid can be used for constructing HLA-A*30:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:24 Protein Expression Plasmid Vector	PHLAP9256583	Plasmid vector containing HLA-A*30:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:24 protein. This plasmid can be used for constructing HLA-A*30:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:25Q Protein Expression Plasmid Vector	PHLAP9256584	Plasmid vector containing HLA-A*30:02:25Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:25Q protein. This plasmid can be used for constructing HLA-A*30:02:25Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:25Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:26 Protein Expression Plasmid Vector	PHLAP9256585	Plasmid vector containing HLA-A*30:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:26 protein. This plasmid can be used for constructing HLA-A*30:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:27 Protein Expression Plasmid Vector	PHLAP9256586	Plasmid vector containing HLA-A*30:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:27 protein. This plasmid can be used for constructing HLA-A*30:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:28 Protein Expression Plasmid Vector	PHLAP9256587	Plasmid vector containing HLA-A*30:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:28 protein. This plasmid can be used for constructing HLA-A*30:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:29 Protein Expression Plasmid Vector	PHLAP9256588	Plasmid vector containing HLA-A*30:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:29 protein. This plasmid can be used for constructing HLA-A*30:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:02:30 Protein Expression Plasmid Vector	PHLAP9256589	Plasmid vector containing HLA-A*30:02:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:30 protein. This plasmid can be used for constructing HLA-A*30:02:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:31 Protein Expression Plasmid Vector	PHLAP9256590	Plasmid vector containing HLA-A*30:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:31 protein. This plasmid can be used for constructing HLA-A*30:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:32 Protein Expression Plasmid Vector	PHLAP9256591	Plasmid vector containing HLA-A*30:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:32 protein. This plasmid can be used for constructing HLA-A*30:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:02:33 Protein Expression Plasmid Vector	PHLAP9256592	Plasmid vector containing HLA-A*30:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:02:33 protein. This plasmid can be used for constructing HLA-A*30:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:03 Protein Expression Plasmid Vector	PHLAP9256593	Plasmid vector containing HLA-A*30:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:03 protein. This plasmid can be used for constructing HLA-A*30:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:04:01:01 Protein Expression Plasmid Vector	PHLAP9256594	Plasmid vector containing HLA-A*30:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:04:01:01 protein. This plasmid can be used for constructing HLA-A*30:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:04:01:02 Protein Expression Plasmid Vector	PHLAP9256595	Plasmid vector containing HLA-A*30:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:04:01:02 protein. This plasmid can be used for constructing HLA-A*30:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:04:01:03 Protein Expression Plasmid Vector	PHLAP9256596	Plasmid vector containing HLA-A*30:04:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:04:01:03 protein. This plasmid can be used for constructing HLA-A*30:04:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:04:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:04:02 Protein Expression Plasmid Vector	PHLAP9256597	Plasmid vector containing HLA-A*30:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:04:02 protein. This plasmid can be used for constructing HLA-A*30:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:04:03 Protein Expression Plasmid Vector	PHLAP9256598	Plasmid vector containing HLA-A*30:04:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:04:03 protein. This plasmid can be used for constructing HLA-A*30:04:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:04:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:04:04 Protein Expression Plasmid Vector	PHLAP9256599	Plasmid vector containing HLA-A*30:04:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:04:04 protein. This plasmid can be used for constructing HLA-A*30:04:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:04:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:04:05 Protein Expression Plasmid Vector	PHLAP9256600	Plasmid vector containing HLA-A*30:04:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:04:05 protein. This plasmid can be used for constructing HLA-A*30:04:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:04:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:06 Protein Expression Plasmid Vector	PHLAP9256601	Plasmid vector containing HLA-A*30:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:06 protein. This plasmid can be used for constructing HLA-A*30:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:07 Protein Expression Plasmid Vector	PHLAP9256602	Plasmid vector containing HLA-A*30:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:07 protein. This plasmid can be used for constructing HLA-A*30:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:08:01 Protein Expression Plasmid Vector	PHLAP9256603	Plasmid vector containing HLA-A*30:08:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:08:01 protein. This plasmid can be used for constructing HLA-A*30:08:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:08:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:08:02 Protein Expression Plasmid Vector	PHLAP9256604	Plasmid vector containing HLA-A*30:08:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:08:02 protein. This plasmid can be used for constructing HLA-A*30:08:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:08:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:09:01:01 Protein Expression Plasmid Vector	PHLAP9256605	Plasmid vector containing HLA-A*30:09:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:09:01:01 protein. This plasmid can be used for constructing HLA-A*30:09:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:09:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:09:01:02 Protein Expression Plasmid Vector	PHLAP9256606	Plasmid vector containing HLA-A*30:09:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:09:01:02 protein. This plasmid can be used for constructing HLA-A*30:09:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:09:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:10 Protein Expression Plasmid Vector	PHLAP9256607	Plasmid vector containing HLA-A*30:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:10 protein. This plasmid can be used for constructing HLA-A*30:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:100 Protein Expression Plasmid Vector	PHLAP9256608	Plasmid vector containing HLA-A*30:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:100 protein. This plasmid can be used for constructing HLA-A*30:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:101Q Protein Expression Plasmid Vector	PHLAP9256609	Plasmid vector containing HLA-A*30:101Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:101Q protein. This plasmid can be used for constructing HLA-A*30:101Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:101Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:102 Protein Expression Plasmid Vector	PHLAP9256610	Plasmid vector containing HLA-A*30:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:102 protein. This plasmid can be used for constructing HLA-A*30:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:103 Protein Expression Plasmid Vector	PHLAP9256611	Plasmid vector containing HLA-A*30:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:103 protein. This plasmid can be used for constructing HLA-A*30:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:104 Protein Expression Plasmid Vector	PHLAP9256612	Plasmid vector containing HLA-A*30:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:104 protein. This plasmid can be used for constructing HLA-A*30:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:105 Protein Expression Plasmid Vector	PHLAP9256613	Plasmid vector containing HLA-A*30:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:105 protein. This plasmid can be used for constructing HLA-A*30:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:106 Protein Expression Plasmid Vector	PHLAP9256614	Plasmid vector containing HLA-A*30:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:106 protein. This plasmid can be used for constructing HLA-A*30:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:107 Protein Expression Plasmid Vector	PHLAP9256615	Plasmid vector containing HLA-A*30:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:107 protein. This plasmid can be used for constructing HLA-A*30:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:108 Protein Expression Plasmid Vector	PHLAP9256616	Plasmid vector containing HLA-A*30:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:108 protein. This plasmid can be used for constructing HLA-A*30:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:109 Protein Expression Plasmid Vector	PHLAP9256617	Plasmid vector containing HLA-A*30:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:109 protein. This plasmid can be used for constructing HLA-A*30:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:11:01 Protein Expression Plasmid Vector	PHLAP9256618	Plasmid vector containing HLA-A*30:11:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:11:01 protein. This plasmid can be used for constructing HLA-A*30:11:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:11:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:11:02 Protein Expression Plasmid Vector	PHLAP9256619	Plasmid vector containing HLA-A*30:11:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:11:02 protein. This plasmid can be used for constructing HLA-A*30:11:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:11:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:110 Protein Expression Plasmid Vector	PHLAP9256620	Plasmid vector containing HLA-A*30:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:110 protein. This plasmid can be used for constructing HLA-A*30:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:111 Protein Expression Plasmid Vector	PHLAP9256621	Plasmid vector containing HLA-A*30:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:111 protein. This plasmid can be used for constructing HLA-A*30:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:112 Protein Expression Plasmid Vector	PHLAP9256622	Plasmid vector containing HLA-A*30:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:112 protein. This plasmid can be used for constructing HLA-A*30:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:113 Protein Expression Plasmid Vector	PHLAP9256623	Plasmid vector containing HLA-A*30:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:113 protein. This plasmid can be used for constructing HLA-A*30:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:114 Protein Expression Plasmid Vector	PHLAP9256624	Plasmid vector containing HLA-A*30:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:114 protein. This plasmid can be used for constructing HLA-A*30:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:115 Protein Expression Plasmid Vector	PHLAP9256625	Plasmid vector containing HLA-A*30:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:115 protein. This plasmid can be used for constructing HLA-A*30:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:116 Protein Expression Plasmid Vector	PHLAP9256626	Plasmid vector containing HLA-A*30:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:116 protein. This plasmid can be used for constructing HLA-A*30:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:117 Protein Expression Plasmid Vector	PHLAP9256627	Plasmid vector containing HLA-A*30:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:117 protein. This plasmid can be used for constructing HLA-A*30:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:118 Protein Expression Plasmid Vector	PHLAP9256628	Plasmid vector containing HLA-A*30:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:118 protein. This plasmid can be used for constructing HLA-A*30:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:119 Protein Expression Plasmid Vector	PHLAP9256629	Plasmid vector containing HLA-A*30:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:119 protein. This plasmid can be used for constructing HLA-A*30:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:12:01 Protein Expression Plasmid Vector	PHLAP9256630	Plasmid vector containing HLA-A*30:12:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:12:01 protein. This plasmid can be used for constructing HLA-A*30:12:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:12:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:12:02 Protein Expression Plasmid Vector	PHLAP9256631	Plasmid vector containing HLA-A*30:12:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:12:02 protein. This plasmid can be used for constructing HLA-A*30:12:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:12:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:120 Protein Expression Plasmid Vector	PHLAP9256632	Plasmid vector containing HLA-A*30:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:120 protein. This plasmid can be used for constructing HLA-A*30:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:121N Protein Expression Plasmid Vector	PHLAP9256633	Plasmid vector containing HLA-A*30:121N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:121N protein. This plasmid can be used for constructing HLA-A*30:121N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:121N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:122 Protein Expression Plasmid Vector	PHLAP9256634	Plasmid vector containing HLA-A*30:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:122 protein. This plasmid can be used for constructing HLA-A*30:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:123N Protein Expression Plasmid Vector	PHLAP9256635	Plasmid vector containing HLA-A*30:123N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:123N protein. This plasmid can be used for constructing HLA-A*30:123N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:123N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:124 Protein Expression Plasmid Vector	PHLAP9256636	Plasmid vector containing HLA-A*30:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:124 protein. This plasmid can be used for constructing HLA-A*30:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:125 Protein Expression Plasmid Vector	PHLAP9256637	Plasmid vector containing HLA-A*30:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:125 protein. This plasmid can be used for constructing HLA-A*30:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:126 Protein Expression Plasmid Vector	PHLAP9256638	Plasmid vector containing HLA-A*30:126 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:126 protein. This plasmid can be used for constructing HLA-A*30:126 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:126 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:127 Protein Expression Plasmid Vector	PHLAP9256639	Plasmid vector containing HLA-A*30:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:127 protein. This plasmid can be used for constructing HLA-A*30:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:128 Protein Expression Plasmid Vector	PHLAP9256640	Plasmid vector containing HLA-A*30:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:128 protein. This plasmid can be used for constructing HLA-A*30:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:129 Protein Expression Plasmid Vector	PHLAP9256641	Plasmid vector containing HLA-A*30:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:129 protein. This plasmid can be used for constructing HLA-A*30:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:13 Protein Expression Plasmid Vector	PHLAP9256642	Plasmid vector containing HLA-A*30:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:13 protein. This plasmid can be used for constructing HLA-A*30:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:130N Protein Expression Plasmid Vector	PHLAP9256643	Plasmid vector containing HLA-A*30:130N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:130N protein. This plasmid can be used for constructing HLA-A*30:130N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:130N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:131 Protein Expression Plasmid Vector	PHLAP9256644	Plasmid vector containing HLA-A*30:131 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:131 protein. This plasmid can be used for constructing HLA-A*30:131 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:131 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:132N Protein Expression Plasmid Vector	PHLAP9256645	Plasmid vector containing HLA-A*30:132N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:132N protein. This plasmid can be used for constructing HLA-A*30:132N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:132N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:133 Protein Expression Plasmid Vector	PHLAP9256646	Plasmid vector containing HLA-A*30:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:133 protein. This plasmid can be used for constructing HLA-A*30:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:134 Protein Expression Plasmid Vector	PHLAP9256647	Plasmid vector containing HLA-A*30:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:134 protein. This plasmid can be used for constructing HLA-A*30:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:135 Protein Expression Plasmid Vector	PHLAP9256648	Plasmid vector containing HLA-A*30:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:135 protein. This plasmid can be used for constructing HLA-A*30:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:136 Protein Expression Plasmid Vector	PHLAP9256649	Plasmid vector containing HLA-A*30:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:136 protein. This plasmid can be used for constructing HLA-A*30:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:137 Protein Expression Plasmid Vector	PHLAP9256650	Plasmid vector containing HLA-A*30:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:137 protein. This plasmid can be used for constructing HLA-A*30:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:138 Protein Expression Plasmid Vector	PHLAP9256651	Plasmid vector containing HLA-A*30:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:138 protein. This plasmid can be used for constructing HLA-A*30:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:139 Protein Expression Plasmid Vector	PHLAP9256652	Plasmid vector containing HLA-A*30:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:139 protein. This plasmid can be used for constructing HLA-A*30:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:140 Protein Expression Plasmid Vector	PHLAP9256653	Plasmid vector containing HLA-A*30:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:140 protein. This plasmid can be used for constructing HLA-A*30:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:141 Protein Expression Plasmid Vector	PHLAP9256654	Plasmid vector containing HLA-A*30:141 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:141 protein. This plasmid can be used for constructing HLA-A*30:141 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:141 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:142 Protein Expression Plasmid Vector	PHLAP9256655	Plasmid vector containing HLA-A*30:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:142 protein. This plasmid can be used for constructing HLA-A*30:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:143 Protein Expression Plasmid Vector	PHLAP9256656	Plasmid vector containing HLA-A*30:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:143 protein. This plasmid can be used for constructing HLA-A*30:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:144 Protein Expression Plasmid Vector	PHLAP9256657	Plasmid vector containing HLA-A*30:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:144 protein. This plasmid can be used for constructing HLA-A*30:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:145N Protein Expression Plasmid Vector	PHLAP9256658	Plasmid vector containing HLA-A*30:145N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:145N protein. This plasmid can be used for constructing HLA-A*30:145N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:145N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:146 Protein Expression Plasmid Vector	PHLAP9256659	Plasmid vector containing HLA-A*30:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:146 protein. This plasmid can be used for constructing HLA-A*30:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:147 Protein Expression Plasmid Vector	PHLAP9256660	Plasmid vector containing HLA-A*30:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:147 protein. This plasmid can be used for constructing HLA-A*30:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:148 Protein Expression Plasmid Vector	PHLAP9256661	Plasmid vector containing HLA-A*30:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:148 protein. This plasmid can be used for constructing HLA-A*30:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:149 Protein Expression Plasmid Vector	PHLAP9256662	Plasmid vector containing HLA-A*30:149 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:149 protein. This plasmid can be used for constructing HLA-A*30:149 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:149 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:14L Protein Expression Plasmid Vector	PHLAP9256663	Plasmid vector containing HLA-A*30:14L protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:14L protein. This plasmid can be used for constructing HLA-A*30:14L overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:14L protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:15 Protein Expression Plasmid Vector	PHLAP9256664	Plasmid vector containing HLA-A*30:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:15 protein. This plasmid can be used for constructing HLA-A*30:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:150 Protein Expression Plasmid Vector	PHLAP9256665	Plasmid vector containing HLA-A*30:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:150 protein. This plasmid can be used for constructing HLA-A*30:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:151 Protein Expression Plasmid Vector	PHLAP9256666	Plasmid vector containing HLA-A*30:151 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:151 protein. This plasmid can be used for constructing HLA-A*30:151 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:151 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:152 Protein Expression Plasmid Vector	PHLAP9256667	Plasmid vector containing HLA-A*30:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:152 protein. This plasmid can be used for constructing HLA-A*30:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:153 Protein Expression Plasmid Vector	PHLAP9256668	Plasmid vector containing HLA-A*30:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:153 protein. This plasmid can be used for constructing HLA-A*30:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:154 Protein Expression Plasmid Vector	PHLAP9256669	Plasmid vector containing HLA-A*30:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:154 protein. This plasmid can be used for constructing HLA-A*30:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:155 Protein Expression Plasmid Vector	PHLAP9256670	Plasmid vector containing HLA-A*30:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:155 protein. This plasmid can be used for constructing HLA-A*30:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:156 Protein Expression Plasmid Vector	PHLAP9256671	Plasmid vector containing HLA-A*30:156 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:156 protein. This plasmid can be used for constructing HLA-A*30:156 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:156 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:157 Protein Expression Plasmid Vector	PHLAP9256672	Plasmid vector containing HLA-A*30:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:157 protein. This plasmid can be used for constructing HLA-A*30:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:158N Protein Expression Plasmid Vector	PHLAP9256673	Plasmid vector containing HLA-A*30:158N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:158N protein. This plasmid can be used for constructing HLA-A*30:158N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:158N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:159 Protein Expression Plasmid Vector	PHLAP9256674	Plasmid vector containing HLA-A*30:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:159 protein. This plasmid can be used for constructing HLA-A*30:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:16 Protein Expression Plasmid Vector	PHLAP9256675	Plasmid vector containing HLA-A*30:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:16 protein. This plasmid can be used for constructing HLA-A*30:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:160 Protein Expression Plasmid Vector	PHLAP9256676	Plasmid vector containing HLA-A*30:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:160 protein. This plasmid can be used for constructing HLA-A*30:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:161 Protein Expression Plasmid Vector	PHLAP9256677	Plasmid vector containing HLA-A*30:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:161 protein. This plasmid can be used for constructing HLA-A*30:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:162 Protein Expression Plasmid Vector	PHLAP9256678	Plasmid vector containing HLA-A*30:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:162 protein. This plasmid can be used for constructing HLA-A*30:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:163 Protein Expression Plasmid Vector	PHLAP9256679	Plasmid vector containing HLA-A*30:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:163 protein. This plasmid can be used for constructing HLA-A*30:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:164 Protein Expression Plasmid Vector	PHLAP9256680	Plasmid vector containing HLA-A*30:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:164 protein. This plasmid can be used for constructing HLA-A*30:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:165 Protein Expression Plasmid Vector	PHLAP9256681	Plasmid vector containing HLA-A*30:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:165 protein. This plasmid can be used for constructing HLA-A*30:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:166 Protein Expression Plasmid Vector	PHLAP9256682	Plasmid vector containing HLA-A*30:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:166 protein. This plasmid can be used for constructing HLA-A*30:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:167 Protein Expression Plasmid Vector	PHLAP9256683	Plasmid vector containing HLA-A*30:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:167 protein. This plasmid can be used for constructing HLA-A*30:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:168 Protein Expression Plasmid Vector	PHLAP9256684	Plasmid vector containing HLA-A*30:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:168 protein. This plasmid can be used for constructing HLA-A*30:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:169 Protein Expression Plasmid Vector	PHLAP9256685	Plasmid vector containing HLA-A*30:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:169 protein. This plasmid can be used for constructing HLA-A*30:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:17 Protein Expression Plasmid Vector	PHLAP9256686	Plasmid vector containing HLA-A*30:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:17 protein. This plasmid can be used for constructing HLA-A*30:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:170 Protein Expression Plasmid Vector	PHLAP9256687	Plasmid vector containing HLA-A*30:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:170 protein. This plasmid can be used for constructing HLA-A*30:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:171 Protein Expression Plasmid Vector	PHLAP9256688	Plasmid vector containing HLA-A*30:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:171 protein. This plasmid can be used for constructing HLA-A*30:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:172 Protein Expression Plasmid Vector	PHLAP9256689	Plasmid vector containing HLA-A*30:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:172 protein. This plasmid can be used for constructing HLA-A*30:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:173 Protein Expression Plasmid Vector	PHLAP9256690	Plasmid vector containing HLA-A*30:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:173 protein. This plasmid can be used for constructing HLA-A*30:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:174 Protein Expression Plasmid Vector	PHLAP9256691	Plasmid vector containing HLA-A*30:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:174 protein. This plasmid can be used for constructing HLA-A*30:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:175 Protein Expression Plasmid Vector	PHLAP9256692	Plasmid vector containing HLA-A*30:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:175 protein. This plasmid can be used for constructing HLA-A*30:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:176 Protein Expression Plasmid Vector	PHLAP9256693	Plasmid vector containing HLA-A*30:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:176 protein. This plasmid can be used for constructing HLA-A*30:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:177 Protein Expression Plasmid Vector	PHLAP9256694	Plasmid vector containing HLA-A*30:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:177 protein. This plasmid can be used for constructing HLA-A*30:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:178N Protein Expression Plasmid Vector	PHLAP9256695	Plasmid vector containing HLA-A*30:178N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:178N protein. This plasmid can be used for constructing HLA-A*30:178N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:178N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:179 Protein Expression Plasmid Vector	PHLAP9256696	Plasmid vector containing HLA-A*30:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:179 protein. This plasmid can be used for constructing HLA-A*30:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:18:01 Protein Expression Plasmid Vector	PHLAP9256697	Plasmid vector containing HLA-A*30:18:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:18:01 protein. This plasmid can be used for constructing HLA-A*30:18:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:18:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:18:02 Protein Expression Plasmid Vector	PHLAP9256698	Plasmid vector containing HLA-A*30:18:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:18:02 protein. This plasmid can be used for constructing HLA-A*30:18:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:18:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:180 Protein Expression Plasmid Vector	PHLAP9256699	Plasmid vector containing HLA-A*30:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:180 protein. This plasmid can be used for constructing HLA-A*30:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:181 Protein Expression Plasmid Vector	PHLAP9256700	Plasmid vector containing HLA-A*30:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:181 protein. This plasmid can be used for constructing HLA-A*30:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:182 Protein Expression Plasmid Vector	PHLAP9256701	Plasmid vector containing HLA-A*30:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:182 protein. This plasmid can be used for constructing HLA-A*30:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:183 Protein Expression Plasmid Vector	PHLAP9256702	Plasmid vector containing HLA-A*30:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:183 protein. This plasmid can be used for constructing HLA-A*30:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:184Q Protein Expression Plasmid Vector	PHLAP9256703	Plasmid vector containing HLA-A*30:184Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:184Q protein. This plasmid can be used for constructing HLA-A*30:184Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:184Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:185 Protein Expression Plasmid Vector	PHLAP9256704	Plasmid vector containing HLA-A*30:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:185 protein. This plasmid can be used for constructing HLA-A*30:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:186 Protein Expression Plasmid Vector	PHLAP9256705	Plasmid vector containing HLA-A*30:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:186 protein. This plasmid can be used for constructing HLA-A*30:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:187 Protein Expression Plasmid Vector	PHLAP9256706	Plasmid vector containing HLA-A*30:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:187 protein. This plasmid can be used for constructing HLA-A*30:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:188 Protein Expression Plasmid Vector	PHLAP9256707	Plasmid vector containing HLA-A*30:188 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:188 protein. This plasmid can be used for constructing HLA-A*30:188 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:188 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:189 Protein Expression Plasmid Vector	PHLAP9256708	Plasmid vector containing HLA-A*30:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:189 protein. This plasmid can be used for constructing HLA-A*30:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:19 Protein Expression Plasmid Vector	PHLAP9256709	Plasmid vector containing HLA-A*30:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:19 protein. This plasmid can be used for constructing HLA-A*30:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:190 Protein Expression Plasmid Vector	PHLAP9256710	Plasmid vector containing HLA-A*30:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:190 protein. This plasmid can be used for constructing HLA-A*30:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:191 Protein Expression Plasmid Vector	PHLAP9256711	Plasmid vector containing HLA-A*30:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:191 protein. This plasmid can be used for constructing HLA-A*30:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:192 Protein Expression Plasmid Vector	PHLAP9256712	Plasmid vector containing HLA-A*30:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:192 protein. This plasmid can be used for constructing HLA-A*30:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:193 Protein Expression Plasmid Vector	PHLAP9256713	Plasmid vector containing HLA-A*30:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:193 protein. This plasmid can be used for constructing HLA-A*30:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:194 Protein Expression Plasmid Vector	PHLAP9256714	Plasmid vector containing HLA-A*30:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:194 protein. This plasmid can be used for constructing HLA-A*30:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:195 Protein Expression Plasmid Vector	PHLAP9256715	Plasmid vector containing HLA-A*30:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:195 protein. This plasmid can be used for constructing HLA-A*30:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:196 Protein Expression Plasmid Vector	PHLAP9256716	Plasmid vector containing HLA-A*30:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:196 protein. This plasmid can be used for constructing HLA-A*30:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:197N Protein Expression Plasmid Vector	PHLAP9256717	Plasmid vector containing HLA-A*30:197N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:197N protein. This plasmid can be used for constructing HLA-A*30:197N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:197N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:198 Protein Expression Plasmid Vector	PHLAP9256718	Plasmid vector containing HLA-A*30:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:198 protein. This plasmid can be used for constructing HLA-A*30:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:199 Protein Expression Plasmid Vector	PHLAP9256719	Plasmid vector containing HLA-A*30:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:199 protein. This plasmid can be used for constructing HLA-A*30:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:20 Protein Expression Plasmid Vector	PHLAP9256720	Plasmid vector containing HLA-A*30:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:20 protein. This plasmid can be used for constructing HLA-A*30:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:200 Protein Expression Plasmid Vector	PHLAP9256721	Plasmid vector containing HLA-A*30:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:200 protein. This plasmid can be used for constructing HLA-A*30:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:201 Protein Expression Plasmid Vector	PHLAP9256722	Plasmid vector containing HLA-A*30:201 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:201 protein. This plasmid can be used for constructing HLA-A*30:201 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:201 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:202 Protein Expression Plasmid Vector	PHLAP9256723	Plasmid vector containing HLA-A*30:202 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:202 protein. This plasmid can be used for constructing HLA-A*30:202 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:202 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:203 Protein Expression Plasmid Vector	PHLAP9256724	Plasmid vector containing HLA-A*30:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:203 protein. This plasmid can be used for constructing HLA-A*30:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:204N Protein Expression Plasmid Vector	PHLAP9256725	Plasmid vector containing HLA-A*30:204N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:204N protein. This plasmid can be used for constructing HLA-A*30:204N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:204N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:205 Protein Expression Plasmid Vector	PHLAP9256726	Plasmid vector containing HLA-A*30:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:205 protein. This plasmid can be used for constructing HLA-A*30:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:206 Protein Expression Plasmid Vector	PHLAP9256727	Plasmid vector containing HLA-A*30:206 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:206 protein. This plasmid can be used for constructing HLA-A*30:206 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:206 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:207 Protein Expression Plasmid Vector	PHLAP9256728	Plasmid vector containing HLA-A*30:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:207 protein. This plasmid can be used for constructing HLA-A*30:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:208N Protein Expression Plasmid Vector	PHLAP9256729	Plasmid vector containing HLA-A*30:208N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:208N protein. This plasmid can be used for constructing HLA-A*30:208N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:208N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:209N Protein Expression Plasmid Vector	PHLAP9256730	Plasmid vector containing HLA-A*30:209N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:209N protein. This plasmid can be used for constructing HLA-A*30:209N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:209N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:210 Protein Expression Plasmid Vector	PHLAP9256731	Plasmid vector containing HLA-A*30:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:210 protein. This plasmid can be used for constructing HLA-A*30:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:211 Protein Expression Plasmid Vector	PHLAP9256732	Plasmid vector containing HLA-A*30:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:211 protein. This plasmid can be used for constructing HLA-A*30:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:212 Protein Expression Plasmid Vector	PHLAP9256733	Plasmid vector containing HLA-A*30:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:212 protein. This plasmid can be used for constructing HLA-A*30:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:213 Protein Expression Plasmid Vector	PHLAP9256734	Plasmid vector containing HLA-A*30:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:213 protein. This plasmid can be used for constructing HLA-A*30:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:214 Protein Expression Plasmid Vector	PHLAP9256735	Plasmid vector containing HLA-A*30:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:214 protein. This plasmid can be used for constructing HLA-A*30:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:215 Protein Expression Plasmid Vector	PHLAP9256736	Plasmid vector containing HLA-A*30:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:215 protein. This plasmid can be used for constructing HLA-A*30:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:216 Protein Expression Plasmid Vector	PHLAP9256737	Plasmid vector containing HLA-A*30:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:216 protein. This plasmid can be used for constructing HLA-A*30:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:217 Protein Expression Plasmid Vector	PHLAP9256738	Plasmid vector containing HLA-A*30:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:217 protein. This plasmid can be used for constructing HLA-A*30:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:218 Protein Expression Plasmid Vector	PHLAP9256739	Plasmid vector containing HLA-A*30:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:218 protein. This plasmid can be used for constructing HLA-A*30:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:219N Protein Expression Plasmid Vector	PHLAP9256740	Plasmid vector containing HLA-A*30:219N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:219N protein. This plasmid can be used for constructing HLA-A*30:219N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:219N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:22 Protein Expression Plasmid Vector	PHLAP9256741	Plasmid vector containing HLA-A*30:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:22 protein. This plasmid can be used for constructing HLA-A*30:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:220Q Protein Expression Plasmid Vector	PHLAP9256742	Plasmid vector containing HLA-A*30:220Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:220Q protein. This plasmid can be used for constructing HLA-A*30:220Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:220Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:221 Protein Expression Plasmid Vector	PHLAP9256743	Plasmid vector containing HLA-A*30:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:221 protein. This plasmid can be used for constructing HLA-A*30:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:222 Protein Expression Plasmid Vector	PHLAP9256744	Plasmid vector containing HLA-A*30:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:222 protein. This plasmid can be used for constructing HLA-A*30:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:223 Protein Expression Plasmid Vector	PHLAP9256745	Plasmid vector containing HLA-A*30:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:223 protein. This plasmid can be used for constructing HLA-A*30:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:224 Protein Expression Plasmid Vector	PHLAP9256746	Plasmid vector containing HLA-A*30:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:224 protein. This plasmid can be used for constructing HLA-A*30:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:225 Protein Expression Plasmid Vector	PHLAP9256747	Plasmid vector containing HLA-A*30:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:225 protein. This plasmid can be used for constructing HLA-A*30:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:226 Protein Expression Plasmid Vector	PHLAP9256748	Plasmid vector containing HLA-A*30:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:226 protein. This plasmid can be used for constructing HLA-A*30:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:227 Protein Expression Plasmid Vector	PHLAP9256749	Plasmid vector containing HLA-A*30:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:227 protein. This plasmid can be used for constructing HLA-A*30:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:228 Protein Expression Plasmid Vector	PHLAP9256750	Plasmid vector containing HLA-A*30:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:228 protein. This plasmid can be used for constructing HLA-A*30:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:229 Protein Expression Plasmid Vector	PHLAP9256751	Plasmid vector containing HLA-A*30:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:229 protein. This plasmid can be used for constructing HLA-A*30:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:23 Protein Expression Plasmid Vector	PHLAP9256752	Plasmid vector containing HLA-A*30:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:23 protein. This plasmid can be used for constructing HLA-A*30:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:230 Protein Expression Plasmid Vector	PHLAP9256753	Plasmid vector containing HLA-A*30:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:230 protein. This plasmid can be used for constructing HLA-A*30:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:231 Protein Expression Plasmid Vector	PHLAP9256754	Plasmid vector containing HLA-A*30:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:231 protein. This plasmid can be used for constructing HLA-A*30:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:232 Protein Expression Plasmid Vector	PHLAP9256755	Plasmid vector containing HLA-A*30:232 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:232 protein. This plasmid can be used for constructing HLA-A*30:232 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:232 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:233 Protein Expression Plasmid Vector	PHLAP9256756	Plasmid vector containing HLA-A*30:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:233 protein. This plasmid can be used for constructing HLA-A*30:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:234 Protein Expression Plasmid Vector	PHLAP9256757	Plasmid vector containing HLA-A*30:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:234 protein. This plasmid can be used for constructing HLA-A*30:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:235 Protein Expression Plasmid Vector	PHLAP9256758	Plasmid vector containing HLA-A*30:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:235 protein. This plasmid can be used for constructing HLA-A*30:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:236 Protein Expression Plasmid Vector	PHLAP9256759	Plasmid vector containing HLA-A*30:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:236 protein. This plasmid can be used for constructing HLA-A*30:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:237 Protein Expression Plasmid Vector	PHLAP9256760	Plasmid vector containing HLA-A*30:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:237 protein. This plasmid can be used for constructing HLA-A*30:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:238 Protein Expression Plasmid Vector	PHLAP9256761	Plasmid vector containing HLA-A*30:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:238 protein. This plasmid can be used for constructing HLA-A*30:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:239 Protein Expression Plasmid Vector	PHLAP9256762	Plasmid vector containing HLA-A*30:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:239 protein. This plasmid can be used for constructing HLA-A*30:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:24 Protein Expression Plasmid Vector	PHLAP9256763	Plasmid vector containing HLA-A*30:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:24 protein. This plasmid can be used for constructing HLA-A*30:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:240N Protein Expression Plasmid Vector	PHLAP9256764	Plasmid vector containing HLA-A*30:240N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:240N protein. This plasmid can be used for constructing HLA-A*30:240N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:240N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:241 Protein Expression Plasmid Vector	PHLAP9256765	Plasmid vector containing HLA-A*30:241 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:241 protein. This plasmid can be used for constructing HLA-A*30:241 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:241 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:242 Protein Expression Plasmid Vector	PHLAP9256766	Plasmid vector containing HLA-A*30:242 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:242 protein. This plasmid can be used for constructing HLA-A*30:242 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:242 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:25 Protein Expression Plasmid Vector	PHLAP9256767	Plasmid vector containing HLA-A*30:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:25 protein. This plasmid can be used for constructing HLA-A*30:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:26 Protein Expression Plasmid Vector	PHLAP9256768	Plasmid vector containing HLA-A*30:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:26 protein. This plasmid can be used for constructing HLA-A*30:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:27N Protein Expression Plasmid Vector	PHLAP9256769	Plasmid vector containing HLA-A*30:27N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:27N protein. This plasmid can be used for constructing HLA-A*30:27N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:27N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:28 Protein Expression Plasmid Vector	PHLAP9256770	Plasmid vector containing HLA-A*30:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:28 protein. This plasmid can be used for constructing HLA-A*30:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:29 Protein Expression Plasmid Vector	PHLAP9256771	Plasmid vector containing HLA-A*30:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:29 protein. This plasmid can be used for constructing HLA-A*30:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:30 Protein Expression Plasmid Vector	PHLAP9256772	Plasmid vector containing HLA-A*30:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:30 protein. This plasmid can be used for constructing HLA-A*30:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:31 Protein Expression Plasmid Vector	PHLAP9256773	Plasmid vector containing HLA-A*30:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:31 protein. This plasmid can be used for constructing HLA-A*30:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:32 Protein Expression Plasmid Vector	PHLAP9256774	Plasmid vector containing HLA-A*30:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:32 protein. This plasmid can be used for constructing HLA-A*30:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:33 Protein Expression Plasmid Vector	PHLAP9256775	Plasmid vector containing HLA-A*30:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:33 protein. This plasmid can be used for constructing HLA-A*30:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:34 Protein Expression Plasmid Vector	PHLAP9256776	Plasmid vector containing HLA-A*30:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:34 protein. This plasmid can be used for constructing HLA-A*30:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:35 Protein Expression Plasmid Vector	PHLAP9256777	Plasmid vector containing HLA-A*30:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:35 protein. This plasmid can be used for constructing HLA-A*30:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:36 Protein Expression Plasmid Vector	PHLAP9256778	Plasmid vector containing HLA-A*30:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:36 protein. This plasmid can be used for constructing HLA-A*30:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:37 Protein Expression Plasmid Vector	PHLAP9256779	Plasmid vector containing HLA-A*30:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:37 protein. This plasmid can be used for constructing HLA-A*30:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:38 Protein Expression Plasmid Vector	PHLAP9256780	Plasmid vector containing HLA-A*30:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:38 protein. This plasmid can be used for constructing HLA-A*30:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:39:01 Protein Expression Plasmid Vector	PHLAP9256781	Plasmid vector containing HLA-A*30:39:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:39:01 protein. This plasmid can be used for constructing HLA-A*30:39:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:39:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:39:02 Protein Expression Plasmid Vector	PHLAP9256782	Plasmid vector containing HLA-A*30:39:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:39:02 protein. This plasmid can be used for constructing HLA-A*30:39:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:39:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:40 Protein Expression Plasmid Vector	PHLAP9256783	Plasmid vector containing HLA-A*30:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:40 protein. This plasmid can be used for constructing HLA-A*30:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:41 Protein Expression Plasmid Vector	PHLAP9256784	Plasmid vector containing HLA-A*30:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:41 protein. This plasmid can be used for constructing HLA-A*30:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:42 Protein Expression Plasmid Vector	PHLAP9256785	Plasmid vector containing HLA-A*30:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:42 protein. This plasmid can be used for constructing HLA-A*30:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:43 Protein Expression Plasmid Vector	PHLAP9256786	Plasmid vector containing HLA-A*30:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:43 protein. This plasmid can be used for constructing HLA-A*30:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:44 Protein Expression Plasmid Vector	PHLAP9256787	Plasmid vector containing HLA-A*30:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:44 protein. This plasmid can be used for constructing HLA-A*30:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:45 Protein Expression Plasmid Vector	PHLAP9256788	Plasmid vector containing HLA-A*30:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:45 protein. This plasmid can be used for constructing HLA-A*30:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:46 Protein Expression Plasmid Vector	PHLAP9256789	Plasmid vector containing HLA-A*30:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:46 protein. This plasmid can be used for constructing HLA-A*30:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:47 Protein Expression Plasmid Vector	PHLAP9256790	Plasmid vector containing HLA-A*30:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:47 protein. This plasmid can be used for constructing HLA-A*30:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:48 Protein Expression Plasmid Vector	PHLAP9256791	Plasmid vector containing HLA-A*30:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:48 protein. This plasmid can be used for constructing HLA-A*30:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:49 Protein Expression Plasmid Vector	PHLAP9256792	Plasmid vector containing HLA-A*30:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:49 protein. This plasmid can be used for constructing HLA-A*30:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:50 Protein Expression Plasmid Vector	PHLAP9256793	Plasmid vector containing HLA-A*30:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:50 protein. This plasmid can be used for constructing HLA-A*30:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:51 Protein Expression Plasmid Vector	PHLAP9256794	Plasmid vector containing HLA-A*30:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:51 protein. This plasmid can be used for constructing HLA-A*30:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:52 Protein Expression Plasmid Vector	PHLAP9256795	Plasmid vector containing HLA-A*30:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:52 protein. This plasmid can be used for constructing HLA-A*30:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:53 Protein Expression Plasmid Vector	PHLAP9256796	Plasmid vector containing HLA-A*30:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:53 protein. This plasmid can be used for constructing HLA-A*30:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:54 Protein Expression Plasmid Vector	PHLAP9256797	Plasmid vector containing HLA-A*30:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:54 protein. This plasmid can be used for constructing HLA-A*30:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:55 Protein Expression Plasmid Vector	PHLAP9256798	Plasmid vector containing HLA-A*30:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:55 protein. This plasmid can be used for constructing HLA-A*30:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:56 Protein Expression Plasmid Vector	PHLAP9256799	Plasmid vector containing HLA-A*30:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:56 protein. This plasmid can be used for constructing HLA-A*30:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:57 Protein Expression Plasmid Vector	PHLAP9256800	Plasmid vector containing HLA-A*30:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:57 protein. This plasmid can be used for constructing HLA-A*30:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:58 Protein Expression Plasmid Vector	PHLAP9256801	Plasmid vector containing HLA-A*30:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:58 protein. This plasmid can be used for constructing HLA-A*30:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:59N Protein Expression Plasmid Vector	PHLAP9256802	Plasmid vector containing HLA-A*30:59N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:59N protein. This plasmid can be used for constructing HLA-A*30:59N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:59N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:60 Protein Expression Plasmid Vector	PHLAP9256803	Plasmid vector containing HLA-A*30:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:60 protein. This plasmid can be used for constructing HLA-A*30:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:61 Protein Expression Plasmid Vector	PHLAP9256804	Plasmid vector containing HLA-A*30:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:61 protein. This plasmid can be used for constructing HLA-A*30:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:62 Protein Expression Plasmid Vector	PHLAP9256805	Plasmid vector containing HLA-A*30:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:62 protein. This plasmid can be used for constructing HLA-A*30:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:63 Protein Expression Plasmid Vector	PHLAP9256806	Plasmid vector containing HLA-A*30:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:63 protein. This plasmid can be used for constructing HLA-A*30:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:64 Protein Expression Plasmid Vector	PHLAP9256807	Plasmid vector containing HLA-A*30:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:64 protein. This plasmid can be used for constructing HLA-A*30:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:65 Protein Expression Plasmid Vector	PHLAP9256808	Plasmid vector containing HLA-A*30:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:65 protein. This plasmid can be used for constructing HLA-A*30:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:66 Protein Expression Plasmid Vector	PHLAP9256809	Plasmid vector containing HLA-A*30:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:66 protein. This plasmid can be used for constructing HLA-A*30:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:67 Protein Expression Plasmid Vector	PHLAP9256810	Plasmid vector containing HLA-A*30:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:67 protein. This plasmid can be used for constructing HLA-A*30:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:68 Protein Expression Plasmid Vector	PHLAP9256811	Plasmid vector containing HLA-A*30:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:68 protein. This plasmid can be used for constructing HLA-A*30:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:69 Protein Expression Plasmid Vector	PHLAP9256812	Plasmid vector containing HLA-A*30:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:69 protein. This plasmid can be used for constructing HLA-A*30:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:70N Protein Expression Plasmid Vector	PHLAP9256813	Plasmid vector containing HLA-A*30:70N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:70N protein. This plasmid can be used for constructing HLA-A*30:70N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:70N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:71 Protein Expression Plasmid Vector	PHLAP9256814	Plasmid vector containing HLA-A*30:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:71 protein. This plasmid can be used for constructing HLA-A*30:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:72 Protein Expression Plasmid Vector	PHLAP9256815	Plasmid vector containing HLA-A*30:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:72 protein. This plasmid can be used for constructing HLA-A*30:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:73N Protein Expression Plasmid Vector	PHLAP9256816	Plasmid vector containing HLA-A*30:73N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:73N protein. This plasmid can be used for constructing HLA-A*30:73N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:73N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:74 Protein Expression Plasmid Vector	PHLAP9256817	Plasmid vector containing HLA-A*30:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:74 protein. This plasmid can be used for constructing HLA-A*30:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:75 Protein Expression Plasmid Vector	PHLAP9256818	Plasmid vector containing HLA-A*30:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:75 protein. This plasmid can be used for constructing HLA-A*30:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:76N Protein Expression Plasmid Vector	PHLAP9256819	Plasmid vector containing HLA-A*30:76N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:76N protein. This plasmid can be used for constructing HLA-A*30:76N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:76N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:77 Protein Expression Plasmid Vector	PHLAP9256820	Plasmid vector containing HLA-A*30:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:77 protein. This plasmid can be used for constructing HLA-A*30:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:78N Protein Expression Plasmid Vector	PHLAP9256821	Plasmid vector containing HLA-A*30:78N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:78N protein. This plasmid can be used for constructing HLA-A*30:78N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:78N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:79 Protein Expression Plasmid Vector	PHLAP9256822	Plasmid vector containing HLA-A*30:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:79 protein. This plasmid can be used for constructing HLA-A*30:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:80 Protein Expression Plasmid Vector	PHLAP9256823	Plasmid vector containing HLA-A*30:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:80 protein. This plasmid can be used for constructing HLA-A*30:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:81 Protein Expression Plasmid Vector	PHLAP9256824	Plasmid vector containing HLA-A*30:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:81 protein. This plasmid can be used for constructing HLA-A*30:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:82 Protein Expression Plasmid Vector	PHLAP9256825	Plasmid vector containing HLA-A*30:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:82 protein. This plasmid can be used for constructing HLA-A*30:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:83 Protein Expression Plasmid Vector	PHLAP9256826	Plasmid vector containing HLA-A*30:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:83 protein. This plasmid can be used for constructing HLA-A*30:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:84 Protein Expression Plasmid Vector	PHLAP9256827	Plasmid vector containing HLA-A*30:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:84 protein. This plasmid can be used for constructing HLA-A*30:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:85 Protein Expression Plasmid Vector	PHLAP9256828	Plasmid vector containing HLA-A*30:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:85 protein. This plasmid can be used for constructing HLA-A*30:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:86 Protein Expression Plasmid Vector	PHLAP9256829	Plasmid vector containing HLA-A*30:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:86 protein. This plasmid can be used for constructing HLA-A*30:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:87 Protein Expression Plasmid Vector	PHLAP9256830	Plasmid vector containing HLA-A*30:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:87 protein. This plasmid can be used for constructing HLA-A*30:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:88 Protein Expression Plasmid Vector	PHLAP9256831	Plasmid vector containing HLA-A*30:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:88 protein. This plasmid can be used for constructing HLA-A*30:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:89 Protein Expression Plasmid Vector	PHLAP9256832	Plasmid vector containing HLA-A*30:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:89 protein. This plasmid can be used for constructing HLA-A*30:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:90 Protein Expression Plasmid Vector	PHLAP9256833	Plasmid vector containing HLA-A*30:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:90 protein. This plasmid can be used for constructing HLA-A*30:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:91 Protein Expression Plasmid Vector	PHLAP9256834	Plasmid vector containing HLA-A*30:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:91 protein. This plasmid can be used for constructing HLA-A*30:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:92 Protein Expression Plasmid Vector	PHLAP9256835	Plasmid vector containing HLA-A*30:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:92 protein. This plasmid can be used for constructing HLA-A*30:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*30:93 Protein Expression Plasmid Vector	PHLAP9256836	Plasmid vector containing HLA-A*30:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:93 protein. This plasmid can be used for constructing HLA-A*30:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:94 Protein Expression Plasmid Vector	PHLAP9256837	Plasmid vector containing HLA-A*30:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:94 protein. This plasmid can be used for constructing HLA-A*30:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:95 Protein Expression Plasmid Vector	PHLAP9256838	Plasmid vector containing HLA-A*30:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:95 protein. This plasmid can be used for constructing HLA-A*30:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:96 Protein Expression Plasmid Vector	PHLAP9256839	Plasmid vector containing HLA-A*30:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:96 protein. This plasmid can be used for constructing HLA-A*30:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:97 Protein Expression Plasmid Vector	PHLAP9256840	Plasmid vector containing HLA-A*30:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:97 protein. This plasmid can be used for constructing HLA-A*30:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:98 Protein Expression Plasmid Vector	PHLAP9256841	Plasmid vector containing HLA-A*30:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:98 protein. This plasmid can be used for constructing HLA-A*30:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*30:99 Protein Expression Plasmid Vector	PHLAP9256842	Plasmid vector containing HLA-A*30:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*30:99 protein. This plasmid can be used for constructing HLA-A*30:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*30:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*3005 Protein Expression Plasmid Vector	PHLAP9256843	Plasmid vector containing HLA-A*3005 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*3005 protein. This plasmid can be used for constructing HLA-A*3005 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*3005 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*3021 Protein Expression Plasmid Vector	PHLAP9256844	Plasmid vector containing HLA-A*3021 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*3021 protein. This plasmid can be used for constructing HLA-A*3021 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*3021 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:01 Protein Expression Plasmid Vector	PHLAP9256845	Plasmid vector containing HLA-A*31:01:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:01 protein. This plasmid can be used for constructing HLA-A*31:01:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:02 Protein Expression Plasmid Vector	PHLAP9256846	Plasmid vector containing HLA-A*31:01:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:02 protein. This plasmid can be used for constructing HLA-A*31:01:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:03N Protein Expression Plasmid Vector	PHLAP9256847	Plasmid vector containing HLA-A*31:01:02:03N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:03N protein. This plasmid can be used for constructing HLA-A*31:01:02:03N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:03N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:04 Protein Expression Plasmid Vector	PHLAP9256848	Plasmid vector containing HLA-A*31:01:02:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:04 protein. This plasmid can be used for constructing HLA-A*31:01:02:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:05 Protein Expression Plasmid Vector	PHLAP9256849	Plasmid vector containing HLA-A*31:01:02:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:05 protein. This plasmid can be used for constructing HLA-A*31:01:02:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:06 Protein Expression Plasmid Vector	PHLAP9256850	Plasmid vector containing HLA-A*31:01:02:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:06 protein. This plasmid can be used for constructing HLA-A*31:01:02:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:02:07 Protein Expression Plasmid Vector	PHLAP9256851	Plasmid vector containing HLA-A*31:01:02:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:07 protein. This plasmid can be used for constructing HLA-A*31:01:02:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:08 Protein Expression Plasmid Vector	PHLAP9256852	Plasmid vector containing HLA-A*31:01:02:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:08 protein. This plasmid can be used for constructing HLA-A*31:01:02:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:09 Protein Expression Plasmid Vector	PHLAP9256853	Plasmid vector containing HLA-A*31:01:02:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:09 protein. This plasmid can be used for constructing HLA-A*31:01:02:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:10 Protein Expression Plasmid Vector	PHLAP9256854	Plasmid vector containing HLA-A*31:01:02:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:10 protein. This plasmid can be used for constructing HLA-A*31:01:02:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:11 Protein Expression Plasmid Vector	PHLAP9256855	Plasmid vector containing HLA-A*31:01:02:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:11 protein. This plasmid can be used for constructing HLA-A*31:01:02:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:12 Protein Expression Plasmid Vector	PHLAP9256856	Plasmid vector containing HLA-A*31:01:02:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:12 protein. This plasmid can be used for constructing HLA-A*31:01:02:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:13 Protein Expression Plasmid Vector	PHLAP9256857	Plasmid vector containing HLA-A*31:01:02:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:13 protein. This plasmid can be used for constructing HLA-A*31:01:02:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:02:14 Protein Expression Plasmid Vector	PHLAP9256858	Plasmid vector containing HLA-A*31:01:02:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:14 protein. This plasmid can be used for constructing HLA-A*31:01:02:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:15 Protein Expression Plasmid Vector	PHLAP9256859	Plasmid vector containing HLA-A*31:01:02:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:15 protein. This plasmid can be used for constructing HLA-A*31:01:02:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:16 Protein Expression Plasmid Vector	PHLAP9256860	Plasmid vector containing HLA-A*31:01:02:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:16 protein. This plasmid can be used for constructing HLA-A*31:01:02:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:17 Protein Expression Plasmid Vector	PHLAP9256861	Plasmid vector containing HLA-A*31:01:02:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:17 protein. This plasmid can be used for constructing HLA-A*31:01:02:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:18 Protein Expression Plasmid Vector	PHLAP9256862	Plasmid vector containing HLA-A*31:01:02:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:18 protein. This plasmid can be used for constructing HLA-A*31:01:02:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:19 Protein Expression Plasmid Vector	PHLAP9256863	Plasmid vector containing HLA-A*31:01:02:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:19 protein. This plasmid can be used for constructing HLA-A*31:01:02:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:20 Protein Expression Plasmid Vector	PHLAP9256864	Plasmid vector containing HLA-A*31:01:02:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:20 protein. This plasmid can be used for constructing HLA-A*31:01:02:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:02:21 Protein Expression Plasmid Vector	PHLAP9256865	Plasmid vector containing HLA-A*31:01:02:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:21 protein. This plasmid can be used for constructing HLA-A*31:01:02:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:22 Protein Expression Plasmid Vector	PHLAP9256866	Plasmid vector containing HLA-A*31:01:02:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:22 protein. This plasmid can be used for constructing HLA-A*31:01:02:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:23 Protein Expression Plasmid Vector	PHLAP9256867	Plasmid vector containing HLA-A*31:01:02:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:23 protein. This plasmid can be used for constructing HLA-A*31:01:02:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:24 Protein Expression Plasmid Vector	PHLAP9256868	Plasmid vector containing HLA-A*31:01:02:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:24 protein. This plasmid can be used for constructing HLA-A*31:01:02:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:25 Protein Expression Plasmid Vector	PHLAP9256869	Plasmid vector containing HLA-A*31:01:02:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:25 protein. This plasmid can be used for constructing HLA-A*31:01:02:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:26 Protein Expression Plasmid Vector	PHLAP9256870	Plasmid vector containing HLA-A*31:01:02:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:26 protein. This plasmid can be used for constructing HLA-A*31:01:02:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:27 Protein Expression Plasmid Vector	PHLAP9256871	Plasmid vector containing HLA-A*31:01:02:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:27 protein. This plasmid can be used for constructing HLA-A*31:01:02:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:02:28 Protein Expression Plasmid Vector	PHLAP9256872	Plasmid vector containing HLA-A*31:01:02:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:28 protein. This plasmid can be used for constructing HLA-A*31:01:02:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:29 Protein Expression Plasmid Vector	PHLAP9256873	Plasmid vector containing HLA-A*31:01:02:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:29 protein. This plasmid can be used for constructing HLA-A*31:01:02:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:30Q Protein Expression Plasmid Vector	PHLAP9256874	Plasmid vector containing HLA-A*31:01:02:30Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:30Q protein. This plasmid can be used for constructing HLA-A*31:01:02:30Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:30Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:31 Protein Expression Plasmid Vector	PHLAP9256875	Plasmid vector containing HLA-A*31:01:02:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:31 protein. This plasmid can be used for constructing HLA-A*31:01:02:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:32 Protein Expression Plasmid Vector	PHLAP9256876	Plasmid vector containing HLA-A*31:01:02:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:32 protein. This plasmid can be used for constructing HLA-A*31:01:02:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:33 Protein Expression Plasmid Vector	PHLAP9256877	Plasmid vector containing HLA-A*31:01:02:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:33 protein. This plasmid can be used for constructing HLA-A*31:01:02:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:34 Protein Expression Plasmid Vector	PHLAP9256878	Plasmid vector containing HLA-A*31:01:02:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:34 protein. This plasmid can be used for constructing HLA-A*31:01:02:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:02:35 Protein Expression Plasmid Vector	PHLAP9256879	Plasmid vector containing HLA-A*31:01:02:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:35 protein. This plasmid can be used for constructing HLA-A*31:01:02:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:36 Protein Expression Plasmid Vector	PHLAP9256880	Plasmid vector containing HLA-A*31:01:02:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:36 protein. This plasmid can be used for constructing HLA-A*31:01:02:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:37 Protein Expression Plasmid Vector	PHLAP9256881	Plasmid vector containing HLA-A*31:01:02:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:37 protein. This plasmid can be used for constructing HLA-A*31:01:02:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:38 Protein Expression Plasmid Vector	PHLAP9256882	Plasmid vector containing HLA-A*31:01:02:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:38 protein. This plasmid can be used for constructing HLA-A*31:01:02:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:39 Protein Expression Plasmid Vector	PHLAP9256883	Plasmid vector containing HLA-A*31:01:02:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:39 protein. This plasmid can be used for constructing HLA-A*31:01:02:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:40 Protein Expression Plasmid Vector	PHLAP9256884	Plasmid vector containing HLA-A*31:01:02:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:40 protein. This plasmid can be used for constructing HLA-A*31:01:02:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:41 Protein Expression Plasmid Vector	PHLAP9256885	Plasmid vector containing HLA-A*31:01:02:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:41 protein. This plasmid can be used for constructing HLA-A*31:01:02:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:02:42 Protein Expression Plasmid Vector	PHLAP9256886	Plasmid vector containing HLA-A*31:01:02:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:42 protein. This plasmid can be used for constructing HLA-A*31:01:02:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:43 Protein Expression Plasmid Vector	PHLAP9256887	Plasmid vector containing HLA-A*31:01:02:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:43 protein. This plasmid can be used for constructing HLA-A*31:01:02:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:44 Protein Expression Plasmid Vector	PHLAP9256888	Plasmid vector containing HLA-A*31:01:02:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:44 protein. This plasmid can be used for constructing HLA-A*31:01:02:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:45 Protein Expression Plasmid Vector	PHLAP9256889	Plasmid vector containing HLA-A*31:01:02:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:45 protein. This plasmid can be used for constructing HLA-A*31:01:02:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:46 Protein Expression Plasmid Vector	PHLAP9256890	Plasmid vector containing HLA-A*31:01:02:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:46 protein. This plasmid can be used for constructing HLA-A*31:01:02:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:47 Protein Expression Plasmid Vector	PHLAP9256891	Plasmid vector containing HLA-A*31:01:02:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:47 protein. This plasmid can be used for constructing HLA-A*31:01:02:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:48 Protein Expression Plasmid Vector	PHLAP9256892	Plasmid vector containing HLA-A*31:01:02:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:48 protein. This plasmid can be used for constructing HLA-A*31:01:02:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:02:49 Protein Expression Plasmid Vector	PHLAP9256893	Plasmid vector containing HLA-A*31:01:02:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:49 protein. This plasmid can be used for constructing HLA-A*31:01:02:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:50 Protein Expression Plasmid Vector	PHLAP9256894	Plasmid vector containing HLA-A*31:01:02:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:50 protein. This plasmid can be used for constructing HLA-A*31:01:02:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:51Q Protein Expression Plasmid Vector	PHLAP9256895	Plasmid vector containing HLA-A*31:01:02:51Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:51Q protein. This plasmid can be used for constructing HLA-A*31:01:02:51Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:51Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:52 Protein Expression Plasmid Vector	PHLAP9256896	Plasmid vector containing HLA-A*31:01:02:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:52 protein. This plasmid can be used for constructing HLA-A*31:01:02:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:53 Protein Expression Plasmid Vector	PHLAP9256897	Plasmid vector containing HLA-A*31:01:02:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:53 protein. This plasmid can be used for constructing HLA-A*31:01:02:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:54 Protein Expression Plasmid Vector	PHLAP9256898	Plasmid vector containing HLA-A*31:01:02:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:54 protein. This plasmid can be used for constructing HLA-A*31:01:02:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:55 Protein Expression Plasmid Vector	PHLAP9256899	Plasmid vector containing HLA-A*31:01:02:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:55 protein. This plasmid can be used for constructing HLA-A*31:01:02:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:02:56 Protein Expression Plasmid Vector	PHLAP9256900	Plasmid vector containing HLA-A*31:01:02:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:56 protein. This plasmid can be used for constructing HLA-A*31:01:02:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:57 Protein Expression Plasmid Vector	PHLAP9256901	Plasmid vector containing HLA-A*31:01:02:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:57 protein. This plasmid can be used for constructing HLA-A*31:01:02:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:58 Protein Expression Plasmid Vector	PHLAP9256902	Plasmid vector containing HLA-A*31:01:02:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:58 protein. This plasmid can be used for constructing HLA-A*31:01:02:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:59 Protein Expression Plasmid Vector	PHLAP9256903	Plasmid vector containing HLA-A*31:01:02:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:59 protein. This plasmid can be used for constructing HLA-A*31:01:02:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:60 Protein Expression Plasmid Vector	PHLAP9256904	Plasmid vector containing HLA-A*31:01:02:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:60 protein. This plasmid can be used for constructing HLA-A*31:01:02:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:61 Protein Expression Plasmid Vector	PHLAP9256905	Plasmid vector containing HLA-A*31:01:02:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:61 protein. This plasmid can be used for constructing HLA-A*31:01:02:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:02:62 Protein Expression Plasmid Vector	PHLAP9256906	Plasmid vector containing HLA-A*31:01:02:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:02:62 protein. This plasmid can be used for constructing HLA-A*31:01:02:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:02:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:03 Protein Expression Plasmid Vector	PHLAP9256907	Plasmid vector containing HLA-A*31:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:03 protein. This plasmid can be used for constructing HLA-A*31:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:04 Protein Expression Plasmid Vector	PHLAP9256908	Plasmid vector containing HLA-A*31:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:04 protein. This plasmid can be used for constructing HLA-A*31:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:05 Protein Expression Plasmid Vector	PHLAP9256909	Plasmid vector containing HLA-A*31:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:05 protein. This plasmid can be used for constructing HLA-A*31:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:06 Protein Expression Plasmid Vector	PHLAP9256910	Plasmid vector containing HLA-A*31:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:06 protein. This plasmid can be used for constructing HLA-A*31:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:07 Protein Expression Plasmid Vector	PHLAP9256911	Plasmid vector containing HLA-A*31:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:07 protein. This plasmid can be used for constructing HLA-A*31:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:08 Protein Expression Plasmid Vector	PHLAP9256912	Plasmid vector containing HLA-A*31:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:08 protein. This plasmid can be used for constructing HLA-A*31:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:09 Protein Expression Plasmid Vector	PHLAP9256913	Plasmid vector containing HLA-A*31:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:09 protein. This plasmid can be used for constructing HLA-A*31:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:10 Protein Expression Plasmid Vector	PHLAP9256914	Plasmid vector containing HLA-A*31:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:10 protein. This plasmid can be used for constructing HLA-A*31:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:11 Protein Expression Plasmid Vector	PHLAP9256915	Plasmid vector containing HLA-A*31:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:11 protein. This plasmid can be used for constructing HLA-A*31:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:12 Protein Expression Plasmid Vector	PHLAP9256916	Plasmid vector containing HLA-A*31:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:12 protein. This plasmid can be used for constructing HLA-A*31:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:13 Protein Expression Plasmid Vector	PHLAP9256917	Plasmid vector containing HLA-A*31:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:13 protein. This plasmid can be used for constructing HLA-A*31:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:14 Protein Expression Plasmid Vector	PHLAP9256918	Plasmid vector containing HLA-A*31:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:14 protein. This plasmid can be used for constructing HLA-A*31:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:15 Protein Expression Plasmid Vector	PHLAP9256919	Plasmid vector containing HLA-A*31:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:15 protein. This plasmid can be used for constructing HLA-A*31:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:16 Protein Expression Plasmid Vector	PHLAP9256920	Plasmid vector containing HLA-A*31:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:16 protein. This plasmid can be used for constructing HLA-A*31:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:17 Protein Expression Plasmid Vector	PHLAP9256921	Plasmid vector containing HLA-A*31:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:17 protein. This plasmid can be used for constructing HLA-A*31:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:18 Protein Expression Plasmid Vector	PHLAP9256922	Plasmid vector containing HLA-A*31:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:18 protein. This plasmid can be used for constructing HLA-A*31:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:19 Protein Expression Plasmid Vector	PHLAP9256923	Plasmid vector containing HLA-A*31:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:19 protein. This plasmid can be used for constructing HLA-A*31:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:20 Protein Expression Plasmid Vector	PHLAP9256924	Plasmid vector containing HLA-A*31:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:20 protein. This plasmid can be used for constructing HLA-A*31:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:21 Protein Expression Plasmid Vector	PHLAP9256925	Plasmid vector containing HLA-A*31:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:21 protein. This plasmid can be used for constructing HLA-A*31:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:22 Protein Expression Plasmid Vector	PHLAP9256926	Plasmid vector containing HLA-A*31:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:22 protein. This plasmid can be used for constructing HLA-A*31:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:23 Protein Expression Plasmid Vector	PHLAP9256927	Plasmid vector containing HLA-A*31:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:23 protein. This plasmid can be used for constructing HLA-A*31:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:24 Protein Expression Plasmid Vector	PHLAP9256928	Plasmid vector containing HLA-A*31:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:24 protein. This plasmid can be used for constructing HLA-A*31:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:25 Protein Expression Plasmid Vector	PHLAP9256929	Plasmid vector containing HLA-A*31:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:25 protein. This plasmid can be used for constructing HLA-A*31:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:26 Protein Expression Plasmid Vector	PHLAP9256930	Plasmid vector containing HLA-A*31:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:26 protein. This plasmid can be used for constructing HLA-A*31:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:27 Protein Expression Plasmid Vector	PHLAP9256931	Plasmid vector containing HLA-A*31:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:27 protein. This plasmid can be used for constructing HLA-A*31:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:28 Protein Expression Plasmid Vector	PHLAP9256932	Plasmid vector containing HLA-A*31:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:28 protein. This plasmid can be used for constructing HLA-A*31:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:29 Protein Expression Plasmid Vector	PHLAP9256933	Plasmid vector containing HLA-A*31:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:29 protein. This plasmid can be used for constructing HLA-A*31:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:30 Protein Expression Plasmid Vector	PHLAP9256934	Plasmid vector containing HLA-A*31:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:30 protein. This plasmid can be used for constructing HLA-A*31:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:31 Protein Expression Plasmid Vector	PHLAP9256935	Plasmid vector containing HLA-A*31:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:31 protein. This plasmid can be used for constructing HLA-A*31:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:32 Protein Expression Plasmid Vector	PHLAP9256936	Plasmid vector containing HLA-A*31:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:32 protein. This plasmid can be used for constructing HLA-A*31:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:33 Protein Expression Plasmid Vector	PHLAP9256937	Plasmid vector containing HLA-A*31:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:33 protein. This plasmid can be used for constructing HLA-A*31:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:34 Protein Expression Plasmid Vector	PHLAP9256938	Plasmid vector containing HLA-A*31:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:34 protein. This plasmid can be used for constructing HLA-A*31:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:35 Protein Expression Plasmid Vector	PHLAP9256939	Plasmid vector containing HLA-A*31:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:35 protein. This plasmid can be used for constructing HLA-A*31:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:36 Protein Expression Plasmid Vector	PHLAP9256940	Plasmid vector containing HLA-A*31:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:36 protein. This plasmid can be used for constructing HLA-A*31:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:37 Protein Expression Plasmid Vector	PHLAP9256941	Plasmid vector containing HLA-A*31:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:37 protein. This plasmid can be used for constructing HLA-A*31:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:38 Protein Expression Plasmid Vector	PHLAP9256942	Plasmid vector containing HLA-A*31:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:38 protein. This plasmid can be used for constructing HLA-A*31:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:39 Protein Expression Plasmid Vector	PHLAP9256943	Plasmid vector containing HLA-A*31:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:39 protein. This plasmid can be used for constructing HLA-A*31:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:40 Protein Expression Plasmid Vector	PHLAP9256944	Plasmid vector containing HLA-A*31:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:40 protein. This plasmid can be used for constructing HLA-A*31:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:41 Protein Expression Plasmid Vector	PHLAP9256945	Plasmid vector containing HLA-A*31:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:41 protein. This plasmid can be used for constructing HLA-A*31:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:42 Protein Expression Plasmid Vector	PHLAP9256946	Plasmid vector containing HLA-A*31:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:42 protein. This plasmid can be used for constructing HLA-A*31:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:43 Protein Expression Plasmid Vector	PHLAP9256947	Plasmid vector containing HLA-A*31:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:43 protein. This plasmid can be used for constructing HLA-A*31:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:44 Protein Expression Plasmid Vector	PHLAP9256948	Plasmid vector containing HLA-A*31:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:44 protein. This plasmid can be used for constructing HLA-A*31:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:45 Protein Expression Plasmid Vector	PHLAP9256949	Plasmid vector containing HLA-A*31:01:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:45 protein. This plasmid can be used for constructing HLA-A*31:01:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:46 Protein Expression Plasmid Vector	PHLAP9256950	Plasmid vector containing HLA-A*31:01:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:46 protein. This plasmid can be used for constructing HLA-A*31:01:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:47 Protein Expression Plasmid Vector	PHLAP9256951	Plasmid vector containing HLA-A*31:01:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:47 protein. This plasmid can be used for constructing HLA-A*31:01:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:48 Protein Expression Plasmid Vector	PHLAP9256952	Plasmid vector containing HLA-A*31:01:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:48 protein. This plasmid can be used for constructing HLA-A*31:01:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:49 Protein Expression Plasmid Vector	PHLAP9256953	Plasmid vector containing HLA-A*31:01:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:49 protein. This plasmid can be used for constructing HLA-A*31:01:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:50 Protein Expression Plasmid Vector	PHLAP9256954	Plasmid vector containing HLA-A*31:01:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:50 protein. This plasmid can be used for constructing HLA-A*31:01:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:51 Protein Expression Plasmid Vector	PHLAP9256955	Plasmid vector containing HLA-A*31:01:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:51 protein. This plasmid can be used for constructing HLA-A*31:01:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:52 Protein Expression Plasmid Vector	PHLAP9256956	Plasmid vector containing HLA-A*31:01:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:52 protein. This plasmid can be used for constructing HLA-A*31:01:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:53 Protein Expression Plasmid Vector	PHLAP9256957	Plasmid vector containing HLA-A*31:01:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:53 protein. This plasmid can be used for constructing HLA-A*31:01:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:54 Protein Expression Plasmid Vector	PHLAP9256958	Plasmid vector containing HLA-A*31:01:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:54 protein. This plasmid can be used for constructing HLA-A*31:01:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:55 Protein Expression Plasmid Vector	PHLAP9256959	Plasmid vector containing HLA-A*31:01:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:55 protein. This plasmid can be used for constructing HLA-A*31:01:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:56 Protein Expression Plasmid Vector	PHLAP9256960	Plasmid vector containing HLA-A*31:01:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:56 protein. This plasmid can be used for constructing HLA-A*31:01:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:57 Protein Expression Plasmid Vector	PHLAP9256961	Plasmid vector containing HLA-A*31:01:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:57 protein. This plasmid can be used for constructing HLA-A*31:01:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:58 Protein Expression Plasmid Vector	PHLAP9256962	Plasmid vector containing HLA-A*31:01:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:58 protein. This plasmid can be used for constructing HLA-A*31:01:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:01:59 Protein Expression Plasmid Vector	PHLAP9256963	Plasmid vector containing HLA-A*31:01:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:59 protein. This plasmid can be used for constructing HLA-A*31:01:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:01:60 Protein Expression Plasmid Vector	PHLAP9256964	Plasmid vector containing HLA-A*31:01:60 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:01:60 protein. This plasmid can be used for constructing HLA-A*31:01:60 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:01:60 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:02:01 Protein Expression Plasmid Vector	PHLAP9256965	Plasmid vector containing HLA-A*31:02:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:02:01 protein. This plasmid can be used for constructing HLA-A*31:02:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:02:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:02:02 Protein Expression Plasmid Vector	PHLAP9256966	Plasmid vector containing HLA-A*31:02:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:02:02 protein. This plasmid can be used for constructing HLA-A*31:02:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:02:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:03 Protein Expression Plasmid Vector	PHLAP9256967	Plasmid vector containing HLA-A*31:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:03 protein. This plasmid can be used for constructing HLA-A*31:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:04:01:01 Protein Expression Plasmid Vector	PHLAP9256968	Plasmid vector containing HLA-A*31:04:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:04:01:01 protein. This plasmid can be used for constructing HLA-A*31:04:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:04:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:04:01:02 Protein Expression Plasmid Vector	PHLAP9256969	Plasmid vector containing HLA-A*31:04:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:04:01:02 protein. This plasmid can be used for constructing HLA-A*31:04:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:04:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:04:02 Protein Expression Plasmid Vector	PHLAP9256970	Plasmid vector containing HLA-A*31:04:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:04:02 protein. This plasmid can be used for constructing HLA-A*31:04:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:04:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:05 Protein Expression Plasmid Vector	PHLAP9256971	Plasmid vector containing HLA-A*31:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:05 protein. This plasmid can be used for constructing HLA-A*31:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:06 Protein Expression Plasmid Vector	PHLAP9256972	Plasmid vector containing HLA-A*31:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:06 protein. This plasmid can be used for constructing HLA-A*31:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:07 Protein Expression Plasmid Vector	PHLAP9256973	Plasmid vector containing HLA-A*31:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:07 protein. This plasmid can be used for constructing HLA-A*31:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:08 Protein Expression Plasmid Vector	PHLAP9256974	Plasmid vector containing HLA-A*31:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:08 protein. This plasmid can be used for constructing HLA-A*31:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:09 Protein Expression Plasmid Vector	PHLAP9256975	Plasmid vector containing HLA-A*31:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:09 protein. This plasmid can be used for constructing HLA-A*31:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:10 Protein Expression Plasmid Vector	PHLAP9256976	Plasmid vector containing HLA-A*31:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:10 protein. This plasmid can be used for constructing HLA-A*31:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:100 Protein Expression Plasmid Vector	PHLAP9256977	Plasmid vector containing HLA-A*31:100 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:100 protein. This plasmid can be used for constructing HLA-A*31:100 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:100 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:101 Protein Expression Plasmid Vector	PHLAP9256978	Plasmid vector containing HLA-A*31:101 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:101 protein. This plasmid can be used for constructing HLA-A*31:101 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:101 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:102 Protein Expression Plasmid Vector	PHLAP9256979	Plasmid vector containing HLA-A*31:102 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:102 protein. This plasmid can be used for constructing HLA-A*31:102 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:102 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:103 Protein Expression Plasmid Vector	PHLAP9256980	Plasmid vector containing HLA-A*31:103 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:103 protein. This plasmid can be used for constructing HLA-A*31:103 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:103 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:104 Protein Expression Plasmid Vector	PHLAP9256981	Plasmid vector containing HLA-A*31:104 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:104 protein. This plasmid can be used for constructing HLA-A*31:104 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:104 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:105 Protein Expression Plasmid Vector	PHLAP9256982	Plasmid vector containing HLA-A*31:105 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:105 protein. This plasmid can be used for constructing HLA-A*31:105 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:105 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:106 Protein Expression Plasmid Vector	PHLAP9256983	Plasmid vector containing HLA-A*31:106 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:106 protein. This plasmid can be used for constructing HLA-A*31:106 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:106 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:107 Protein Expression Plasmid Vector	PHLAP9256984	Plasmid vector containing HLA-A*31:107 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:107 protein. This plasmid can be used for constructing HLA-A*31:107 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:107 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:108 Protein Expression Plasmid Vector	PHLAP9256985	Plasmid vector containing HLA-A*31:108 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:108 protein. This plasmid can be used for constructing HLA-A*31:108 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:108 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:109 Protein Expression Plasmid Vector	PHLAP9256986	Plasmid vector containing HLA-A*31:109 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:109 protein. This plasmid can be used for constructing HLA-A*31:109 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:109 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:11:01 Protein Expression Plasmid Vector	PHLAP9256987	Plasmid vector containing HLA-A*31:11:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:11:01 protein. This plasmid can be used for constructing HLA-A*31:11:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:11:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:11:02 Protein Expression Plasmid Vector	PHLAP9256988	Plasmid vector containing HLA-A*31:11:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:11:02 protein. This plasmid can be used for constructing HLA-A*31:11:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:11:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:110 Protein Expression Plasmid Vector	PHLAP9256989	Plasmid vector containing HLA-A*31:110 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:110 protein. This plasmid can be used for constructing HLA-A*31:110 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:110 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:111 Protein Expression Plasmid Vector	PHLAP9256990	Plasmid vector containing HLA-A*31:111 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:111 protein. This plasmid can be used for constructing HLA-A*31:111 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:111 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:112 Protein Expression Plasmid Vector	PHLAP9256991	Plasmid vector containing HLA-A*31:112 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:112 protein. This plasmid can be used for constructing HLA-A*31:112 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:112 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:113 Protein Expression Plasmid Vector	PHLAP9256992	Plasmid vector containing HLA-A*31:113 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:113 protein. This plasmid can be used for constructing HLA-A*31:113 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:113 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:114 Protein Expression Plasmid Vector	PHLAP9256993	Plasmid vector containing HLA-A*31:114 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:114 protein. This plasmid can be used for constructing HLA-A*31:114 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:114 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:115 Protein Expression Plasmid Vector	PHLAP9256994	Plasmid vector containing HLA-A*31:115 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:115 protein. This plasmid can be used for constructing HLA-A*31:115 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:115 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:116 Protein Expression Plasmid Vector	PHLAP9256995	Plasmid vector containing HLA-A*31:116 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:116 protein. This plasmid can be used for constructing HLA-A*31:116 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:116 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:117 Protein Expression Plasmid Vector	PHLAP9256996	Plasmid vector containing HLA-A*31:117 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:117 protein. This plasmid can be used for constructing HLA-A*31:117 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:117 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:118 Protein Expression Plasmid Vector	PHLAP9256997	Plasmid vector containing HLA-A*31:118 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:118 protein. This plasmid can be used for constructing HLA-A*31:118 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:118 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:119 Protein Expression Plasmid Vector	PHLAP9256998	Plasmid vector containing HLA-A*31:119 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:119 protein. This plasmid can be used for constructing HLA-A*31:119 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:119 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:12 Protein Expression Plasmid Vector	PHLAP9256999	Plasmid vector containing HLA-A*31:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:12 protein. This plasmid can be used for constructing HLA-A*31:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:120 Protein Expression Plasmid Vector	PHLAP9257000	Plasmid vector containing HLA-A*31:120 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:120 protein. This plasmid can be used for constructing HLA-A*31:120 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:120 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:121 Protein Expression Plasmid Vector	PHLAP9257001	Plasmid vector containing HLA-A*31:121 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:121 protein. This plasmid can be used for constructing HLA-A*31:121 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:121 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:122 Protein Expression Plasmid Vector	PHLAP9257002	Plasmid vector containing HLA-A*31:122 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:122 protein. This plasmid can be used for constructing HLA-A*31:122 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:122 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:123 Protein Expression Plasmid Vector	PHLAP9257003	Plasmid vector containing HLA-A*31:123 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:123 protein. This plasmid can be used for constructing HLA-A*31:123 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:123 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:124 Protein Expression Plasmid Vector	PHLAP9257004	Plasmid vector containing HLA-A*31:124 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:124 protein. This plasmid can be used for constructing HLA-A*31:124 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:124 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:125 Protein Expression Plasmid Vector	PHLAP9257005	Plasmid vector containing HLA-A*31:125 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:125 protein. This plasmid can be used for constructing HLA-A*31:125 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:125 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:126N Protein Expression Plasmid Vector	PHLAP9257006	Plasmid vector containing HLA-A*31:126N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:126N protein. This plasmid can be used for constructing HLA-A*31:126N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:126N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:127 Protein Expression Plasmid Vector	PHLAP9257007	Plasmid vector containing HLA-A*31:127 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:127 protein. This plasmid can be used for constructing HLA-A*31:127 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:127 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:128 Protein Expression Plasmid Vector	PHLAP9257008	Plasmid vector containing HLA-A*31:128 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:128 protein. This plasmid can be used for constructing HLA-A*31:128 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:128 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:129 Protein Expression Plasmid Vector	PHLAP9257009	Plasmid vector containing HLA-A*31:129 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:129 protein. This plasmid can be used for constructing HLA-A*31:129 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:129 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:13 Protein Expression Plasmid Vector	PHLAP9257010	Plasmid vector containing HLA-A*31:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:13 protein. This plasmid can be used for constructing HLA-A*31:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:130 Protein Expression Plasmid Vector	PHLAP9257011	Plasmid vector containing HLA-A*31:130 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:130 protein. This plasmid can be used for constructing HLA-A*31:130 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:130 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:131N Protein Expression Plasmid Vector	PHLAP9257012	Plasmid vector containing HLA-A*31:131N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:131N protein. This plasmid can be used for constructing HLA-A*31:131N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:131N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:132 Protein Expression Plasmid Vector	PHLAP9257013	Plasmid vector containing HLA-A*31:132 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:132 protein. This plasmid can be used for constructing HLA-A*31:132 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:132 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:133 Protein Expression Plasmid Vector	PHLAP9257014	Plasmid vector containing HLA-A*31:133 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:133 protein. This plasmid can be used for constructing HLA-A*31:133 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:133 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:134 Protein Expression Plasmid Vector	PHLAP9257015	Plasmid vector containing HLA-A*31:134 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:134 protein. This plasmid can be used for constructing HLA-A*31:134 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:134 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:135 Protein Expression Plasmid Vector	PHLAP9257016	Plasmid vector containing HLA-A*31:135 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:135 protein. This plasmid can be used for constructing HLA-A*31:135 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:135 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:136 Protein Expression Plasmid Vector	PHLAP9257017	Plasmid vector containing HLA-A*31:136 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:136 protein. This plasmid can be used for constructing HLA-A*31:136 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:136 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:137 Protein Expression Plasmid Vector	PHLAP9257018	Plasmid vector containing HLA-A*31:137 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:137 protein. This plasmid can be used for constructing HLA-A*31:137 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:137 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:138 Protein Expression Plasmid Vector	PHLAP9257019	Plasmid vector containing HLA-A*31:138 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:138 protein. This plasmid can be used for constructing HLA-A*31:138 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:138 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:139 Protein Expression Plasmid Vector	PHLAP9257020	Plasmid vector containing HLA-A*31:139 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:139 protein. This plasmid can be used for constructing HLA-A*31:139 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:139 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:140 Protein Expression Plasmid Vector	PHLAP9257021	Plasmid vector containing HLA-A*31:140 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:140 protein. This plasmid can be used for constructing HLA-A*31:140 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:140 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:141N Protein Expression Plasmid Vector	PHLAP9257022	Plasmid vector containing HLA-A*31:141N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:141N protein. This plasmid can be used for constructing HLA-A*31:141N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:141N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:142 Protein Expression Plasmid Vector	PHLAP9257023	Plasmid vector containing HLA-A*31:142 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:142 protein. This plasmid can be used for constructing HLA-A*31:142 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:142 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:143 Protein Expression Plasmid Vector	PHLAP9257024	Plasmid vector containing HLA-A*31:143 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:143 protein. This plasmid can be used for constructing HLA-A*31:143 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:143 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:144 Protein Expression Plasmid Vector	PHLAP9257025	Plasmid vector containing HLA-A*31:144 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:144 protein. This plasmid can be used for constructing HLA-A*31:144 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:144 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:145 Protein Expression Plasmid Vector	PHLAP9257026	Plasmid vector containing HLA-A*31:145 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:145 protein. This plasmid can be used for constructing HLA-A*31:145 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:145 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:146 Protein Expression Plasmid Vector	PHLAP9257027	Plasmid vector containing HLA-A*31:146 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:146 protein. This plasmid can be used for constructing HLA-A*31:146 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:146 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:147 Protein Expression Plasmid Vector	PHLAP9257028	Plasmid vector containing HLA-A*31:147 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:147 protein. This plasmid can be used for constructing HLA-A*31:147 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:147 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:148 Protein Expression Plasmid Vector	PHLAP9257029	Plasmid vector containing HLA-A*31:148 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:148 protein. This plasmid can be used for constructing HLA-A*31:148 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:148 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:149N Protein Expression Plasmid Vector	PHLAP9257030	Plasmid vector containing HLA-A*31:149N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:149N protein. This plasmid can be used for constructing HLA-A*31:149N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:149N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:14N Protein Expression Plasmid Vector	PHLAP9257031	Plasmid vector containing HLA-A*31:14N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:14N protein. This plasmid can be used for constructing HLA-A*31:14N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:14N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:15 Protein Expression Plasmid Vector	PHLAP9257032	Plasmid vector containing HLA-A*31:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:15 protein. This plasmid can be used for constructing HLA-A*31:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:150 Protein Expression Plasmid Vector	PHLAP9257033	Plasmid vector containing HLA-A*31:150 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:150 protein. This plasmid can be used for constructing HLA-A*31:150 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:150 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:151Q Protein Expression Plasmid Vector	PHLAP9257034	Plasmid vector containing HLA-A*31:151Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:151Q protein. This plasmid can be used for constructing HLA-A*31:151Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:151Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:152 Protein Expression Plasmid Vector	PHLAP9257035	Plasmid vector containing HLA-A*31:152 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:152 protein. This plasmid can be used for constructing HLA-A*31:152 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:152 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:153 Protein Expression Plasmid Vector	PHLAP9257036	Plasmid vector containing HLA-A*31:153 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:153 protein. This plasmid can be used for constructing HLA-A*31:153 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:153 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:154 Protein Expression Plasmid Vector	PHLAP9257037	Plasmid vector containing HLA-A*31:154 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:154 protein. This plasmid can be used for constructing HLA-A*31:154 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:154 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:155 Protein Expression Plasmid Vector	PHLAP9257038	Plasmid vector containing HLA-A*31:155 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:155 protein. This plasmid can be used for constructing HLA-A*31:155 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:155 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:157 Protein Expression Plasmid Vector	PHLAP9257039	Plasmid vector containing HLA-A*31:157 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:157 protein. This plasmid can be used for constructing HLA-A*31:157 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:157 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:158N Protein Expression Plasmid Vector	PHLAP9257040	Plasmid vector containing HLA-A*31:158N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:158N protein. This plasmid can be used for constructing HLA-A*31:158N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:158N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:159 Protein Expression Plasmid Vector	PHLAP9257041	Plasmid vector containing HLA-A*31:159 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:159 protein. This plasmid can be used for constructing HLA-A*31:159 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:159 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:16 Protein Expression Plasmid Vector	PHLAP9257042	Plasmid vector containing HLA-A*31:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:16 protein. This plasmid can be used for constructing HLA-A*31:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:160 Protein Expression Plasmid Vector	PHLAP9257043	Plasmid vector containing HLA-A*31:160 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:160 protein. This plasmid can be used for constructing HLA-A*31:160 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:160 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:161 Protein Expression Plasmid Vector	PHLAP9257044	Plasmid vector containing HLA-A*31:161 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:161 protein. This plasmid can be used for constructing HLA-A*31:161 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:161 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:162 Protein Expression Plasmid Vector	PHLAP9257045	Plasmid vector containing HLA-A*31:162 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:162 protein. This plasmid can be used for constructing HLA-A*31:162 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:162 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:163 Protein Expression Plasmid Vector	PHLAP9257046	Plasmid vector containing HLA-A*31:163 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:163 protein. This plasmid can be used for constructing HLA-A*31:163 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:163 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:164 Protein Expression Plasmid Vector	PHLAP9257047	Plasmid vector containing HLA-A*31:164 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:164 protein. This plasmid can be used for constructing HLA-A*31:164 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:164 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:165 Protein Expression Plasmid Vector	PHLAP9257048	Plasmid vector containing HLA-A*31:165 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:165 protein. This plasmid can be used for constructing HLA-A*31:165 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:165 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:166 Protein Expression Plasmid Vector	PHLAP9257049	Plasmid vector containing HLA-A*31:166 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:166 protein. This plasmid can be used for constructing HLA-A*31:166 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:166 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:167 Protein Expression Plasmid Vector	PHLAP9257050	Plasmid vector containing HLA-A*31:167 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:167 protein. This plasmid can be used for constructing HLA-A*31:167 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:167 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:168 Protein Expression Plasmid Vector	PHLAP9257051	Plasmid vector containing HLA-A*31:168 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:168 protein. This plasmid can be used for constructing HLA-A*31:168 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:168 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:169 Protein Expression Plasmid Vector	PHLAP9257052	Plasmid vector containing HLA-A*31:169 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:169 protein. This plasmid can be used for constructing HLA-A*31:169 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:169 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:17 Protein Expression Plasmid Vector	PHLAP9257053	Plasmid vector containing HLA-A*31:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:17 protein. This plasmid can be used for constructing HLA-A*31:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:170 Protein Expression Plasmid Vector	PHLAP9257054	Plasmid vector containing HLA-A*31:170 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:170 protein. This plasmid can be used for constructing HLA-A*31:170 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:170 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:171 Protein Expression Plasmid Vector	PHLAP9257055	Plasmid vector containing HLA-A*31:171 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:171 protein. This plasmid can be used for constructing HLA-A*31:171 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:171 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:172 Protein Expression Plasmid Vector	PHLAP9257056	Plasmid vector containing HLA-A*31:172 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:172 protein. This plasmid can be used for constructing HLA-A*31:172 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:172 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:173 Protein Expression Plasmid Vector	PHLAP9257057	Plasmid vector containing HLA-A*31:173 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:173 protein. This plasmid can be used for constructing HLA-A*31:173 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:173 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:174 Protein Expression Plasmid Vector	PHLAP9257058	Plasmid vector containing HLA-A*31:174 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:174 protein. This plasmid can be used for constructing HLA-A*31:174 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:174 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:175 Protein Expression Plasmid Vector	PHLAP9257059	Plasmid vector containing HLA-A*31:175 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:175 protein. This plasmid can be used for constructing HLA-A*31:175 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:175 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:176 Protein Expression Plasmid Vector	PHLAP9257060	Plasmid vector containing HLA-A*31:176 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:176 protein. This plasmid can be used for constructing HLA-A*31:176 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:176 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:177 Protein Expression Plasmid Vector	PHLAP9257061	Plasmid vector containing HLA-A*31:177 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:177 protein. This plasmid can be used for constructing HLA-A*31:177 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:177 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:178 Protein Expression Plasmid Vector	PHLAP9257062	Plasmid vector containing HLA-A*31:178 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:178 protein. This plasmid can be used for constructing HLA-A*31:178 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:178 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:179 Protein Expression Plasmid Vector	PHLAP9257063	Plasmid vector containing HLA-A*31:179 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:179 protein. This plasmid can be used for constructing HLA-A*31:179 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:179 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:18 Protein Expression Plasmid Vector	PHLAP9257064	Plasmid vector containing HLA-A*31:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:18 protein. This plasmid can be used for constructing HLA-A*31:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:180 Protein Expression Plasmid Vector	PHLAP9257065	Plasmid vector containing HLA-A*31:180 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:180 protein. This plasmid can be used for constructing HLA-A*31:180 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:180 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:181 Protein Expression Plasmid Vector	PHLAP9257066	Plasmid vector containing HLA-A*31:181 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:181 protein. This plasmid can be used for constructing HLA-A*31:181 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:181 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:182 Protein Expression Plasmid Vector	PHLAP9257067	Plasmid vector containing HLA-A*31:182 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:182 protein. This plasmid can be used for constructing HLA-A*31:182 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:182 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:183 Protein Expression Plasmid Vector	PHLAP9257068	Plasmid vector containing HLA-A*31:183 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:183 protein. This plasmid can be used for constructing HLA-A*31:183 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:183 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:184N Protein Expression Plasmid Vector	PHLAP9257069	Plasmid vector containing HLA-A*31:184N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:184N protein. This plasmid can be used for constructing HLA-A*31:184N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:184N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:185 Protein Expression Plasmid Vector	PHLAP9257070	Plasmid vector containing HLA-A*31:185 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:185 protein. This plasmid can be used for constructing HLA-A*31:185 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:185 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:186 Protein Expression Plasmid Vector	PHLAP9257071	Plasmid vector containing HLA-A*31:186 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:186 protein. This plasmid can be used for constructing HLA-A*31:186 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:186 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:187 Protein Expression Plasmid Vector	PHLAP9257072	Plasmid vector containing HLA-A*31:187 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:187 protein. This plasmid can be used for constructing HLA-A*31:187 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:187 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:188N Protein Expression Plasmid Vector	PHLAP9257073	Plasmid vector containing HLA-A*31:188N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:188N protein. This plasmid can be used for constructing HLA-A*31:188N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:188N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:189 Protein Expression Plasmid Vector	PHLAP9257074	Plasmid vector containing HLA-A*31:189 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:189 protein. This plasmid can be used for constructing HLA-A*31:189 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:189 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:19 Protein Expression Plasmid Vector	PHLAP9257075	Plasmid vector containing HLA-A*31:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:19 protein. This plasmid can be used for constructing HLA-A*31:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:190 Protein Expression Plasmid Vector	PHLAP9257076	Plasmid vector containing HLA-A*31:190 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:190 protein. This plasmid can be used for constructing HLA-A*31:190 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:190 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:191 Protein Expression Plasmid Vector	PHLAP9257077	Plasmid vector containing HLA-A*31:191 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:191 protein. This plasmid can be used for constructing HLA-A*31:191 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:191 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:192 Protein Expression Plasmid Vector	PHLAP9257078	Plasmid vector containing HLA-A*31:192 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:192 protein. This plasmid can be used for constructing HLA-A*31:192 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:192 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:193 Protein Expression Plasmid Vector	PHLAP9257079	Plasmid vector containing HLA-A*31:193 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:193 protein. This plasmid can be used for constructing HLA-A*31:193 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:193 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:194 Protein Expression Plasmid Vector	PHLAP9257080	Plasmid vector containing HLA-A*31:194 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:194 protein. This plasmid can be used for constructing HLA-A*31:194 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:194 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:195 Protein Expression Plasmid Vector	PHLAP9257081	Plasmid vector containing HLA-A*31:195 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:195 protein. This plasmid can be used for constructing HLA-A*31:195 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:195 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:196 Protein Expression Plasmid Vector	PHLAP9257082	Plasmid vector containing HLA-A*31:196 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:196 protein. This plasmid can be used for constructing HLA-A*31:196 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:196 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:197 Protein Expression Plasmid Vector	PHLAP9257083	Plasmid vector containing HLA-A*31:197 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:197 protein. This plasmid can be used for constructing HLA-A*31:197 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:197 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:198 Protein Expression Plasmid Vector	PHLAP9257084	Plasmid vector containing HLA-A*31:198 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:198 protein. This plasmid can be used for constructing HLA-A*31:198 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:198 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:199 Protein Expression Plasmid Vector	PHLAP9257085	Plasmid vector containing HLA-A*31:199 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:199 protein. This plasmid can be used for constructing HLA-A*31:199 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:199 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:20 Protein Expression Plasmid Vector	PHLAP9257086	Plasmid vector containing HLA-A*31:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:20 protein. This plasmid can be used for constructing HLA-A*31:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:200 Protein Expression Plasmid Vector	PHLAP9257087	Plasmid vector containing HLA-A*31:200 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:200 protein. This plasmid can be used for constructing HLA-A*31:200 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:200 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:201N Protein Expression Plasmid Vector	PHLAP9257088	Plasmid vector containing HLA-A*31:201N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:201N protein. This plasmid can be used for constructing HLA-A*31:201N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:201N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:202N Protein Expression Plasmid Vector	PHLAP9257089	Plasmid vector containing HLA-A*31:202N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:202N protein. This plasmid can be used for constructing HLA-A*31:202N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:202N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:203 Protein Expression Plasmid Vector	PHLAP9257090	Plasmid vector containing HLA-A*31:203 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:203 protein. This plasmid can be used for constructing HLA-A*31:203 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:203 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:204 Protein Expression Plasmid Vector	PHLAP9257091	Plasmid vector containing HLA-A*31:204 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:204 protein. This plasmid can be used for constructing HLA-A*31:204 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:204 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:205 Protein Expression Plasmid Vector	PHLAP9257092	Plasmid vector containing HLA-A*31:205 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:205 protein. This plasmid can be used for constructing HLA-A*31:205 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:205 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:206Q Protein Expression Plasmid Vector	PHLAP9257093	Plasmid vector containing HLA-A*31:206Q protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:206Q protein. This plasmid can be used for constructing HLA-A*31:206Q overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:206Q protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:207 Protein Expression Plasmid Vector	PHLAP9257094	Plasmid vector containing HLA-A*31:207 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:207 protein. This plasmid can be used for constructing HLA-A*31:207 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:207 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:208 Protein Expression Plasmid Vector	PHLAP9257095	Plasmid vector containing HLA-A*31:208 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:208 protein. This plasmid can be used for constructing HLA-A*31:208 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:208 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:209 Protein Expression Plasmid Vector	PHLAP9257096	Plasmid vector containing HLA-A*31:209 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:209 protein. This plasmid can be used for constructing HLA-A*31:209 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:209 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:21 Protein Expression Plasmid Vector	PHLAP9257097	Plasmid vector containing HLA-A*31:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:21 protein. This plasmid can be used for constructing HLA-A*31:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:210 Protein Expression Plasmid Vector	PHLAP9257098	Plasmid vector containing HLA-A*31:210 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:210 protein. This plasmid can be used for constructing HLA-A*31:210 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:210 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:211 Protein Expression Plasmid Vector	PHLAP9257099	Plasmid vector containing HLA-A*31:211 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:211 protein. This plasmid can be used for constructing HLA-A*31:211 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:211 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:212 Protein Expression Plasmid Vector	PHLAP9257100	Plasmid vector containing HLA-A*31:212 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:212 protein. This plasmid can be used for constructing HLA-A*31:212 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:212 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:213 Protein Expression Plasmid Vector	PHLAP9257101	Plasmid vector containing HLA-A*31:213 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:213 protein. This plasmid can be used for constructing HLA-A*31:213 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:213 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:214 Protein Expression Plasmid Vector	PHLAP9257102	Plasmid vector containing HLA-A*31:214 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:214 protein. This plasmid can be used for constructing HLA-A*31:214 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:214 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:215 Protein Expression Plasmid Vector	PHLAP9257103	Plasmid vector containing HLA-A*31:215 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:215 protein. This plasmid can be used for constructing HLA-A*31:215 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:215 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:216 Protein Expression Plasmid Vector	PHLAP9257104	Plasmid vector containing HLA-A*31:216 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:216 protein. This plasmid can be used for constructing HLA-A*31:216 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:216 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:217 Protein Expression Plasmid Vector	PHLAP9257105	Plasmid vector containing HLA-A*31:217 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:217 protein. This plasmid can be used for constructing HLA-A*31:217 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:217 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:218 Protein Expression Plasmid Vector	PHLAP9257106	Plasmid vector containing HLA-A*31:218 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:218 protein. This plasmid can be used for constructing HLA-A*31:218 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:218 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:219 Protein Expression Plasmid Vector	PHLAP9257107	Plasmid vector containing HLA-A*31:219 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:219 protein. This plasmid can be used for constructing HLA-A*31:219 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:219 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:22 Protein Expression Plasmid Vector	PHLAP9257108	Plasmid vector containing HLA-A*31:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:22 protein. This plasmid can be used for constructing HLA-A*31:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:220 Protein Expression Plasmid Vector	PHLAP9257109	Plasmid vector containing HLA-A*31:220 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:220 protein. This plasmid can be used for constructing HLA-A*31:220 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:220 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:221 Protein Expression Plasmid Vector	PHLAP9257110	Plasmid vector containing HLA-A*31:221 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:221 protein. This plasmid can be used for constructing HLA-A*31:221 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:221 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:222 Protein Expression Plasmid Vector	PHLAP9257111	Plasmid vector containing HLA-A*31:222 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:222 protein. This plasmid can be used for constructing HLA-A*31:222 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:222 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:223 Protein Expression Plasmid Vector	PHLAP9257112	Plasmid vector containing HLA-A*31:223 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:223 protein. This plasmid can be used for constructing HLA-A*31:223 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:223 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:224 Protein Expression Plasmid Vector	PHLAP9257113	Plasmid vector containing HLA-A*31:224 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:224 protein. This plasmid can be used for constructing HLA-A*31:224 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:224 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:225 Protein Expression Plasmid Vector	PHLAP9257114	Plasmid vector containing HLA-A*31:225 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:225 protein. This plasmid can be used for constructing HLA-A*31:225 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:225 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:226 Protein Expression Plasmid Vector	PHLAP9257115	Plasmid vector containing HLA-A*31:226 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:226 protein. This plasmid can be used for constructing HLA-A*31:226 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:226 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:227 Protein Expression Plasmid Vector	PHLAP9257116	Plasmid vector containing HLA-A*31:227 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:227 protein. This plasmid can be used for constructing HLA-A*31:227 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:227 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:228 Protein Expression Plasmid Vector	PHLAP9257117	Plasmid vector containing HLA-A*31:228 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:228 protein. This plasmid can be used for constructing HLA-A*31:228 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:228 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:229 Protein Expression Plasmid Vector	PHLAP9257118	Plasmid vector containing HLA-A*31:229 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:229 protein. This plasmid can be used for constructing HLA-A*31:229 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:229 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:23 Protein Expression Plasmid Vector	PHLAP9257119	Plasmid vector containing HLA-A*31:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:23 protein. This plasmid can be used for constructing HLA-A*31:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:230 Protein Expression Plasmid Vector	PHLAP9257120	Plasmid vector containing HLA-A*31:230 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:230 protein. This plasmid can be used for constructing HLA-A*31:230 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:230 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:231 Protein Expression Plasmid Vector	PHLAP9257121	Plasmid vector containing HLA-A*31:231 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:231 protein. This plasmid can be used for constructing HLA-A*31:231 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:231 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:232N Protein Expression Plasmid Vector	PHLAP9257122	Plasmid vector containing HLA-A*31:232N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:232N protein. This plasmid can be used for constructing HLA-A*31:232N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:232N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:233 Protein Expression Plasmid Vector	PHLAP9257123	Plasmid vector containing HLA-A*31:233 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:233 protein. This plasmid can be used for constructing HLA-A*31:233 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:233 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:234 Protein Expression Plasmid Vector	PHLAP9257124	Plasmid vector containing HLA-A*31:234 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:234 protein. This plasmid can be used for constructing HLA-A*31:234 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:234 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:235 Protein Expression Plasmid Vector	PHLAP9257125	Plasmid vector containing HLA-A*31:235 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:235 protein. This plasmid can be used for constructing HLA-A*31:235 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:235 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:236 Protein Expression Plasmid Vector	PHLAP9257126	Plasmid vector containing HLA-A*31:236 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:236 protein. This plasmid can be used for constructing HLA-A*31:236 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:236 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:237 Protein Expression Plasmid Vector	PHLAP9257127	Plasmid vector containing HLA-A*31:237 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:237 protein. This plasmid can be used for constructing HLA-A*31:237 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:237 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:238 Protein Expression Plasmid Vector	PHLAP9257128	Plasmid vector containing HLA-A*31:238 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:238 protein. This plasmid can be used for constructing HLA-A*31:238 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:238 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:239 Protein Expression Plasmid Vector	PHLAP9257129	Plasmid vector containing HLA-A*31:239 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:239 protein. This plasmid can be used for constructing HLA-A*31:239 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:239 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:24 Protein Expression Plasmid Vector	PHLAP9257130	Plasmid vector containing HLA-A*31:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:24 protein. This plasmid can be used for constructing HLA-A*31:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:240 Protein Expression Plasmid Vector	PHLAP9257131	Plasmid vector containing HLA-A*31:240 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:240 protein. This plasmid can be used for constructing HLA-A*31:240 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:240 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:241N Protein Expression Plasmid Vector	PHLAP9257132	Plasmid vector containing HLA-A*31:241N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:241N protein. This plasmid can be used for constructing HLA-A*31:241N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:241N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:25 Protein Expression Plasmid Vector	PHLAP9257133	Plasmid vector containing HLA-A*31:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:25 protein. This plasmid can be used for constructing HLA-A*31:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:26 Protein Expression Plasmid Vector	PHLAP9257134	Plasmid vector containing HLA-A*31:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:26 protein. This plasmid can be used for constructing HLA-A*31:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:27 Protein Expression Plasmid Vector	PHLAP9257135	Plasmid vector containing HLA-A*31:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:27 protein. This plasmid can be used for constructing HLA-A*31:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:28 Protein Expression Plasmid Vector	PHLAP9257136	Plasmid vector containing HLA-A*31:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:28 protein. This plasmid can be used for constructing HLA-A*31:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:29 Protein Expression Plasmid Vector	PHLAP9257137	Plasmid vector containing HLA-A*31:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:29 protein. This plasmid can be used for constructing HLA-A*31:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:30 Protein Expression Plasmid Vector	PHLAP9257138	Plasmid vector containing HLA-A*31:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:30 protein. This plasmid can be used for constructing HLA-A*31:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:31 Protein Expression Plasmid Vector	PHLAP9257139	Plasmid vector containing HLA-A*31:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:31 protein. This plasmid can be used for constructing HLA-A*31:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:32 Protein Expression Plasmid Vector	PHLAP9257140	Plasmid vector containing HLA-A*31:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:32 protein. This plasmid can be used for constructing HLA-A*31:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:33 Protein Expression Plasmid Vector	PHLAP9257141	Plasmid vector containing HLA-A*31:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:33 protein. This plasmid can be used for constructing HLA-A*31:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:34 Protein Expression Plasmid Vector	PHLAP9257142	Plasmid vector containing HLA-A*31:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:34 protein. This plasmid can be used for constructing HLA-A*31:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:35 Protein Expression Plasmid Vector	PHLAP9257143	Plasmid vector containing HLA-A*31:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:35 protein. This plasmid can be used for constructing HLA-A*31:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:36 Protein Expression Plasmid Vector	PHLAP9257144	Plasmid vector containing HLA-A*31:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:36 protein. This plasmid can be used for constructing HLA-A*31:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:37 Protein Expression Plasmid Vector	PHLAP9257145	Plasmid vector containing HLA-A*31:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:37 protein. This plasmid can be used for constructing HLA-A*31:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:38 Protein Expression Plasmid Vector	PHLAP9257146	Plasmid vector containing HLA-A*31:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:38 protein. This plasmid can be used for constructing HLA-A*31:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:39 Protein Expression Plasmid Vector	PHLAP9257147	Plasmid vector containing HLA-A*31:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:39 protein. This plasmid can be used for constructing HLA-A*31:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:40 Protein Expression Plasmid Vector	PHLAP9257148	Plasmid vector containing HLA-A*31:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:40 protein. This plasmid can be used for constructing HLA-A*31:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:41 Protein Expression Plasmid Vector	PHLAP9257149	Plasmid vector containing HLA-A*31:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:41 protein. This plasmid can be used for constructing HLA-A*31:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:42 Protein Expression Plasmid Vector	PHLAP9257150	Plasmid vector containing HLA-A*31:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:42 protein. This plasmid can be used for constructing HLA-A*31:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:43 Protein Expression Plasmid Vector	PHLAP9257151	Plasmid vector containing HLA-A*31:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:43 protein. This plasmid can be used for constructing HLA-A*31:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:44 Protein Expression Plasmid Vector	PHLAP9257152	Plasmid vector containing HLA-A*31:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:44 protein. This plasmid can be used for constructing HLA-A*31:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:45 Protein Expression Plasmid Vector	PHLAP9257153	Plasmid vector containing HLA-A*31:45 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:45 protein. This plasmid can be used for constructing HLA-A*31:45 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:45 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:46 Protein Expression Plasmid Vector	PHLAP9257154	Plasmid vector containing HLA-A*31:46 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:46 protein. This plasmid can be used for constructing HLA-A*31:46 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:46 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:47 Protein Expression Plasmid Vector	PHLAP9257155	Plasmid vector containing HLA-A*31:47 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:47 protein. This plasmid can be used for constructing HLA-A*31:47 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:47 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:48 Protein Expression Plasmid Vector	PHLAP9257156	Plasmid vector containing HLA-A*31:48 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:48 protein. This plasmid can be used for constructing HLA-A*31:48 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:48 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:49 Protein Expression Plasmid Vector	PHLAP9257157	Plasmid vector containing HLA-A*31:49 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:49 protein. This plasmid can be used for constructing HLA-A*31:49 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:49 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:50 Protein Expression Plasmid Vector	PHLAP9257158	Plasmid vector containing HLA-A*31:50 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:50 protein. This plasmid can be used for constructing HLA-A*31:50 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:50 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:51 Protein Expression Plasmid Vector	PHLAP9257159	Plasmid vector containing HLA-A*31:51 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:51 protein. This plasmid can be used for constructing HLA-A*31:51 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:51 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:52 Protein Expression Plasmid Vector	PHLAP9257160	Plasmid vector containing HLA-A*31:52 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:52 protein. This plasmid can be used for constructing HLA-A*31:52 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:52 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:53 Protein Expression Plasmid Vector	PHLAP9257161	Plasmid vector containing HLA-A*31:53 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:53 protein. This plasmid can be used for constructing HLA-A*31:53 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:53 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:54 Protein Expression Plasmid Vector	PHLAP9257162	Plasmid vector containing HLA-A*31:54 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:54 protein. This plasmid can be used for constructing HLA-A*31:54 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:54 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:55 Protein Expression Plasmid Vector	PHLAP9257163	Plasmid vector containing HLA-A*31:55 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:55 protein. This plasmid can be used for constructing HLA-A*31:55 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:55 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:56 Protein Expression Plasmid Vector	PHLAP9257164	Plasmid vector containing HLA-A*31:56 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:56 protein. This plasmid can be used for constructing HLA-A*31:56 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:56 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:57 Protein Expression Plasmid Vector	PHLAP9257165	Plasmid vector containing HLA-A*31:57 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:57 protein. This plasmid can be used for constructing HLA-A*31:57 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:57 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:58 Protein Expression Plasmid Vector	PHLAP9257166	Plasmid vector containing HLA-A*31:58 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:58 protein. This plasmid can be used for constructing HLA-A*31:58 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:58 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:59 Protein Expression Plasmid Vector	PHLAP9257167	Plasmid vector containing HLA-A*31:59 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:59 protein. This plasmid can be used for constructing HLA-A*31:59 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:59 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:60N Protein Expression Plasmid Vector	PHLAP9257168	Plasmid vector containing HLA-A*31:60N protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:60N protein. This plasmid can be used for constructing HLA-A*31:60N overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:60N protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:61 Protein Expression Plasmid Vector	PHLAP9257169	Plasmid vector containing HLA-A*31:61 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:61 protein. This plasmid can be used for constructing HLA-A*31:61 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:61 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:62 Protein Expression Plasmid Vector	PHLAP9257170	Plasmid vector containing HLA-A*31:62 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:62 protein. This plasmid can be used for constructing HLA-A*31:62 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:62 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:63 Protein Expression Plasmid Vector	PHLAP9257171	Plasmid vector containing HLA-A*31:63 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:63 protein. This plasmid can be used for constructing HLA-A*31:63 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:63 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:64 Protein Expression Plasmid Vector	PHLAP9257172	Plasmid vector containing HLA-A*31:64 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:64 protein. This plasmid can be used for constructing HLA-A*31:64 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:64 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:65 Protein Expression Plasmid Vector	PHLAP9257173	Plasmid vector containing HLA-A*31:65 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:65 protein. This plasmid can be used for constructing HLA-A*31:65 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:65 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:66 Protein Expression Plasmid Vector	PHLAP9257174	Plasmid vector containing HLA-A*31:66 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:66 protein. This plasmid can be used for constructing HLA-A*31:66 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:66 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:67 Protein Expression Plasmid Vector	PHLAP9257175	Plasmid vector containing HLA-A*31:67 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:67 protein. This plasmid can be used for constructing HLA-A*31:67 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:67 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:68 Protein Expression Plasmid Vector	PHLAP9257176	Plasmid vector containing HLA-A*31:68 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:68 protein. This plasmid can be used for constructing HLA-A*31:68 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:68 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:69 Protein Expression Plasmid Vector	PHLAP9257177	Plasmid vector containing HLA-A*31:69 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:69 protein. This plasmid can be used for constructing HLA-A*31:69 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:69 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:70 Protein Expression Plasmid Vector	PHLAP9257178	Plasmid vector containing HLA-A*31:70 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:70 protein. This plasmid can be used for constructing HLA-A*31:70 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:70 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:71 Protein Expression Plasmid Vector	PHLAP9257179	Plasmid vector containing HLA-A*31:71 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:71 protein. This plasmid can be used for constructing HLA-A*31:71 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:71 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:72 Protein Expression Plasmid Vector	PHLAP9257180	Plasmid vector containing HLA-A*31:72 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:72 protein. This plasmid can be used for constructing HLA-A*31:72 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:72 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:73 Protein Expression Plasmid Vector	PHLAP9257181	Plasmid vector containing HLA-A*31:73 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:73 protein. This plasmid can be used for constructing HLA-A*31:73 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:73 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:74 Protein Expression Plasmid Vector	PHLAP9257182	Plasmid vector containing HLA-A*31:74 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:74 protein. This plasmid can be used for constructing HLA-A*31:74 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:74 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:75 Protein Expression Plasmid Vector	PHLAP9257183	Plasmid vector containing HLA-A*31:75 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:75 protein. This plasmid can be used for constructing HLA-A*31:75 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:75 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:76 Protein Expression Plasmid Vector	PHLAP9257184	Plasmid vector containing HLA-A*31:76 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:76 protein. This plasmid can be used for constructing HLA-A*31:76 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:76 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:77 Protein Expression Plasmid Vector	PHLAP9257185	Plasmid vector containing HLA-A*31:77 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:77 protein. This plasmid can be used for constructing HLA-A*31:77 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:77 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:78 Protein Expression Plasmid Vector	PHLAP9257186	Plasmid vector containing HLA-A*31:78 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:78 protein. This plasmid can be used for constructing HLA-A*31:78 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:78 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:79 Protein Expression Plasmid Vector	PHLAP9257187	Plasmid vector containing HLA-A*31:79 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:79 protein. This plasmid can be used for constructing HLA-A*31:79 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:79 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:80 Protein Expression Plasmid Vector	PHLAP9257188	Plasmid vector containing HLA-A*31:80 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:80 protein. This plasmid can be used for constructing HLA-A*31:80 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:80 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:81 Protein Expression Plasmid Vector	PHLAP9257189	Plasmid vector containing HLA-A*31:81 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:81 protein. This plasmid can be used for constructing HLA-A*31:81 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:81 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:82 Protein Expression Plasmid Vector	PHLAP9257190	Plasmid vector containing HLA-A*31:82 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:82 protein. This plasmid can be used for constructing HLA-A*31:82 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:82 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:83 Protein Expression Plasmid Vector	PHLAP9257191	Plasmid vector containing HLA-A*31:83 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:83 protein. This plasmid can be used for constructing HLA-A*31:83 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:83 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:84 Protein Expression Plasmid Vector	PHLAP9257192	Plasmid vector containing HLA-A*31:84 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:84 protein. This plasmid can be used for constructing HLA-A*31:84 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:84 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:85 Protein Expression Plasmid Vector	PHLAP9257193	Plasmid vector containing HLA-A*31:85 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:85 protein. This plasmid can be used for constructing HLA-A*31:85 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:85 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:86 Protein Expression Plasmid Vector	PHLAP9257194	Plasmid vector containing HLA-A*31:86 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:86 protein. This plasmid can be used for constructing HLA-A*31:86 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:86 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:87 Protein Expression Plasmid Vector	PHLAP9257195	Plasmid vector containing HLA-A*31:87 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:87 protein. This plasmid can be used for constructing HLA-A*31:87 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:87 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:88 Protein Expression Plasmid Vector	PHLAP9257196	Plasmid vector containing HLA-A*31:88 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:88 protein. This plasmid can be used for constructing HLA-A*31:88 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:88 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:89 Protein Expression Plasmid Vector	PHLAP9257197	Plasmid vector containing HLA-A*31:89 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:89 protein. This plasmid can be used for constructing HLA-A*31:89 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:89 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:90 Protein Expression Plasmid Vector	PHLAP9257198	Plasmid vector containing HLA-A*31:90 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:90 protein. This plasmid can be used for constructing HLA-A*31:90 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:90 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:91 Protein Expression Plasmid Vector	PHLAP9257199	Plasmid vector containing HLA-A*31:91 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:91 protein. This plasmid can be used for constructing HLA-A*31:91 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:91 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:92 Protein Expression Plasmid Vector	PHLAP9257200	Plasmid vector containing HLA-A*31:92 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:92 protein. This plasmid can be used for constructing HLA-A*31:92 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:92 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:93 Protein Expression Plasmid Vector	PHLAP9257201	Plasmid vector containing HLA-A*31:93 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:93 protein. This plasmid can be used for constructing HLA-A*31:93 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:93 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:94 Protein Expression Plasmid Vector	PHLAP9257202	Plasmid vector containing HLA-A*31:94 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:94 protein. This plasmid can be used for constructing HLA-A*31:94 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:94 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*31:95 Protein Expression Plasmid Vector	PHLAP9257203	Plasmid vector containing HLA-A*31:95 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:95 protein. This plasmid can be used for constructing HLA-A*31:95 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:95 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:96 Protein Expression Plasmid Vector	PHLAP9257204	Plasmid vector containing HLA-A*31:96 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:96 protein. This plasmid can be used for constructing HLA-A*31:96 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:96 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:97 Protein Expression Plasmid Vector	PHLAP9257205	Plasmid vector containing HLA-A*31:97 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:97 protein. This plasmid can be used for constructing HLA-A*31:97 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:97 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:98 Protein Expression Plasmid Vector	PHLAP9257206	Plasmid vector containing HLA-A*31:98 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:98 protein. This plasmid can be used for constructing HLA-A*31:98 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:98 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31:99 Protein Expression Plasmid Vector	PHLAP9257207	Plasmid vector containing HLA-A*31:99 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31:99 protein. This plasmid can be used for constructing HLA-A*31:99 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31:99 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*31011 Protein Expression Plasmid Vector	PHLAP9257208	Plasmid vector containing HLA-A*31011 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*31011 protein. This plasmid can be used for constructing HLA-A*31011 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*31011 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:01 Protein Expression Plasmid Vector	PHLAP9257209	Plasmid vector containing HLA-A*32:01:01:01 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:01 protein. This plasmid can be used for constructing HLA-A*32:01:01:01 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:01 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:02 Protein Expression Plasmid Vector	PHLAP9257210	Plasmid vector containing HLA-A*32:01:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:02 protein. This plasmid can be used for constructing HLA-A*32:01:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:01:03 Protein Expression Plasmid Vector	PHLAP9257211	Plasmid vector containing HLA-A*32:01:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:03 protein. This plasmid can be used for constructing HLA-A*32:01:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:04 Protein Expression Plasmid Vector	PHLAP9257212	Plasmid vector containing HLA-A*32:01:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:04 protein. This plasmid can be used for constructing HLA-A*32:01:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:05 Protein Expression Plasmid Vector	PHLAP9257213	Plasmid vector containing HLA-A*32:01:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:05 protein. This plasmid can be used for constructing HLA-A*32:01:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:06 Protein Expression Plasmid Vector	PHLAP9257214	Plasmid vector containing HLA-A*32:01:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:06 protein. This plasmid can be used for constructing HLA-A*32:01:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:07 Protein Expression Plasmid Vector	PHLAP9257215	Plasmid vector containing HLA-A*32:01:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:07 protein. This plasmid can be used for constructing HLA-A*32:01:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:08 Protein Expression Plasmid Vector	PHLAP9257216	Plasmid vector containing HLA-A*32:01:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:08 protein. This plasmid can be used for constructing HLA-A*32:01:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:09 Protein Expression Plasmid Vector	PHLAP9257217	Plasmid vector containing HLA-A*32:01:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:09 protein. This plasmid can be used for constructing HLA-A*32:01:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:01:10 Protein Expression Plasmid Vector	PHLAP9257218	Plasmid vector containing HLA-A*32:01:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:10 protein. This plasmid can be used for constructing HLA-A*32:01:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:11 Protein Expression Plasmid Vector	PHLAP9257219	Plasmid vector containing HLA-A*32:01:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:11 protein. This plasmid can be used for constructing HLA-A*32:01:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:12 Protein Expression Plasmid Vector	PHLAP9257220	Plasmid vector containing HLA-A*32:01:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:12 protein. This plasmid can be used for constructing HLA-A*32:01:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:13 Protein Expression Plasmid Vector	PHLAP9257221	Plasmid vector containing HLA-A*32:01:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:13 protein. This plasmid can be used for constructing HLA-A*32:01:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:14 Protein Expression Plasmid Vector	PHLAP9257222	Plasmid vector containing HLA-A*32:01:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:14 protein. This plasmid can be used for constructing HLA-A*32:01:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:15 Protein Expression Plasmid Vector	PHLAP9257223	Plasmid vector containing HLA-A*32:01:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:15 protein. This plasmid can be used for constructing HLA-A*32:01:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:16 Protein Expression Plasmid Vector	PHLAP9257224	Plasmid vector containing HLA-A*32:01:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:16 protein. This plasmid can be used for constructing HLA-A*32:01:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:01:17 Protein Expression Plasmid Vector	PHLAP9257225	Plasmid vector containing HLA-A*32:01:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:17 protein. This plasmid can be used for constructing HLA-A*32:01:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:18 Protein Expression Plasmid Vector	PHLAP9257226	Plasmid vector containing HLA-A*32:01:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:18 protein. This plasmid can be used for constructing HLA-A*32:01:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:19 Protein Expression Plasmid Vector	PHLAP9257227	Plasmid vector containing HLA-A*32:01:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:19 protein. This plasmid can be used for constructing HLA-A*32:01:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:20 Protein Expression Plasmid Vector	PHLAP9257228	Plasmid vector containing HLA-A*32:01:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:20 protein. This plasmid can be used for constructing HLA-A*32:01:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:21 Protein Expression Plasmid Vector	PHLAP9257229	Plasmid vector containing HLA-A*32:01:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:21 protein. This plasmid can be used for constructing HLA-A*32:01:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:22 Protein Expression Plasmid Vector	PHLAP9257230	Plasmid vector containing HLA-A*32:01:01:22 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:22 protein. This plasmid can be used for constructing HLA-A*32:01:01:22 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:22 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:23 Protein Expression Plasmid Vector	PHLAP9257231	Plasmid vector containing HLA-A*32:01:01:23 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:23 protein. This plasmid can be used for constructing HLA-A*32:01:01:23 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:23 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:01:24 Protein Expression Plasmid Vector	PHLAP9257232	Plasmid vector containing HLA-A*32:01:01:24 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:24 protein. This plasmid can be used for constructing HLA-A*32:01:01:24 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:24 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:25 Protein Expression Plasmid Vector	PHLAP9257233	Plasmid vector containing HLA-A*32:01:01:25 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:25 protein. This plasmid can be used for constructing HLA-A*32:01:01:25 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:25 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:26 Protein Expression Plasmid Vector	PHLAP9257234	Plasmid vector containing HLA-A*32:01:01:26 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:26 protein. This plasmid can be used for constructing HLA-A*32:01:01:26 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:26 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:27 Protein Expression Plasmid Vector	PHLAP9257235	Plasmid vector containing HLA-A*32:01:01:27 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:27 protein. This plasmid can be used for constructing HLA-A*32:01:01:27 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:27 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:28 Protein Expression Plasmid Vector	PHLAP9257236	Plasmid vector containing HLA-A*32:01:01:28 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:28 protein. This plasmid can be used for constructing HLA-A*32:01:01:28 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:28 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:29 Protein Expression Plasmid Vector	PHLAP9257237	Plasmid vector containing HLA-A*32:01:01:29 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:29 protein. This plasmid can be used for constructing HLA-A*32:01:01:29 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:29 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:30 Protein Expression Plasmid Vector	PHLAP9257238	Plasmid vector containing HLA-A*32:01:01:30 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:30 protein. This plasmid can be used for constructing HLA-A*32:01:01:30 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:30 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:01:31 Protein Expression Plasmid Vector	PHLAP9257239	Plasmid vector containing HLA-A*32:01:01:31 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:31 protein. This plasmid can be used for constructing HLA-A*32:01:01:31 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:31 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:32 Protein Expression Plasmid Vector	PHLAP9257240	Plasmid vector containing HLA-A*32:01:01:32 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:32 protein. This plasmid can be used for constructing HLA-A*32:01:01:32 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:32 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:33 Protein Expression Plasmid Vector	PHLAP9257241	Plasmid vector containing HLA-A*32:01:01:33 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:33 protein. This plasmid can be used for constructing HLA-A*32:01:01:33 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:33 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:34 Protein Expression Plasmid Vector	PHLAP9257242	Plasmid vector containing HLA-A*32:01:01:34 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:34 protein. This plasmid can be used for constructing HLA-A*32:01:01:34 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:34 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:35 Protein Expression Plasmid Vector	PHLAP9257243	Plasmid vector containing HLA-A*32:01:01:35 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:35 protein. This plasmid can be used for constructing HLA-A*32:01:01:35 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:35 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:36 Protein Expression Plasmid Vector	PHLAP9257244	Plasmid vector containing HLA-A*32:01:01:36 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:36 protein. This plasmid can be used for constructing HLA-A*32:01:01:36 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:36 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:37 Protein Expression Plasmid Vector	PHLAP9257245	Plasmid vector containing HLA-A*32:01:01:37 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:37 protein. This plasmid can be used for constructing HLA-A*32:01:01:37 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:37 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:01:38 Protein Expression Plasmid Vector	PHLAP9257246	Plasmid vector containing HLA-A*32:01:01:38 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:38 protein. This plasmid can be used for constructing HLA-A*32:01:01:38 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:38 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:39 Protein Expression Plasmid Vector	PHLAP9257247	Plasmid vector containing HLA-A*32:01:01:39 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:39 protein. This plasmid can be used for constructing HLA-A*32:01:01:39 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:39 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:40 Protein Expression Plasmid Vector	PHLAP9257248	Plasmid vector containing HLA-A*32:01:01:40 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:40 protein. This plasmid can be used for constructing HLA-A*32:01:01:40 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:40 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:41 Protein Expression Plasmid Vector	PHLAP9257249	Plasmid vector containing HLA-A*32:01:01:41 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:41 protein. This plasmid can be used for constructing HLA-A*32:01:01:41 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:41 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:42 Protein Expression Plasmid Vector	PHLAP9257250	Plasmid vector containing HLA-A*32:01:01:42 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:42 protein. This plasmid can be used for constructing HLA-A*32:01:01:42 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:42 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:43 Protein Expression Plasmid Vector	PHLAP9257251	Plasmid vector containing HLA-A*32:01:01:43 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:43 protein. This plasmid can be used for constructing HLA-A*32:01:01:43 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:43 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:01:44 Protein Expression Plasmid Vector	PHLAP9257252	Plasmid vector containing HLA-A*32:01:01:44 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:01:44 protein. This plasmid can be used for constructing HLA-A*32:01:01:44 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:01:44 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:02 Protein Expression Plasmid Vector	PHLAP9257253	Plasmid vector containing HLA-A*32:01:02 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:02 protein. This plasmid can be used for constructing HLA-A*32:01:02 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:02 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:03 Protein Expression Plasmid Vector	PHLAP9257254	Plasmid vector containing HLA-A*32:01:03 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:03 protein. This plasmid can be used for constructing HLA-A*32:01:03 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:03 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:04 Protein Expression Plasmid Vector	PHLAP9257255	Plasmid vector containing HLA-A*32:01:04 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:04 protein. This plasmid can be used for constructing HLA-A*32:01:04 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:04 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:05 Protein Expression Plasmid Vector	PHLAP9257256	Plasmid vector containing HLA-A*32:01:05 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:05 protein. This plasmid can be used for constructing HLA-A*32:01:05 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:05 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:06 Protein Expression Plasmid Vector	PHLAP9257257	Plasmid vector containing HLA-A*32:01:06 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:06 protein. This plasmid can be used for constructing HLA-A*32:01:06 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:06 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:07 Protein Expression Plasmid Vector	PHLAP9257258	Plasmid vector containing HLA-A*32:01:07 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:07 protein. This plasmid can be used for constructing HLA-A*32:01:07 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:07 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:08 Protein Expression Plasmid Vector	PHLAP9257259	Plasmid vector containing HLA-A*32:01:08 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:08 protein. This plasmid can be used for constructing HLA-A*32:01:08 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:08 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:09 Protein Expression Plasmid Vector	PHLAP9257260	Plasmid vector containing HLA-A*32:01:09 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:09 protein. This plasmid can be used for constructing HLA-A*32:01:09 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:09 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:10 Protein Expression Plasmid Vector	PHLAP9257261	Plasmid vector containing HLA-A*32:01:10 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:10 protein. This plasmid can be used for constructing HLA-A*32:01:10 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:10 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:11 Protein Expression Plasmid Vector	PHLAP9257262	Plasmid vector containing HLA-A*32:01:11 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:11 protein. This plasmid can be used for constructing HLA-A*32:01:11 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:11 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:12 Protein Expression Plasmid Vector	PHLAP9257263	Plasmid vector containing HLA-A*32:01:12 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:12 protein. This plasmid can be used for constructing HLA-A*32:01:12 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:12 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:13 Protein Expression Plasmid Vector	PHLAP9257264	Plasmid vector containing HLA-A*32:01:13 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:13 protein. This plasmid can be used for constructing HLA-A*32:01:13 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:13 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:14 Protein Expression Plasmid Vector	PHLAP9257265	Plasmid vector containing HLA-A*32:01:14 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:14 protein. This plasmid can be used for constructing HLA-A*32:01:14 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:14 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:15 Protein Expression Plasmid Vector	PHLAP9257266	Plasmid vector containing HLA-A*32:01:15 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:15 protein. This plasmid can be used for constructing HLA-A*32:01:15 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:15 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:16 Protein Expression Plasmid Vector	PHLAP9257267	Plasmid vector containing HLA-A*32:01:16 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:16 protein. This plasmid can be used for constructing HLA-A*32:01:16 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:16 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:17 Protein Expression Plasmid Vector	PHLAP9257268	Plasmid vector containing HLA-A*32:01:17 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:17 protein. This plasmid can be used for constructing HLA-A*32:01:17 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:17 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry

HLA-A*32:01:18 Protein Expression Plasmid Vector	PHLAP9257269	Plasmid vector containing HLA-A*32:01:18 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:18 protein. This plasmid can be used for constructing HLA-A*32:01:18 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:18 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:19 Protein Expression Plasmid Vector	PHLAP9257270	Plasmid vector containing HLA-A*32:01:19 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:19 protein. This plasmid can be used for constructing HLA-A*32:01:19 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:19 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:20 Protein Expression Plasmid Vector	PHLAP9257271	Plasmid vector containing HLA-A*32:01:20 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:20 protein. This plasmid can be used for constructing HLA-A*32:01:20 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:20 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
HLA-A*32:01:21 Protein Expression Plasmid Vector	PHLAP9257272	Plasmid vector containing HLA-A*32:01:21 protein encoding sequence under the control of an exogenous promoter and terminator for overexpression of HLA-A*32:01:21 protein. This plasmid can be used for constructing HLA-A*32:01:21 overexpressing cell lines to study antigen presentation and T-cell recognition processes. The plasmid can also be used for For producing recombinant HLA-A*32:01:21 protein for structural biology studies, such as X-ray crystallography or cryo-EM analysis.	Inquiry
